Dear Mr. Barnard:

In reviewing our completed certificates of registration, we have noted an apparent error in the required recording fees for your well registration statement. The registration statement shows an area of 137.4 acres is being irrigated near the Clackamas River in Clackamas County and the total fee for this acreage is \$27.40. On the 25th of July, 1958 your statement was filed with a fee of \$19.50, an additional \$9.90 is required to complete this filing fee.

In your letter of July 23, 1958, you mentioned that you submitted fees covering an additional thirty acres which was over and above the original thirty acres covered by your \$15.00 check, thereby inferring that approximately sixty acres are being irrigated rather than the 137.4 as shown in your statement. Would you please clarify the correct number of acres being served by the well. Should you be irrigating 137.4 acres then we require the \$9.90 as previously mentioned. However, should there be a change in the amount of irrigated land then you should return your registration statement so that these corrections may be made. A fee of \$19.50 covers sixty acres of irrigation.

Upon receipt of your additional fees or the corrected registration statement, we will be able to complete your ground water filing.

Very truly yours,

LEWIS A. STANLEY .

Dear Mr. Barnard:

We wish to acknowledge receipt of your registration statement setting forth your claim to a vested ground water right.

Before this claim can be filed, however, we must be in receipt of the examination and recording fees that are prescribed by the statutes. These fees are computed as follows; examination fee \$10 and recording fee of \$5 for the first 30 acres of irrigated land, additional acreage require 15 cents per acre up to and including 100 acres, above 100 acres the fee drops to 5 cents per acre. Using this schedule you can compute the total registration fee necessary for your filing. Since all claims must be filed before August 3, 1958, the required fees should be mailed to us prior to that time.

Your registration statement will be held until August pending the receipt of the necessary fees. An information sheet describing the method of computing registration fees is being enclosed for your information.

**Subject:** GR mod ?

Good morning, GR-2666 states on page one that it is for irrigation. Simple enough. When it lists the POU acres it states that the use is supplemental to a SW(res) source. The reservoirs are only 3 acre feet total and the right is for 137.4 acres. Now that is some thin water. There was also a partial cancellation that brought the acres down to 115.7 acres.

This is the first time I have seen a GR even remotely identified as a supplemental right. Some of the GR is linked to the SW right. Some of it is not covered by a SW right anymore. Would we just consider the GR as an irrigation authorization as stated on page 1 of the claim? Or, would we have to address the fact that they indicated it was supplemental to a SW right later in the claim? The area where the GR mod (APOA) is proposed to take place is in the location where some of the SW right was cancelled. So, no tie to the SW right. I think we would allow them to do this. I am not positive so I'm running it by the experts.
