Compliance:

Water level was read March 19, 2024 for Well (MARI 32541)

OWRD

Condition of T-11299:

The water user shall maintain and operate the existing measurement device and shall make such improvements as may be required by the Department

Compliance:

Water user has used a power meter to record water use from Well (MARI 3241) since the well was installed in 1977 and was still using a power meter through 2023. The water user has now installed a new totalizing flow meter as of February 23, 2024 to record water use.

c3) Condition:

Water shall be acquired from the same aquifer (water source) as the original point of appropriation.

Compliance:

Certificate 86681 Well (MARI 17259) develops water from the alluvial aquifer through casing perforations within the depth interval of 110 to 140 feet in layers of sand and gravel.

T-11299 Well (MARI 3241) develops water from the alluvial aquifer through perforations in the casing within the depth intervals of 155 to 169 feet, 185 to 191 feet, and 200 to 219 feet in layers of sand and gravel.

It appears this well obtains water from the alluvial aquifer; therefore, this condition has been met.

CLAIM OF BENEFICIAL USE MAP

The Claim of Beneficial Use Map must be submitted with this claim. Claims submitted without the Claim of Beneficial Use map will be returned. The map shall be submitted on polyester film at a scale of 1" = 1320 feet, 1" = 400 feet, or the original full-size scale of the county assessor map for the location.

The changes that were authorized under the transfer final order must be mapped based on the developed locations; new or additional points of appropriation and place of use.

In cases where the order involved additional points of appropriation, the additional points should be mapped based on their developed locations. The original points of appropriation should be mapped based on the original right of record at the time the transfer final order was issued.

In cases where the order involved changing the place of use for a portion of a water right, the portion of the place of use being changed should be mapped based on the developed location. If the transfer also included portions of the place of use that were not being modified, but were receiving a new or additional point of appropriation, the place of use for those lands should be mapped based on the original right of record at the time the transfer final order was issued.

Provide a general description of the survey method used to prepare the map. Examples of possible methods include, but are not limited to, a traverse survey, GPS, or the use of aerial photos. If the basis of the survey is an aerial photo, provide the source, date, series and the aerial photo identification number.

**The COBU map was prepared using tax assessor's maps 06 1W 19 and 30, overlain by a 2014 aerial photo titled USDA-FSA-APFO NAIP County Mosaic and obtained on line from the Natural Resources Conservation Service, Image Metadata:
