Application No. 73401

NOTICE OF BEGINNING OF CONSTRUCTION

I, PEARL ENTERPRISES, INC., the holder of Permit No. 52164
to appropriate the public waters of the state of Oregon, began the actual construction of the works described
therein on the 1st day of October, 1996

Remarks: 15HP Pump w/ 6" PVC line from 7 mile creek to place of
use - began irrigation on 4 acres of new cranberries
The appropriator must state the manner of beginning of construction, the amount of work completed and the type of equipment
acquired for the water system up to the date of this statement, and any additional information which shows a substantial beginning of construction

authorized by your permit.

IN WITNESS WHEREOF, I have hereunto set my hand this 18th day of November, 1997
Michael W. Pearl HC 84 Box ST 76 MYRTLE POINT, ORE. 97458
(Signature of Applicant) (Address)

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when construction work is begun.

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

PEART ENTERPRISES, INC.

HC 84 ST 76

MYRTLE POINT, OREGON 97458

(541) 572-5030

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: S-73401

SOURCE OF WATER: SEVENMILE CREEK AND THREE RESERVOIRS, CONSTRUCTED UNDER APPLICATION R-73400; PERMIT R-11771, TRIBUTARIES OF COQUILLE RIVER

PURPOSE OR USE: CRANBERRY USE ON 18.05 ACRES, BEING 8.5 ACRES PRIMARY FROM LIVE FLOW AND 9.55 ACRES SUPPLEMENTAL FROM RESERVOIRS ONLY

RATE OF USE: 1.0 CUBIC FOOT PER SECOND FROM SEVENMILE CREEK; AND 19.0 ACRE-FEET FROM WATER LEGALLY STORED

PERIOD OF ALLOWED USE: JANUARY 1 THROUGH MARCH 31 FROM LIVE FLOW; YEAR ROUND FROM WATER LEGALLY STORED

DATE OF PRIORITY: MAY 17, 1993

POINT OF DIVERSION LOCATION: SW 1/4 SE 1/4, SECTION 34, T27S, R14W, W.M.; NW 1/4 NE 1/4, SECTION 3, T28S, R14W, W.M.; RESERVOIR 1 - 2800 FEET NORTH AND 3750 FEET EAST; RESERVOIR 2 - 2350 FEET NORTH AND 3545 FEET EAST; RESERVOIR 3 - 1790 FEET NORTH AND 3650 FEET EAST; SEVENMILE CREEK - 2990 FEET NORTH AND 3995 FEET EAST, ALL FROM THE W 1/4 CORNER OF SECTION 3

The amount of water diverted for CRANBERRY OPERATIONS, together with amounts secured under any other rights existing for the same lands, is limited as follows: For temperature control, 0.15 cubic foot per second per acre; For flood harvesting or pest control, 0.05 cubic foot per second per acre; For irrigation of cranberries, ONE-FORTIETH of one cubic foot per second and 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year. For the irrigation of any other crop, ONE-EIGHTIETH of one cubic foot per second and 2.5 acre-feet per acre for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

	<u>PRIMARY</u>	<u>SUPPLEMENTAL</u>
NW 1/4 NE 1/4	8.5 ACRES	9.55 ACRES
SECTION 3		
TOWNSHIP 28 SOUTH, RANGE 14 WEST, W.M.		

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

Only at point of diversion on Sevenmile Creek the permittee shall install, maintain, and operate fish screening and by-pass devices as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the proposed diversion. The required screen is to be in place and functional prior to diversion of any water. The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream.

Before water use may begin under this permit, a totalizing flow meter must be installed at each diversion point. The totalizing flow meter must be installed and maintained as identified in OAR 690-507-645.

In the event of a request for a change in point of appropriation, an additional point of appropriation or alteration of the appropriation facility associated with this authorized diversion, the quantity of water allowed herein, together with any other right, shall not exceed the capacity of the facility at the time of perfection of this right.

This right is limited to any deficiency in the available supply of any prior right existing for the same land.

STANDARD CONDITIONS

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction work shall begin within one year from permit issuance and shall be completed on or before October 1, 1998. Complete application of the water to the use shall be made on or before October 1, 1999.

Issued June 19, 1996

for Martha O. Pagel, Director
Water Resources Department

Oregon Water Resources Department
Water Rights Division

Water Rights Application
Number 73401

Final Order
Extension of Time for Permit Number 52164

Application History

On December 9, 1998, Peart Enterprises Inc. submitted an application to the Department for an extension of time for permit number 52164. The Department issued Permit number 52164 on June 19, 1996. The permit called for completion of construction of the water development project by October 1, 1998 and complete application of water to the full beneficial use by October 1, 1999. In accordance with OAR 690-320-0010(8), on April 27, 1999, the Department issued a Proposed Final Order proposing to extend the time to complete development of the water development project to October 1, 2001, and the time to fully apply water to beneficial use to October 1, 2002. The protest period closed June 11, 1999. No protest was filed.

The applicant has demonstrated good cause for the permit extension pursuant to ORS 537.230, 537.248, 537.630 and 539.010(5).

Order

The extension of time for Application 73401, Permit Number 52164, therefore, is approved. The deadline for completing construction is extended to October 1, 2001. The deadline for applying water to full beneficial use is extended to October 1, 2002.

DATED August 13, 1999

Martha O. Pagel, Director

Appeal Rights

Under the provisions of ORS 536.075, the applicant may appeal this order by filing a petition for review in the Circuit Court for Marion County or the circuit court for the county in which the applicant resides or has a principal business office. The petition for review must be filed within 60 days after the date this order is served. ORS 183.484

**Oregon Water Resources Department
Water Rights Division**

Water Right Permit Extension Application
for Permit Number 52164

Water Right Application Number 73401

Proposed Final Order

This Proposed Final Order applies only to permit number 52164.

Summary of Recommendation

The Department proposes to:

grant the extension for complete construction of the water system from October 1, 1998 to October 1, 2001, and

grant the extension for complete application of water from October 1, 1999 to October 1, 2002.

Application History

Permit no. 52164 was granted by the Water Resources Department on June 19, 1996. The permit authorizes use of 1.0 CFS and 19.0 AF of water from Sevenmile Creek and Three Reservoirs for Cranberry Use on 18.05 Acres in the Coquille River basin. It specified that construction must be completed by October 1, 1998, and water applied to full beneficial use by October 1, 1999. A copy of permit no. 52164 is attached.

On December 9, 1998, the Department received an application from Peart Enterprises Inc. for an extension of time to complete construction and to apply water to full beneficial use. The applicant has requested until October 1, 2001 to complete construction of the water system and until October 1, 2002 to apply water to full beneficial use. This is the first permit extension request.

Findings of Fact

ORS 537.230(2) and 537.630 (1) allows the Department to grant an extension of time to perfect a water right for good cause. In evaluating good cause, the Department has considered the written record in the permit application file in relation to the requirements of ORS 537.230(2), ORS 537.630 (1) and ORS 539.010(5) and makes the following findings.

1. The applicant is legally entitled to apply for an extension on this permit.
2. The applicant has submitted a completed permit extension form and the required fee.
3. The water project development made to date has been accomplished in accordance with the terms and conditions contained in the permit.
4. Progress in perfecting the permit was slowed by: abnormally wet weather; renovation to existing fields was necessary, which was unplanned; material for the new bogs(sand and clay) had to be brought in from off site, which was time consuming and costly; and income from timber sales was not as high as planned, making the money projected to be available for the project unavailable.
5. The applicant has pursued perfection of the right in good faith and with reasonable diligence.
 - a) Work on the water development project completed to date includes reconstruction of dikes on existing bogs, construction of 4.5 acres of new cranberry fields, storage of 60-70% of the water necessary for use.
 - b) The applicant has invested approximately \$ 110,000 of an estimated total water system project cost of \$ 260,000.
 - c) The work to be completed consists of the remaining construction of the reservoirs and delivery system and complete application of water.
6. Based on the written record, the Department finds there is good cause to approve the extension request. The applicant has pursued perfection of the right in good faith and with reasonable diligence. Perfection of the permit has been delayed by the size and scope of the project, weather, economic reasons, and the types of soils necessary to construct the bogs and reservoirs.
7. Due to the reasons outlined above in item 4 and the water development progress to date, the Department finds that the length of time requested for completion of construction should be extended to October 1, 2001 and the length of time requested for completion of the application of water should be extended to October 1, 2002 as requested by the applicant.

Conclusions of Law

1. The applicant is entitled to apply for an extension of time to complete construction and/or completely apply water to the full beneficial use pursuant to ORS 537.230, and ORS 537.630.
2. The applicant has submitted an extension application form and the fee required by ORS 536.050(1)(L).
3. The applicant has pursued perfection of the right in good faith and prosecuted construction with reasonable diligence.
4. The applicant has shown good cause for the untimely completion of the water development project and complete application of water to full beneficial use pursuant to ORS 537.230(2), and ORS 537.630 (1).
5. The permit extension should be approved until October 1, 2001 to complete construction and until October 1, 2002 to complete the application of water.

Recommendation

The Department proposes to issue an order to:

extend the permit time to complete construction from October 1, 1998 to October 1, 2001 and

extend the permit time to complete application of water from October 1, 1999 to October 1, 2002.

DATED: April 27, 1999

Dwight French

Water Rights Section Manager

Protest Rights and Comments

1. Under the provisions of OAR 690-320-0010(8) you have the right to protest this proposed final order. Your protest must be in writing and must include the following:
 - a) Your name, address and telephone number;
 - b) Your interest in this proposed final order, and if you claim to represent the public interest, a precise statement of the public interest represented;
 - c) A detailed description of how the action in the proposed final order would impair or be detrimental to your interest;
 - d) A detailed description of how the proposed final order is in error or deficient and how to correct the alleged error or deficiency;
 - e) Any citation of legal authority supporting your protest, if known; and
 - f) If you are not the applicant, the \$25 protest fee required under ORS 536.050 (1)(j).
2. Each person submitting a protest shall raise all reasonably ascertainable issues and all reasonably available arguments supporting the person's position by the close of the comment period.
3. The Water Resources Department must receive written protests or written comments no later than **June 11, 1999**.
4. After the close of the comment and protest period, the Director will either issue a final order, or schedule a contested case hearing if the Director finds there are significant disputes related to the use of water.

This document was prepared by Russell W. Klassen. If you have any questions about any of the statements contained in this document I am most likely the best person to answer your questions. You can reach me toll free within Oregon at 1-800-624-3199 extension 272. Outside of Oregon you can dial 1-503-378-8455.

If you have questions about how to file a protest or if you have previously filed a protest and want to know the status, please contact Adam Sussman. His extension number is 262.

If you have other questions about the Department or any of its programs please contact our Water Rights Information Group at extension 499.

STATE OF OREGON

COUNTY OF COOS

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

PEART ENTERPRISES, INC.

HC 84 ST 76

MYRTLE POINT, OREGON 97458

(541) 572-5030

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: S-73401

SOURCE OF WATER: SEVENMILE CREEK AND THREE RESERVOIRS, CONSTRUCTED UNDER APPLICATION R-73400, PERMIT R-11771, TRIBUTARIES OF COQUILLE RIVER

PURPOSE OR USE: CRANBERRY USE ON 18.05 ACRES, BEING 8.5 ACRES PRIMARY FROM LIVE FLOW AND 9.55 ACRES SUPPLEMENTAL FROM RESERVOIRS ONLY

RATE OF USE: 1.0 CUBIC FOOT PER SECOND FROM SEVENMILE CREEK; AND 19.0 ACRE-FEET FROM WATER LEGALLY STORED

PERIOD OF ALLOWED USE: JANUARY 1 THROUGH MARCH 31 FROM LIVE FLOW; YEAR ROUND FROM WATER LEGALLY STORED

DATE OF PRIORITY: MAY 17, 1993

POINT OF DIVERSION LOCATION: SW 1/4 SE 1/4, SECTION 34, T27S, R14W, W.M.; NW 1/4 NE 1/4, SECTION 3, T28S, R14W, W.M.; RESERVOIR 1 - 2800 FEET NORTH AND 3750 FEET EAST; RESERVOIR 2 - 2350 FEET NORTH AND 3545 FEET EAST; RESERVOIR 3 - 1790 FEET NORTH AND 3650 FEET EAST; SEVENMILE CREEK - 2990 FEET NORTH AND 3995 FEET EAST, ALL FROM THE W 1/4 CORNER OF SECTION 3

The amount of water diverted for CRANBERRY OPERATIONS, together with amounts secured under any other rights existing for the same lands, is limited as follows: For temperature control, 0.15 cubic foot per second per acre; For flood harvesting or pest control, 0.05 cubic foot per second per acre; For irrigation of cranberries, ONE-FORTIETH of one cubic foot per second and 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year. WATER RESOURCES DEPT.
SALEM, OREGON

APPLICATION FOR EXTENSION OF TIME
TO THE WATER RESOURCES DIRECTOR OF OREGON

I, Pearl Enterprises, Inc.

NAME				
<u>Route 2, Box 1900</u>	<u>Bandon</u>	<u>Oregon</u>	<u>97411</u>	<u>(541) 347-1345</u>
ADDRESS	CITY	STATE	ZIP	PHONE

record owner of application No. S-73401 permit No. S-52164, do hereby request that the time in which to:

☐ complete the construction of works and/or purchase and installation of the equipment necessary to the use of water, which time now expires on October 1, 1998, be extended to October 1, 2001, and/or the time in which to

☐ accomplish beneficial use of water to the full extent under the terms of the permit, which time, now expires on October 1, 1999, be extended to October 1, 2002.

The extension of time requested should be long enough to finish the project. Should this request be approved, it will be the Department's expectation that you will complete your project within the new time period allowed. Future extensions may not be granted.

1-Did water system construction/well drilling begin within the time specified in the permit [yes/no]? Yes

2-Have you put any water to use under this permit [yes/no]? Yes
If yes, has that use been made consistent with the terms and conditions of the permit [yes/no]? Yes If no, please explain.
Which terms and/or conditions have not been completely fulfilled at this time. _____

3-I have accomplished the following described works, purchases and installation of equipment necessary to the use of water under said permit.

(a) within past year Rebuilt dikes on existing bogs, renovated 1.75 acres on supplemental acreage, imported sand for construction and continued construction on dam. (had to import additional clay).

(b) prior to this past year Built and planted 4.5 acres of new cranberry fields, constructed one well and sumpwell and initiated reservoir construction (we are storing 60-70% of what we need).

© and have accomplished beneficial use of water to the extent of
(amount of water used or acres irrigated) _____

Irrigated supplemental acreage (9.55 acres) new acreage (4.5 acres).

4-Cost of project to date \$110,000. Projected cost for
completion of project \$100,000 - \$150,000.

5-Have there been any unforeseen events which delayed development
of water system? We have had limited construction seasons the last two years because
of weather. We had to do unplanned renovation to existing fields. We had to
import material for construction and the timber price dropped.

6-Have there been any significant government requirements that
have delayed the completion of construction or application of
water ? [please explain] No

7-What reasons was the project not completed within permit time
limits ? See No. 5. Mainly because of weather conditions, importing materials
(adds to cost and time of construction) and we did not get income planned from
timber sales.

8-Has there been any change in the demand for water or power
since permit was issued? (please explain) No

9-Has there been any change in the market for water or power
since the permit was issued? (please explain) No

RECEIVED

DEC 09 1998

WATER RESOURCES DEPT.
SALEM, OREGON

10-Will the income or use from this project provide reasonable returns against the investment in this project? (please explain)

Yes - when complete the farm will support two families. Current acreage

not sufficient to support two families. However, at full development, our acreage will support two families.

11-If the extension request is denied, is the current level of water use economically feasible? (please explain)

No. The current level will support one family but not two.

12-Is there an alternative source of water available [yes/no please explain]? No. We are using ground water and reservoirs for

the use. There are no alternatives.

13-Has the use of water under the permit caused an adverse impact on the surface/groundwater resource in the area ? (please explain)

Not in our opinion. Our seasonal creek is dry in the summer and the reservoir fills during the first good rainfall event. The ground water development has not shown any impact on the surface water in this area.

All items must be completed or the application will be returned. Please feel free to provide the Department with any additional information you might have that would aid us in making our decision. Please use an additional sheet of paper, if needed.

I am the permittee or have authorization from the permittee to apply for an extension of time under this permit. I understand that false or misleading statements in this extension application are grounds for the Department to suspend processing of the request and/or reason to deny the extension.

Water Rights Division

Water Rights Application
Number S-73401

Final Order

Application History

On May 17, 1993, PEART ENTERPRISES, INC. submitted an application to the Department for a water use permit. The Department issued a Proposed Final Order on November 7, 1995. The protest period closed December 22, 1995, and no protest was filed.

An interagency team reviewed this proposed use for potential adverse impacts on declining fish populations. This team consisted of representatives from the Oregon Departments of Water Resources (WRD), Environmental Quality, Fish and Wildlife (DFW), and Agriculture. WRD and DFW representatives included both technical and field staff. The interagency team recommended that additional limitations or conditions of use be imposed on this application as follows:

Before water use may begin under this permit, a totalizing flow meter must be installed at each diversion point. The totalizing flow meter must be installed and maintained as identified in OAR 690-507-645.

The proposed use would not impair or be detrimental to the public interest, but the Department's continuing evaluation reveals that the Proposed Final Order requires modification to include the condition(s) described above.

Order

Application S-73401 therefore is approved with the above modifications to the Proposed Final Order, and Permit Number 52164 is issued as limited by the conditions set forth in the permit.

DATED June 19, 1996

for Martha O. Pagel
Director

Hearing and Appeal Rights

Under the provisions of ORS 537.170, the applicant may request a contested case hearing by submitting the information required for a protest under ORS 527.153(6) to the Department within 14 days after this order is issued. If a contested case hearing is requested, the Department must schedule one. In the contested case hearing, however, only those issues based on the above modifications to the proposed final order may be addressed.

Under the provisions of ORS 183.484, the applicant or any person having standing may appeal this order by filing a petition for review in the Circuit Court for Marion County or the circuit court for the county in which the applicant resides or has a principal business office. The petition for review must be filed within 60 days after the date this order is served.

RE: Application File # R-73400 AND S-73401

Dear Applicant,

The Water Resources Department is in the process of issuing a permit for water use. However, the application map does not meet the standards of OAR 690-310-050.

- ▶ The map must show the location of the dams for each reservoir and the point of diversion referenced to a recognized public land survey corner. The map that accompanied the applications did not indicate a recognized public land survey corner. The locations may be shown by distance and bearing or by coordinates (distance north or south and distance east or west from the corner).

In order to expedite the processing of your application, we request that you submit these items by **JUNE 7, 1996**.

Should you have any questions regarding your application or the required materials listed above, please call me personally at 1-800-624-3199 extension 458.

Sincerely,

Jerry Gainey

Attention: Steve Brown, Manager
Water Rights Division

Reference: File No. S 73401
Objection to the Technical Review

RECEIVED
MAR - 9 1994
WATER RESOURCES DEPT.
SALEM, OREGON

Dear Mr. Brown:

In response to the Satisfactory report of Technical Review for Water Use Permit (s) applicable to application S 73401, I would like to object to the Technical Review in accordance with OAR 690-11-170 for the following reasons:

1. I am within the Bandon Cranberry Growing area, as zoned by the Coos County Comprehensive Plan. The growing of cranberries is valued as one of the highest priorities for this area and in the public interest. The public interest discussion may be found in the Oregon Farmer's Cranberry Alliance's objection to the instream water right filing on Seven Mile Creek. I incorporate by this reference the objections filed by the Oregon Cranberry Farmers Alliance relative to the instream application on Seven Mile Creek.
2. I am willing to accept a lesser amount of water from Seven Mile Creek to raise cranberries. There may be water available during certain months on Seven Mile Creek which I could use for irrigation. I would like to evaluate the water availability information used for the technical review to determine if there are opportunities for extended use during the summer months.
3. The permit conditions for application 73401 should not be finalized until the final determination is made on the instream water right application now pending for Seven Mile Creek.

I desire to participate in alternate dispute resolution (OAR 690-11-180) with the Department to determine if water is available for my use.

Sincerely,

Michael Peart

WATER RESOURCES DEPARTMENT
WATER RIGHTS DIVISION

Before the Director Water Resources Department

In the matter of	:	)	PROPOSED
Surface Water Application	:	)	FINAL
S-73401 submitted by	:	)	ORDER
PEART ENTERPRISES, INC.	:	)	

FINDINGS OF FACT

Water Use Request

1. PEART ENTERPRISES, INC. requested use of 1.0 Cubic Foot Per Second from SEVENMILE CREEK, for CRANBERRY OPERATIONS on 8.5 ACRES, and 19.0 ACRE-FEET FROM STORED WATER UNDER APPLICATION R-73400, being 5.0 ACRE-FEET from RESERVOIR 1, 5.0 ACRE-FEET from RESERVOIR 2, and 9.0 ACRE-FEET from RESERVOIR 3, for SUPPLEMENTAL CRANBERRY OPERATIONS ON 9.55 ACRES. Sevenmile Creek and stored water are tributaries of the Coquille River at tidewater within the South Coast Basin.
2. The area of proposed use is in Coos County within SECTION 3, TOWNSHIP 28 SOUTH, RANGE 14 WEST, W.M.
3. The water delivery system is described by the applicant as follows: An electric pump from each source pumps water through plastic pipe to sprinklers.
4. The request was made in Application S-73401 which was received by the Water Resources Department on May 17, 1993.

Affected Waters

1. SEVENMILE CREEK AND THREE RESERVOIRS, TRIBUTARIES OF COQUILLE RIVER AT TIDEWATER, are not within or above a State Scenic Waterway.
2. ODFW has advised that one or more species of game fish are present at the described point of diversion only on Sevenmile Creek Point of Diversion.
3. There are senior water rights on SEVENMILE CREEK, TRIBUTARY OF COQUILLE RIVER AT TIDEWATER, and on downstream waters.

Department Actions

1. The application was determined to be complete and not defective.

2. A technical review of the application was completed and a report of the results of that review was mailed to the applicant on December 30, 1993.
3. The technical review determined:
 - a. CRANBERRY USE ON 18.0 ACRES, BEING 8.5 ACRES PRIMARY AND 9.55 ACRES SUPPLEMENTAL is allowed under the South Coast Basin Program.
 - b. The use is not prohibited by Statute.
 - c. Water is available for further appropriation (at an 80 percent exceedance probability) for the period **year round from stored water only under application R-73400 and limited to the period January 1 through March 31 for live flow.**
 - d. The use would not injure existing water rights.
4. The report of technical review listed these determinations and disclosed a number of conditions and restrictions that would likely be included in the permit if issued. These conditions and restrictions are listed in the attached draft permit.

Assessment

1. In proceeding with evaluation of Application S-73401, the following criteria were found to be relevant by the Department.
 - a. The South Coast Basin Program (OAR Chapter 690, Division 517)
 - b. The Coos County Comprehensive Plan and Zoning Ordinance
 - c. The amount of water available in SEVENMILE CREEK AND THREE RESERVOIRS
 - d. The established rate and duty for the proposed use
 - e. Pending, senior applications and existing water rights of record
 - f. Comments received

CONCLUSIONS OF LAW

1. Based upon continued evaluation, the Department finds the determinations of the technical review remain valid.

2. The Department has further determined that, to protect the resource, an additional condition on the proposed water use is necessary: The condition, as further described on the attached draft permit, would require fish screening.
3. Period of allowed use: Live Flow - January 1 through March 31 of each year; Stored water only is available year round.
4. The Department finds that no more than 1.0 cfs from live flow and 19.0 acre-feet from stored water would be necessary for the proposed use. The amount of water requested, 1.0 CUBIC FOOT PER SECOND FROM SEVENMILE CREEK, 5.0 ACRE-FEET FROM RESERVOIR 1, 5.0 ACRE-FEET FROM RESERVOIR 2, AND 9.0 ACRE-FEET FROM RESERVOIR 3, is allowable.
5. Coos County Planning Department staff completed the Department's Land Use Information Form and indicated thereon that the land use associated with the proposed use is compatible with the Coos County Comprehensive Land Use Plan.
6. The proposed use would not conflict with existing water rights, and, if exercised in accordance with law, rule, and the proposed conditions would not result in injury to existing water users.
7. The proposed use complies with all other rules of the Commission.
8. Pursuant to Chapter 416, Oregon laws, 1995, enacted by the 68th Oregon Legislative Assembly, and given the findings listed above, a rebuttable presumption has been established that the use will not impair or be detrimental to the public interest if exercised in the manner described in the attached draft permit.
9. Therefore, the proposed use, as conditioned, and described in the attached draft permit, would not impair or be detrimental to the public interest.

PROPOSED ORDER

IT IS PROPOSED that Application S-73401 in the name of PEART ENTERPRISES, INC. be approved for CRANBERRY USE ON 18.0 ACRES, BEING 8.5 ACRES PRIMARY AND 9.55 ACRES SUPPLEMENTAL, as provided in the attached draft permit.

DATED November 7, 1995

Steven P. Applegate
Administrator

Water Rights and Adjudications Division

NOTICE:

This Proposed Final Order is issued by the Department pursuant to Chapter 416, Oregon laws, 1995, enacted by the 68th Oregon Legislative Assembly.

To seek changes in this proposed final order, you must file a formal protest.

Formal protests to this proposed final order must be made in proper form and accompanied by the statutory fee in the amount of \$200. Note: The applicant is not subject to this fee.

For other than the applicant, if you agree with the findings in this proposed order, but wish to maintain your right to participate in any contested case proceeding or judicial review, you must file a written request for standing. Requests for standing in proceedings relating to this application must be made in the proper form and accompanied by the statutory fee in the amount of \$50.

Protests or requests for standing, along with the appropriate fees must be received by the Water Resources Department in Salem, Oregon by 5:00 pm on December 22, 1995.

Only the applicant and any persons who timely file a protest or request for standing may participate in further proceedings before the Department or the Commission which deal with this Application.

DRAFT
STATE OF OREGON
COUNTY OF Coos

DRAFT PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS DRAFT PERMIT IS HEREBY ISSUED TO

PEART ENTERPRISES, INC.

HC 84 ST 76

MYRTLE POINT, OREGON 97458

(503) 572-5030

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: S-73401

SOURCE OF WATER: SEVENMILE CREEK AND THREE RESERVOIRS UNDER APPLICATION R-73400, TRIBUTARIES OF COQUILLE RIVER AT TIDEWATER

PURPOSE OR USE: CRANBERRY USE ON 18.0 ACRES, BEING 8.5 ACRES PRIMARY FROM LIVE FLOW AND 9.55 ACRES SUPPLEMENTAL FROM RESERVOIRS ONLY

RATE OF USE: 1.0 CFS FROM SEVENMILE CREEK; 19.0 ACRE-FEET FROM STORED WATER UNDER APPLICATION R-73400

PERIOD OF ALLOWED USE: LIVE FLOW - JANUARY 1 THROUGH MARCH 31 OF EACH YEAR; STORED WATER IS ALLOWABLE YEAR ROUND

DATE OF PRIORITY: May 17, 1993

POINT OF DIVERSION LOCATION: RESERVOIR 1 - SW 1/4 SE 1/4, SECTION 34, T 27 S, R 14 W, W.M.; 2800 FEET NORTH & 3750 FEET EAST FROM SW 1/4 SE 1/4 CORNER, SECTION 34, T 27 S, R 14 W

RESERVOIR 2 - NW 1/4 NE 1/4, SECTION 3, T 28 S, R 14 W, W.M.; 2350 FEET NORTH & 3545 FEET EAST FROM W 1/4 CORNER, SECTION 3

RESERVOIR 3 - NW 1/4 NE 1/4, SECTION 3, T 28 S, R 14 W, W.M.; 1790 FEET NORTH & 3650 FEET EAST FROM W 1/4 CORNER, SECTION 3

SEVENMILE CREEK - SW 1/4 SE 1/4, SECTION 34, T 27 S, R 14 W, W.M.; 2990 FEET NORTH & 3995 FEET EAST FROM SW 1/4 SE 1/4 CORNER, SECTION 34, T 27 S, R 14 W

The amount of water diverted for CRANBERRY OPERATIONS, together with amounts secured under any other rights existing for the same lands, is limited as follows: For temperature control, 0.15 cubic foot per second per acre; For flood harvesting or pest control, 0.05 cubic foot per second per acre; For irrigation of cranberries, ONE-FORTIETH of one cubic foot per second and 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year. For the irrigation of any other crop, ONE-EIGHTIETH of one cubic foot per second and 2.5 acre-feet per acre for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

NW 1/4 NE 1/4	CRANBERRY USE - 8.5 ACRES
NW 1/4 NE 1/4	SUPPLEMENTAL CRANBERRY USE - 9.55 ACRES

SECTION 3

TOWNSHIP 28 SOUTH, RANGE 14 WEST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

Only at point of diversion on Sevenmile Creek the permittee shall install, maintain, and operate fish screening and by-pass devices as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the proposed diversion. The required screen is to be in place and functional prior to diversion of any water. The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream.

In the event of a request for a change in point of appropriation, an additional point of appropriation or alteration of the appropriation facility associated with this authorized diversion, the quantity of water allowed herein, together with any other right, shall not exceed the capacity of the facility at the time of perfection of this right.

This right is limited to any deficiency in the available supply of any prior right existing for the same land.

STANDARD CONDITIONS

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Application No. 73401

State of Oregon
WATER RESOURCES DEPARTMENT

Application for a Permit to Appropriate Surface Water

Applicant(s) Pearl Enterprises, Inc.
(Please print or type - use dark ink)

Mailing Address: HC84 Box ST 76
Myrtle Point, Oregon 97458 (503) 572-5030
City State Zip Daytime Phone No.

I (We) make application for a permit to appropriate the following described waters of the State of Oregon:

1. **SOURCE OF WATER** for the proposed use: Sevenmile Creek and 3 reservoirs ,
a tributary of Coquille River @ Tidewater .
2. **TOTAL AMOUNT OF WATER** to be applied to beneficial use: 1.00 cubic feet per second, OR 484 gallons per minute. If water is to be used from more than one source, give the quantity of water from each: and 19 acre feet
Reservoir #1 - 5 a.f.; Reservoir #2 - 5 a.f.; Reservoir #3 - 9 a.f.
3. **INTENDED USE(s) OF WATER:** Agricultural Use (raising of cranberries)

If for more than one use, give the quantity of water from each source for each use; _____

Primary 1.00 c.f.s./Sevenmile Creek and Supplemental 19 a.f. from reservoirs

If for **DOMESTIC** use, state the number of households to be supplied; _____

If for **MUNICIPAL OR QUASI-MUNICIPAL** use, state the present population to be served, and an estimate of the future requirements; (List population projections, water needs, anticipated areas to be provided water.)

If for **MINING** use, state the nature (gold, silver, etc.) of the mines to be served; _____

If for **IRRIGATION**, or other land area use, state the **TOTAL** number of acres to be developed under each use;

Irrigation _____

Other (describe) _____

Agricultural Use 8.5 acres Primary and supplemental from reservoirs

Agricultural Use 9.55 acres Supplemental from reservoirs

4. **DESCRIPTION OF WATER DELIVERY SYSTEM:** *Include dimensions and type of construction of diversion works, length and dimensions of supply ditches or pipelines, size and type of pump and motor. If for irrigation, describe the type of system (i.e., flood, wheel line, hand line, drip, other).*

Water will be delivered via an electric pump/motor from each source. Plastic pipe will be used to convey water and water will be applied by sprinklers.

5. **PROJECT SCHEDULE:** *(List month and year)*

Proposed date construction work will begin October, 1993

Proposed date construction work will be completed October, 1995

Proposed date water use will be completed October, 1998

NOTE: A map prepared by a Certified Water Right Examiner (CWRE) and a complete legal description of the subject property are required under ORS 537.140 and OAR 690 as a part of your application. The legal description may be copied from your deed, title insurance policy, or land sales contract.

6. a) In the event any deficiencies are noted involving the application map enclosed herein, please return the map with instructions for correction to (check one):

 Applicant XX CWRE Other (Identify in REMARKS section)

- b) In the event any deficiencies are noted involving the application, please return the application with instructions for correction to (check one):

 Applicant XX CWRE Other (Identify in REMARKS section)

7. Are all lands involved (including the proposed diversion site, place of use, and access for conveying the water) under your ownership? NO. If not, list in the REMARKS section below, or on an attached sheet, the names and mailing addresses of the legal owners of all property involved in the proposed development.

REMARKS: _____

I/We certify that the information I have provided in this application is an accurate representation of the proposed water use and is true and correct to the best of my knowledge.

NOTE: The permit, when issued, is for the beneficial use of water without waste. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible the land use you propose may not be allowed if it is not in keeping with the goals and acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.

APPLICATION NO: 73401

PERMIT NO: _____

RECEIVED

MAR - 7 1995

March 3, 1995
SALEM, OREGON

Steve Applegate, Manager
Oregon Water Resources Department
158 12th Street, N.E.
Salem, Oregon 97310

Reference: File No. S 73401

Dear Mr. Applegate:

As discussed at the meeting in Bandon on February 24th, I hereby withdraw my objection to the technical review (filed on March 7, 1994) on application S 73401. Based on our discussions in Bandon, I will have sufficient water from my ground water sources and reservoirs if those applications can be issued as permits with no change in permit conditions as described in their respective technical reviews.

The outstanding question in Bandon was the language contained in the March 8, 1994, letter from Oregon Department of Fish and Wildlife concerning construction of a dam in the channel of the subject stream. Upon examination of Mr. Mirati's letter, his concern was limited to Sevenmile Creek. Since my reservoirs are not located on Sevenmile Creek, this will not affect my proposed operation.

As we also discussed at the Bandon meeting, please revise reservoir no. 3 on application R 73401 from an estimated 9.5 acre feet of storage to 9.0 acre feet of storage.

If there are no changes in the technical reviews and permit conditions as they now exist for S 73401, R 73400 and G 13413, we withdraw all objections and request you consider issuing the permits as quickly as possible.

Please contact me if you have any questions.

Yours truly,

Pearl Enterprises, Inc.

Michael Pearl

Hello:

This letter informs you of the current status of your application for a water use permit and accompanies the Satisfactory Report of Technical Review For Water Use Permit(s). We apologize for the delay in transmitting this information and Report to you and for any inconvenience the wait may have caused you.

The enclosed Report of Technical Review is the Department's summary of a specialized analysis of various legal and scientific aspects of your application and proposed water use. We are required by the state of Oregon's administrative rules (in OAR 690-11-160) to conduct this official technical review of each application submitted to the Oregon Water Resources Department for a water use permit. This process was designed to insure that your application receives a fair evaluation and to secure protection of existing water rights and of the public at large.

AS THE RESULT OF OUR TECHNICAL EVALUATION, WE HAVE DETERMINED THAT YOUR APPLICATION SATISFIES THE REQUIREMENTS OF THE TECHNICAL REVIEW.

The Department will now move your application to the next phase of processing. This phase includes a public interest review of your proposed water use. No final action may be taken on your application until the public interest review is completed.

You should also note that the Report of Technical Review describes conditions currently anticipated which may limit the water use proposed in your application.

If you wish to object to any of the analyses contained in the Report, you must submit your objection to the Department in writing within 60 days of the date of mailing of this Report or by the date specified below. Your objection must allege that the technical review is defective and you may also submit evidence which demonstrates that your proposed water use will not impair or be detrimental to the public interest.

Copies of the Report of Technical Review will be distributed to all persons who have filed comments or otherwise expressed an interest in the water use proposed in your application. Interested parties must also submit their objections within the prescribed objection period. Those objections must allege that the technical review is defective and/or that the proposed water use may impair or be detrimental to the public interest.

If an objection contains allegations that the technical review is defective, it must be accompanied by facts which support such allegations. If an objection contains allegations that the proposed water use may impair or be detrimental to the public interest, the objection must specify the particular public interest standards which apply as set out in Oregon Revised Statutes (ORS 537.170(5)) and Oregon Administrative Rules (OAR 690-11-195) and state facts showing how such standards would be violated.

All evidence and objections must be received by our Salem office **no later than 5:00 p.m. on or before March 11, 1994** or the Department may presume there is no opposition to any of the analyses set out in the technical review report. Evidence and objections must be addressed and delivered to: Oregon Water Resources Department, Water Rights Section, 3850 Portland Road, Northeast, Salem, Oregon 97310.

If objections and evidence are submitted on or before the above time and date, the Director of the Water Resources Department will evaluate each issue raised in the objections and either accept or deny them. Objectors are encouraged to indicate whether they would be interested in resolving their concerns through alternative dispute resolution.

If any of the objections are denied, the objector will be allowed thirty days to submit a protest to the denial. The protest must meet the standards set forth in OAR 690-02-030 through 080.

If you have any questions, please feel free to telephone me or any of the Department's Water Rights Section staff. My telephone number is 378-3739, in Salem, or you may call toll free from within the state to 1-800-624-3199.

Sincerely,

STEVE BROWN
Manager
Water Rights Division

SURFACE WATER AVAILABILITY

Water is likely available in excess of needs for all existing rights 80% of the time during each monthly period proposed by the technical review.

Water availability tables are available in the application file and may be reviewed in the office of the Water Resources Department in Salem.

CONFLICTS WITH OTHER WATER RIGHTS:

There are existing rights from this point of diversion.
See proposed permit conditions.

There are existing water rights appurtenant to the lands described in the application. See proposed permit conditions.

REPORT CONCLUSIONS:

Based on the Department's review of water availability and Oregon Administrative Rules, water in the amount of 1.0 cfs from live flow is likely available for 3 months and legally stored water in the amount of 19.0 acre-feet is available for use at any time during the year. Therefore, the Director finds that water is available in sufficient amount and during periods which will reasonably support the proposed use.

THE PROPOSED WATER USE, AS CONDITIONED, SATISFIES THE REQUIREMENTS OF THIS TECHNICAL REVIEW.

This Report of Technical Review sets out the Director's technical analysis of the application. In addition to this technical analysis, the Director will evaluate this application to determine whether the proposed water use might impair or be detrimental to the public interest under the standards set out in ORS 537.170(5) and OAR 690-11-195. Matters relating to public interest in the proposed water use which are raised in objections will be evaluated following the 60-day objection period.

PROPOSED PERMIT CONDITIONS

Application: 73401

The following conditions will apply to water use under the permit, and will appear in the permit, if issued.

1. Use of water under this permit is subject to all prior rights.
2. Period of allowed use: Live Flow - January 1 through March 31 of each year; Stored water may be used at any time during the year.
3. Rate of use: 1.0 cfs from live flow; 19.0 acre-feet
4. Water use development requirements:
 - A. Begin construction by (one year from issuance of permit).
 - B. Complete construction by October 1, 1996.
 - C. Completely apply the water to beneficial use by October 1, 1997.
5. Measurement, recording and reporting conditions:
 - A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
 - B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
 - C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

6. Failure to comply with any of the provisions of the permit may result in action including, but not limited to, restrictions on the use, penalties, or cancellation of the permit.
7. The permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
8. The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.
9. In the event of a request for a change in point of appropriation, an additional point of appropriation or alteration of the appropriation facility associated with this authorized diversion, the quantity of water allowed herein, together with any other right, shall not exceed the capacity of the facility at the time of perfection of this right.
10. This right is limited to any deficiency in the available supply of any prior right existing for the same land.
11. The amount of water diverted for CRANBERRY OPERATIONS, together with amounts secured under any other rights existing for the same lands, is limited as follows: For temperature control, 0.15 cubic foot per second per acre; For flood harvesting or pest control, 0.05 cubic foot per second per acre; For irrigation of cranberries, ONE-FORTIETH of one cubic foot per second and 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year. For the irrigation of any other crop, ONE-EIGHTIETH of one cubic foot per second and 2.5 acre-feet per acre for each acre irrigated during the irrigation season of each year.

MAR 13 1994

WATER RESOURCES DEPT
OF FISH & WILDLIFE OREGON

DEPARTMENT OF
FISH AND
WILDLIFE

RE: Water Right Application #R-73400 and 73401; Reports of
Technical Review

For reservoir sites: Because there are no fish in the immediate area of the subject appropriation, no fish screening or passage facilities are to be required.

For Sevenmile Creek POD: Because one or more species of game fish are present at the described POD, ODFW will require the applicant to provide fish screening pursuant to ORS 498.248. Therefore, ODFW requests WRD add the following condition to those already proposed:

The permittee shall install, maintain, and operate fish screening and by-pass devices as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the proposed diversion. The required screens and by-pass devices are to be in place, functional, inspected and approved by an ODFW representative prior to diversion of any water.

ODFW also requests the following condition relating to in-channel obstructions be included as a permit condition:

The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream.

Thank you for the opportunity to comment.

Sincerely,

WaterWatch submits the following objections pursuant to OAR 690-11-170:

◆ **The Technical Reports are Defective**

The technical reports fail to contain many of the elements and evaluations required in OAR 690-11-160(1). The areas of deficiency are the same as those identified in WaterWatch's April 5 objection to application #69165 which we hereby incorporate into this objection.

◆ **The Water Availability Analyses in the Technical Reports are Defective**

The analyses are defective for the following reasons:

- The technical reports fail to contain any analysis of water availability, contrary to OAR 690-11.
- The analyses fail to take into account existing water rights of record. It is unclear from the technical reports to what extent the water availability analysis takes into account upstream water rights. As we understand it, water rights are taken into account either by assuming the streamflow data reflects the amount of use or by using estimates of consumptive use. Both methods fail to

give adequate consideration to rights-of-record. Failure to account for future increases in water use pursuant to rights of record results in an over-estimation of water availability and over-allocation of the resource. This is contrary to the statewide Water Allocation Policy. OAR 690-400-010.

- The analyses fail to take into account the requested flows in the senior pending instream water right applications for the Middle Fork Coquille River, and Fishtrap Creek.

♦ **The Uses As Proposed are Not in the Public Interest**

The proposed uses fail to pass the public interest considerations in ORS 537.170 and are contrary to the South Coast basin program. *See also*, OAR 690-11-195(3)(d), (4)(a), (4)(c)(A), (4)(d)(A), (4)(f).

The South Coast Basin plan states:

Income from water-related recreation is a major contributor to the economy of the South Coast Basin. Finding 39.

The natural lakes, storage reservoirs and free-flowing streams support part of the water-based recreation use. Finding 40.

The water resources, wetlands and associated habitat are critical to the subsistence and propagation of wildlife in the Basin. Finding 42.

The coastal streams support resident and anadromous species of fish. Finding 43.

The fish resources of the South coast Basin are significant to the State of Oregon. Finding 44.

Adequate streamflow throughout the year is necessary for the maintenance of aquatic life in the coastal streams. Finding 45.

Low summer streamflow in many Basin streams is one factor limiting production of salmonids. Finding 46.

Summer flows in some streams will no support recommended minimum flows. Finding 47.

The Coquille River has water quality problems caused by point and non-point sources of pollution and low flows. Finding 56.

Coquille River and its surrounding tributaries and wetlands support a variety wildlife and fish life. Coho and Chinook salmon and winter steelhead rely on flows in the Coquille River for different stages of their life cycles.

- 1. The proposed uses are not in the public interest because they will interfere with flows needed to support public instream uses of water.**

The proposed uses will deplete flows needed for numerous public instream uses of the the Coquille River. This river system supports a variety of fish life including cutthroat trout, winter steelhead and coho salmon. Petitions have been filed requesting listing of coastal coho and steelhead under the Federal Endangered Species Act. Low flows during summer months impair fish survival by among other things raising water temperatures and decreasing aquatic habitat and fish rearing areas. Low flows in the winter adversely affect fish habitat by among other things exposing spawning gravel and reducing feeding and rearing areas in the river. In addition, water diversions create problems for fish passage and survival in the basin.

Currently there are pending instream water right applications for the Coquille system. These pending applications request flows needed for fish life in the system. The dams used to stored water will create passage problems. Both the storage and diversion of stored water change the hydrology of the stream system - eliminating flood events needed for habitat maintenance, blocking passage, and storing water during times of low flows. In addition, the use of water to irrigate cranberry bogs will result in additions of pesticides and fertilizers to the river system which will, unless regulated, will degrade stream quality. Thus, the proposed uses are not in the public interest because they will preclude flows needed for the pending instream water right application.

The public use reflected in the instream water right applications (protection and conservation of fish life) has a "reasonable expectation of being developed" as evidenced by the pending instream water right application. This instream use provides greater benefit to the public at large than the proposed use. These fish populations have statewide and even national significance and streamflows are essential for maintenance of these fish. These proposed uses will divert water needed for these streamflows and will create passage problems they should be denied.

2. Measurement and reporting.

These conditions should allow the Director to require measurement and reporting of both **rate and duty** of water stored and used. The proposed permit conditions restrict use based upon a specific rate. Measurement and reporting of water use is to be a useful informational and regulatory tool for the Department, it should provide the information needed to ensure that water use is within the terms of the permit.

The surface waters of the Coquille River system are overallocated several months of the year. The information generated by these proposed conditions are essential to the management and control of the water resource. If these uses were to be permitted, water use measurement and reporting should be a mandatory condition of use. This information is essential for protection of the public interest in the resource. However, we question the Department's ability to control these uses, even with these requirements.

The technical reports propose to limit the months of storage and water use. The technical reports also propose to limit the type of use during several months of the year. The Department's enforcement staff is already incapable of control existing rights to use water in the basin. These proposed uses add yet another enforcement responsibility on top of an already unmanageable load. Under these circumstances, it is difficult if not impossible for the state to ensure that these applicants will, **at all times**, use water in compliance with the permit conditions. Given the critical state of the water resource in the basin and the Department's inability to control this use, even with measurement and reporting, these uses are not in the public interest.

3. The uses will impair the public interest because fish screening and passage facilities are not a condition of use.

Given the critical status of fish populations and the water quality problems in this river system and the adverse effects diversions and storage projects have on fish habitat, screening and passage should clearly be required to be in place **before** any diversion of water. In addition, failure to maintain screening and passage facilities must be grounds for shutting off water use. There should be a condition in any permit issued which **clearly** states these requirements.

4. The proposed uses are contrary to Oregon policy.

ORS 537.170(5)(a) and (c) require the Department to ensure that waters in the basin will be used and controlled for all purposes, not just consumptive purposes. The Statewide Instream Flow Protection Policy states that "(w)here streamflows have been depleted to the point that public uses have been impaired, methods to restore the flows are to be developed and implemented." OAR 690-410-030(1). When considering applications for new water

rights the agency is required to consider the needs of instream and out-of-stream uses and the need to develop streamflow restoration programs. OAR 690-410-030(2)(a).

If hypothetically, these proposed uses were allowed they will be junior to the existing instream water right applications and should be conditioned to protect the senior instream flows. Critical to the protection of instream flows is knowing and controlling water use in the basin. These and other potential water users in the basin should be required to contribute to activities that enable the state to better manage and control the resource - such as measuring and reporting streamflows or contributing funds for installation and maintenance of gauging stations in key locations.

The recent petition for listing of coho and steelhead populations coast wide makes the protection of instream flows even more important for achieving a balance in this basin. The establishment and protection of instream water rights will help to achieve a balanced allocation of water between public instream and other uses in Basin and throughout the state.

Establishment of the instream water right also furthers statewide policies, priorities and goals for streamflow restoration including those in OAR 690-11-030(1), 690-410-070, and 690-77-015. Providing streamflow protection for fish is also necessary in order to carry out the state policy of restoring native fish stocks. ORS 496.435. Thus, protection of the public interest requires denial of this application.

Domestic Use

Allowing the proposed domestic uses is contrary to the Commission's Water Allocation Policy. The policy allows additional uses on overappropriated streams **only** "where public interest in those uses is high **and** uses are conditioned to protect instream values." OAR 690-410-070(1)(a) (emphasis added). While the exceptions contained in the existing instream water rights in the South Coast basin seem to indicate high public interest in the proposed uses of human consumption, livestock and irrigation of non-commercial gardens, they are not included in the pending senior instream water right applications.¹

In addition, the mere fact that the proposed use of human consumption seem to fall within the exception in the existing instream water rights does not relieve the Department from its duty to consider and protect the public interest, including the public value of instream flows and the needs of anadromous fish. Furthermore, the proposed uses fails to fit within the exception because it is impossible to condition these uses in a way that will protect instream values. *See above.*

¹ An exception for human consumption has been proposed in the technical reports for the instream water right applications - however, this does not necessarily mean that the instream water right when issued will include this unlimited exception.

The exceptions in the instream water right certificates are narrowly worded and should not be applied unless there is absolutely no other alternative sources of water. It is bad public policy to automatically apply this exemption without looking for other possible sources that can accommodate this water use. Human beings can go elsewhere for water, fish can not.

Failure of the State to look for or provide other sources of water, in the face of potential listing of the coastal coho creates expectations for water that may not be fulfilled if/when the species are listed. Instream flows in the creek provide critical habitat for fish - without water instream there is **no** habitat. Continuing to issue water rights on a river with a possibility of a listed species, as well as existing water availability and water quality problems makes little sense.

There are many small domestic uses in the basin consuming both ground and surface waters, all vital sources for instream flow. Individually, the quantity of water consumed may not be large, but cumulatively these uses adversely effect instream flows and water quality. Ignoring this problem is bad public policy. The state should be looking for alternate sources for these uses and ways to provide regional water supplies for these uses in a way that will result in the least amount of impact for the resource.

Conservation

Oregon statutes and rules also call for the state to "aggressively promote" water conservation and places a high priority on eliminating waste and improving the efficiency of water use. ORS 537.460(2)(a) and OAR 690-410-060(1). The proposed conditions do little to further these policies. Given the presence of potentially listed species, the water quality problems and the fact water diversions are one of the causes of anadromous fish declines it is imperative that the water use be as efficient as possible. The proposed uses should be held to a high efficiency standard **prior to** any permit issuance.

Sincerely,

TECHNICAL REVIEW CHECKLIST

FORM-71393

(1) Application: 73401

(2) Review Date: 12/28/93

S Indicates information was completed or adequately addressed.
 U Indicates information is needed, or incomplete, or inadequately addressed
 N/A Indicates Not Applicable

SUMMARY

S Completeness *MAP*
S Land Use
N/A GW Interference (if potential interference with surface water, see results of water availability analysis)
S Conflicts
S Water Availability

(3) S The applicant has certified that the information provided in the application is an accurate representation of the proposed use and is true and correct to the best of their knowledge.

(4) N/A No oath is required because application was filed before June 5, 1992.

(5) S Application fees:

Examination fee:	\$ 200
Recording fee:	\$ 100
TOTAL REQUIRED	\$ 300
TOTAL SUBMITTED	\$ 300
AMOUNT DUE prior to issuance of permit	\$ 0
AMOUNT OVERPAID	
refund due applicant	\$

(6) S Proposed dates of beginning and completion of construction, and complete application of water

(7) U MAP: ☒ Prepared by a CWRE *not complete*
☐ Exempt under OAR 690-11-150(3)
☐ A map or drawing included (non-CWRE)
☐ No map or drawing in file

- (8) N/A A CWRE map is not required for applications filed before November 9, 1987.
- (9) S A written copy of the legal description of the property on which the water is to be used.
- (10) S A copy of written authorization, contract or easement permitting access to the land or reservoir not owned by the applicant.
- (11) N/A The proposed use is not restricted or prohibited by statute.
- (12) N/A The source of water is not withdrawn from appropriation by order of the State Engineer or Water Resources Commission, or legislatively withdrawn under ORS Chapter 538.
- (13) S AGRICULTURAL use(s) is/~~are~~ classified uses(s) under the S COAST Basin Program, OAR 690 - 517-0018 (8)
- (14) U The application, map and supporting data are complete and free of defects.

Land Use Compatibility:

- (15) As expressed by the Planning Department of Coos Co.
- (16) S The land uses to be served by proposed water uses (including proposed construction) are allowed or are not regulated by the local comprehensive plan (ordinance section _____).
- (17) N/A The land uses to be served by proposed water uses (including proposed construction) involve discretionary land use approvals which have been obtained.
- (18) _____ The local government was notified, and sent no comment pursuant to the rules at the time; land use was presumed in compliance per such statement printed on the application.

For ground water applications:

- (20) _____ A copy of the constructor's log, if available, for any well already constructed, or required information regarding actual or anticipated construction.
- (21) _____ The report from groundwater section has been received.

For reservoir applications:

- (22) ✓ Plans, specifications and supporting information for the dam and impoundment area.

WaterWatch

O F O R E G O N

RECEIVED

WATER RESOURCES DEPT.
SALEM, OREGON

June 12, 1993

Water Resources Department
3850 Portland Rd. N. E.
Salem, OR 97310

RE: Application for Permit #R73400, 73401, Peart Enter.
7mile Cr., Coos Co., Cranberry Use

WaterWatch has reviewed the limited amount of information contained in the public notice of this water right application. Based upon that information, WaterWatch raises the following issues, questions, and concerns:

Is there unappropriated water available for this proposed use? Does the Department have adequate data to accurately determine the 80% exceedence level?

What effect will this proposed use have on instream flows necessary to protect the public's interest in fish, wildlife, recreation, and a healthy aquatic system?

This water source may suffer from water quality problems. Has the Department consulted with the Department of Environmental Quality to determine the effect this proposed withdrawal will have on water quality?

If this water source provides habitat to native fish during any phase of their life cycle, we request that the Department include conditions requiring the installation and maintenance of fish screening and bypass devices prior to any diversion of water.

Given the importance of surface water sources, and the Department's limited enforcement staff, it only makes sense to require this applicant to measure and record water use. Measurement not only helps the Department carry out its statutory mandate to promote the control of water resources for all beneficial uses, it helps the Department protect the public's interest in assuring the use is within the bounds of the permit. ORS 536.220(1)(a), 537.170(5).

Will this proposed use be compatible with Goal 5 elements of the local comprehensive plan?

It is a high priority of the state to eliminate waste and improve the efficiency of water use. OAR690-410-060(1). Statewide policy also calls upon water users to use and maintain their water systems in a manner consistent with the state's priority. OAR 690-410-060(2)(a). What conditions are proposed for this permit that will carry out and encourage compliance with state policy?

Is this an existing illegal use of water? If so, will the continued use without a permit cause harm to existing water rights and the public interest?

We request copies of the draft permit and the Department's technical review of this application.

Sincerely,

Jim Myron

WaterWatch of Oregon, Inc. 921 S.W. Morrison. Suite 438 Portland, Oregon 97205 (503) 295-4039

May 25, 1993

PEART ENTERPRISES INC.
HC 84 BOX ST 76
MYRTLE POINT, OR 97458

REFERENCE: File(s) G-13413, R-73400, S-73401

We have received your application(s) for a water use permit along with your supporting data, documentation, and fees. A receipt is enclosed here unless you were previously issued one. Your application has been assigned the above referenced file number. Please refer to this number whenever you contact us about your application.

Even though your application has been received, filed and assigned an application reference number, no authorization has been granted to develop your water use. The filing of an application does not create a water right. Water may not be used without a water right permit.

After an application has been accepted for filing, public notification of the application is made, followed by the mandatory 30-day comment period. Thereafter, applications can be considered for processing as time allows.

At present the Water Resources Department has a backlog of several thousand applications for water use permits which has delayed our application processing time. Applications are processed in the order in which they are received.

The processing of an application does not guarantee that a water right permit will be issued. Each application must undergo a specialized analysis called a technical review and a public interest review. There is no way to determine at this time whether your particular proposed water use will be recommended for a permit.

REFERENCE: File(s) - G-13413, R-73400, S-73401

When the report on the technical review is completed and sent to you, a 60-day objection period begins during which you, the applicant, or anyone who has expressed an interest in your proposed water use may communicate to us their disagreement with what we have said in our report on your application. After the 60-day objection period, the Department conducts the public interest review and considers any objections which have been made.

After any objections have been considered, there may follow time to allow parties to resolve conflicts over the proposed water use. In addition, a 30-day protest period may be required. Lastly, it may be necessary to schedule a hearing or send the application to the Water Resources Commission for their review. In most cases no objections are received and the application processing can proceed without further conflict resolution, protest, or hearing.

If your application is recommended for approval and a permit is issued, the use allowed by the permit will be subject to the Basin Program Rules of the Water Resources Commission, instream flow requirements, and the demands of prior right holders, and other conditions to conform the water use to particular standards.

Please contact the Water Rights Section of the Water Resources Department if you have any questions. You may write to us at 3850 Portland Road, Northeast, Salem, Oregon 97310 or you may call 378-3739 in Salem or toll free from within the state 1-800-624-3199.

Sincerely,

Laurie Beth English
Water Rights Program Analyst

Application No. 73401
Permit No.

STATE OF OREGON

COUNTY OF COOS

CERTIFICATE OF WATER RIGHT

RECEIVED

MAY 17 1993

WATER RESOURCES DEPT.
SALEM, OREGON

THIS CERTIFICATE ISSUED TO

MICHAEL NELSON RUSSELL
ROUTE 2, BOX 1900
BANDON, OREGON 97411

confirms the right to use the waters of SEVENMILE CREEK, a tributary of COQUILLE RIVER, for the purpose of TEMPERATURE CONTROL, IRRIGATION, AND FLOOD HARVESTING ON 9.55 ACRES OF CRANBERRIES.

The right has been perfected under Permit 47254. The date of priority is MAY 4, 1982. The right is limited to not more than 0.70 CUBIC FOOT PER SECOND; BEING 0.70 CFS FOR TEMPERATURE CONTROL, 0.24 CFS FOR IRRIGATION, AND 0.48 CFS FOR FLOOD HARVESTING, PROVIDED THE TOTAL DIVERTED SHALL NOT EXCEED 0.70 CFS, or its equivalent in case of rotation, measured at the point of diversion from the source.

The point of diversion is located as follows:

SW 1/4 SE 1/4, SECTION 34, T 27 S, R 14 W, W.M.; 2990 FEET NORTH AND 3995 FEET EAST FROM THE W 1/4 CORNER OF SECTION 3.

The amount of water used for irrigation of cranberries, together with the amount secured under any other right existing for the same lands, is limited to a diversion of one-fortieth of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year. For the irrigation of any other crop this right is limited to a diversion of one-eightieth of one cubic foot per second (or its equivalent) and 2.5 acre-feet for each acre irrigated during the irrigation season of each year.

The right shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

NW 1/4 NE 1/4 9.55 ACRES
SECTION 3
TOWNSHIP 28 SOUTH, RANGE 14 WEST, W.M.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described. The right is subject to minimum flows established by the Water Resources Commission with an effective date prior to this right.

WITNESS the signature of the Water Resources Director, affixed this date NOVEMBER 19, 1990.

William H. Young
Water Resources Director

Recorded in State Record of Water Right Certificates numbered 65035.

EASEMENT

RECEIVED

MAY 24 1993

WATER RESOURCES DEPT.
SALEM, OREGON

REVELLE JOHN LAFFERTY and MELBESE M. LAFFERTY, husband and wife, herein called "GRANTORS" convey to MICHAEL N. RUSSELL, a single man, an easement for the construction and maintenance of a pipeline to carry water from Seven Mile Creek on portions of that real property situated in Coos County, State of Oregon, described as follows:

The SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 34, Township 27 South, Range 14 West of the Willamette Meridian and the SW $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 34, Township 27 South, Range 14 West of the Willamette Meridian,

said pipe line to originate north of the bridge over Seven Mile Creek in said SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 34, Township 27 South, Range 14 West of the Willamette Meridian and running generally southwesterly to or near the line between the SW $\frac{1}{4}$ and the SE $\frac{1}{4}$ and thence in a southwesterly direction to the Section line between Section 34, Township 27 South, Range 14 West of the Willamette Meridian and Section 3, Township 28 South, Range 14 West of the Willamette Meridian at the point which is approximately the mid-point of that portion of said Section line which forms the south line of the SW $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 34, Township 27 South, Range 14 West, said easement to be appurtenant to each and every portion of the following described property:

Lots 1 and 2 in Section 3, Township 28 South, Range 14 West of the Willamette Meridian.

TO HAVE AND TO HOLD to said Michael N. Russell, his heirs and assigns.

True and actual consideration for this transfer is \$10.00.

WITNESS our hands and seals this _____ day of February, 1968.
