Re: Extension of Time for Permit S-33923

The Oregon Department of Fish and Wildlife (ODFW) has been working with the city of Dunes City to satisfy the fish screening condition for the diversions associated with permit S-33923. ODFW was contacted by CwM-H2O in May of this year to verify the screening requirements, and our Screen Shop has been coordinating efforts with the city since August.

The permit includes 218 points of diversion for water from Woahink Lake. Woahink Lake supports the lifecycle of multiple species of native migratory fish, including ESA listed coho, cutthroat, and potentially occasional steelhead.

The fish screening requirement was added to the city's water right in 2003 when the city filed for a time extension to complete the water development project. The city has until October of 2022 to fulfill the requirements of this permit. ODFW is satisfied that the city has begun planning to screen the 218 points of diversion on water right S-33923. However, the city has applied for an extension of time until October 2031, 28 years after the initial screening requirement.

Currently, the city is working with landowners and local businesses to collect information on the diversion rates and screen status of the pumps associated with each point of diversion in the lake. It appears that only a small portion of the diversions currently have a fish screen. The city has made progress gathering information. The ODFW Screen Shop has been working with the city, businesses, and landowners to advise them on the screening criteria needed, based on their max diversion rate. ODFW has also provided tax credit information that the city has posted on its website.

Once the city has the information on the diversion rate and size of screen proposed, they will keep the records for ODFW to review and determine which points of diversion have fulfilled the screening requirements. ODFW is supportive of this approach and will continue to support the approach if sufficient progress is made toward screening all 218 points of diversion. ODFW encourages the city to maintain close communication with the ODFW Screening Program and Screen Shop as they work to document the state of compliance with the screening requirement. Additionally, if the extension of time is granted, ODFW recommends adopting screening benchmarks and quarterly check-ins with ODFW to document progress.

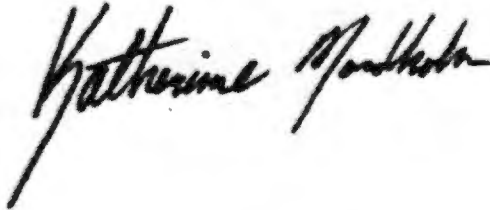

ODFW requests that the city makes every effort to have fish screens in place by the original deadline of October of 2022. ODFW recommends that the city sets the following benchmarks:

- To complete their initial data gathering effort by April 15, 2022

- To screen 70% of operational diversions by the original October 2022 deadline
- To screen 100% of diversions by the end of 2023 or as coordinated with ODFW.

If you have any questions, please contact me at Katherine.e.nordholm@odfw.Oregon.state or (503) 947-6274.

Sincerely,

**Extension of Time
 Progress Reporting Form
 For Checkpoints**

TO THE DIRECTOR OF THE OREGON WATER RESOURCES DEPARTMENT

Permit Holder: City of Dunes City

Application S-86387 Permit S-54405

Progress Report Form for 2021
 Report Due no later than October 1, 2021
 DO NOT SUBMIT PRIOR TO 30 DAYS BEFORE DUE DATE

As authorized in ORS 690-315-0050(6), this progress report is required in order to ensure diligence is exercised in the development and perfection of Permit S-54405. FAILURE TO SUBMIT THIS REPORT WILL MOST LIKELY RESULT IN ANY FUTURE EXTENSION BEING DENIED.

10/21/2021 to Sept 30, 2021	Engineering fees	30,997.17
"	Meter acquisition (new radio read meters)	40,491.85
"	Meter readings (annual)	12,250.00
"	Meter installations	2591.21
"	Legal Fees	1890.70

2. Describe actions taken to comply with terms/conditions of the permit and/or previous extension.

Please see attached.

3. Total number of acres irrigated to date : N/A (NA if not applicable)

4. Provide the maximum rate, or duty if applicable, of water diverted for beneficial use under this permit, if any, made to date.

Maximum rate used to date = 0 cfs (cubic feet per second)

or

Maximum rate used to date = 0 gpm (gallons per minute)

or

Acre Feet stored to date = 0 AF

Report the rate in the same units of measurement as specified in the permit, being cfs (cubic feet per second), gpm (gallons per minute) or AF (acre-feet). Do not provide daily, monthly or annual water volume totals.

INCOMPLETE REPORTS WILL BE RETURNED. AN ANSWER IS REQUIRED IN EACH ITEM.

PROGRESS REPORT FORM FOR 2021

Attachment for Item 2.

**Permit Holder: City of Dunes City
Permit S-54405**

Application S-86387

Since October 1, 2016, the City has continued its negotiations with the heirs of the property owner of the land upon which the outlet control structure is located. The property owners firmly refuse to allow the City acquisition of the land, however, they have expressed a tentative agreement to execute an easement under certain conditions still under negotiation.

The City did not qualify for the grant it was seeking to pay for an update to the existing feasibility studies, so the City continues to seek funding to move forward with that task.

The City hired an engineer to design and install a metering device at the outlet of Woahink Creek and measurements were taken regularly to determine outflows of Woahink Lake into Woahink Creek. When a beaver ate through the cord of the doppler meter, water measurements stopped via that meter and continued at the staff gauge located on the outlet control structure itself for a limited period of time until the calculations the engineer needed for future design of the fish passage and storage mechanisms were acquired.

As the City grows and more and more homes convert to vacation homes and vacation rentals, it became increasingly apparent to the City that counting on monthly meter readings from the property owners was not reliable. Consequently, the City opted to acquire radio-read meters in 2020 and continues with replacement of all the remaining meters. All meters are anticipated to be replaced by the summer of 2022.

While awaiting full installation of all new meters, the City continues to monitor monthly reported readings by individual users and hires a person to read the meters annually.

The City additionally acquired land where Woahink empties into Siltcoos Lake for a multitude of reasons, not the least of which is the acquisition of a stretch of Woahink Creek that will allow for measurement of the outflows of the Creek into Siltcoos Lake as required in the terms of the permit. Following approval of the wetland delineation report, an access design will be submitted for approval by the State so that installation and reading of the measurement device can be accomplished. The money used to purchase the \$325,000 of property is not reported herein.

The City's Engineer and representatives from the Oregon Department of Fish & Wildlife are currently assisting the City in ensuring that approved fish screens are installed on every diversion point. Expenses incurred in conjunction with this continuing activity are being tracked and are not included in this report.

In 2018, the City prepared and submitted its Water Management and Conservation Plan to the State addressing the City's Permit S-44501, wherein it states, at page 6 thereof: "The City also holds Permit No. S-54405, approved June 21, 2007, for the diversion of an additional 410 a.f. from Woahink Lake for delivery to parcels located in the points of diversion identified in the permit, for domestic uses expanded and for stream flow augmentation. At this time the entirety of the water right is remaining in the stream for streamflow augmentation as the storage right under Permit No. R-14131 is not being exercised." The City anticipates a change to these circumstances in the very near future as the preparation of a maintenance and operation plan and installation of storage mechanisms is in the development and design phase.

REFERENCE: Application for Extension of Time

Dear Extension of Time Applicant:

The Water Right Services Division has received your application for an extension of time for **APPLICATION FILE #: S-45456 (Permit S-33923)**. Your application will be reviewed in the future. Following the review, you will receive a Proposed Final Order either approving or rejecting the extension of time request. A 45-day protest period begins upon issuance of the Proposed Final Order. After the protest period closes, a Final Order is issued.

You may continue the use of water under your water right until the Water Resources Department formally takes action on your extension application. If your permit includes conditions, water use reporting, water level measurement reporting, etc., you are required to comply with the conditions.

Any additional development that occurs after the expired completion date, identified on the permit or an extension order, can only be claimed upon an approved extension application.

If you have questions concerning your extension of time application, please contact Jeffrey Pierceall at (503) 986-0802. For general information about the Water Resources Department, you may contact the Water Resources' Customer Service Group at (503) 986-0801 or you may access the Department's website at: www.wrd.state.or.us.

RE: CITY OF DUNES CITY – APPLICATION FOR EXTENSION OF TIME FOR PERMIT S-33923

Dear Permit Extension Specialist,

Please find enclosed with this letter a completed Application for an Extension of Time for Permit S-33923 with supporting documentation (Attachments A-G). Please note that although the permit holder is the City of Dunes City, it is a Domestic water right so the 'non-municipal extension for time' form was used.

Additionally, The City of Dunes City has included a check for the Statutory fee of \$670.00.

Please let us know if there are any question or if any additional information is needed.

Thank you for your assistance.

Sincerely,

CwM H2O, L.L.C.

Robert Long, CWRE

Criteria for a Permit Extension of Time

The Department can accept requests for an extension of time on permits to (1) complete construction, and/or to (2) apply water to beneficial use.

In order to approve a permit extension request the Department must be able to find:

1) Construction has begun:

A. For Groundwater Permits

Construction of the well(s), *authorized by the permit*, began within 5 years of the date the permit was issued or by the actual construction date specified in the permit.

B. For Surface Water or Reservoir Permits

Construction of the water system began within 5 years of the date the permit was issued or by the actual construction date specified in the permit.

The Department will also confirm that:

- 2) If required, a fish screen, fish passage or fish by-pass device was installed before or prior to diversion of any water. An exception to the need to confirm installation prior to diversion of any water would be a waiver submitted to the Department from ODFW stating that a fish screen, fish passage or fish by-pass device was not required, provided your permit allows for a waiver.**

If you have questions, please call the Department at (503)-986-0900 and ask to speak with a permit extension specialist.

Before submitting your Application for Extension of Time, make sure the following items are included:

- This completed Application for Extension of Time.
- Statutory fee of \$670
- Signature page (Second page of this Application for Extension of Time).
- Letter granting an agent authority to act on behalf of the permit holder (*if applicable*)
- All supporting documentation and/or evidence referenced in the Application for Extension of Time. (ODFW Fish screen approval or waiver, contract for stored water, etc)

MAIL COMPLETED APPLICATION

along with the Supporting documents and/ or evidence and correct fee to:

Water Resources Department
Attn: Water Right Permit Extensions
725 Summer Street NE, Suite A
Salem, Oregon 97301

GENERAL TIPS:

- Permit holders of **municipal or quasi-municipal water use permits DO NOT use this form**. The correct form is APPLICATION FOR EXTENSION OF TIME FOR MUNICIPAL AND QUASI-MUNICIPAL WATER USE PERMITS.
- Request the reasonable amount of time necessary to fully complete construction of the water project and/or to fully use the permitted quantity of water under the terms and conditions of your permit. Should this request be approved, it will be OWRD's expectation that you will complete your project within the new time period allowed. Future extensions may not be granted.
- A separate APPLICATION FOR EXTENSION OF TIME must be submitted for each permit. OAR 690-315-0020(2).
- Permit extensions are evaluated under OAR Chapter 690, Division 315. These rules may be viewed at the State of Oregon, Secretary of State Website. To be granted an extension of time, the Department must make four specific findings; 1) the application is complete, 2) construction of the water system began, 3) there is good cause, and 4) the project can be completed within the time being requested. If the Department cannot make all four findings, the extension of time cannot be approved.
- You may provide OWRD with any additional information or evidence that will aid us in making our decision. Please note that OWRD may require other information that is necessary to evaluate the application. OAR 690-315-0020(3)(n).
- After careful review of the Application for Extension of Time, you may contact OWRD at (503) 986-0900, to ask questions and request assistance from a Permit Extensions Specialist in the Water Rights Services Division.

RECEIVED

AUG 30 2021

OWRD

- An Application for an Extension of Time will be reviewed for completeness. A response is required for each item contained in the application. OWRD will return any incomplete or deficient applications to the applicant. OAR 690-315-0040(1)(a).

Reference Materials Needed to Complete this Application:

- **The water right permit.** If needed, a copy of the water right permit can be downloaded from the Department’s Website, or, a copy of the permit may be requested by water right application number from the Water Rights Division at 503-986-0900 (copy fees will apply).
- **Previous Applications and Orders.** Copies of previous applications and orders that may inform the completion of the Application for Extension of Time, if available, may be downloaded from the Department’s Website. **NOTE: If the document requested is not available on the Department’s website, you may be required to submit a Public Record Request.**
- **Documentation which demonstrates compliance with permit conditions** (for example, well construction logs; static water level measurement reports; annual water use reports; ODFW fish screen certification; a plan to monitor the effect of water use on ground water aquifers utilized under the permit; etc.).

Questions to complete this application for an Extension of Time

Please see the instruction sheet to help you answer these items.

- 1. Beginning Construction within required deadlines.** OAR 690-315-0020(3)(d)

For Surface/Reservoir Permit

Has construction of the water system begun? **Yes** **No**

Date construction began: before October 15, 2005*

Details of construction and attach documentation:

*The original permit S-33923 (priority date 10/7/1968) (Attachment A) was approved with one point of diversion in Woahink Lake (640 ft N and 180 ft W of the SE corner of Sec 22, T19S, R12W). The City of Dunes City was granted several extensions of time between 1970 and 2003 in order to complete construction and beneficially use water under this right. The 2003 Extension Final Order (Attachment B) sets the current permit extension deadline of October 1, 2022 and also identifies permit conditions of fish screens and progress report checkpoints. The City had considered forming a water district in the late 1970s and again in the 1990s, however several attempts by the Council to pass such a proposal were voted down by residents of Dunes City. In response, the City changed their approach. In December 2005, transfer T-9854 was approved to add a total of 218 PODs to the permit (Attachment C), representing individual diversions for individual residences, community systems, and lots with plans to be developed within the Dunes City UGB. At this point, diversion infrastructure was in place at many of the 218 PODs. Individual property owners are responsible for installing the intakes, pumps, and any water treatment equipment. Because of the nature of these PODs, it is difficult to document their construction and determine exact dates. The actual dates of construction for many PODs preceded the 2005 transfer. As of the 2018 WMCP, there were 195 points of

AUG 30 2021

OWRD

RECEIVED

SEP 27 2021

OWRD

diversion in use under S-33923 (T-9854), representing 316 homes. Most of these PODs are in regular use with installed flow meters and have been regularly checked. Many of the remaining PODs are vacant lots with water reservation agreements that require the installation of meters as structures are built and water use begins. Attached to this application is the City's approved 2018 WMCP, which in addition to providing some of the development history, also includes information related to the City's 'Shared Domestic Water Right Permit Program' which defines how the City implements the sharing of Permit S-33923 with its residents (Attachment D).

OAR 690-315-0020(3)(A)€(A)

- 2a. Permits typically contain standard or special conditions that must be fully satisfied to lawfully develop and use permitted water. Review the permit subject to this extension to identify which of the conditions listed in the 2nd column are contained within it. Using the extra row labeled "other" to specify any other additional conditions included in the permit, or specified in a final order approving a permit amendment or prior extension of time. In the 1st column check the box for each condition (row) identified as relevant. In the 3rd column check "Yes" if you have completed or met the permit condition. Check "No" if the condition is not yet satisfied. In the 4th column, give the date when the condition was satisfied or will be satisfied. Attach any pertinent documentation. Note: a pump test condition does not need to be addressed here however; you must submit the results of the test to the Department for approval prior to certification.

RECEIVED

***Meter use Requirement-** There are several PODs listed water under S-33923 that do not yet have a flow meter in place. Generally, most of the unmetered PODs are for vacant or reservation lots in Dunes City that are not currently using water. As inactive PODs begin to use water under S-33923, the installation of a radio-read meter is now required by the City. The City is in the process of notifying residents that beneficial water use must be developed and fully metered by October 1, 2022 to remain in compliance with the permit conditions. Owners of vacant lots with reservations unable to meet those requirements by October 1, 2022 are subject to removal from the shared permit. Once the City completes its current assessment of users and diversion conditions, it intends to move (transfer) three categories of users off permit S-33923 and on to its municipal use permit (S-44501). These three user categories (PODs) include: commercial, small community-use, and individual PODs/users who did not develop a fully metered diversion by October 1, 2022. To facilitate more efficient and timely meter readings, the City purchased new 3G mobile (remote reader) meters, and is in the process of updating original meters as their budget allows. The receipt for these new meters, as well as other expenses related to the City's Water Rights program to develop water to full beneficial use are provided in Attachment E.

SEP 27 2021

OWRD

***Fish screen Requirement-** While the City has been very focused on meeting the meter and water-use reporting requirements, it has only recently begun to systematically address the fish screening requirement. The fish screening condition extends through the 2005 permit amendment to apply to all 218 PODs listed on the permit. Because of the nature of how these individual diversions were developed, the City currently does not have complete information on the construction of all PODs. In coordination with ODFW, the City is starting to contact individual diversion owners to gather information on construction and fish screening details. The City is also contacting local diversion contractors to gather information on their screening practices and installation records. Information for individual PODs will be compiled in a binder for review by ODFW to satisfy this permit condition. It's too early in the inquiry process to definitively say when accurate fish screening information can be collected for the majority of PODs. As mentioned above, the City is pursuing different strategies to this end, and is hopeful that fish screening data can be reported to ODFW (and upgrades made if necessary) within

four to five years. A Communications Memorandum between the City’s Water Consultant and ODFW regarding this requirement is attached to this application (Attachment F), as is the Fish Screening Information Request form the City mailed to its residents to gather more information for this permit condition (Attachment G).

[OAR 690-315-0020(3)(e)]

- Provide evidence of physical work made toward completion of the water system, and of progress made toward making beneficial use of water within the permitted time period (CHART-B); and if applicable, within the time period of the most recent extension granted (CHART-C). CHART-B (below) must be completed for all Application for Extension of Time requests. Use *chronological order*. Itemize each work item, and do not combine multiple work actions in one area. (Planning, formulating a business plan, securing financing, letting contracts, purchasing but not installing equipment, surveying, clearing land, or planting crops *is not considered work in the development of the water system. Work accomplished under other water rights may not be considered work under this permit.*)

Total Cost of Chart-C		\$136,337+

5. Cost of project to date: \$136,337.00 +*

(The total combined cost from CHART-B and CHART-C) [OAR 690-315-0020(f)]

*The true costs for Chart B are unknown. The costs for Chart C are estimated at \$136,337 (The City has provided QuickBooks budget reports for its water rights fund, Attachment E)

[OAR 690-315-0020(3)(e)(B)]

Provide evidence of the maximum rate (or duty, if applicable) of water diverted for beneficial use under this permit made to date.

TIP: Report the rate used to date. Unless full beneficial use has been made, this rate will be less than the rate authorized on the permit.

6. For Surface Water Permit Extensions (S-33923):

TIP: Report the rate in the same units of measurement as specified in the permit.

Maximum rate used to date = 0.500* cfs (cubic feet per second) or,

*The rate of 0.500 cfs is based on combined monthly metering data available from all PODs from 2009, 2013-2020. The highest monthly volume (17.35 AF in November 2014) was used to estimate the average instantaneous rate during the peak-use month. Average use was multiplied by a typical peak factor of 1.75 to estimate maximum instantaneous rate during this period.

Reported use from December 2014 to September 2015 was consistently and unusually high due to extreme readings from a single POD meter. These readings, which were nearly 6 times the next highest usage month, are assumed to be a meter or unit-reporting error.

7. For Ground Water Permit Extensions (e.g. G-XXXX): NA

TIP: Include information from ALL wells that pertain to this permit, including drilled wells not currently used.

8. Has a Permit Amendment Application been filed? Yes No

If yes, identify Transfer No. T-9854

[OAR 690-315-0020(3)(e)(C)]

9. For Irrigation and Nursery Use Permits Extensions: NA

Provide the total number of acres irrigated to date under this permit.

[OAR 690-315-0020(3)(i)(j)]

10. In the chart below provide a summary of your future plans and schedule to complete the construction of the water system, and/or apply water to full beneficial use under the terms and conditions of the permit.

CHART-E

APPROXIMATE DATE RANGE (projected)	WORK OR ACTION TO BE ACCOMPLISHED (projected)	ESTIMATED COST (projected)
2025-2026	Complete the replacement of original meters with radio-read meters. (As budget permits. Current City estimates \$300/ meters to replace, able to do ~50 meters/year, so completion in four to five years)	~\$65,400
2021 - 2031	Cost of meter checking, repair, and replacement program. Assemble/update the City's Master Water Meter Database with missing POD info, streamline water meter reading and reporting procedures	~\$30,000
2026	Collect and assemble fish screening information for individual PODs in a binder for ODFW review. Encourage fish screen upgrades if necessary to satisfy ODFW requirement	~\$7,500
2022	Permit amendment of S-44501 to transfer community and commercial PODs to municipal water right.	~\$4,000
2026	Claim of beneficial use surveys and application for S-33923.	~\$87,000
Year: 2031	Date intended to apply water to full beneficial use under the terms and conditions of this permit.	
Total Cost		\$193,900+

[OAR 690-315-0020(3)(g)]

11. Estimated remaining cost to complete the project: ~\$193,900

(The total cost from CHART-E)

[OAR 690-315-0020(3)(j)]

12. Provide a summary of your plan to complete construction, meeting all permit conditions and apply the water to beneficial use: *(List all tasks or steps needed to complete the project, the date when each task will be completed, and the cost associated with each task; attach additional pages if necessary.)*

Permit S-33923 currently includes individual residence PODs, community system PODs, commercial PODs and reservations for water for future development. In order to complete development under S-33923, the City intends to submit an application for amendment of municipal permit S-44501 to add the community, commercial, and reservation (undeveloped) PODs to that water right. Once this transfer has been approved, the only PODs remaining on S-33923 will be the individual residence PODs that are already developed and metered or are in the process of being developed by October 1, 2022. This action will effectively complete the development under this water right.

Although the City created and maintains a Master Water Meter Database, there are a number of discrepancies in it that they are trying to resolve. These include PODs that have the same location information, or multiple PODs associated with one meter or report number, or metered PODs lacking an associated report number. The City will use this time extension to further refine its water meter database, to gather fish screening information for ODFW, and to replace existing meters with radio read meters to streamline the water use reporting process. After all PODs are fully accounted for and metered and ODFW is satisfied with the fish screening requirements, a claim of beneficial use will be completed for the developed portion of the right.

As noted in Chart E – the major tasks required to complete the development of the water right are:

1. Resolve discrepancies in the City's Master Water Meter Database to ensure accuracy and accountability,
2. Notify residents that the Oct 1, 2022 development deadline is approaching and they need to provide information on their current diversion or their plans for developing a diversion,
3. Continue gathering fish screening information to satisfy permit condition. This involves contacting contractors and property owners with a request for information and assembling responses in a binder for ODFW review,
4. Continue meter replacement program to upgrade the metering and reporting system.

[OAR 690-315-0020(3)(k)]

13. Justify the time requested to complete the project and/or apply the water to full beneficial use. *(Include any other information or evidence to establish that the requested amount of time is sufficient and that you will be able to complete the project within the amount of time requested.)*

As stated above, progress on completion of S-33923 is dependent on three processes: completing the replacement of current meters with radio read meters at all individual PODs, the fulfillment of ODFW's fish screening requirement, and the amendment of permit S-44501. The meter replacement program is expected to be completed by late 2026. The City has already

RECEIVED

AUG 30 2021

OWRD

RECEIVED

SEP 27 2021

OWRD

purchased all meters and must pay for their installation in small groups to stay within the City's budget. There are several vacant/reservation PODs that will be developed completely in the coming years. Meters will be installed and water use monitored once construction is completed. The extension of time requested allows flexibility in the timeline for delays and unexpected issues in this process, and gives the City the ability to correct discrepancies in its water meter database and gather accurate fish screening information on the hundreds of individual PODs for ODFW to review.

[OAR 690-315--0020(3)(I)]

14a. Will a denial of the extension result in undue hardship? (Describe the hardship and the effects.)

Absolutely. The City of Dunes City holds four surface water permits. One of these (R-14131) is for storage of 410 AF in Woahink Lake, one (S-44501) is a municipal right on Woahink Lake, and S-33923 and S-54405 are domestic rights on the lake. Because of the unique way in which Dunes City has developed over the last several decades, the only water right with water use to date has been S-33923. Water use under S-44501 is currently not possible without the transfer of existing PODs (process soon to be commenced). Use under S-54405 is dependent on storage under R-14131, though development of the infrastructure necessary for storage in Woahink Lake has not been possible to date. Therefore, denial of extension of S-33923 would leave no other viable option for use for the approximately 200 residential PODs currently being used through the permit. An extension approval would allow for use to continue under S-33923 while for the next five to ten years, the City completes the following tasks:

- The City works with OWRD to transfer commercial, community users and undeveloped PODs from S-33923 to its municipal permit, S-44501,
- The remaining undeveloped PODs on S-33923 demonstrate they have begun development by October 1, 2022,
- The storage infrastructure in Woahink Lake is completed,
- The City completes and organizes its assessment of fish screening information for a majority of the PODs currently in use on S-33923

14b. Are there any other reasonable alternatives that exist for meeting your water use needs? (Explain in detail, consider other potential sources of water, and describe their feasibility)

The City is currently working on adding the community and commercial PODs currently on S-33923 to their municipal water right on Woahink Lake. Once this is done, the municipal right S-44501 will support water use. However, there no other reasonable alternatives besides Woahink Lake. Siltcoos Lake to the south is limited in its residential use, and groundwater resources in the Dunes City area are limited by supply and water quality issues.

[OAR 690-315-0020(3)(h)]

15. Was the delay in the timely completion of this water development project and/or timely application of water to full beneficial use caused by any additional government requirements, other than the conditions contained within the permit, which significantly delayed the completion and perfection of this right? (Explain in detail, including how much time did this delay the project; list dates.)

The delay in timely application was not caused by additional government requirements outside of the permit conditions.

[OAR 690-315-0020(3)(h)]

16. Describe any unforeseen events which contributed to the delay of completion of this project that you had no control over. (Explain in detail what the unforeseen events were (i.e. health issues, natural disaster) and how much time was spent addressing the unforeseen events.)

Early development of S-33923 was complicated by several failed attempts to form a water district and water system by public referendum. The three referendums delayed the development of a water system for at least 15 years. In the meantime, individuals were beginning to construct their own diversions in Woahink Lake, which were added to the permit in the 2005 transfer. This fundamentally changed the way in which the Dunes City water system developed. Now, all water use in the City is under S-33923 through the 218 approved PODs.

As stated in the 2018 WMCP, a City staff walk-out in 2007 further delayed the development and documentation of water use through these many PODs. The City has improved their water use monitoring and reporting systems in recent years, and new meters are now being installed to improve and increase meter checking. However, the process of starting the meter upgrades and addressing the collection of fish screening information for the PODs was delayed in 2020 and 2021 by the effects of COVID-19 on the City office and staff. Restrictions on the number of staff allowed in the office at one time slowed progress, and the delivery of the 200 new radio read meters was delayed.

Furthermore, the effects of COVID-19 caused the City to devote significant time and resources to considering and applying for support grants but ended up not being eligible for assistance.

[OAR 690-315-0020(3)(h)]

17. Describe any additional reasons why the construction was not completed, and/or water was not beneficially used within permit time limits. (Provide supporting information for the reason(s) that best fits your circumstances.)

Construction and beneficial use within the permit conditions is close to completion. The only remaining conditions to be met are the metering of a few remaining PODs and accurate assessment of the fish screening status. This extension is requested to allow time for the related permit amendments to S-44501, for coordination with the OWRD on procedures for the claim

of beneficial use of 200+ PODs, for installation of new meters, and for coordination with ODFW to ensure the fish screening in place for the majority of PODs meets their satisfaction.

RECEIVED

AUG 30 2021

OWRD

[OAR 690-315-0020(3)(m)(n)]

18. Provide any other information you wish OWRD to consider while evaluating your Application for Extension of Time.

As described in the 2018 WMCP, leaders of the City of Dunes City are not inclined to expand the UGB or promote significant population growth within the area. Future population growth and corresponding water demand increases are expected to remain gradual.

RECEIVED

SEP 27 2021

[OAR 690-315-0040(2)(f)]

19. Will the income or use of the water project provide a fair and reasonable return on your investment? (Explain in detail)

OWRD

The proposed work left to be completed during the extension period does not include water system infrastructure that would require a cost-benefit analysis. The remaining time will be used primarily for metering and to complete other permit compliance actions related to the completion of beneficial use under this permit.

[OAR 690-315-0040(4)(d)]

20. Describe in detail if there are other economic interest, beyond those of the permit holder, which are dependent upon the completion of this project. (Who will be effected and how?)

Though the City is the holder of this permit, none of the PODs are City diversions. All PODs are either individual residences or small community systems within the City UGB. All of these water users are dependent upon the maintenance and completion of this water right project.

Attach permit, and documentation to the application

I, City of Dunes City
(Name of applicant)
of Dunes City
(Mailing address)
State of Oregon, do hereby make application for a permit to appropriate the following described public waters of the State of Oregon, **SUBJECT TO EXISTING RIGHTS:**

If the applicant is a corporation, give date and place of incorporation _____

1. The source of the proposed appropriation is Woahink Lake
(Name of stream)
_____, a tributary of _____

2. The amount of water which the applicant intends to apply to beneficial use is 1.4
cubic feet per second.
(If water is to be used from more than one source, give quantity from each)

3. The use to which the water is to be applied is domestic supplies
(Irrigation, power, mining, manufacturing, domestic supplies, etc.)

4. The point of diversion is located 640 ft. N and 180 ft. W from the S.E.
(N. or S.) (E. or W.)
corner of Section 22, T19S, R12W, W.M.
(Section or subdivision)

(If preferable, give distance and bearing to section corner)

(If there is more than one point of diversion, each must be described. Use separate sheet if necessary)

being within the S&E S&E
(Give smallest legal subdivision) of Sec. 22, Tp. 19S
(N. or S.) (E. or W.)

R. 12W, W. M., in the county of Lane
(N. or W.)

5. The pipe line to be water distribution system
(Main ditch, canal or pipe line) (Ditch or feet)
in length, terminating in the _____ of Sec. _____, Tp. _____
(Smallest legal subdivision) (N. or S.)
R. _____, W. M., the proposed location being shown throughout on the accompanying map.
(N. or W.)

DESCRIPTION OF WORKS

Diversion Works—

6. (a) Height of dam _____ feet, length on top _____ feet, length at bottom _____ feet; material to be used and character of construction _____
(Loose rock, concrete, masonry, rock and brush, timber crib, etc., roadway over or around dam)

None required

(b) Description of headgate _____
(Timber, concrete, etc., number and size of openings)

None required

(c) If water is to be pumped give general description 2 - 10 h.p. turbine
(Size and type of pump)
type electric pumps, 300 gpm @ 120 T.D.H.
(Size and type of engine or motor to be used, total head water is to be lifted, etc.)

*A different form of application is provided where storage works are contemplated.

**Application for permits to appropriate water for the generation of electricity, with the exception of municipalities, must be made to the Hydroelectric Commission. Either of the above forms may be secured, without cost, together with instructions by addressing the State Engineer, Salem, Oregon.

Canal System or Pipe Line—

7. (a) Give dimensions at each point of canal where materially changed in size, stating miles from headgate. At headgate: width on top (at water line) None required feet; width on bottom _____ feet; depth of water _____ feet; grade _____ feet fall per one thousand feet.

(b) At _____ miles from headgate: width on top (at water line) _____ feet; width on bottom _____ feet; depth of water _____ feet; grade _____ feet fall per one thousand feet.

(c) Length of pipe, 22,000 ft.; size at intake, 10 in.; size at 1,000 ft. from intake 8 in.; size at place of use 6 in.; difference in elevation between intake and place of use, 160 ft. Is grade uniform? No Estimated capacity, _____

Water Rights Application
Number S-45456

**Final Order¹
Extension of Time for Permit Number S-33923**

RECEIVED

SEP 27 2021

Application History

On NOVEMBER 22, 2002, the CITY OF DUNES CITY submitted an application to the Department for an extension of time for permit number S-33923. The Department issued permit number S-33923 on APRIL 9, 1969. The permit called for completion of construction of the water development project by OCTOBER 1, 1971, and complete application of water to the full beneficial use by OCTOBER 1, 1972. In accordance with OAR 690-315-0050(2), on MARCH 4, 2003, the Department issued a Proposed Final Order proposing to extend the time to complete development of the water development project and the time to fully apply water to beneficial use to OCTOBER 1, 2022. The protest period closed APRIL 18, 2003, in accordance with OAR 690-315-0060(1). No protest was filed.

OWRD

The applicant has demonstrated good cause for the permit extension pursuant to ORS 537.230, 537.248, 537.630, 539.010(5) and/or OAR 690-315-0040(2).

At time of issuance of the Proposed Final Order the Department concluded that, based on the factors demonstrated by the applicant, the permit may be extended subject to the following conditions:

CONDITIONS

1. **Fish Screens**
The permit holder must install fish screens at each point of diversion under Permit #S-33923, unless the Oregon Department of Fish and Wildlife provides a letter that determines fish screens are not necessary.
2. **Progress Report Checkpoints**
In accordance with OAR 690-315-0050(6), the permittee must submit a written progress report to the Department by October 1, of the years 2008, 2013 and 2018. The report must be received by the Department not sooner than 90 days prior to the due

Appeal Rights

Under the provisions of ORS 536.075, the applicant may appeal this order by filing a petition for review in the Circuit Court for Marion County or the circuit court for the county in which the applicant resides or has a principal business office. The petition for review must be filed within 60 days after the date this order is served. ORS 183.484.

date. The permittee's report must describe in detail the work done each year since the last extension was granted or the last progress report submitted. The report shall include:

- a) The amount of construction completed;
- b) The amount of beneficial use of water being made, including the total volume of water used, water used relative to the specific authorizations (types of use, acres irrigated, etc.) contained in the permit, and the percent of the total allowable water use that this represents;
- c) A review of the permittee's compliance with terms and conditions of the permit and/or previous extension; and
- d) Financial investments made toward developing the beneficial water use. The Department will review the progress report to determine whether the permittee is exercising diligence towards completion of the project and complying with the terms and conditions of the permit and extension.

The Department will review the progress report to determine whether the permittee is exercising diligence towards completion of the project and complying with the terms and conditions of the permit and extension.

Failure to submit a progress report by the due date above may jeopardize continued development under the permit.

The Department will take into consideration annual reports submitted under OAR Chapter 690, Division 86 or ORS 537.099, and any other report that demonstrates diligence.

Other reports, however, are not a substitute for the progress reports and anything submitted must clearly show that diligence towards perfecting the water right permit is being attempted.

If the Department finds that diligence is questionable, the Department may:

- a) request the permittee to submit additional information with which to evaluate diligence; or
- b) apply additional conditions and performance criteria for perfection of the right; or
- c) cancel the undeveloped portion of the permit pursuant to ORS 537.260 or 537.410 to 537.450. The Department will grant the permittee a hearing on the cancellation, if one is requested.

In determining whether the permittee has been diligent, the Department will consider any information submitted to the Department by the permittee and any information submitted during the 30-day public comment period following public notice of submittal of the progress report.

If information is received through the public notice process indicating that the applicant has not been diligent toward completing the project, and if the director determines there are significant disputes related to the use of water, the Department will conduct a hearing.

Order

The extension of time for Application Number S-45456, Permit Number S-33923, therefore, is approved. The deadline for completing construction is extended to OCTOBER 1, 2022. The deadline for applying water to full beneficial use is extended to OCTOBER 1, 2022.

FINAL ORDER

RECEIVED

SEP 27 2021

OWRD

ORS 537.211 establishes the process in which a water right permit holder may submit a request to change the point of diversion and/or place of use authorized under an existing water right permit.

Applicant

City of Dunes City
P. O. Box 97
Westlake, Oregon 97493

Findings of Fact

1. City of Dunes City, filed an application to add additional points of diversion under Permit 33923. The Department assigned the application number T-9854.
2. The permit to be amended is as follows:

Permit: 33923, in the name of City of Dunes City
Use: Domestic use
Priority Date: October 7, 1968
Quantity: 1.4 cubic feet per second
Source: Woahink Lake, a tributary of Woahink Creek
Date Of Complete Application of Water: October 1, 2022

Authorized Point of Diversion:

Township		Range		Meridian	Sec	¼ ¼		Location
19	S	12	W	W.M.	22	SE	SE	640 feet North and 180 feet West from the SE Corner of Section 22.

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-080 and OAR 690-01-005 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. Notice of the application for permit amendment was published pursuant to ORS 540.520(5). No comments were filed in response to the notice.

5. The change would not result in injury to other water rights.

6. The change does not enlarge the permit.

7. The change does not alter all other terms of the permit.

Conclusion of Law

The additional points of diversion proposed by Permit Amendment Application T-9854 are consistent with the requirements of ORS 537.211.

Now, therefore, it is ORDERED:

The change and subsequent use of water shall be subject to the following conditions:

1. The combined quantity of water diverted at the proposed additional points of diversion, together with that diverted at the old point of diversion, shall not exceed the quantity of water lawfully available at the original point of diversion.
2. Prior to appropriating water from the proposed points of diversion, the water user shall install in-line flow meters, or other suitable devices for measuring and recording the quantity of water diverted. The type and plans of the measuring devices must be approved by the Department prior to beginning construction. The device shall be installed under the general supervision of the Department, and the water user shall ensure that the measuring and recording device is operational at all times. The permittee shall allow the watermaster access to the meter or measuring device; provided, however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
3. The permittee shall monitor and report the monthly cumulative water use from individual meters to the Department. If the monthly reports do not adequately assure the Department that the permit is not being used in accordance with the terms of the water right, then the Department shall inform the permittee of the deficiency and the permittee shall address any deficiency to the satisfaction of the Director. The permittee is responsible to assure that the permit is being used in accordance with the terms of the water right.
4. Water shall be acquired from the same surface water source as the original point of diversion.

5. All other terms and conditions of Permit 33923 remain the same.
6. Permit 33923, in the name of City of Dunes City, is amended as described herein.

Dated at Salem, Oregon this 2nd day of December, 2005.

I. INTRODUCTION

Permit No. S-44501, issued by the Oregon Water Resources Department on November 14, 1979, provided that the construction of a municipal water system for Dunes City (City) would be completed by October 1, 1981, and the water applied to a beneficial use by October 1, 1982. At the time, the City Council contemplated the formation of a water district as provided under Oregon Revised Statutes and, consequently, referred the question of forming a water district to the voters at the next regularly scheduled general election. The question failed passage by the voters. The same or similar question was posed to the voters of Dunes City on two additional occasions and, again, both times the measure failed.

In the meantime, applications for extensions of the time in which the construction would be completed and the water put to a beneficial use were filed by the City, with the most recent extensions being granted until October 1, 2048 by Final Order entered August 15, 2014. The requests for extensions, however, failed to request an extension of time within which to prepare, approve and submit the mandated Water Management and Conservation Plan (WMCP) for the water usage under Permit No. S-44501. Consequently, Dunes City is required to submit this Water Management and Conservation Plan (WMCP) to address a system that does not exist and for which no water is supplied.

Lane County is an affect local government as defined under ORS Chapter 268 and on April 18, 2018, a copy of this document was provided to Lane County for consideration and comment. No comments were received.

II. PROPOSED WMCP UPDATE SCHEDULE

This WMCP shall be updated every TEN (10) years. Thus, pursuant to OAR 690-086-0125(6), this WMCP shall be updated on or before **AUGUST 15, 2027**, provided, however, that the City has not withdrawn or otherwise divested itself in the City's interest in Permit No. S-44501.

III. WATER SUPPLIER DESCRIPTION

A. The water supplier for purposes of this WRCP is a municipal corporation of the State of Oregon. The source of the water is a maximum of 1.5 cubic feet per second (c.f.s.) from Woahink Lake, a Tributary of Woahink Creek, for Municipal Use.

B. Current Sources of Water and Service Area and Population Served.

1. Currently, there is no service area and no populations are being served under Permit No. S-44501.

2. The City also holds Permit No. R-14131 for storage of 410 acre feet (a.f.) of water each year in Woahink Lake under certain conditions. Perfection of this storage right has been extended to October 30, 2031. This storage right is not currently being exercised.

3. The City also holds Permit No. S-33923 for the diversion of 1.4 c.f.s. for domestic use expanded. That permit was amended by Order T-9854 approved December 2, 2005, which allows the City to “share” the surface water right usage granted by Permit No. S-33923 with individual property owners associated with the points of diversion identified in T-9854. To date, there are 141 points of diversion currently in use, including three (3) community water systems that serve a total of 130 homes, and two (2) RV parks. Individual property owners, at their own cost and expense, install pumps and pipes and any water treatment facilities they desire. The City is not responsible for the quality or quantity of available water. The City installs meters approved by the Watermaster and individuals are required by City Code to provide monthly meter readings. Additionally, the City reads the meters annually and reports the usage to the State in December of each calendar year. In 2016, the reported usage was 26,246,315 gallons per year or .11 c.f.s.

Until such time as the full 1.4 c.f.s. granted under this permit is placed to a beneficial use, the City does not, at this time, contemplate expanding its uses to include amounts set out in other permits. Since an estimate is required for this document, the best guess would be around 2050. Perhaps at that time the ballot question required to create a water district for purposes of installing a City-wide municipal water system might be approved, which time the City can move forward with the design and installation of the City-wide municipal water system as was originally intended by the founding fathers (and mothers) of the City.

The population of Dunes City in 2017 was 1316. This year’s population was estimated by Portland State University to be 1326, an increase of .075%. Dunes City has been advised by the Oregon Department of Land Conservation and Development that any requests to expand its

Outlet Control Structure on Woahink Lake

Urban Growth Boundary will be denied until such time as Dunes City repeals its current Code provisions that require lots to be an acre or greater in size. At this time, then, the City has no intentions of expanding its urban growth boundary or developing commercial zoning districts to encourage industry and, in fact, the City’s Comprehensive Plan expresses that additional growth is discouraged.

That position, of course, may change in the future. The contemplated service area, at full build out – to be served by the system is found in Appendix B.

4. The City also holds Permit No. S-54405, approved June 21, 2007, for the diversion of an additional 410 a.f. from Woahink Lake for delivery to parcels located in the points of diversion identified in the permit, for domestic uses expanded and for stream flow augmentation. At this time the entirety of the water right is remaining in the stream for streamflow augmentation as the storage right under Permit No. R-14131 is not being exercised.

C. Assessment of Existing Water Supplies

Woahink Lake is an exceptionally clear lake. With a surface area of about 800 acres and a maximum depth of about 69 feet, the lake is highly regarded as a recreational area. Approximately 5.47 square miles of adjacent land contributes drainage to the lake. In addition, approximately two square miles of sand dune area are suspected to contribute subsurface recharge to the lake. The water from Woahink Lake is reliably of exceptionally high quality.

During all but the months of July, August and September, large quantities of water are discharged from Woahink Lake. Summer discharges from the lake are much more limited, however. The lowest recorded discharge from the lake is 1.6 c.f.s. This is probably somewhat in excess of the actual low flow.

The State Game Commission (now Oregon Department of Fish and Wildlife) in 1965 requested that a minimum summer discharge of 5 c.f.s. be maintained from Woahink Lake. The City, too, is interested in maintaining adequate instream flows for fish as recreational fishing and boating are the largest, and currently only, major commercial activity taking place within the City limits. In an effort to ensure adequate supply for both domestic uses and instream flows, the City applied for the storage right under Permit R-14131, and the additional 410 a.f. use in Permit No. S-54405.

In summary, Woahink Lake has excellent water. By manipulating the water level within a four inch range, sufficient quantities of water from the lake can be assured to meet domestic use expanded and instream flow demands during all but the driest of water years.

D. Present and Historic Water Use

There is no present or historic water use associated with Permit No. S-44501.

E. Supplier Water Rights Inventory Table. Please see Chart 1, found on page 8 of this WRCP.

F. Environmental Resource Issues of Concern. Please see Chart 2, found on page 9 of this WRCP. Dunes City does not hold water rights from Siltcoos Lake and does not intend to utilize Siltcoos Lake or Siltcoos River water to meet its domestic use expanded supply demands except, perhaps, in the case of an emergency as described in Section V of this WRCP. Neither Woahink Lake nor Woahink Creek are identified as critical habitat for sensitive, threatened, or

SEP 27 2021

AUG 30 2021

OWRD

OWRD

endangered (ST&E) species, although species of salmon are known to pass through Woahink Creek and Woahink Lake to spawn in seasonal creeks and streams that feed Little Woahink Lake, a man-made reservoir. The Salmon and Trout Enhancement Program (STEP) volunteers hand transfer spawning salmon from Woahink Lake into Little Woahink Lake during the annual fish spawn.

G. Water Quality Limited Sources. Woahink Lake does not appear on the Department of Environmental Quality Integrated Report Assessment Database and 303(d) List. There are no water quality limited designations.

H. Customers Served and Water Use Summary. There are no customers served under Permit S-44501.

I. Interconnections with Other Systems. There are no existing or planned interconnections with other water systems.

J. System Schematic. There is no water supply system installed at this time. At the time of filing of the application that led to the issuance of Permit S-44501, the City submitted the schematic for the proposed system. This report also included other information at the time of its preparation in June of 1971, such as projected populations, maximum day water demands, estimated water system demands, and other pertinent information. A copy of the report is attached hereto as Appendix A.

K. Quantification of System Leakage. There is no system installed or in use so there is no system leakage to report at this time.

IV. WATER CONSERVATION ELEMENT

OWRD

OWRD

A. **Water Use Measurement/Reporting Program.** There are no facilities or usage associated with Permit No. S-44501, however, at such time as the system is fully installed and operational, a measurement program will be designed to comply with all rules set forth by Oregon Water Resources Department (OWRD) and reports will be submitted as required.

B. **Annual Water Audit.** There are no facilities or water usage associated with Permit No. S-44501, however, at such time as the system is fully installed and operational, annual City-wide audits will be done by the City in a manner acceptable to and mandated by OWRD.

C. **Full Metering of the System.** As the system proposed for usage of the water rights associated with Permit No. S-44501 is developed, all diversion points and all customer connections will be metered.

D. **Meter Testing and Maintenance Program.** At such time as the system proposed for usage of the water rights associated with Permit No. S-44501 is developed, meters will be inspected, tested and calibrated every two years or upon such other time table as may be recommended by the manufacturer. If a break or obvious malfunction occurs, maintenance and repair will be done as soon as possible. As monetary constraints allow and as new technology develops, meters will be replaced with newer models.

E. **Rate Structure Based On Quantity of Water Metered.** At such time as the system proposed for usage of the water rights associated with Permit No. S-44501 is developed and operational, customers will be billed a flat monthly rate plus a per gallon usage rate based on an inclining block rate structure.

F. **Leak Detection Program.** At such time as the system proposed for usage of the water rights associated with Permit No. S-44501 is installed and operational, a leak detection audit will be conducted at the end of each year by comparing metered amounts of water diverted to metered amounts of water used. If a greater than 10% system loss is calculated, efforts will be taken to identify where the system losses are occurring and repairs or system changes made as soon as practicable.

G. **Public Education Program.** At such time as the system proposed for usage of the water rights associated with Permit No. S-44501 is installed and operational, the City will include water saving tips and brochures in its customer bills, on the City's website, in its newsletters, and at City Hall.

H. **Other Implemented Conservation Measures.** The City occasionally provides basic water conservation tips and information in its newsletters, just on general principal.

V. WATER CURTAILMENT ELEMENT

A. Intent. Water curtailment plans are designed to minimize the impacts of a short-term emergency water shortage by reducing demand and finding alternative supplies. Prior to diverting any water under Permit S-44501, Dunes City will develop a water curtailment plan with at least three (3) stages of alert based on supply levels that are measurable. Once the curtailment plan is developed, Dunes City, again prior to any diversion of water under Permit S-44501, will formally approve and/or adopt the City's curtailment plan through appropriate City Council action.

B. Historical Data. There have been no known deficiencies experienced for Woahink Lake water users in at least the last Twenty (20) years. Woahink Lake is Sixty-Nine (69) feet deep at its deepest point and is fed by both surface run off and underground springs. Dunes City provides for monthly (weather permitting) water quality testing of Woahink Lake in conjunction with and under the training and supervision of the Oregon Department of Environmental Quality. The Quality Assurance Project Plan (QAPP) approved by the Department of Environmental Quality and the Dunes City Council, sets forth the manner, methods and mechanisms for such water testing to be conducted.

C. Declaration of Water Emergency. In an event where insufficient water resources are available to meet demand of customers (calculated as number of customers x 75 gallons per person per day, divided by 646,316.883), and where the situation is likely to last more than Three (3) days (based upon standard weather forecasts), as calculated by the City Administrator, the Mayor or the President of the City Council may enter a Declaration of Water Emergency. Such declaration will immediately cause the implementation of Emergency Conservation Measures and notification to the public and customers, by regular mail, telephone, and public service announcements on the radio and in local newspapers, as well as email if available, of implementation of Emergency Conservation Measures and what those measures entail.

D. Emergency Water Conservation Measures. In all cases of emergency water shortage, regardless of the cause, the first action will be implementation of emergency conservation measures. Such measures include immediate discontinuance of outdoor water use including landscape watering, power washing, pet washing, etc., and implementing the monetary fine structure in Dunes City Code for failure to obey. In addition, customers will be encouraged to utilize bottled water for cooking and drinking, to restrict clothes washing and bathing, and to only flush solid wastes.

E. Drought. During drought, emergency conservation measures will be implemented as listed in paragraph C. above. In extreme drought, water will be trucked in for use by residents. In such case, the truck will be located in the parking lot at City Hall. Residents, with their own containers in hand, must travel to City Hall to have their containers filled. Home-bound residents may ask neighbors to retrieve water for them by providing

written permission, delivered to the City. In any event, no person will be permitted more than Seventy-Five (75) gallons of water per person, per day.

F. **Contamination.** In the event Woahink Lake becomes contaminated as a result of a terrorist act, a motor vehicle accident, or some other reason, a variety of delivery options would be explored. Ideally, those options that involve entering into Memorandums of Understanding or other written agreements would be done ahead of time and would be triggered by the entry of a Declaration of Emergency by the Mayor or President of the City Council. Those delivery options include:

- a. Entering into a Memorandum of Understanding with the Oregon Water Services, Inc., to utilize a portion of their treated water drawn from Siltcoos Lake;
- b. Making application for use of various local springs for emergency purposes only, or entering into Memorandums of Understanding with the holders of permits and/or certificates to such springs;
- c. Trucking in water on a temporary basis, either with the help of the Siuslaw Valley Fire District or a private purveyor; or
- d. Taking the action historically used by the City, that is, allowing residents to fend for themselves but with the added benefit of not charging them for the time in which they do without water delivery.

G. **Delivery System Failure.** Since, at the time of this writing, all delivery systems are under the operation and control of the individual property owners, should their delivery system fail, the property owner is responsible for repairs and/or replacement of the elements of the delivery system.

H. **Firefighting.** The Siuslaw Valley Fire and Rescue has the ability to draw from local lakes and streams in emergency situations.

VI. WATER SUPPLY ASSESSMENT

Current and Future Usage

As discussed on pages 5 and 6 of this document, the service area to be served by this permit is restricted to the City limits of Dunes City, consisting of portions of Sections 11, 13, 14, 15, 22, 23, 24, 26, 27, and 34, all in Township 19 South, Range 12 West, as more specifically identified on Permit S-33923 (T-9854) and Appendix B hereof. According to Portland State University's annual calculation done on behalf of the State of Oregon, the current population of the City is 1326. Growth projections are estimated to be less than 1% per annum. At this time, there are 195 points of diversion in use under S-33923 (T-9854), which represents 316 homes. Although a complete analysis hasn't been finalized, current research identifies that 163 homes are being served by wells, and 272 homes are served by a State water right permit from either Woahink or Siltcoos Lake, or unnamed streams or springs. While research as to water rights on Woahink is nearing completion, Siltcoos Lake examination has only just begun.

Unfortunately, due to a walk-out of office staff in 2007, water usage under permit S-33923 is sketchy at best. It was not until 2009 that any attempt was made to identify, with specificity, who was using the water and where. Annual meter readings done at that time were completed by non-professionals who, quite frankly, didn't know what they were doing. Many mistakes were made. Data entry was not consistent. Obvious mistakes in the recording of meter readings were "estimated". Consequently, current City officials have little faith in the historic usages reported to the State. The last two years, however, readings are more reliable. Usage for 2016 was reported at 13,550,731 gallons, or .06 cfs. Based upon this usage, the City has current sources of water that will serve the City for at least the next ten (10) years, and possibly even twenty (20) years. Increases in population will result in an increase in use of the City's water right, as no further State water right permits are issued on Woahink Lake and Siltcoos is limited strictly to residential use. In addition, wells are only an option in certain locations, given the close proximity to lakes, streams and the ocean. The City is currently seeking additional alternative sources, not so much due to need for additional water sources, but to facilitate water delivery to all areas of the City that are currently separated by County lands and geographical features that make water delivery through a City-wide system more difficult and expensive.

The City does not currently expect to fully exercise of all the water rights and permits currently held for more than 50 years. Historically, including to today, the City leaders are not inclined to expand their City limits, not being interested in growth or commercial development, but more interested in maintaining the quiet, small, fishing camp-type/retirement rural community atmosphere the City now maintains. Given recent legislative actions, however, it appears the State has other, conflicting, visions. Given Dunes City's limited population, it is not currently required to allow two residents on every property – which it could not do anyway, as the holding capacity of the soil for individual septic systems would not be sufficient. The City may be forced to cross that bridge in the future, but for now, we are able to maintain our minimum 1.0 acres lot sizes with septic systems on every parcel.

Short-term Emergency Water Supply

To assess the likelihood that a water supplier may experience a short-term emergency water supply shortage in the future, suppliers are required to consider the performance of their water system over the last Ten (10) years. Since the system is not yet installed or operational, no assessment can be made at this time.

A. There were no deficiencies experienced in the system within the last Ten (10) years, because there was no system in place or operational. That having been said, there were also no deficiencies in the source water, that is, Woahink Lake for a period of time in excess of Ten (10) years.

B. The limitation of the system is the limitation of the surface water right permit, which is 1.5 c.f.s.

C. The source water is vulnerable to contamination by way of motor vehicle accident on one of the many roadways that run adjacent to the lake, including Highway 101; by septic and other point-source and non-point source pollution activities that occur daily; by catastrophic events such as earthquake and tsunami; and by acts of terrorism. Paragraph V.(F) above describes activities to take place in the event of contamination of the source water for all but non-point source and point-source activities. Dunes City has adopted and is enforcing a septic system inspection Code that mandates inspections of septic systems within the City limits on a periodic basis. A copy of that Code is attached hereto as Appendix C.

VII SCHEDULE OF UPDATES

A. Dunes City will periodically update this Water Management and Conservation Plan to take into consideration growth and water use impacts and changes that have occurred, including policy changes, over each period between reviews. Such reviews and updates will occur not less than every Ten (10) years, as mandated by OAR.

ORDINANCE NO. 231-A

AN ORDINANCE ADDING CHAPTER 51, ENTITLED "SHARED DOMESTIC WATER RIGHT" TO THE DUNES CITY CODE OF ORDINANCES; REPEALING ORDINANCE NUMBERS 165 AND 192, CONFIRMING THE APPEAL OF ORDINANCE NUMBER 185, AND OTHER MATTERS PROPERLY RELATING THERETO.

WHEREAS, the Dunes City Council adopted Ordinance No. 165 on November 13, 2003 which authorizes the sharing of the City's domestic water right and establishing application fees therefore; and

WHEREAS, the Dunes City Council adopted Resolution 01-08-04(A) on January 8, 2004, which established definitions, and established and adopted application fees and administrative charges; and

WHEREAS, the Dunes City Council adopted Ordinance No. 192 on April 12, 2007, which established penalties for failure to pay administrative water permit fees or to report water meter readings in a timely manner; and

WHEREAS, the Dunes City Council adopted Resolution 11-10-04 on November 10, 2004, which replaced and repealed Resolution 01-08-04(A) as to definitions, application fees and administrative charges; and

WHEREAS, the Dunes City Council adopted Resolution 06-14-07(A) on June 14, 2007, which amended the annual administrative fee for water right permit holders; and

WHEREAS, neither Ordinance No. 165 nor Ordinance 192, nor any of the adopted Resolutions identified a location within the Dunes City Code of Ordinances wherein such provisions should be codified; and

WHEREAS, the City Council wishes to identify and codify the provisions of its Shared Domestic Water Right program within the Dunes City Code of Ordinances;

WHEREAS, a review of the implementation of the Dunes City Shared Domestic Water Right Program has revealed numerous problems and inequities;

WHEREAS, the City Council desires to amend the terms of the program to ensure its implementation is fair and equitable to all Dunes City residents;

NOW, THEREFORE, THE CITY OF DUNES CITY ORDAINS AS FOLLOWS:

Section 1. Title V., entitled Public Works, of the Dunes City Code of Ordinances is amended by adding the following Chapter 51:

Chapter 51 Shared Domestic Water Right Program

§51.10 *Established.*

The Dunes City Shared Domestic Water Right Program is hereby established whereby Dunes City agrees to share its domestic water right assigned Oregon Water Resources Department Permit No. S33923 (Application No. 45456) for the diversion of water from Woahink Lake.

§51.20 *Definitions.*

For the purposes of this section, the following definitions will apply unless the context clearly indicates or requires a different meaning:

APPLICANT. An individual owning property in Dunes City who applies to Dunes City for a permit to share Dunes City's domestic water right permit for diversion of water from Woahink Lake. Each applicant shall provide legal access, by easement appurtenant to the land or by fee simple absolute, for the water line between the point of diversion and the point of use.

DOMESTIC USE. Water used for all domestic purposes including, but not limited to, human and pet consumption, bathing, food preparation, and personal and household hygiene, and for the irrigation of not more than one-half (1/2) acre of landscaping.

POINT OF DIVERSION. The surveyed location of where water is diverted from Woahink Lake.

POINT OF USE. The surveyed location of where water diverted from Woahink Lake is actually used.

STANDARD WATER METER. The standard water meter shall be "5/8 x 3/4" diameter with a minimum 12" rectangular water box or as otherwise designated by Dunes City.

SURVEY. Creating a longitudinal and latitudinal position for a point of diversion and a point of use to a survey grade accuracy.

WATER DISTRIBUTION COMPANIES. A for profit corporation or other entity, including home owner associations, that provides domestic water service to more than Twenty (20) homes.

WATER METER. An instrument for measuring the volume of water flowing through a point during a fixed period of time.

§51.30 Prohibitions.

Drawing and using Woahink Lake water without a properly issued State permit or without an approved permit to participate in Dunes City's Shared Domestic Water Right Program is prohibited.

§51.40 Application.

A. New Applicant. A property owner desiring or required by the State of Oregon to apply for a permit to utilize Dunes City's domestic water right permit for diversion of water from Woahink Lake to serve property within Dunes City who has not already been diverting water from Woahink Lake without a permit, must make application to Dunes City on forms provided by Dunes City. The application must be accompanied by an application fee as set by the City Council and include a survey prepared by an Oregon licensed surveyor designating each point of diversion and each proposed place of use. No more than two (2) points of diversion per tax lot will be permitted.

B. Existing Non-Permitted Applicant. A Property owner desiring or required by the State of Oregon to apply for a permit to utilize Dunes City's domestic water right permit for diversion of water from Woahink Lake to serve property within Dunes City who has been diverting water from Woahink Lake without a permit, must make application to Dunes City on forms provided by Dunes City. The application must be accompanied by an application fee and penalty as set by the City Council and include a survey prepared by an Oregon licensed surveyor designating each point of diversion and each proposed place of use. No more than two (2) points of diversion per tax lot will be permitted.

C. Reservation Applicant. A property owner desiring to reserve the right to utilize Dunes City's domestic water right permit for diversion of water from Woahink Lake to serve property within Dunes City upon which future development will take place must make application to Dunes City on forms provided by Dunes City. The application must be accompanied by an application fee as set by the City Council. Prior to construction of any residential or commercial building upon the property, a survey must be prepared by an Oregon licensed surveyor and submitted to Dunes City designating each point of diversion and each proposed place of use. No more than two (2) points of diversion per tax lot will be permitted.

D. Water Distribution Companies. A for profit corporation, or other entity, including a homeowners' association, that provides domestic water service to greater than THREE (3) residences who desires to apply for a permit to utilize Dunes City's domestic water right permit for diversion of water from Woahink Lake to serve property within Dunes City who has not already been diverting water under an existing Dunes City

domestic water right permit must make application to Dunes City on forms provided by Dunes City. The application must be accompanied by an application fee as set by the City Council and include a survey prepared by an Oregon licensed surveyor designating each point of diversion and each proposed place of use. No more than two (2) points of diversion per tax lot will be permitted.

§51.45 Agreement Required; payment of Fees.

Any approved Applicant for participation in the Dunes City Shared Domestic Water Supply must sign an Agreement with the City for use of the Dunes City water right under the terms of the City's State permit. The executed Agreement will be recorded with the Lane County Recorder and will thereafter run as an appurtenance to the land. Costs and fees associated with the preparation and recording of the Agreement shall be collected at the time of execution of the Agreement and shall be paid by the Applicant.

§51.50 Transfer of Ownership.

A. Any time a property that was granted a permit to participate in the Dunes City Shared Domestic Water Supply prior to the effective date of this ordinance is sold or otherwise transfers ownership, the new owner or owners of said property must execute a Agreement as required under Section 51.45 hereof.

B. Any time a property that has been granted a permit to participate in the Dunes City Shared Domestic Water Supply and has a recorded Agreement as described in Section 51.45 above, must file a Transfer of Ownership form with Dunes City on forms provided by Dunes City. The application must be accompanied by an application fee as set by the City Council, as well as a copy of the document that conveyed title to the property to the new owner(s).

51.50 *Fees and Costs.*

They City Council shall, by resolution, establish an application fee to cover the full expense of sharing its domestic water right with property owners and water distribution companies; said expense shall include, but may not be limited to, the application fee with the Oregon Department of Water Resources for the amendment to the City's water right, surveying expenses, legal expenditures, extension fees, recording fees and administrative costs. The City Council will also impose, by resolution, an annual fee to cover water meter reading, the maintenance of records, reporting costs and other necessary administrative costs. The City Council may also impose, by resolution, a charge for water use by water distribution companies based on volume of water used.

§51.60 *New Meters.*

From and after the date of adoption of this Code, property owners and water distribution companies issued a permit or permits to participate in Dunes City's Shared Domestic Water Right Program must install, or allow Dunes City, or its designee, to

install, metering devices to measure the volume of water being diverted to the property for domestic purposes. A meter must be installed for every point of diversion. Meters must be located in an easily accessible and visible location between the pump and the water treatment system on the outside of any structures, but in any event, the system must measure the volume of all, to the greatest extent possible, of the water used on the property for all purposes.

§51.70 *Relocation of Existing Meters.*

During its budget process, Dunes City will identify the number of inaccessible meters to be moved during the coming fiscal year. Property owners must allow Dunes City, or its designees, to enter on to the property for purposes of relocating the meters to an easily accessible and visible location on the outside of any structures. Failure to allow Dunes City access to the property may result in revocation of the permit to participate in the Dunes City Shared Domestic Water Right Program.

§51.80 *Domestic Water Quality and Quantity.*

The City does not warrant or otherwise guarantee the quality or quantity of the water diverted through the use of its domestic water right.

§51.90 *Payment of Administrative Fees.*

Payment of fees as described in §51.30 must be received by the City Recorder within thirty (30) calendar days of the mailing of invoice. The annual fee shall be increased by a sum of \$1.00 per calendar day that payment is not received after its due date. Failure to pay the annual fee within ninety (90) calendar days after its due date may result in the imposition of additional penalties and a lien against the property or properties benefiting from the water permit in accordance with the process delineated in Chapter 36 of the Dunes City Code of Ordinances.

§51.100 *Water Usage Reporting.*

A. Property owners and water distribution companies sharing Dunes City's domestic water right are responsible for reporting water usage on a monthly basis, or at intervals otherwise designated by the City. Reporting may be by telephone, personal contact, electronic message or by mail. If a property owner has not reported a meter reading within sixty (60) days of the month that it is due, the City may contract to have the meter read and the property owner billed for that service and may levy a penalty against the property owner.

B. Dunes City will contract to have the meters read once a year on residential properties not served by a water distribution company. Property owners holding valid permits must allow meter readers onto their property for purposes of reading the meters. If the meter is located in an inaccessible location, the meter readers will contact the property owners to make arrangements to have the meters read. Failure to allow Dunes

OWRD

City meter readers onto the property for purposes of reading the meters may result in revocation of the permit to participate in Dunes City's Shared Domestic Water Right Program.

§51.110 Use without a Permit

A. A penalty of One thousand dollars (\$1,000.00) per year, from and after the date of enactment of this Ordinance, is assessed against any property owner who has been drawing water from Woahink Lake without a permit to use Dunes City's Shared Domestic Water Right. This penalty is in addition to any penalty that accrued since the date of enactment of Ordinance Number 192, that is, April 12, 2003. Such penalty will be collected in accordance with the terms of Chapter 36 of the Dunes City Code. Said penalty must be fully paid at the time of application for permit to participate in Dunes City's Shared Domestic Water Right Program. Failure to pay said penalty will result in denial of the permit.

B. Property owners identified or suspected of drawing water from Woahink Lake without a Dunes City Shared Domestic Water Right Permit will be reported to the State enforcement authority for further investigation and possible disciplinary action.

Section 2. Repeal

The repeal of Ordinance Nos. 165, 185, and 192, and Resolutions 01-08-04(A), 11-10-04, and 06-14-07(A) shall not affect any action occurring before the repeal takes effect. Ordinance Nos. 165, 185 and 192, and Resolutions 01-08-04(A), 11-10-04, and 06-04-07(A) are hereby repealed.

Section 3. Effective Date

The provisions of this ordinance will become effective thirty (30) from and after the date of adoption.

ORDINANCE NO. 234

AN ORDINANCE CORRECTING ORDINANCE NO. 231-A, AND SPECIFICALLY SECTION 51.20 ENTITLED "DEFINITIONS" BY AMENDING THE DEFINITION OF WATER DISTRIBUTION COMPANIES TO COMPLY WITH OREGON STATUTE AND ADMINISTRATIVE RULES.

WHEREAS, the Dunes City Council adopted Ordinance No. 231-A on February 11, 2016 which authorized the sharing of the City's domestic water right and establishing requirements, applications, fees, costs and penalties associated therewith; and

WHEREAS, language contained in Ordinance No. 231-A which defines "Water Distribution Companies" conflicts with the definition as defined by Oregon Administrative Rule 333-061-0020; and

WHEREAS, Dunes City desires to ensure its Code provisions are compatible with State law, rules and regulations;

NOW, THEREFORE, THE CITY OF DUNES CITY ORDAINS AS FOLLOWS:

Section 1. Title V, entitled Public Works, of the Dunes City Code of Ordinances, §51.20, definition of "Water Distribution Companies" is amended to read as follows:

"WATER DISTRIBUTION COMPANIES. A for-profit corporation or other entity, including homeowner associations, the has fifteen (15) or more service connections used by year-round residents, or that regularly serves 25 or more year-round residents."

Section 2. Title V, entitled Public Works, of the Dunes City Code of Ordinances, §51.40(D), is amended to read as follows:

"Water Distribution Companies. A for profit corporation, or other entity, including homeowner associations, that has fifteen (15) or more service connections used by year-round residents, or that regularly serves twenty-five (25) or more year-round residents, that desires to apply for a permit to utilize Dunes City's domestic water right permit for diversion of water from Woahink Lake to serve property within Dunes City and that has not already been diverting water under an existing Dunes City domestic water right permit, must make application to Dunes City on forms provided by Dunes City. The application must be accompanied by an application fee as set by the City Council and include a survey prepared by an Oregon licensed surveyor designating each point of diversion and each proposed place of use. No more than two (2) points of diversion per tax lot will be permitted."

COMMUNICATIONS MEMORANDUM

RECEIVED

SEP 27 2021

OWRD

To: Dunes City Water Right Compliance Project
Communications File

From: Ian Godwin, *GIT*

Date: May 25, 2021

Subject: Summary of Phone Call with ODFW Regarding Permit S-33923 Fish Screening

Ian Godwin reached out to the Oregon Department of Fish and Wildlife (ODFW) fish screen shop for Dunes City's region to discuss the path forward for satisfying the fish screening condition on Permit S-33923. This permit was extended in 2003 to October 1, 2022, and the extension FO placed a screening requirement on all permit points of diversion (PODs). When the permit was amended in 2005 to include 218 PODs, the condition presumably carried over to these PODs. The point of contact at ODFW was Katherine Nordholm, Fish Screens and Passage Coordinator. She passed the information along to specialists in the Salem region fish screen shop for more information. A call was scheduled with Katherine for May 25th at 8:30 am to cover the available options for meeting the permit condition.

CALL SUMMARY

Date: May 25, 2021

Time: 8:30 – 8:50

Participants: Ian Godwin (CwM) and Katherine Nordholm (ODFW)

- The call started with Katherine asking for more information on how the City of Dunes City arrived at this type of POD setup. Ian gave a brief summary of the City's water rights and development history, including the challenges to developing a centralized water system and the transfer that created the 218 PODs on Permit S-33923.
- Katherine stated that the Fish Screen Self-Certification Form is no longer in regular use by the ODFW due to frequent confusion by those filling it out.
- Katherine stated that the best path forward based on her discussions with other ODFW staff is a form of self-certification where the information is volunteered (as much as possible) by the POD-owners. The information would then be compiled in a report/binder that could be sent to the ODFW screen shop for review and approval. Information needed for each POD:
 - If a purchased screen, need the brand and model information,

- If a custom screen, need the mesh size, diameter of screen, size of pipe, and approximate rate of diversion.
- If POD-owners are unable to access the end of the diversion or do not know the information, ODFW is able to inspect screens with owner permission.
- PODs without screens will need to install an approved screen.
 - Approved off-the-shelf screens for small diversions are less than \$50,
 - Custom screens must meet the ODFW specifications.
 - There is a tax credit available for fish screen installation by landowners.
- Any PODs installed by local plumbers/pump installers/contractors that can document use of standard specs or screens do not need response from landowner, just records of the POD installation.
- ODFW is willing to help the City develop informational flyers or mailers to promote fish screening and reporting of screening information.

Katherine Nordholm agreed that the following plan of action would fit with ODFW's goals for Dunes City's fish screening requirements:

- Obtain screen installation information from local plumbing/pump contractors for as many PODs as possible to limit the dependence on landowner responses,
- Start with a voluntary information request from landowners through mailer or other mass communication clearly outlining the necessary information – include the educational flyer made with the help of ODFW to promote screening and reporting.
- Check in with ODFW to review the information obtained after the initial voluntary information request.
- If necessary, send additional information requests with incentives for response.

*Given the unusual nature of this condition and lack of precedent, OWFD *may* be willing to write a letter of approval if a significant majority of PODs are confirmed screened and approved with the process above.

Date: August 5, 2021

Time: 3:00 – 3:30

Participants: Bob Long, Jenny Thom, Ian Godwin (CwM) and Katherine Nordholm (ODFW)

OWRD

- The purpose of the call was for Katherine to gain more information on the relative roles and responsibilities of each party (the City staff, the residents, CwM, and ODFW) and the path forward for the fish screen program.
- CwM communicated that our role is as a consultant for the City to help them achieve permit condition compliance and to complete a claim of beneficial use on their domestic permit in Woahink lake. We are not participating in the field activities related to information gathering on screens, but are providing data organization and water rights support.
- The intention of the City's fish screening program is to collect as much information as possible about the number and types of screens currently in place through information request flyers, discussions with local plumbers and screen installers, and field surveys. The information that is gathered will be compiled and included in the claim of beneficial use application eventually prepared for the City's water right permit. Once these details for all, or a reasonable majority of PODs, have been compiled, the information will be presented to OWRD and ODFW for review and comment.
- Katherine will communicate directly with Jamie Mills at the City to provide support during the information gathering process and will include CwM on further communications.

Fish Screening Program - Information Request Form

AUG 30 2021

Water supply from Woahink Lake is available to the registered residents of Dunes City under the Oregon Water Resources Department water right Permit S-33923, which allows for individuals to place diversions (pump intakes) in the lake. As a condition of the City's permit, each diversion point must have a fish screen approved by the Department of Fish and Wildlife to protect native fish species that spawn in Woahink and surrounding lakes. Such approval must be acquired by October 1, 2022 to ensure that the residents of Dunes City continue to have permission to divert from Woahink Lake. **Please fill out the following information to the best of your knowledge and return this form so the City can document compliance with the fish screening condition of Permit S-33923.**

Dear Applicant,

HB2142 increased the fees for water right transactions effective July 1, 2021. The new fee for an Application for Extension of Time is \$780. Because your Application was received on August 30, 2021, the fee of \$670 is not sufficient to cover the statutory fee required by law. As a result, the Department has considered the application incomplete.

If you have any other questions please contact me at 503-979-3213.

Sincerely,

Jeffrey D. Pierceall

Dear Permit Holder:

The Water Right Services Division received your written October 1, 2018 progress report for Permit S-33923 on October 1, 2018. Receipt of the progress report was published on the Department's weekly Public Notice, dated October 2, 2018. The Department did not receive any public comment on the progress report.

After reviewing your Progress Report, the Department determined that diligence toward completion of the project and compliance with the terms and conditions of the permit and extension has been demonstrated.

As per your most recent extension, the date by which water must be applied to full beneficial use within the terms and conditions of your permit is October 1, 2022.

If you have any questions, please feel free to contact me by telephone at (503) 986-0802.

Sincerely,

Application S-45456

Permit S-33923

Progress Report Form for 2018

Report Due no later than October 1, 2018
 DO NOT SUBMIT PRIOR TO 30 DAYS BEFORE DUE DATE

RECEIVED

OCT 01 2018

OWRD

As authorized in OAR 690-315-0050(6)(a), this progress report is required in order to ensure diligence is exercised in the development and perfection of Permit S-33923. FAILURE TO SUBMIT THIS REPORT WILL MOST LIKELY RESULT IN ANY FUTURE EXTENSION BEING DENIED.

DATES	LIST ALL WORK ACCOMPLISHED and FINANCIAL INVESTMENTS For the period of time between October 1, 2013 and October 1, 2018	FINANCIAL INVESTMENT
2013-2018	Wages	38700.00
2013-2018	Meters	3350.00
2013-2018	Meter reading	7350.00
2013-2018	Insurance, Conservation & Education	6450.00
2013-2018	Preservation & maintenance of OCS	3000.00

2. Describe actions taken to comply with terms/conditions of the permit and/or previous extension.

Continued acquisition, installation, reading, recording and maintenance of water meters; staff time for the same; newsletters, meetings & newspaper articles re: water use & conservation; continue research & engineering for OCS improvements & measurement of flows. Moving forward with changing out current meters with those that can be read electronically.

3. Total number of acres irrigated to date= N/A

4. Provide the maximum rate, or duty if applicable, of water diverted for beneficial use under this permit, if any, made to date.

Maximum rate used to date= .06 cfs (cubic feet per second)

Maximum rate used to date= 21.45 gpm (gallons per minute)

Maximum Acre Feet used per year to date = 1578.77 AF

Report the rate in the same units of measurement as specified in the permit, being cfs (cubic feet per second), gpm (gallons per minute) or AF (acre-feet). Do not provide daily, monthly or annual water volume totals.

INCOMPLETE REPORTS WILL BE RETURNED. AN ANSWER IS REQUIRED IN EACH ITEM.

REFERENCE: PAST DUE Requirement for submittal of a Water Management and Conservation Plan (WMCP)

Dear Ms. Mills:

This notification is provided to you as a courtesy reminder of a requirement related to the City of Dunes City's Water Management and Conservation Plan (WMCP).

On August 15, 2014, the Oregon Water Resources Department (Department) issued a Final Order approving an extension of time for Permit # S-44501(enclosed). The final order specified that an updated WMCP meeting the requirements of OAR Chapter 690, Division 086 **must** be submitted to the Department no later than **August 15, 2017**.

It is strongly recommended that your WMCP be submitted as soon as possible to help minimize potential problems related to requesting certification of a water use permit, obtaining new water right permits or accessing water beyond any development limitations specified under an extended permit. Please remember you are currently limited to 0.0 cfs under Permit S-44501, ***any withdrawal of water beyond 0.0 cfs under Permit S-44501 may only be authorized through an approved WMCP.***

Additionally, if you are required to have a WMCP and you intend to apply for grant or loan funding from Water Project Grants and Loans (SB 839 – Water Supply Development Account), you must have an approved WMCP prior to submitting your grant/loan application as required by ORS 541.569. If you do not have an approved WMCP, your funding application will not be accepted or considered for funding.

If you have any questions related to this notification, please do not hesitate to contact me by telephone at 503-986-0919 or by e-mail at Kerri.H.Cope@oregon.gov.

Sincerely,

Kerri H. Cope

Dear Permit Holder:

The Water Right Services Division received your 2013 written progress report for Permit S-33923. Receipt of the progress report was published on the Department's weekly Public Notice, dated 5/18/2015. The Department did not receive any public comment on the progress report.

After reviewing your Progress Report, the Department determined that diligence toward completion of the project and compliance with the terms and conditions of the permit and extension has been demonstrated.

Your next written progress report for Permit S-33923 is due no later than **October 1, 2018**. The report must be received by the Department no sooner than 30 days prior to the due date.

For your convenience, I have enclosed your next *Progress Report Form*. Please calendar this October 1, 2018 due date, as no further reminders will be sent.

As per your most recent extension, the date by which water must be applied to full beneficial use within the terms and conditions of your permit is October 1, 2022. ***Failure to submit a written progress report will most likely result in any future extensions being denied.***

If you have any questions, please feel free to contact me by telephone at (503) 986-0802.

Dear Permit Holder:

On 4/24/2003, the Department issued a Final Order approving an Extension of Time for Permit S-33923. This Final Order included a condition that required the permit holder to submit a written progress report to the Department by October 1, 2008 as well as a future progress report(s) due by October 1, 2013 and 2018.

This letter is being sent to you because the Department has not yet received the progress report that was due on October 1, 2008.

For your convenience, I have enclosed a **Progress Report Form** for you to fill out and submit. In order to maintain the ability to continue developing water under this permit, you should submit your overdue progress report immediately.

As per your most recent extension, the date by which water must be applied to full beneficial use within the terms and conditions of your permit is October 1, 2022. *Failure to submit a written progress report may jeopardize continued development of your permit beyond October 1, 2022, as future extensions are evaluated on past due diligence, and consequently may not be granted.*

If you have any questions concerning this matter, you may contact me by telephone at (503) 986-0813.

Re: Permit Numbers 35664 and 33923
Notice of Intent to Appropriate
Water Under Both Permits

Dear Mr. Ward,

This firm represents Bonnie Stoetzl, current owner of the real property at 83893 Highway 101 South, Florence, Oregon which is currently appropriating water for the single family residence thereon under Certificate of Water Right Permit No. 35664. My client has recently applied for and received a license to appropriate waters from Woahink Lake under Dunes City's Water Right, permit number 33923.

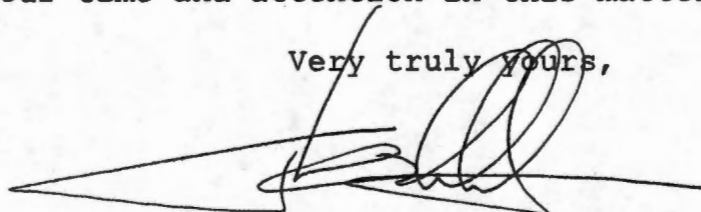

The purpose of this letter is to advise the Water Resources Department that my client intends to and will appropriate waters from Woahink Lake under both water right certificates. My client's appropriation of water under the Dunes City Water Right does not constitute abandonment or intent to abandon the water rights otherwise available under Permit No. 35664. My client will be exercising her rights under both permits so that no lapse of use will occur. Neither use should be deemed "supplemental" and not subject to cancellation for non-use under ORS 540.610.

Copies to:
Debbie C., Bob R.
 Dwight E., Tim
then file as appropriate.

BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON

In the Matter of Permit Amendment)
T-9854, Lane County, Oregon)
)

FINAL ORDER

ORS 537.211 establishes the process in which a water right permit holder may submit a request to change the point of diversion and/or place of use authorized under an existing water right permit.

Applicant

City of Dunes City
P. O. Box 97
Westlake, Oregon 97493

Findings of Fact

1. City of Dunes City, filed an application to add additional points of diversion under Permit 33923. The Department assigned the application number T-9854.
2. The permit to be amended is as follows:

Permit: 33923, in the name of City of Dunes City
Use: Domestic use
Priority Date: October 7, 1968
Quantity: 1.4 cubic feet per second
Source: Woahink Lake, a tributary of Woahink Creek
Date Of Complete Application of Water: October 1, 2022

Authorized Point of Diversion:

Township		Range		Meridian	Sec	¼ ¼		Location
19	S	12	W	W.M.	22	SE	SE	640 feet North and 180 feet West from the SE Corner of Section 22.

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-080 and OAR 690-01-005 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. Notice of the application for permit amendment was published pursuant to ORS 540.520(5). No comments were filed in response to the notice.
5. The change would not result in injury to other water rights.
6. The change does not enlarge the permit.
7. The change does not alter all other terms of the permit.

Conclusion of Law

The additional points of diversion proposed by Permit Amendment Application T-9854 are consistent with the requirements of ORS 537.211.

Now, therefore, it is ORDERED:

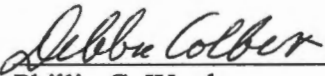

The change and subsequent use of water shall be subject to the following conditions:

1. The combined quantity of water diverted at the proposed additional points of diversion, together with that diverted at the old point of diversion, shall not exceed the quantity of water lawfully available at the original point of diversion.
2. Prior to appropriating water from the proposed points of diversion, the water user shall install in-line flow meters, or other suitable devices for measuring and recording the quantity of water diverted. The type and plans of the measuring devices must be approved by the Department prior to beginning construction. The device shall be installed under the general supervision of the Department, and the water user shall ensure that the measuring and recording device is operational at all times. The permittee shall allow the watermaster access to the meter or measuring device; provided, however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
3. The permittee shall monitor and report the monthly cumulative water use from individual meters to the Department. If the monthly reports do not adequately assure the Department that the permit is not being used in accordance with the terms of the water right, then the Department shall inform the permittee of the deficiency and the permittee shall address any deficiency to the satisfaction of the Director. The permittee is responsible to assure that the permit is being used in accordance with the terms of the water right.
4. Water shall be acquired from the same surface water source as the original point of diversion.

5. All other terms and conditions of Permit 33923 remain the same.

6. Permit 33923, in the name of City of Dunes City, is amended as described herein.

Dated at Salem, Oregon this 2nd day of December, 2005.

Water Rights Application
Number S-45456

Final Order¹
Extension of Time for Permit Number S-33923

Application History

On NOVEMBER 22, 2002, the CITY OF DUNES CITY submitted an application to the Department for an extension of time for permit number S-33923. The Department issued permit number S-33923 on APRIL 9, 1969. The permit called for completion of construction of the water development project by OCTOBER 1, 1971, and complete application of water to the full beneficial use by OCTOBER 1, 1972. In accordance with OAR 690-315-0050(2), on MARCH 4, 2003, the Department issued a Proposed Final Order proposing to extend the time to complete development of the water development project and the time to fully apply water to beneficial use to OCTOBER 1, 2022. The protest period closed APRIL 18, 2003, in accordance with OAR 690-315-0060(1). No protest was filed.

The applicant has demonstrated good cause for the permit extension pursuant to ORS 537.230, 537.248, 537.630, 539.010(5) and/or OAR 690-315-0040(2).

At time of issuance of the Proposed Final Order the Department concluded that, based on the factors demonstrated by the applicant, the permit may be extended subject to the following conditions:

CONDITIONS

1. Fish Screens

The permit holder must install fish screens at each point of diversion under Permit #S-33923, unless the Oregon Department of Fish and Wildlife provides a letter that determines fish screens are not necessary.

2. Progress Report Checkpoints

In accordance with OAR 690-315-0050(6), the permittee must submit a written progress report to the Department by October 1, of the years 2008, 2013 and 2018. The report must be received by the Department not sooner than 90 days prior to the due

¹

Appeal Rights

Under the provisions of ORS 536.075, the applicant may appeal this order by filing a petition for review in the Circuit Court for Marion County or the circuit court for the county in which the applicant resides or has a principal business office. The petition for review must be filed within 60 days after the date this order is served. ORS 183.484.

date. The permittee's report must describe in detail the work done each year since the last extension was granted or the last progress report submitted. The report shall include:

- a) The amount of construction completed;
- b) The amount of beneficial use of water being made, including the total volume of water used, water used relative to the specific authorizations (types of use, acres irrigated, etc.) contained in the permit, and the percent of the total allowable water use that this represents;
- c) A review of the permittee's compliance with terms and conditions of the permit and/or previous extension; and
- d) Financial investments made toward developing the beneficial water use. The Department will review the progress report to determine whether the permittee is exercising diligence towards completion of the project and complying with the terms and conditions of the permit and extension.

The Department will review the progress report to determine whether the permittee is exercising diligence towards completion of the project and complying with the terms and conditions of the permit and extension.

Failure to submit a progress report by the due date above may jeopardize continued development under the permit.

The Department will take into consideration annual reports submitted under OAR Chapter 690, Division 86 or ORS 537.099, and any other report that demonstrates diligence.

Other reports, however, are not a substitute for the progress reports and anything submitted must clearly show that diligence towards perfecting the water right permit is being attempted.

If the Department finds that diligence is questionable, the Department may:

- a) request the permittee to submit additional information with which to evaluate diligence; or
- b) apply additional conditions and performance criteria for perfection of the right; or
- c) cancel the undeveloped portion of the permit pursuant to ORS 537.260 or 537.410 to 537.450. The Department will grant the permittee a hearing on the cancellation, if one is requested.

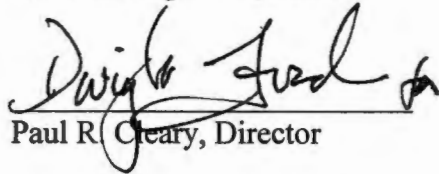

In determining whether the permittee has been diligent, the Department will consider any information submitted to the Department by the permittee and any information submitted during the 30-day public comment period following public notice of submittal of the progress report.

If information is received through the public notice process indicating that the applicant has not been diligent toward completing the project, and if the director determines there are significant disputes related to the use of water, the Department will conduct a hearing.

Order

The extension of time for Application Number S-45456, Permit Number S-33923, therefore, is approved. The deadline for completing construction is extended to OCTOBER 1, 2022. The deadline for applying water to full beneficial use is extended to OCTOBER 1, 2022.

DATED: April 24, 2003

Paul R. Cleary, Director

NOTE: Include a copy of the "Important Notice" document along with the original copy of the Final Order being sent to the permit holder.

REFERENCE: City of Dunes City; Application #S-45456 (Permit #S-33923)

Dear Mr. Nordahl:

This letter is in follow-up to the letter dated March 6, 2003, from Charles O. Porter to Director Cleary, and the telephone conversation between Mr. Porter, you and me. At the end of the conversation you asked about the status of Dune City's request for an extension of time to complete development of its water right permit for domestic use. In addition, you asked how to provide comments in the extension process. You requested that this letter be sent to you directly rather than through Mr. Porter, your attorney.

As you know, the Water Resources Department along with representatives of other state agencies have been working with water users around Woahink Lake and Dune City to find solutions to water use issues. As a result of these efforts, Dune City offered to include residents in a water right permit issued to the City for domestic use. The City filed a water right permit extension of time request to allow more time to develop water use under its water right permit.

The Department received a complete application for an extension of time for Permit #S-33923 from the Dune City on November 22, 2002. Notification of Dune City's extension of time request for Permit #S-33923 was published on the Department's Public Notice dated December 17, 2002. No public comment on the extension application was received.

On March 4, 2003, the Department issued an extension Proposed Final Order approving Dune City's request to extend the permit dates for completion of construction and complete application of water to October 1, 2022, for Permit #S-33923. The 45-day protest period for the Proposed Final Order for Permit #S-33923 ends at 5:00 pm on Friday, April 18, 2003.

If you have any questions concerning the proposed extension of time for Permit #S-33923, or if you would like to receive a copy of the extension Proposed Final Order, you may contact Lisa Juul by telephone at (503) 378-8455, extension 272. If you would rather receive an electronic copy of the extension Proposed Final Order, please contact Lisa by e-mail at:

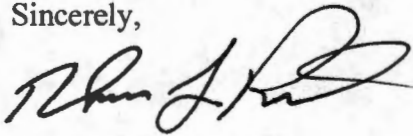

"Lisa.J.JUUL@ wrd.state.or.us."

The Water Resources Department is not proposing to take formal enforcement action against Dune City or any individuals using water from Woahink Lake at this time due to the cooperation of Dune City and individual water users around the Lake. Our enforcement authority includes assessment of civil penalties or the filing of criminal charges with local District Attorneys. Authority for these enforcement actions is found in ORS 536.900 and 537.990. We only take such formal actions if our staff are unable to gain voluntary compliance. As stated, we do have voluntary compliance at this time.

Sincerely,

Thomas J. Paul
Administrator, Field Services Division

Application for Extension of Time

In the Matter of the Application)	
for an Extension of Time for)	
Permit #S-33923, Water Right)	PROPOSED FINAL ORDER
Application #S-45456)	
(City of Dunes City))	

Permit Information	
<hr/> <hr/>	
<u>Application File #S-45456 / Permit #S-33923</u>	
Basin: #18 - Mid Coast Basin / Watermaster District: #02	
Date of Priority: October 7, 1968	
<u>Authorized Use of Water</u>	
Source of Water:	Woahink Lake, a tributary of Woahink Creek
Purpose or Use:	Domestic Use
Maximum Rate:	1.4 cubic feet per second (cfs)

This Extension of Time request is being processed in accordance with Oregon Administrative Rule Chapter 690, Division 315.

Please read this Proposed Final Order in its entirety as it contains additional conditions not included in the original permit.

This Proposed Final Order applies only to Permit #S-33923, water right Application #S-45456. A copy of Permit #S-33923 is enclosed as Attachment 1.

Summary of Proposed Final Order for Extension of Time

The Department proposes to:

- grant the extension for complete construction of the water system from October 1, 1998, to October 1, 2022;
- grant the extension for complete application of water from October 1, 1998, to October 1, 2022; and
- make the extension subject to certain conditions set forth below.

FINDINGS OF FACT

Background

1. Permit #S-33923 was granted by the Water Resources Department on April 9, 1969. The permit authorizes the use of up to 1.4 cfs of water from Woahink Lake, a tributary of Woahink Creek, for Domestic Use. The permit specified that construction of the water development project was to be completed by October 1, 1971, and that complete application of water was to be made on or before October 1, 1972.
2. Eight prior extensions have been granted for Permit #S-33923. The most recent extension request resulted in the construction and completion dates being extended to October 1, 1998.
3. The permit holder submitted an "Application for Extension of Time" to the Department on November 22, 2002, requesting the time in which to complete construction of the water system be extended from October 1, 1998, to October 1, 2003, and the time in which to accomplish beneficial use of water to the full extent under the terms of Permit #S-33923 be extended from October 1, 1998, to October 1, 2022.

4. On February 27, 2003, the permit holder revised the time requested to complete construction under Permit #S-33923 to October 1, 2022.

Development Overview

5. Since the issuance of Permit #S-33923 on April 9, 1969, the permit holder has completed preliminary work consisting of the development of an engineering study, a water feasibility study for a city-wide water system and several attempts to raise funds through bond referendums, as evidenced by documentation of work contained in the file.
6. While the City has accomplished preliminary work for establishing a water system under Permit #S-33923, it does not have a property tax base and has not been able to raise the funds necessary for the development. On three separate occasions, the City placed bond measures on election ballots to secure funds for the water system development. Each time, the bond measures were defeated by voters.
7. Since the issuance of Permit #S-33923 on April 9, 1969, the permit holder has not diverted any water from Woahink Lake for beneficial use, as allowed under the permit.

Review Criteria [OAR 690-315-0040(1)(2)]

8. As set forth under OAR 690-315-0040(1)(2), the time limits to complete construction or to apply the water to a beneficial use may be extended upon showing of good cause for the untimely completion. This determination shall consider the applicable requirements of ORS 537.230, 537.248¹, 537.630 and 539.010(5).

Other Governmental Requirements [ORS 537.230(2)]

9. Delay in the development of this project was not caused by any other governmental requirements.

¹ ORS 537.248 applies to reservoir permits only.

Start of Construction [ORS 537.630]

10. Permits held by municipal corporations for municipal uses or purposes are exempt from the requirement to begin actual construction work within one year from the date of approval of the application.²

Based on the fact that Permit #S-33923 authorizes the City of Dunes City to develop a public water system providing a domestic water supply within the boundaries of the City, the Department has determined that this permit qualifies for exemption from the requirement to begin actual construction work within one year from the date of permit issuance.

Financial Investment [ORS 539.010(5)]

11. As of November 22, 2002, the permit holder had invested a total of \$32,797 into the project, consisting of development of an engineering study, a water feasibility study for a city-wide water system and bond referendums on three separate election ballots. An additional \$20,000 investment is anticipated for the completion of this project.

Reasonable Diligence and Good Faith of the Appropriator [ORS 537.230(1), 537.630(1) and 539.010(5)]

12. Reasonable diligence during the permit period constitutes a continuing test of whether and under what conditions to grant an extension [ORS 537.260, OAR 690-315-0040(3)].
13. In accordance with OAR 690-315-0040(3), the Department shall consider, but is not limited to, the following factors when determining whether the applicant has demonstrated reasonable diligence in previous performance under the permit:
 - a. The amount of construction completed within the time allowed in the permit or previous extension.
 - The work completed thus far consists of development of an engineering study, a water feasibility study for a city-wide water system and bond referendums on three separate election ballots, as evidenced by documentation of work contained in the file.

² ORS 537.230(1)

- b. The amount of beneficial use made of the water during the permit or previous extension time limits.
- Since the issuance of Permit #S-33923 on April 9, 1969, the permit holder has not diverted any water from Woahink Lake for beneficial use, as allowed under the permit.
 - Delay of full beneficial use of water under Permit #S-33923 was due, in part, to the City not having a property tax base to secure the funds necessary to establish a city water system. In addition, attempts by the City to develop a municipal water system by placing bond measures on election ballots were defeated by voters on three separate occasions.
- c. The water right permit holder's conformance with the permit or previous extension conditions.
- The record does not raise concerns about the permit holder's compliance with conditions.
- d. Financial investments made toward developing the beneficial water use.
- As of November 22, 2002, the permit holder had invested approximately 62 percent of the total projected cost for complete development of this project. A total of \$32,797 has been invested into the project, consisting of development of an engineering study, a water feasibility study for a city-wide water system and bond referendums on three separate election ballots. An additional \$20,000 investment is anticipated for the completion of this project.
14. In accordance with OAR 690-315-0050(6), the Department shall establish checkpoints to determine if diligence is being exercised in the development and perfection of Permit #S-33923. The Department, therefore, is including conditions to ensure future diligence, as specified under Item #2 of the "Conditions Section" contained in this Proposed Final Order for an Extension of Time.

The Market and Present Demands for Water [ORS 539.010(5) and OAR 690-315-0040(4)]

15. In accordance with OAR 690-315-0040(4), the Department shall consider, but is not limited to, the following factors when determining the market and the present demand for water or power to be supplied:
- a. The amount of water available to satisfy other affected water rights and scenic waterway flows.
 - The permitted point of diversion, authorized under Permit S-33923, is not located within or above the boundaries of a state scenic waterway.
 - b. Special water use designations established since permit issuance, including but not limited to state scenic waterways, federal wild and scenic rivers, serious water management problem areas or water quality limited sources established under 33 U.S.C. 1313(d).
 - The permitted point of diversion, authorized under Permit #S-33923, is located within a stream segment that has been identified by the Oregon Department of Fish and Wildlife as a "highest" needs ranking area for streamflow restoration for fish.
 - Because of this determination, the Department is requiring the permit holder to install fish screens at each point of diversion under Permit #S-33923, unless the Oregon Department of Fish and Wildlife provides a letter that determines fish screens are not necessary, as specified under Item #1 of the "Conditions Section" contained in this Proposed Final Order for an Extension of Time.
 - c. The habitat needs of sensitive, threatened or endangered species, in consultation with the Oregon Department of Fish and Wildlife.
 - The permitted point of diversion is located within a designated sensitive, threatened or endangered species area for aquatic species utilizing surface water resources, as identified on the Division 33 map furnished by the Oregon Department of Fish and Wildlife.

- Because of this determination, the Department is requiring the permit holder to install fish screens at each point of diversion under Permit #S-33923, unless the Oregon Department of Fish and Wildlife provides a letter that determines fish screens are not necessary, as specified under Item #1 of the "Conditions Section" contained in this Proposed Final Order for an Extension of Time.
- d. Economic investment in the project to date.
- As of November 22, 2002, the permit holder had invested approximately 62 percent of the total projected cost for complete development of this project. A total of \$32,797 has been invested into the project, consisting of development of an engineering study, a water feasibility study for a city-wide water system and bond referendums on three separate election ballots. An additional \$20,000 investment is anticipated for the completion of this project.
- e. Other economic interests dependent on completion of the project.
- Currently, there are approximately 120 residents (households) diverting water from Woahink Lake without the benefit of a water right. In order to correct the problem and maintain a domestic water supply to the residents, the City has proposed to bring their water use under Permit #S-33923. To accomplish this, further development of the permit is necessary.
- f. Other factors relevant to the determination of the market and present demand for water and power.
- There is a market and demand for further development of Permit #S-33923. Specifically, approximately 120 residents (households) are currently diverting water from Woahink Lake without the benefit of a water right. In order to correct the problem and maintain the resident's domestic water supply, the City has proposed to bring their water use under Permit #S-33923.

Fair Return Upon Investment [ORS 539.010(5)]

16. The use of water under Permit #S-33923 will result in reasonable returns upon the investment made to date. By gaining approval for further development of the permit, the City will be able to provide a domestic water supply to the 120 residents (households) currently diverting water from Woahink Lake without the benefit of a water right.

Duration of Extension [OAR 690-315-0040(1)(c), ORS 539.010(5)]

17. As set forth under OAR 690-315-0040(1)(c), time extensions granted shall be for the reasonable time period necessary to complete construction and application of water to beneficial use.
18. As of November 22, 2002, the remaining work to be completed consists of completion of the water distribution system, and complete application of water to beneficial use.
19. Financing and funding issues extended the length of time needed to fully develop and perfect the permit, caused mainly by the City not having a property tax base to secure the funds necessary to establish a city water system. In addition, attempts by the City to develop a municipal water system by placing bond measures on election ballots were defeated by voters on three separate occasions.
20. Given the amount of development left to occur, the Department has determined that the permittee's request to have until October 1, 2022, to complete construction of the water system and to complete the application of water to beneficial use under the terms of Permit #S-33923 is both reasonable and necessary.

Conclusions of Law

1. The applicant is entitled to apply for an extension of time to complete construction and/or completely apply water to the full beneficial use pursuant to ORS 537.230 and ORS 537.630.
2. The applicant has submitted a complete extension application form and the fee required by ORS 536.050(1)(k).

3. The applicant has pursued perfection of the right in good faith and prosecuted construction with reasonable diligence.
4. The Department has considered the requirements of other governmental agencies, the financial investment made, the reasonable diligence and good faith of the appropriator, the market and present demands for water and the fair return upon the investment, and has determined that the applicant has shown good cause exists for an extension to complete construction and apply water to full beneficial use pursuant to ORS 537.630(1).
5. Completion of construction and full application of water to beneficial use can be accomplished by October 1, 2022.³
6. In order to ensure future diligence is exercised in the development and perfection of Permit #S-33923, the Department shall establish progress checkpoints in accordance with OAR 690-315-0050(6), as specified under Item #2 of the "Conditions Section" contained in this Proposed Final Order for an Extension of Time.

Proposed Order

Based upon the foregoing findings of fact and conclusions of law, the Department proposes to issue an order to:

Extend the time for complete construction of the water system under Permit #S-45456 from October 1, 1998, to October 1, 2022; and

Extend the time for complete application of water to beneficial use under Permit #S-33923 from October 1, 1998, to October 1, 2022.

Subject to the following conditions:

³ For permits applied for or received on or before July 9, 1987, upon complete development of the permit, you must notify the Department that the work has been completed and either: (1) Hire a water right examiner certified under ORS 537.798 to conduct a survey, the original to be submitted as required by the Water Resources Department, for issuance of a water right certificate; or (2) Continue to appropriate water under the water right permit until the Water Resources Department conducts a survey and issues a water right certificate under ORS 537.250 or 537.625.

CONDITIONS

1. Fish Screens

The permit holder must install fish screens at each point of diversion under Permit #S-33923, unless the Oregon Department of Fish and Wildlife provides a letter that determines fish screens are not necessary.

2. Progress Report Checkpoints

In accordance with OAR 690-315-0050(6), the permittee must submit a written progress report to the Department by October 1, of the years 2008, 2013 and 2018. The report must be received by the Department not sooner than 90 days prior to the due date. The permittee's report must describe in detail the work done each year since the last extension was granted or the last progress report submitted. The report shall include:

- a) The amount of construction completed;
- b) The amount of beneficial use of water being made, including the total volume of water used, water used relative to the specific authorizations (types of use, acres irrigated, etc.) contained in the permit, and the percent of the total allowable water use that this represents;
- c) A review of the permittee's compliance with terms and conditions of the permit and/or previous extension; and
- d) Financial investments made toward developing the beneficial water use. The Department will review the progress report to determine whether the permittee is exercising diligence towards completion of the project and complying with the terms and conditions of the permit and extension.

The Department will review the progress report to determine whether the permittee is exercising diligence towards completion of the project and complying with the terms and conditions of the permit and extension.

Failure to submit a progress report by the due date above may jeopardize continued development under the permit.

The Department will take into consideration annual reports submitted under OAR Chapter 690, Division 86 or ORS 537.099, and any other report that demonstrates diligence.

Other reports, however, are not a substitute for the progress reports and anything submitted must clearly show that diligence towards perfecting the water right permit is being attempted.

If the Department finds that diligence is questionable, the Department may:

- a) request the permittee to submit additional information with which to evaluate diligence; or
- b) apply additional conditions and performance criteria for perfection of the right; or
- c) cancel the undeveloped portion of the permit pursuant to ORS 537.260 or 537.410 to 537.450. The Department will grant the permittee a hearing on the cancellation, if one is requested.

In determining whether the permittee has been diligent, the Department will consider any information submitted to the Department by the permittee and any information submitted during the 30-day public comment period following public notice of submittal of the progress report.

If information is received through the public notice process indicating that the applicant has not been diligent toward completing the project, and if the director determines there are significant disputes related to the use of water, the Department will conduct a hearing.

DATED: March 4, 2003

Dwight French
Water Rights Section Manager

box on the last page for the
appropriate names and phone
numbers.*

Proposed Final Order Hearing Rights

1. Under the provisions of OAR 690-315-0060, the applicant or any other person adversely affected or aggrieved by the proposed final order may request a contested case hearing on the proposed final order. Your request for contested case hearing must be in writing and must be received by the Water Resources Department no later than ***Friday, April 18, 2003***, being 45 days from the date of publication of the proposed final order in the Department's weekly public notice.
2. A written request for contested case hearing shall include:
 - a. The name, address and telephone number of the petitioner;

- b. A description of the petitioner's interest in the final order and if the protestant claims to represent the public interest, a precise statement of the public interest represented;
 - c. A detailed description of how the action proposed in the final order would adversely affect or aggrieve the petitioner's interest;
 - d. A detailed description of how the final order is in error or deficient and how to correct the alleged error or deficiency;
 - e. Any citation of legal authority supporting the petitioner, if known;
 - f. Proof of service of the petition upon the water right permit holder, if petitioner is other than the water right permit holder; and
 - g. The protest fee required under ORS 536.050.
3. Within 60 days after the close of the period for requesting a contested case hearing, the Director shall:
- a. Issue a final order on the extension request; or
 - b. Schedule a contested case hearing if a request for contested case hearing has been submitted, and:
 - A. Upon review of the issues, the Director finds there are significant disputes related to the proposed agency action; or
 - B. The applicant submitted a timely request for a contested case hearing.

Stream Basin: _____ County: Lane

✓ 1. Has the applicant completely filled out the updated Extension Application form? Yes / No \$100.00 - Yes

***If "No"..... has certified request for the new extension form been sent? Yes / No

✓ 2. Shortcomings of Extension Request..... based upon review of updated extension form Yes No
*****(NOTE: Any missing Extension information that is needed before an Extension PFO can be completed???)**

✓ 3. Date Permit was issued: 4-9-69 (priority = 10-7-68)

✓ 4. Source: Woahink Lake, tributary of Woahink Creek

✓ 5. Use: Domestic

✓ 6. "Q": 1.4 cfs

✓ 7. Original "B" Date: 10-1-71 Original "C" Date: 10-1-72

✓ 8. Conditions of Permit: Original "A" Date: 4-9-70

• "A", "B" & "C" Dates

✓ 9. Extension request received: 11-22-2002 Request Number (...1st 2nd, 3rd): 8th

✓ 10. Last Authorized "B" Date: 10-1-98 Last Authorized "C" Date: 10-1-98

✓ 11. Proposed "B" Date: 10-1-~~2003~~ 2022 Proposed C Date: 10-1-2022

12. Amount Invested to date: \$600.00 Estimated Total Cost: \$52,797.00

+ 32,197.00 - previous Extensions
***Estimated Remaining Cost: \$20,000.00
★ See Memo dated 2-28-03.

13. The water project development made to date has been accomplished in accordance with the terms and conditions contained in the permit. **Yes** / No ***If "No"..... What permit terms and/or conditions have not been met?

"A" Date - N/A per ORS 537.230(1)

14. Work on the water development project completed to date includes:

- developed an engineering study
- developed a water feasibility study
- Bond referendums for funds to establish water system.

15. The work remaining to be completed consists of:

- Completion of construction
- Full beneficial use of water

16. Progress in perfecting the permit is being held up by:

• Good faith attempts for financing → On 3 separate occasions Dunes City attempted to establish a water system ... but, citizens voted down that attempt each time.

17. Has the applicant pursued perfection of the right in good faith and with reasonable diligence? **Yes** / No

Some Factors that may be considered in determining "Reasonable Diligence" [OAR 690-315-040(3)]

- The amount of construction completed within the time allowed in the permit or previous extension;
- The amount of beneficial use made of the water during the permit or previous extension time limits;
- Water right permit holder conformance with the permit or previous extension conditions; and
- Financial investments made toward developing the beneficial water use.

• 0% construction completed | • 0% of water used | • Have invested 3% of total proj. cost of completion | • Only conditions = A, B & C Dates. "A" Date - N/A per ORS 537.230(1)

18. Determination of the market and the present demand for water or power to be supplied:

Some factors to consider in determining the Market and the Present Demand for water or power [OAR 690-315-040(4)]:

- The amount of water available to satisfy other affected water rights and scenic waterway flows;
- Special water use designations established since permit issuance (such as...state scenic waterways, federal wild and scenic rivers, serious water management problem areas, water quality limited sources, etc.);
- The habitat needs of sensitive, threatened or endangered species, in consultation with ODFW;
- Economic investment in the project to date;
- Other economic interests dependent on completion of the project; and
- Other factors relevant to the determination of the market and the present demand for water or power.

• Is NOT in a SWW | • Is within a Div 33 Area | • Is within a "HIGHEST" ranking area for streamflow restoration for fish | ★ Dunes City working with WRD to bring about 120 residents taking water from Wochink Lake - without benefit of a water right - under Dunes City's permit # S-33923.

19. Based on the written record, can the Department make a finding of "Good Cause" to approve the extension request?

Yes... "Good Cause" can be found. → Approval of Extension Request

B & C thru 2022.

No ... "Good Cause" cannot be found. → Denial of Extension Request

20. Conditions to be included on Extension PFO: **Yes**

- ~~scribble~~ 5-Year checkpoints
- Fish Screens → Yes unless ODFW determines it's not needed.

MEMORANDUM

Date: February 28, 2003

To: Appl #S-45456 (Permit #S-33923)

From: Lisa Juul, Permit Extension Review

Subject: Clarification of Requested Dates for Extension of Time

On February 27, 2003, Bob Rice of the Water Resources Department spoke with the Mayor of Dunes City, Rob Ward.

During their telephone conversation, Bob mentioned that Dunes City's extension application requested until October 1, 2003, to complete construction and until October 1, 2022, to accomplish full beneficial use of water under Permit #S-33923.

Mayor Ward stated that Dunes City wishes to amend their extension application as follows:

- the proposed time to complete construction is **October 1, 2022**; and
- the proposed time to accomplish full beneficial use of water is October 1, 2022.

Dear Lisa:

Enclosed please find Dunes City's Water Right Extension application along with the filing fee of \$100.00

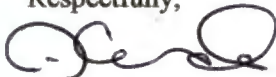

Dunes City currently holds a domestic water right and a municipal water right. It was the City's intention to develop a municipal water system. The residents of Dunes City voted down the municipal water system on three separate occasions.

Recently it was brought to the City's attention that approximately 120 residents take water from Woahink Lake without the benefit of a water right. Dunes City met with Water Resources and other various state agencies regarding this issue. After many meetings, Dunes City proposed that all the residents currently in non-compliance be brought under Dunes City's domestic water right. Dunes City would then place a meter, pump and fish screen on the pumps for a nominal fee. Dunes City would then monitor monthly the usage so as to not exceed the water right.

The first major step in this process is to get a water right extension. Dunes City respectfully requests that Water Resources approve this water right extension so that Dunes City residents can be brought into compliance with current state law.

Thank you for your consideration in this matter.

Respectfully,

Jeannie Cerda
Planning Secretary

C: Mayor Ward/City Council

RECEIVED

NOV 22 2002

WATER RESOURCES DEPT.
SALEM, OREGON

1. Did water system construction/well drilling begin within the time specified in the permit [yes/no]?

NO

2. Has construction of diversion/appropriation works, distribution system, and use of water, if any, been accomplished consistent with the limitations and conditions of this permit [yes/no]?

No - No Conditions listed

A) Please describe how you have complied with each applicable permit condition (**NOTE: the instruction sheet for permit extension applications provides some direction as to what is an "applicable" condition at time of permit extension review**).

No Conditions Listed

B) If you have not complied with all applicable conditions, please explain the reasons why and indicate a date certain, in the near future, by which time you will be in compliance with applicable conditions.

Dunes City did not have a need to complete the original water right. Dunes City is currently attempting to bring all residents into compliance with current state law. In doing so, Dunes City is attempting to place non-compliant residents under Dunes City's water right.

3. I have accomplished the following described works, purchases and installation of equipment necessary to the use of water under said permit:

A) Within the past year or, if a prior extension was authorized, during the last permit extension period:

None

B) Prior to the past year or, if a prior extension was authorized, prior to the last extension period:

NONE

4. I have accomplished beneficial use of water under the permit to the extent of (amount of water used and acres irrigated):

A) Quantity of Water Used [in cubic feet per second (cfs) or gallons per minute (gpm) if using surface water or ground water.....and/or..... in acre-feet (af) if using stored water]:

NONE

B) Number of Acres Irrigated (if an irrigation permit):

NONE

5. Cost of project to date 600.00. Estimated remaining cost to complete the project 20,000.00.

6. Please list the reasons why the project was not constructed, and/or water not beneficially used within permit time limits under the appropriate categories below. Please provide supporting information for each reason identified:

A) The project is of a size and scope that the original intent was to phase it in over a period longer than the timeframes allowed in the permit.

None

RECEIVED
NOV 22 2002
WATER RESOURCES DEPT.
SALEM, OREGON

B) Financing and/or cash-flow needs to develop the project precluded completion of the project within authorized timeframes.

N/A

C) Good faith attempts to comply with permit conditions and/or to acquire permits from other agencies, or otherwise comply with government regulations, delayed completion of the project.

Dunes City has attempted to establish a water system. Dunes City residents have voted down that attempt on three occasions. The residents now agree that the current proposal is a resolution to Dunes City's water issue

D) Acts of God or other unforeseen events delayed full development of the water system and use of water.

N/A

I am the permittee, or have authorization from the permittee, to apply for an extension of time under this permit. I understand that false or misleading statements in this extension application are grounds for the Department to suspend processing of the request and/or reason to deny the extension.

REFERENCE: File 45456

According to the terms of your Permit 33923, complete application of water was to have been made by **October 1, 1998**. To date we have not received notice that this has been accomplished.

Complete application of water means use of the water for the beneficial purpose described in the permit to the full extent intended. (In the case of irrigation, it means beneficial irrigation of the lands the permittee intends to cover.) This may be a smaller amount than the permit allowed. If the water has been used, you should promptly submit notice describing the extent of completion as set forth in the letter accompanying your permit.

If the water has not been applied and you intend to fully utilize the same, an application for extension of time should be made.

If you wish to apply for an extension of time, please fill out the enclosed form. Permit extension rules, adopted by the Water Resources Commission in October 1998, require that the Department consider this information when determining whether or not to approve an extension request. You should request to extend your permit for the amount of time necessary to fully apply water to beneficial use. Should the permit extension be approved, it is the Department's expectation that it will be the last extension granted. Copies of the new extension rules will be furnished upon request.

If you are no longer interested in the project described by the permit, we would appreciate being advised. If the property involved has been sold and any part of the project was completed, you should assign the permit to the new owner. An assignment form will be furnished upon request.

If additional information is needed, please contact me at extension 272 at 378-3739 or toll-free 1-800-624-3199.

Sincerely,

Dallas Miller
Water Rights Specialist

Your applications for extension of time to complete work under Permit Number 33923 and 44501 along with your check in the amount of \$200 have been received. Our Receipts Number 129074 and 129105 are enclosed.

Your request is approved by Special Order Volume 49, Page 448. The time limit for completion of work is extended to October 1, 1998.

Certain water right holders that serve as water suppliers may be required to submit water management and conservation plans at some point in the future. You should be advised that the Water Resources Commission may adopt administrative rules that will require you to prepare and submit such plans in the future.

If you are interested in receiving periodic information concerning the conservation program or the development and adoption of management and conservation rules, please contact the Water Conservation staff at the Salem office of the Water Resources Department.

If you have questions concerning this extension or other water right matters, please call the Water Rights/Adjudication Division. All Divisions of the Department may be reached at the following telephone numbers:

Attention: Dallas S. Miller, Water Rights Specialist

REFERENCE: Files 57827 and 45456

Dear Mr. Miller:

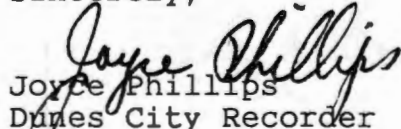

I called you after receipt of your October 4, 1995 letter on extending the above water permits. You indicated more information was needed on what was done during the past three years to facilitate the use of water under these permits. The following information is submitted to support our request for "extension of time for completion of projects".

A water feasibility study was done in 1992 and early 1993 by Gary Dyer, a Consulting Engineer. Mr. Dyer performed the preliminary and subsequent feasibility study for a city-wide water system. Numerous public meetings were held and a bond referendum was placed on the ballot in the fall of 1993. The measure was narrowly defeated. The costs of the water study itself, legal fees, ballot measure costs, staff time in preparing for and holding numerous informational public meetings, etc., cost the City in excess of \$23,000.

The City is currently reviewing long-term solutions, other than one city-wide system, to ensure water quality standards are maintained for Dunes City residents. Other options, including the formation of several smaller city systems, are being reviewed. Peter Thurston, Coordinator for Lane County Community and Economic Development, who provides technical assistance to numerous rural communities, is working with the City in this direction.

If you should need additional information, please call. Thank you for your attention to this matter.

Sincerely,

Joyce Phillips
Dunes City Recorder

cc: Mayor Phil Lapin
City Council

October 4, 1995

DUNES CITY
PO BOX 97
WESTLAKE, OREGON 97493

REFERENCE: File 57827 and 45456

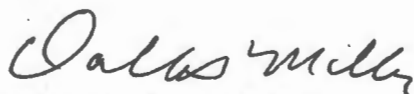

We have received your application for extension of the time limit to make complete application of water under Permit 44501 and 33923. We also have your check in the amount of \$200. Our receipt number 129074 and 129105 is enclosed.

Your extension request states that no construction has taken place. We can possibly extend a permit if other things have been accomplished. Have any studies been made, equipment purchased or any money spent to facilitate the use of water under this permit?

Your extension requests extending the time for application of water, it should also request extension of time for completion of construction.

If you have any questions, please contact the Water Rights Section at 378-3739.

Sincerely,

WATER
RESOURCES
DEPARTMENT

«DATA MacintoshHD: MiscData:Conservation:ExtNames»
«name»«IF street»
«street»«ENDIF»
«city», «st» «zip»

You recently received an extension of time to complete work under Permit «permno». In our letter notifying you of the extension, we indicated that you were required to prepare conservation and long-term water supply plans. We have since re-evaluated our requirements for extensions and have decided not to require the preparation of the plans at this time.

This change does not relieve municipal water suppliers from compliance with a similar condition which was included in many recently issued water use permits. The Water Resources Commission has recently authorized hearings on rules which will provide standards and criteria for the plans required under the permit conditions. A copy of the hearing notice is enclosed. You should be aware that, at some point in the future, the Commission may consider the adoption of rules extending the requirement for preparation of plans to other municipal water suppliers.

While we are not requiring water management and conservation plans as a condition of time extensions, we still encourage you to consider preparing a plan. Because of current demands, there is little water available for new appropriations from many streams in the state. As a result, many communities will have to rely on alternate sources of water such as conservation, storage or acquisition and transfer of existing water rights to support continued growth. The planning approach which is reflected in the rules is already providing many cities with an effective framework within which to identify future needs for water and to evaluate alternatives for meeting those needs.

We welcome the opportunity to work with local water suppliers in evaluating their future water supply options. Please contact Jack Donahue at 378-8455 extension 283 if you have any questions or would like our advice and guidance in preparing a water management and conservation plan.

Sincerely,

Douglas M. Parrow
Conservation/Basin Planning Manager

REFERENCE: Files 57827 and 45456

We received your application for extension of the time to complete work under Permits 44501 and 33923. We also have your check for \$200. Our receipts number 69096 and 69097 are enclosed.

Your request is approved. The time limits under these permits are extended to October 1, 1995.

Oregon Administrative Rules (OAR) 690-410-060, (enclosed), requires water suppliers, such as you, to prepare water conservation management plans. The schedules, standards and procedures for the development of management plans will be adopted in rule form in the near future. These rules also require you to notify the Commission of your plans to assure a long-term water supply.

Accordingly, before future extension requests will be approved, there are two requirements:

1. You will need to submit a plan describing the schedules, standards, and procedures for your water conservation management plans. This will need to be done within your time extension period following the date the Water Resources Commission adopts these rules.
2. You will need to prepare a plan/timetable for the Water Resources Commission which shall indicate the steps you intend to pursue to obtain a long-term water supply. This will need to be done by October 1, 1995.

If you have any questions, please call the Department's Water Rights Section at 378-3739.

Attention: Mr. James E. Baumeister, Mayor

I am enclosing a form for use in making application for an extension of time limits under Permits Numbered 44501 and 33923

The Water Resources Director is permitted by law to extend the time for completion of a project only upon a showing of reasonable diligence by the permittee. Therefore, you should fill out this application carefully and completely describing what has been accomplished.

The application must be submitted to this office with the statutory filing fee in the amount of \$100 for each permit.

Sincerely,

BRUCE A. ESTES, Supervisor
Survey/Certificate Section

We have received your letter dated October 23, 1985 along with your check in the amount of \$10.

The fee schedule for extensions require \$100 for each such request regarding each permit.

Please send the additional \$190 necessary so that we may properly handle your request.

BEFORE THE WATER RESOURCES DIRECTOR OF OREGON

IN THE MATTER OF AN APPLICATION)
FOR EXTENSION OF TIME TO BEGIN)
AND COMPLETE CONSTRUCTION AND)
MAKE COMPLETE APPLICATION OF)
WATER UNDER PERMIT NOS. 33923)
AND 44501 IN THE NAME OF CITY)
OF DUNES CITY)

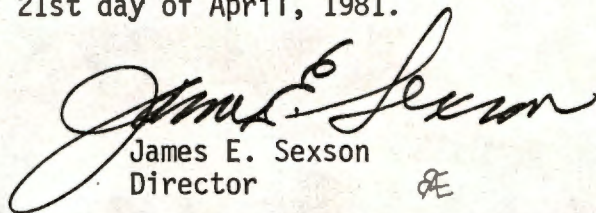

The City of Dunes City is the holder of Permit No. 33923 which grants the right to appropriate not to exceed 1.4 cubic feet of water per second from the Woahink Lake for domestic use and Permit No. 44501 which grants 1.5 cubic feet of water per second from Woahink Lake for municipal use.

The City has advised the Water Resources Director that the appropriation has not been made as described in the Permit, but it is the City's desire to preserve the right for this development.

It is believed that it will be consistent with the public interest to grant said extension.

NOW, THEREFORE, it hereby is ORDERED that the time limits to begin and complete construction and make complete application of water under Permits Nos. 33923 and 44501 be extended to October 1, 1985.

Dated at Salem, Oregon, this 21st day of April, 1981.

Application for Extension of Time

To the State Engineer of Oregon:

I, City of Dunes City, of Dunes City (P. O. Box 97)
Westlake, Oregon 97493
state of Oregon, am the owner and holder of Permit No. 33923, to
appropriate the public waters of the state of Oregon.

Under the terms and conditions of said permit, construction work is required to be completed on or
before 10-1-71 extended to 10-1-72, 19....., and complete application of water is required to be
made on or before 10-1-72, 19.....

I have heretofore done the following work described under said permit during the past year:
None

and did the following work prior to last year:

Engineering study August 1974 (\$1,000) and bond election March 1975.

Engineering costs \$1,100 plus estimated legal costs \$1,000

costing \$ 3,100, and I estimate the cost of completion to be \$ 3,000,000.

I have heretofore used water under said permit to the following extent:

None

I am unable to { complete construction work } within the required time, for the following
{ make complete application of water }
(Strike out phrase not applicable)

reasons, to wit: Bond issue rejected by voters in March 1975. Current water
supply study being made by Lane County to be completed January 1979.

(If additional space is required, attach separate sheet)

Encl. Receipt 5614

52348

31 December 1975

City of Dunes City
City Council
Dunes City, Oregon 97439

Dear Ladies and Gentlemen:

On August 23, 1974, we received a preliminary engineering report prepared by Westech Engineering, Inc., fees of \$15.00, and an application in the name of City of Dunes City for a permit to appropriate 1.84 cubic feet per second of water from Washink Lake for municipal purposes.

The letter submitted by William Jayne, which accompanied the application, indicated that Westech Engineering was authorized to amend and/or complete the application as necessary to describe in detail the proposed use of water so that a permit can be issued.

As of this date, we have not received a final plan for use of water as described by the application. Also, we are not certain that Westech Engineering is still your agent on this matter.

In any case, before a permit can be issued, it will be necessary that the application and supporting data be completed to describe the proposed use of water. It will also be necessary that permit No. 33923, issued to the City of Dunes City for the appropriation of 1.4 cubic feet per second of water from Washink Lake for domestic use, be cancelled.

Permit No. 33923 was issued for household use of water only and does not carry with it a right to appropriate water for commercial or industrial uses or any other use, other than domestic, which is normally associated with a municipal right.

It will also be necessary to amend application No. 52348 so that the request of the City does not exceed 1.5 cubic feet per second of water from Washink Lake. The policy statement

- 2 -

of the Water Resources Board, which was adopted, reserved only 1.5 cubic feet per second of water from the Lake for municipal purposes. Therefore, a permit could not be issued to exceed that amount.

I am returning the application No. 52348 to you along with the preliminary engineering report prepared by Westech Engineering. The application and supporting data should be resubmitted describing a final plan by the City to appropriate water from Woahink Lake under the new application.

The application is endorsed so that in order to retain its priority date, it must be received in this office on or before March 3, 1976.

Sincerely,

Vestal R. Garner
Water Rights Engineer

52348

October 14, 1975

Mrs. Rod Smith
83353 Spruce Lane
Florence, Oregon 97439

Dear Mrs. Smith:

Dunes City was issued a permit for the appropriation of water from Woahink Lake for domestic use but this serves no purpose as it does not allow the appropriation of water for commercial or other uses normally provided through a municipal system.

William Jayne submitted for Dunes City an incomplete application for a permit to appropriate 1.84 cubic feet per second of waters of Woahink Lake. This was accompanied by a preliminary engineering report by Westech Engineering, Inc.

The policy statement of the Water Resources Board reserves 1.5 cubic foot per second of waters of Woahink Lake for municipal purposes. The Dunes City application was the first submitted after the Water Resources Board order so the application could be completed for the appropriation of 1.5 c.f.s.

I will write the City regarding this.

Sincerely,

Trevor Jones
Assistant

TUCSON H. MYERS, P.E.
Director

Hon. Johann Mehlum
Mayor of City of Dunes
P. O. Box 657
Florence, Oregon 97439

Dear Mayor Mehlum:

On March 26, 1974 the State Water Resources Board adopted the revised Mid-Coast water use policy statement (a copy of the statement is enclosed).

As you know, the City of Dunes had previously petitioned for an exception to the July 1966 water use policy statement to allow municipal water use from Woahink Lake. As a result of your request, the adopted 1974 revised water use policy statement contains a provision to allow 1.5 cfs (1 mgd) municipal diversion from Woahink Lake.

To make use of the water, it is necessary that you file for a water right with the State Engineer's office for your intended water use from Woahink Lake. Under the 1974 water use program, the maximum additional municipal diversions that will be allowed from Woahink Lake will be 1.5 cfs.

Some protests were voiced in regard to allowing any additional water to be utilized from Woahink Lake because of possible adverse environmental impacts on the lake.

The Board responded to the effect that it would encourage appropriate monitoring of the effects of additional diversions from the natural lakes to assess the incremental environmental impacts of each diversion. I am sure you share our concern for monitoring the possible adverse impacts, and such data would be important to the city in case of possible liable actions in regard to creation of adverse effects. Hence, we suggest a meeting of all interested parties to discuss the pros and cons of a monitoring system, including costs, equipment, manpower, etc. The staff of the Board is available to provide any help possible in establishing this program.

Hon. Johann Mehlum
April 26, 1974
Page 2

Again we stress that it will be necessary for the City of Dunes or any other entity wishing to use municipal water from Washink Lake to file for a water right with the State Engineer's office. If we can provide any more information or be of any further assistance, please do not hesitate to contact us at your convenience.

Sincerely,

Tucson H. Myers, P.E.
Director

STATE ENGINEER

By ASSISTANT

March 14, 1973

45456

City of Dunes City
P.O. Box 657
Florence, OR 97493

According to the terms of your permit No. 33923 for the appropriation of 1.4 cfs from Woahink Lake for domestic use,

complete application of water was to have been made by October 1, 1972.

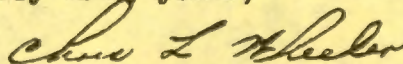

Complete application of water means the application of water to beneficial use under the permit to the full extent intended. In the case of irrigation, it means beneficial irrigation of all the lands the permittee intends to cover under the terms of the permit. If water has been used, you should promptly submit notice describing the extent of completion as set forth in the letter accompanying your permit and also in our postal card of October 16, 1972.

ORS 537.260 provides that: "Whenever the time within which any appropriation under a permit should have been perfected has expired and the owner of the permit fails or refuses within three months thereafter to submit to the State Engineer proof of completion of the appropriation as required by ORS 537.230 and 537.250, the State Engineer may, after 60 days' notice by registered mail, order the cancelation of the permit."****"

In accordance with the provisions of ORS 537.260, you are hereby notified that unless proof of beneficial use is received within 60 days from the date of this letter, the permit(s) may be canceled without further notice.

If for any reason you are no longer interested in the project described by the permit, we would appreciate it if you would so advise. If the property involved has changed hands and any part of the project has been completed, you should immediately assign the permit to the new owner and advise us of his name and address. An assignment form will be furnished upon request.

Very truly yours,

CHRIS L. WHEELER
State Engineer

Certified
Return receipt requested

November 17, 1972

45456

Mrs. William Dedon
521 Latimer Road
Santa Monica, CA 90402

Dear Mrs. Dedon:

Acknowledged is your letter of October 31, 1972, requesting information on water rights or water use permits pertaining to a described parcel of land. Also acknowledged is the description of the parcel.

The only record of a water right or a permit appears in the name of City of Dunes City, and is permit numbered 33923.

Permit numbered 33923 describes the appropriation of 1.4 cubic feet per second of water from Woahink Lake for domestic use. The area of use described on this permit encompasses all of the lands shown on your legal description as well as other lands.

Enclosed is our refund check numbered 4997 and our receipt numbered 31345 for the entire sum of \$6.00 which you had previously submitted.

Very truly yours,

VESTAL R. GARNER
Assistant

Re: File No. 45456

Dear Mr. Wheeler:

Water Right Application Filed by Dunes City, Oregon

We have reviewed this application and do not oppose the taking of 1.4 cfs from Washink Lake provided the water is not used for purposes other than those specifically considered to be "domestic." In other words we would object if the City should make a part of this water available for "industrial" or other such purposes, when the appropriation had been made for "domestic" use.

Sincerely yours,

P. W. Schneider

October 16, 1968

City of Dunes City
Dunes City
Oregon

Gentlemen:

This will acknowledge receipt of your application for a permit to appropriate 1.4 cubic feet of water per second from Woahink Lake for domestic supplies, a map with one print and the fee of \$22 for which our receipt No. 11719 is enclosed.

This application which has been filed and numbered 45456 requires an additional \$5 recording fee.

Item No. 3 on the application designates the use of the water to be domestic supply. Domestic use is considered to be household use of water. Item No. 8 describes the location of municipal use.

The State Water Resources Board Order of July 12, 1968, has closed Woahink Lake to further appropriation except for domestic, livestock, irrigation of lawn and non-commercial garden not to exceed one-half acre in area, power development not to exceed $7\frac{1}{2}$ theoretical horsepower, recreation, wildlife and fish life uses. This order precludes any filing of an application for municipal use, commercial use such as "motels, service stations, restaurants, etc.", manufacturing or industrial use.

Therefore, this application will be in satisfactory form for approval by issuance of a permit for domestic use only upon receipt of the additional \$5 recording fee.

Very truly yours,

Dear Sir:

As engineers for the city of Dunes City, Lane County, Oregon we are applying herewith for a permit to appropriate water from Woahink Lake for the municipal usage of Dunes City. We are enclosing herewith a completed application, a check in the amount of \$22.00 to cover examination and recording fees, and a transparent map and one print indicating the location of the water intake, the treatment plant, and the place of usage.

If additional information is required, please let us know.

Sincerely yours,

for

Willis F. Perley

Larry,

Tom informs me that
T.J. considered engineering
studies to be valid "A" for
municipalities. Is this
OK?
