Albert M. Petaska  
Engineer, 2/6/57

Proof of Appropriation of Water

February 26, 1964

Mr. R. L. Templin, Jr.  
County Engineer  
Department of Roads  
Room 120, Courthouse  
Grants Pass, Oregon

Dear Mr. Templin:

The plans for the Rough and Ready Log Ponds have been examined and are being returned to you for additional information on two items.

1. There appears to be an error in the capacity curve. My computations would indicate a capacity of just over 100 acre feet for all ponds.
2. Would you indicate by note or sketch, the location and type of control on valve of the 18" C.M.P. outlet pipe.

Aside from these two points, the plans appear to adequately represent the existing structures and the changes you propose.

The reservoir application is being returned so that data agreeing with your plans can be shown on the application. It appears that the original application did not make proper allowance for borrow from the interior of the log ponds. Therefore, this application should cover the increased storage. The increased storage is considered to be in all four ponds. Changes should be made in the following items of the application:

- Item 3: The capacity shown should be the difference between the existing capacity and 57.6 acre feet for which a right exists. A notation should be entered in the remarks indicating that the 57.6 acre feet is covered by certificate number 22620.
- Item 5: Should be amended to include SWA NWA to include two western ponds.
- Item 6: Location should be amended as above. Maximum height appears to be about 16 feet at northeast corner of old

Mr. E. L. Templin, Jr.

- 2 -

February 26, 1964

pond. Lengths of dike would be total lengths of old and new dikes. Top width should be minimum proposed top width. Upstream slope appears to be steeper than 5:1. Height of dam above water line should be minimum that will exist at any point where pond is contained by dike.

Item 8: Should show location and dimensions of the proposed new concrete wasteway.

Item 9: Should describe the 18" C.M.P. outlet pipe.

Item 10: The total surface area, maximum depth and mean depth should be shown here.

The application has been endorsed so that in order to retain its priority, it should be returned to this office on or before April 27, 1964.

Very truly yours,

CHRIS L. WHEELER  
State Engineer

Dear Mr. Templin:

Mr. Cushing has told me that you are the engineer preparing the plans for the Rough and Ready Lumber Company log pond near Cave Junction. I inspected the log pond on December 9, 1963, but was not able to talk with you about it before I left Grants Pass on December 10. Mr. Fetaka will probably be in Grants Pass during the latter part of next week and will be happy to meet with you to discuss any questions you may have about our requirements for these plans.

Very truly yours,

CHRIS L. WHEELER  
State Engineer

MEMORANDUM OF INSPECTION

Rough and Ready Lumber Company Log Pond

With Robert Steimer this log pond was inspected on December 9, 1963.

A fill appears to have been constructed with a bulldozer by pushing material from below the downstream toe up onto the dam. The material consists of sand, silt and boulders. There was very little seepage noted at the toe although the pond has evidently been full for some time. The maximum height of the dam is 16½ feet with a crest width of approximately six feet minimum. At the northeast corner of the pond is an 18-inch corrugated metal pipe outlet and near the northwest corner there is a wood flume overflow across the crest with a bottom width of 21 inches and a depth of 11½ inches. Along the west side the pond has been formed entirely by excavation. At the present time little damage would be done by a breach of the dike since the water would have to spread over a large area before reaching any structures.

By  
Jerry W. Eggleston,  
Engineer

March 26, 1963

Laurence A. Cushing  
Attorney at Law  
P.O. Box 234  
Cave Junction, Oregon

Dear Mr. Cushing:

This will acknowledge your letter of March 25, 1963 submitting an application in the names of Lew F. Krauss, Helen C. Krauss, Fred R. Krauss, Lewis N. Krauss and John P. Krauss, for a permit covering the construction of the Rough and Ready Mill Pond and the storage of 60 acre feet of water therein from the Illinois River for log storage, a small dam description and a print of a map.

The application has not been filed as the State Engineer is required by law to collect a \$10 examination fee before an application for permit to appropriate water for any purpose may be filed.

I am not sure that I understand the purposes for the submission of this application. Our records indicate that a right for the construction of a mill pond and the storage of 57.6 acre feet of water therein from Rough and Ready Creek was established in the name of Rough and Ready Lumber Co. and evidenced by Water Right Certificate numbered 22620. It appears to be the exact same log pond as that described in your application. Another certificate, number 22621, evidences a right to appropriate 0.5 cubic foot of water per second from Rough and Ready Creek to maintain the log pond evidenced by certificate numbered 22620. The point at which the water is diverted from the creek agrees with the information shown in Item 6 of your application.

Laurence A. Cushing

2

March 26, 1963

If the new application is for permit to construct additional log ponds, this should be clearly stated and the information submitted limited to the new construction. The information in Item 6 should specify the location of the structure which forms the impoundment or reservoir and should not indicate the location of a diversion from the stream for the filling of the reservoir unless that point represents the axis of the dam forming the storage reservoir.

We are returning the application and submitted data.

Very truly yours,

CHRIS L. WHEELER  
State Engineer

MAR 26 1963  
STATE ENGINEER  
SALEM, OREGON

TELEPHONE 6711

State of Oregon  
State Engineer Office  
Salem, Oregon

Dear Sir:

We are enclosing herewith the application for a reservoir permit, and it has been very difficult for us to give the exact information desired, because there is both a small diversion dam in Rough & Ready Creek, but the main reservoir which we feel is referred to most of the time is the log pond itself.

Attached to the application is a thermofax copy showing the approximate location of the new log pond, and it is important to note that this is merely one of a system of log storage ponds, and that the water flows from one pond into another. Therefore, the information concerning spillways, etc., is somewhat simplified in that there is merely an opening so that the water can flow freely from one pond to another.

Please advise if there is further information desired or needed before this permit can be issued.

Very truly yours,

*Laurence A. Cushing*

April 9, 1957

Rough and Ready Lumber Co.  
By Lew F. Krauss  
Box 222  
Cave Junction, Oregon

Gentlemen:

This will acknowledge receipt of the signed final proof forms in connection with your Permit Nos. R-1750 and 23609 and \$1 certificate recording fee for which our receipt No. 11203 is enclosed.

Please be advised that there is a \$1 certificate recording fee for each permit, and if you will now submit the recording fee for Permit No. 23609 further action will be taken toward the issuance of the desired certificates.

Very truly yours,

LEWIS A. STANLEY  
State Engineer

R-29970

March 26, 1957

Rough & Ready Lumber Co.  
By Lew F. Krauss  
Box 222  
Cave Junction, Oregon

Gentlemen: We are enclosing herewith for completion, final proof in connection with the incomplete water right represented by your Permit No. 23609 granting a right to the use of 0.5 cfs of the waters of Rough & Ready mill pond and Rough & Ready Creek, and Permit No. R-1750 for 57.6 a.f. from Rough & Ready Creek for storage of water and mill pond.

The data contained in the proof, which is based on an inspection ~~and survey~~ of your project made by a representative of this department, defines the extent to which your water right has been completed within the terms of your Permit. The proof should be dated and signed by you on the second sheet under the Affidavit of Appropriator and returned to this office.

Upon receipt of the proof, properly executed and accompanied by the statutory fee of \$1, a Certificate of Water Right will be issued confirming the rights thereunder and, after being recorded in the records of Josephine County, will be forwarded to you.

In the interest of economy and due to the fact that your completed project was examined by a representative of this department, it is not necessary that your signature be made before a Notary Public, nor that the signatures of witnesses be affixed to the proof.

Yours very truly,

*Lewis A. Stanley*

Attention: Law F. Krauss, Partner

Gentlemen:

Our field crews normally make final proof surveys during the summer months and prepare the maps and reports during the winter, however since your permits describe only a log pond we will make an attempt to have an inspection made by the engineer in charge of hydraulic structures. He tentatively plans on being in your area during the latter part of this month or the first part of February and he will contact someone at the mill office prior to making the inspection.

Very truly yours,

LEWIS A. STANLEY  
State Engineer

October 1, 1956

• Rough & Ready Lumber Co.  
Box 222  
Cave Junction, Oregon

Gentlemen:

This will acknowledge receipt of your notice to the effect that complete application of water has been made under Permit No. 23609 & R-1750.

Pursuant to your report and in line with the general practice of this office, a survey will be made at a later date. After this survey, proof may be made and certificate issued covering the actual use of water as found by the engineer. In the case of irrigation, any lands described in the permit that have not been irrigated will be automatically eliminated from the water right.

In the meantime, the permit which you hold will be valid evidence of the water right in question so long as you continue to use the water.

Very truly yours,

*Lewis A. Stanley*

Rough & Ready Lumber Co.

Dear Mr. Stanley:

In regard to the application for permit to appropriate water and application for permit to construct reservoir in the name of Rough & Ready Lbr. Co., by Lew F. Krauss, mailed to you on May 5, we have not received reply.

Mr. Krauss phoned me that the State Engineer had made inspection of the proposed reservoir and recommended that maps and drawings be made to accompany the reservoir application. Mr. Krauss requested that I make these maps. I will be pleased if you will return the application forms to me so that I may make some corrections.
