confirms the right to use the waters of TWO UNNAMED STREAMS AND FIVE RESERVIORS, CONSTRUCTED UNDER APPLICATION R-73610, PERMIT R-11511, TRIBUTARIES OF SIXES RVER, for CRANBERRY USE ON 14.5 ACRES AND SUPPLEMENTAL CRANBERRY USE ON 13.5 ACRES.

This right was perfected under Permit S-51557. The date of priority is AUGUST 31, 1993. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 1.0 CUBIC FEET PER SECOND (CFS); BEING 0.5 CFS FROM EACH STREAM AND 34.8 ACRE FEET STORED WATER FROM FIVE RESERVOIRS, or its equivalent in case of rotation, measured at the point of diversion.

The points of diversion are located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances	Reservoir
31 S	15 W	WM	33	NE SW	POD 2 - 1560 FEET NORTH AND 3150 FEET WEST FROM SE CORNER, SECTION 33	4
31 S	15 W	WM	33	NW SE	POD 1 -1750 FEET NORTH AND 1740 FEET WEST FROM SE CORNER, SECTION 33	1, 2
31 S	15 W	WM	33	NW SE	POD 3 - 1540 FEET NORTH AND 2430 FEET WEST FROM SE CORNER, SECTION 33	3
31 S	15 W	WM	33	SW SE	POD 4 - 295 FEET NORTH AND 1540 FEET WEST FROM SE CORNER, SECTION 33	5

The amount of water diverted for CRANBERRY USE, together with amounts secured under any other rights existing for the same lands, is limited as follows: For temperature control, 0.15 cubic foot per second per acre. For flood harvesting or pest control, 0.05 cubic foot per second per acre. For irrigation of cranberries, ONE-FORTIETH of one cubic foot per second and 3.0 acre feet per acre for each acre irrigated during the irrigation season of each year. For the irrigation of any other crop ONE-EIGHTIETH of one cubic foot per second and 2.5 acre feet per acre during the irrigation season of each year.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

A description of the place of use is as follows:

CRANBERRY USE

31 S	15 W	WM	33	SW SE	4.17

Measurement, recording and reporting conditions:

- A. The water user shall maintain the meter or other suitable measuring device as approved by the Director in good working order.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the water user to keep and maintain a record of the amount (volume) of water used and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water use information, the periods of water use and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

3. Application R-73610, Permit R-11511
4. Application S-73611, Permit S-51557

Mr. Clark:

Inclosed are two maps and two report revisions for the maps, each addressing its reservoir and use location per 1/4 1/4, therefore reflecting revisions to four claims. Also there appears to be an error in the Claim of Beneficial Use (COBU) report for permit R-11511 as a source of water for reservoirs 1, 2, (3) it should have stated 5 not 3 for the un-named #1 stream.

These changes address previously submitted COBU by others that have the bogs and reservoirs incorrectly shifted up to 200 feet to the east. This error if not corrected can cause problems with future transfers and already has had negative interactions with our previously submitted claims.

If there are any questions please officially contact the client with a copy to me.

Respectfully,

Clay Jordan, P.E., S.E., Geotech, CWRE

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

Measurement, recording and reporting conditions:

- A. The water user shall maintain the meter or other suitable measuring device as approved by the Director in good working order.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the water user to keep and maintain a record of the amount (volume) of water used and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water use information, the periods of water use and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

Actual construction work shall begin on or before DECEMBER 6, 1995 and shall be completed on or before October 1, 1996. Complete application of the water to the use shall be made on or before October 1, 1997.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The Director of the Water Resources Department has found that the proposed use of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

METERING

All diverted water is metered. Three meters serve the four diversions. A meter from one of the stationary diversions is installed on the portable pumping unit at diversion #3 when it is operating, and the corresponding stationary unit is closed down. The meter is then re-installed on the stationary unit when pumping is completed at the portable diversion.

The amount of water diverted for CRANBERRY USE, together with amounts secured under any other rights existing for the same lands, is limited as follows: For temperature control, 0.15 cubic foot per second per acre. For flood harvesting or pest control, 0.05 cubic foot per second per acre. For irrigation of cranberries, ONE-FORTIETH of one cubic foot per second and 3.0 acre feet per acre for each acre irrigated during the irrigation season of each year. For the irrigation of any other crop ONE-EIGHTIETH of one cubic foot per second and 2.5 acre feet per acre during the irrigation season of each year.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

Measurement, recording and reporting conditions:

- A. The water user shall maintain the meter or other suitable measuring device as approved by the Director in good working order.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the water user to keep and maintain a record of the amount (volume) of water used and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water use information, the periods of water use and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

This letter is in regard to your water use Permit R-11511 and 51557. As we pointed out to you in our letter of October 21, 1998 your claim of beneficial use must be received in this office by **September 4, 1999**.

Oregon Administrative Rule 690-14-190 states: "The claim of beneficial use shall be submitted to the Department within one year after the use was reported..as being complete...Failure to comply with this section shall cause the Director to initiate permit cancellation proceedings as provided by ORS 537.260."

The "claim" consists of a site report and map of the developed use prepared by a Certified Water Rights Examiner, which accompany a request from the permittee for issuance of a certificate of water right.

You are hereby notified that unless your claim is received on or before **September 4, 1999**, your permit will be canceled without further notice.

If you have any questions, please contact the Water Rights Section.

We have received your notices that complete application of water has been made under Permits R-11511 and 51557.

In order to obtain a certificate of water right, you are required by law to hire a Certified Water Right Examiner (CWRE) to conduct the final proof survey of the completed use. This must be done within one year after the use is reported as being complete or within one year after the beneficial use date allowed in the permit, whichever occurs first. Accordingly, the map and claim of beneficial use must be received in this office on or before **September 4, 1999**. A list of Certified Examiners is enclosed for your information.

The Department requires that the CWRE has a copy of the permit or transfer order to compile the claim of beneficial use. All permit conditions need to be addressed in the claim and map you submit.

Upon receipt of the map and claim of beneficial use, the information will be reviewed and a brief field inspection may be conducted by a representative of this office. Following that, a proposed certificate of water right will be mailed to you for review.

In the meantime, the permit you hold is valid evidence of your right to use the water.

If you have any questions, please contact the Water Rights Section at 378-3739, or toll-free within Oregon 1-800-624-3199.

UNNAMED STREAM #1 AND RESERVOIR 5 - SW 1/4 SE 1/4, SECTION 33, T 31 S, R 15 W, W.M.; 280 FEET SOUTH AND 80 FEET WEST;
ALL FROM THE NORTHEAST CORNER OF THE NORTHWEST QUARTER OF THE SOUTHEAST QUARTER OF SECTION 33, T 31 S, R 15 W, W.M.

The amount of water diverted for CRANBERRY USE, together with amounts secured under any other rights existing for the same lands, is limited as follows: For temperature control, 0.15 cubic foot per second per acre; For flood harvesting or pest control, 0.05 cubic foot per second per acre; For irrigation of cranberries, ONE-FORTIETH of one cubic foot per second and 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year. For the irrigation of any other crop, ONE-EIGHTIETH of one cubic foot per second and 2.5 acre-feet per acre for each acre irrigated during the irrigation season of each year. The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the proposed place of use under this permit is as follows:

NE 1/4 SW 1/4 4.0 ACRES
NW 1/4 SE 1/4 12.5 ACRES
SW 1/4 SE 1/4 11.5 ACRES
SECTION 33
TOWNSHIP 31 SOUTH, RANGE 15 WEST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

Actual construction work shall begin on or before DECEMBER 6, 1995 and shall be completed on or before October 1, 1996. Complete application of the water to the use shall be made on or before October 1, 1997.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

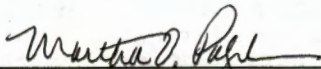

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The Director of the Water Resources Department has found that the proposed use of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Issued this date December 6, 1994.

Dear Carol,

On December 27, 2012, the Department received Requests for Assignments for the above five referenced permits.

It appears that the intention of the Assignments is as follows:

The initial sets of Assignments appear to be assigning the interest from Daryl Robison to George P. Bussmann and Diane G. Bussmann for the five permits listed above.

The second sets of Assignments appear to then be assigning the above permits from the Bussmanns to George P. Bussmann and Diane G. Bussmann and Northwest Farm Credit Services, PCA.

We are unable to accept and process the Assignments as submitted for the following reason:

1. The Assignments were not accompanied with the appropriate fees. A fee is required for each permit being assigned. As described above, your request is for a total of 10 Assignments. The total fees required to complete the Assignments as you have requested is \$750.00 (10 X \$75.00).

We are returning the Requests for Assignment along with your check in the amount of \$300.00. The Request for Assignment form indicates that only one permit be included per form. The Department is willing to accept the forms as completed rather than require that the forms be updated.

Upon submittal of the Assignment forms and the appropriate fees, the Department will process the Assignments.

If you have any questions, please feel free to call Jerry Sauter at 503-986-0817.

Sincerely,

For Department Use		
App. No. <u>S-86412</u>	Permit No. _____	Date _____

2. SOURCE AND PROPERTY OWNERSHIP

A. The Proposed Source of Water

Provide the commonly used name of the water body from which water will be diverted, and the name of the stream or lake it flows into. If unnamed, say so:

Source 1: Reservoir No. 4 Tributary to: Unnamed Stream # 2 - Sixes River
Source 2: Reservoir No. 3 Tributary to: Excavated in Sixes River Drainage
Source 3: _____ Tributary to: _____
Source 4: _____ Tributary to: _____

B. Property Ownership

Do you own all the land where you propose to divert, transport, and use water?

- Yes (Skip to section 3 "Water Use.")
- No (Please check the appropriate box below.)
 - I have a recorded easement or written authorization permitting access.
 - I do not currently have written authorization or easement permitting access.
 - Written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigated and/or domestic use only (ORS 274.040).

You must provide the legal description of: (1) the property from which the water is to be diverted, (2) any property crossed by the proposed ditch, canal or other work, and (3) any property on which the water is to be used as depicted on the map.

List the names and mailing addresses of all affected landowners.

n/a

3. WATER USE

Please read the instruction booklet for more details on "type of use" definitions, how to express how much water you need and how to identify the water source you propose to use. You must fill out a supplemental form for some uses as they require specific information for that type of use.

A. Type(s) of Use(s)

See list of beneficial uses provided in the instructions.

- If your proposed use is **domestic**, indicate the number of households to be supplied with water: _____
- If your proposed use is **irrigation**, please attach **Form I**
- If your proposed use is **mining**, attach **Form R**
- If your proposed use is **municipal or quasi-municipal**, attach **Form M**
- If your proposed use is **commercial/industrial**, attach **Form Q**

Surface Water/2

B. Amount of Water

Provide the amount of water you propose to use from each source, for each use, in cubic feet-per-second (cfs) or gallons-per-minute (gpm). If the proposed use is from storage, provide the amount in acre-feet (af):

(1 cfs equals 448.8 gpm. 1 acre-foot equals 325,851 gallons or 43,560 cubic feet)

Source	Type of use	Amount	<input type="checkbox"/> cfs	<input type="checkbox"/> gpm	<input checked="" type="checkbox"/> af
Reservoir No. 4	Cranberry Operations	4 acre feet	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Reservoir No. 3	Cranberry Operations	4 acre feet	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

C. Period of Use

Indicate the time of year you propose to use the water: March 1 - November 30
(For seasonal uses like irrigation give dates when water use would begin and end, e.g. March 1–October 31.)

D. Acreage

If you will be applying water to land, indicate the total number of acres where water will be applied or used: 2.5 acres
(This number should be consistent with your application map.)

4. WATER MANAGEMENT

A. Diversion

What method will you use to divert water from the source?

- Pump (give horsepower and pump type): 1 - 5 hp Centrifugal & 1 - 15 hp Centrifugal
- Head-gate (give dimensions): _____
- Other means (describe): _____

B. Monitoring

How will you monitor your diversion to be sure you are within the limits of your water right (allowed rate and duty) and you are not wasting water?

- Weir
- Meter
- Periodic Sampling
- Other means (describe): Will use the Micrometer Meters in place

RECEIVED
 SEP 06 2005
 WATER RESOURCES DEPT
 SALEM, OREGON

C. Transport

How will you transport water to your place of use?

Ditch or canal (give average width and depth):

Width _____ Depth _____

Is the ditch or canal to be lined? Yes No

Pipe (give diameter and total length):

Diameter 6" & 4" PVC Length +/- 1700 feet

Other (describe) _____

D. Application/Distribution Method

What equipment will you use to apply water to your place of use? Rainbird 30's with 1/8" nozzles - will open pipe (remove sprinklers) and use 1" uprights to flood field for harvest in October or November

Irrigation or land application method (check all that apply):

- Flood
- High-pressure sprinkler
- Low pressure sprinkler
- Drip
- Water cannons
- Center pivot system
- Hand lines
- Wheel lines
- Siphon tubes or gated pipe with furrows
- Other, describe _____

Distribution method

- Direct pipe from source
- In-line storage (tank or pond)
- Open canal

E. Conservation

What methods will you use to conserve water? Why did you choose this distribution or application method? Have you considered other methods to transport, apply, distribute or use water? For example, if you are using sprinkler irrigation rather than drip irrigation, explain. If you need additional space, attach a separate sheet.

Water is not plentiful at my location. Will use sparingly and will check my usage by the meters. System is closed so there should be little, or no, losses.

5. RESOURCE PROTECTION

A. Protection Practices

In granting permission to use water from a stream or lake, the state encourages, and in some instances requires, careful control of activities that may affect the waterway or streamside area. See instruction guide for a list of possible permit requirements from other agencies. Please indicate any of the practices you plan to undertake to protect water resources.

Diversion will be screened to prevent uptake of fish and other aquatic life.

Describe planned actions: completed

Excavation or clearing of banks will be kept to a minimum to protect riparian or streamside areas. Describe planned actions: reservoirs done - no additional work planned

Operating equipment in a water body will be managed and timed to prevent damage to aquatic life. Describe: n/a

Water quality will be protected by preventing erosion and run-off of waste or chemical products. Describe: I follow the Cranberry Industry's BMP and have had no complaints thus far.

Other: _____

6. PROJECT SCHEDULE

Indicate the anticipated dates that the following construction tasks should begin. If construction has already begun, or is completed, please indicate that date.

Proposed date construction will begin: October 1, 2005

Proposed date construction will be completed: October 1, 2006

Proposed date beneficial water use will begin: October 1, 2009 (time for plants to grow)

7. REMARKS

If you would like to clarify any information you have provided in the application, please do so here and reference the specific application question you are addressing.

I have not had to use the reservoirs fully for supplemental water on existing fields. Plan to use water already stored for the new bog. I estimate there is sufficient water to increase acreage by one cranberry field.

8. MAP REQUIREMENTS

The Department cannot process your application without accurate information showing the source of water and location of water use. You must include a map with this application form that clearly indicates the township, range, section, and quarter/quarter section of the proposed points of diversion and place of use. The map must provide tax lot numbers. See the map guidelines sheet for detailed map specifications.

9. SIGNATURE

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application packet.
- I cannot legally use water until the Water Resources Department issues a permit to me.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be canceled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit to me, I may have to stop using water to allow senior water right holders to get water they are entitled to, and

I swear that all information provided in this application is true and correct to the best of my knowledge:

Signature of Applicant (If more than one applicant, all must sign.)

8/25/05

Date

Before you submit your application be sure you have:

- Answered each question completely.
- Attached a legible map which includes township, range, section, quarter/quarter and tax lot number.
- Included a Land Use Information Form or receipt stub signed by a local official.
- Included the legal description of all the property involved with this application. You may supply a copy of the deed, land sales contract, or title insurance policy, to meet this requirement.
- Included a check payable to the Oregon Water Resources Department for the appropriate amount. The Department's fee schedule can be found at www.wrd.state.or.us or call (503) 986-0900.

Dear Mr. Shook;

Please send me an application for an extension of time to complete construction and make complete application of water. I have recently submitted form A, but because of the wet fall, it is doubtful that I will be able to complete construction by October 1996.

Also, please note that I have a new mailing address and would appreciate having all future correspondence mailed accordingly.

PUBLIC INTEREST REVIEW

The proposed water use described in Application #S-73611 has been evaluated according to the public interest standards set out in ORS 537.170 and OAR 690-11-195.

The Application requested the use of 1.0 CFS from TWO UNAMED STREAMS AND FIVE RESERVIORS tributary to the SIXES RIVER for the purpose(s) of 14.5 ACRES CRANBERRY USE AND 13.5 ACRES SUPPLEMENTAL CRANBERRY USE. The Technical Review Report limits the proposed use to 1.0 CFS LIVE FLOW DURING 11/1 THROUGH 4/30 AND 39.0 AC-FT STORED WATER TO BE USED ANY TIME.

The proposed use described in Application #S-73611 is not within a category required to be submitted to the Commission.

The Director of the Water Resources Department has evaluated the Application for the proposed water use and made the following public interest determination.

TECHNICAL REVIEW

Water use Application #S-73611 received a Satisfactory Report of Technical Review.

The Technical Review revealed that the proposed water use:

- a)-is not prohibited by statute or scenic waterway criteria;
- b)-is a classified use under the applicable basin program or an application for the use has been filed under ORS 536.295 and OAR 690 Division 82;
- c)-is consistent with conditions previously imposed by the Commission on appropriations from the same source;
- d)-will not conflict with (an) existing water right(s);
- e)-is supported by an available source of water.

**PUBLIC INTEREST REVIEW
CHECKLIST**

The Director of the Water Resources Department has evaluated the proposed water use, as described in Application #S-73611, in light of current and planned uses and reasonably anticipated future demands for water from the water source as established in the record.

The evaluation has recognized known beneficial uses of water, including but not limited to the categories described in OAR 690-11-195(3)(a)-(d).

The Director has reviewed the elements of the proposed water use and has based the public interest determination on evidence in the record which included the following:

I. Existing claims to water from the same source.

✓ There are no conflicts with existing claims to water from the same source as is documented in the Report of Technical Review.

Comment: PERMIT CONDITIONED TO AVOID CONFLICT.

II. Land use matters.

✓ The local government where the proposed water use is located has acknowledged receipt of the Land Use Information Form and has filed no objections to the proposed appropriation.

✓ Public notice of the proposed water use was sent to all local governments which have requested such notice and none of those local governments have filed objections to the proposed water use.

✓ There is nothing in the record to indicate the proposed water use is incompatible with Statewide Planning Goals or

local comprehensive plans.

If local government approval has not been granted, there is nothing in the record to indicate conditions cannot be placed on the proposed water use to require local land use approval prior to initiation of the use.

An applicant for municipal water use has submitted information showing the proposed water use is compatible with comprehensive plan policies concerning urban services, urban growth boundaries, and Public Facilities Plans.

III. Identified environmental concerns.

The proposed water use does not appropriate water from any water body listed to receive Total Maximum Daily Loads and therefore, the water body has not been defined as water quality limited according to Section 303(d)(1) of the federal Clean Water Act according to the information supplied by the Oregon Department of Environmental Quality.

IV. The character and extent of other natural resources which are present in the water source basin.

The Oregon Department of Fish and Wildlife (ODFW) has been notified of the proposed water use and has made no objections regarding fish and other aquatic and wildlife species and populations.

There are no listed threatened or endangered species in the water source according to the information supplied by the Oregon Department of Fish and Wildlife.

V. Riparian characteristics.

There is nothing in the record to indicate the proposed use is likely to be detrimental to the riparian characteristics of the water source. This riparian

review is not applicable to groundwater sources.

VI. Recreational use and potential of the water source and its basin area.

There is nothing in the record to indicate a conflict with known or reasonably anticipated recreational use.

VII. Agricultural potential of the area.

There is nothing in the record to indicate the proposed water use will conflict with known or reasonably anticipated agricultural practices.

VIII. Designated historic, cultural, or natural resource protection areas.

There is nothing in the record to indicate any conflict with any known or reasonably anticipated historic, cultural, or natural resource designations.

IX. Identified health or safety requirements.

There nothing in the record to indicate any identified health and safety requirements.

**PUBLIC INTEREST REVIEW
FINDINGS AND CONCLUSIONS**

This public interest determination has considered the following standards as set out in ORS 537.170(5):

- a) The conservation of the highest use of the water for all purposes, including irrigation, domestic use, municipal water supply, power development, public recreation, protection of commercial and game fishing and wildlife, fire protection, mining, industrial purposes, navigation, scenic attraction or any other beneficial use to which the water may be applied for which it may have a special value to the public.
- b) The maximum economic development of the waters involved.
- c) The control of the waters of this state for all beneficial purposes, including drainage, sanitation and flood control.
- d) The amount of waters available for appropriation for beneficial use.
- e) The prevention of wasteful, uneconomic, impracticable or unreasonable use of the waters involved.
- f) All vested and inchoate rights to the waters of this state or to the use of the waters of this state, and the means necessary to protect such rights.
- g) The state water resources policy formulated under ORS 536.295 to 536.350 and 537.505 to 537.525.

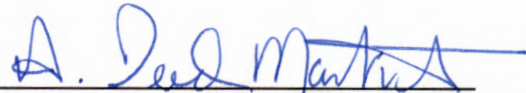

The Director of the Water Resources Department, pursuant to OAR 690-11-185(4), has considered the facts set forth in the Application and its supporting data, the Director's Report of Technical Review and any objections which met the requirements of OAR 690-11-170(1).

The Director of the Water Resources Department has evaluated the proposed water use with respect to the information in the record of the Department and has made the following public interest determination.

The Director has determined that the proposed water use described in Application #S-73611:

WILL IMPAIR OR BE DETRIMENTAL TO THE PUBLIC INTEREST and therefore, the Director hereby proposes rejection of the application and shall schedule a contested case hearing.

WILL NOT IMPAIR OR BE DETRIMENTAL TO THE PUBLIC INTEREST and therefore, the Director shall issue a water use permit with appropriate conditions.

Hello:

This letter informs you of the current status of your application for a water use permit and accompanies the Satisfactory Report of Technical Review For Water Use Permit(s). We apologize for the delay in transmitting this information and Report to you and for any inconvenience the wait may have caused you.

The enclosed Report of Technical Review is the Department's summary of a specialized analysis of various legal and scientific aspects of your application and proposed water use. We are required by the state of Oregon's administrative rules (in OAR 690-11-160) to conduct this official technical review of each application submitted to the Oregon Water Resources Department for a water use permit. This process was designed to insure that your application receives a fair evaluation and to secure protection of existing water rights and of the public at large.

AS THE RESULT OF OUR TECHNICAL EVALUATION, WE HAVE DETERMINED THAT YOUR APPLICATION SATISFIES THE REQUIREMENTS OF THE TECHNICAL REVIEW.

The Department will now move your application to the next phase of processing. This phase includes a public interest review of your proposed water use. No final action may be taken on your application until the public interest review is completed.

You should also note that the Report of Technical Review describes conditions currently anticipated which may limit the water use proposed in your application.

If you wish to object to any of the analyses contained in the Report, you must submit your objection to the Department in writing within 60 days of the date of mailing of this Report or by the date specified below. Your objection must allege that the technical review is defective and you may also submit evidence which demonstrates that your proposed water use will not impair or be detrimental to the public interest.

Copies of the Report of Technical Review will be distributed to all persons who have filed comments or otherwise expressed an interest in the water use proposed in your application. Interested parties must also submit their objections within the prescribed objection period. Those objections must allege that the technical review is defective and/or that the proposed water use may impair or be detrimental to the public interest.

If an objection contains allegations that the technical review is defective, it must be accompanied by facts which support such allegations. If an objection contains allegations that the proposed water use may impair or be detrimental to the public interest, the objection must specify the particular public interest standards which apply as set out in Oregon Revised Statutes (ORS 537.170(5)) and Oregon Administrative Rules (OAR 690-11-195) and state facts showing how such standards would be violated.

All evidence and objections must be received by our Salem office no later than 5:00 p.m. on or before March 11, 1994 or the Department may presume there is no opposition to any of the analyses set out in the technical review report. Evidence and objections must be addressed and delivered to: Oregon Water Resources Department, Water Rights Section, 3850 Portland Road, Northeast, Salem, Oregon 97310.

If objections and evidence are submitted on or before the above time and date, the Director of the Water Resources Department will evaluate each issue raised in the objections and either accept or deny them. Objectors are encouraged to indicate whether they would be interested in resolving their concerns through alternative dispute resolution.

If any of the objections are denied, the objector will be allowed thirty days to submit a protest to the denial. The protest must meet the standards set forth in OAR 690-02-030 through 080.

If you have any questions, please feel free to telephone me or any of the Department's Water Rights Section staff. My telephone number is 378-3739, in Salem, or you may call toll free from within the state to 1-800-624-3199.

Sincerely,

STEVE BROWN
Manager
Water Rights Division

SURFACE WATER AVAILABILITY

Water is likely available in excess of needs for all existing rights 80% of the time during each monthly period proposed by the technical review.

Water availability tables are available in the application file and may be reviewed in the office of the Water Resources Department in Salem.

CONFLICTS WITH OTHER WATER RIGHTS:

There are existing rights from this point of diversion. See proposed permit conditions.

There are existing water rights appurtenant to the lands described in the application. See proposed permit conditions.

REPORT CONCLUSIONS:

Based on the Department's review of water availability and Oregon Administrative Rules, water in the amount of 1.0 cfs is likely available for 5 months and the 39.0 acre-feet of stored water may be used at any time. Therefore, the Director finds that water is available in sufficient amount and during periods which will reasonably support the proposed use.

THE PROPOSED WATER USE, AS CONDITIONED, SATISFIES THE REQUIREMENTS OF THIS TECHNICAL REVIEW.

This Report of Technical Review sets out the Director's technical analysis of the application. In addition to this technical analysis, the Director will evaluate this application to determine whether the proposed water use might impair or be detrimental to the public interest under the standards set out in ORS 537.170(5) and OAR 690-11-195. Matters relating to public interest in the proposed water use which are raised in objections will be evaluated following the 60-day objection period.

PROPOSED PERMIT CONDITIONS

Application: 73611

The following conditions will apply to water use under the permit, and will appear in the permit, if issued.

1. Use of water under this permit is subject to all prior rights.
2. Period of allowed use: Live Flow - November 1 through April 30 of each year; Stored water may used at any time.
3. Rate of use: 1.0 cfs and 39.0 acre-feet
4. Water use development requirements:
 - A. Begin construction by (one year from issuance of permit).
 - B. Complete construction by October 1, 1996.
 - C. Completely apply the water to beneficial use by October 1, 1997.
5. Measurement, recording and reporting conditions:
 - A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
 - B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
 - C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

6. Failure to comply with any of the provisions of the permit may result in action including, but not limited to, restrictions on the use, penalties, or cancellation of the permit.
7. The permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
8. The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.
9. In the event of a request for a change in point of appropriation, an additional point of appropriation or alteration of the appropriation facility associated with this authorized diversion, the quantity of water allowed herein, together with any other right, shall not exceed the capacity of the facility at the time of perfection of this right.
10. This right is limited to any deficiency in the available supply of any prior right existing for the same land.
11. The amount of water diverted for CRANBERRY OPERATIONS, together with amounts secured under any other rights existing for the same lands, is limited as follows: For temperature control, 0.15 cubic foot per second per acre; For flood harvesting or pest control, 0.05 cubic foot per second per acre; For irrigation of cranberries, ONE-FORTIETH of one cubic foot per second and 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year. For the irrigation of any other crop, ONE-EIGHTIETH of one cubic foot per second and 2.5 acre-feet per acre for each acre irrigated during the irrigation season of each year.

Hello:

Under separate cover I have enclosed our report of technical review. This process is fairly new to staff and has taken more time to complete than anticipated; however, we believe that the process is more fair and will allow staff to deal with issues in a more timely manner. I truly apologize for the delay.

Your application file was recently reviewed. Before we can process your application further, you need to provide us with additional information, documentation, or fees.

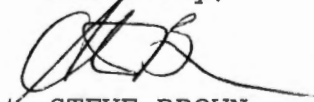

Please send the following:

permit fees in the amount of \$136.00;

After the file is complete and the deadline for objections to the technical review expires, staff will again review the file for objections and further process your application as soon as possible.

Please feel free to contact me if you have any questions and I will be happy to address any concerns you may have.

RE: Application for Permit #R73610, 73611, Daryl Robison
Sixes R. Tribs, Curry Co., Cranberry Use

WaterWatch has reviewed the limited amount of information contained in the public notice of this water right application. Based upon that information, WaterWatch raises the following issues, questions, and concerns:

Is there unappropriated water available for this proposed use? Does the Department have adequate data to accurately determine the 50% and 80% exceedence levels?

What effect will this proposed use have on instream flows necessary to protect the public's interest in fish, wildlife, recreation, and a healthy aquatic system?

This water source may suffer from water quality problems. Has the Department consulted with the Department of Environmental Quality to determine the effect this proposed withdrawal will have on water quality?

If this water source provides habitat to native fish during any phase of their life cycle, WaterWatch requests that the Department include conditions requiring the installation and maintenance of fish screening and bypass devices prior to any diversion of water.

Will this proposed diversion require a dredge & fill permit from the U. S. Army Corps. of Engineers or a fill and removal permit from the Division of State Lands?

Given the importance of surface water sources, and the Department's limited enforcement staff, it only makes sense to require this applicant to measure and report water use. Measurement not only helps the Department carry out its statutory mandate to promote the control of water resources for all beneficial uses, it helps the Department protect the public's interest in assuring the use is within the bounds of the permit. ORS 536.220(1)(a), 537.170(5).

Will this proposed use be compatible with Goal 5 elements of the local comprehensive plan?

It is a high priority of the state to eliminate waste and improve the efficiency of water use. Statewide policy also calls upon water users to use and maintain their water systems in a manner consistent with the state's priority. What conditions are proposed for this permit that will carry out and encourage compliance with state policy?

Is this an existing illegal use of water? If so, will the continued use without a permit cause harm to existing water rights and the public interest?

Please send WaterWatch a copy of the Department's technical review of this application.

Sincerely,

Jim Myron

REFERENCE: File(s) R-73610, S-73611

We have received your application(s) for a water use permit along with your supporting data, documentation, and fees. A receipt is enclosed here unless you were previously issued one. Your application has been assigned the above referenced file number. Please refer to this number whenever you contact us about your application.

Even though your application has been received, filed and assigned an application reference number, no authorization has been granted to develop your water use. The filing of an application does not create a water right. Water may not be used without a water right permit.

After an application has been accepted for filing, public notification of the application is made, followed by the mandatory 30-day comment period. Thereafter, applications can be considered for processing as time allows.

At present the Water Resources Department has a backlog of several thousand applications for water use permits which has delayed our application processing time. Applications are processed in the order in which they are received.

The processing of an application does not guarantee that a water right permit will be issued. Each application must undergo a specialized analysis called a technical review and a public interest review. There is no way to determine at this time whether your particular proposed water use will be recommended for a permit.

REFERENCE: File(s) - R-73610, S-73611

When the report on the technical review is completed and sent to you, a 60-day objection period begins during which you, the applicant, or anyone who has expressed an interest in your proposed water use may communicate to us their disagreement with what we have said in our report on your application. After the 60-day objection period, the Department conducts the public interest review and considers any objections which have been made.

After any objections have been considered, there may follow time to allow parties to resolve conflicts over the proposed water use. In addition, a 30-day protest period may be required. Lastly, it may be necessary to schedule a hearing or send the application to the Water Resources Commission for their review. In most cases no objections are received and the application processing can proceed without further conflict resolution, protest, or hearing.

If your application is recommended for approval and a permit is issued, the use allowed by the permit will be subject to the Basin Program Rules of the Water Resources Commission, instream flow requirements, and the demands of prior right holders, and other conditions to conform the water use to particular standards.

Please contact the Water Rights Section of the Water Resources Department if you have any questions. You may write to us at 3850 Portland Road, Northeast, Salem, Oregon 97310 or you may call 378-3739 in Salem or toll free from within the state 1-800-624-3199.
