

## **Water Right Application Initial Review**

November 8, 2024

JOHN C. KATZENSTEIN  
PO BOX 765  
GLIDE OR 97443

Reference: Application S-89846

This document is to inform you of the preliminary analysis of the water-use permit application and to describe your options. In determining whether an application may be approved, the Water Resources Department (Department) must consider the factors listed below, all of which must be favorable to the proposed use if it is to be allowed. Based on the information supplied, the Department has made the following preliminary determinations:

### **Preliminary Determinations under Oregon Administrative Rule (OAR) 690-310-0080:**

1. The application proposes the diversion of 0.03 cubic foot per second (CFS), further limited to 0.5 acre-feet (AF) annually, of water from the North Umpqua River, tributary to the Umpqua River, for irrigation of 0.5 acre during spring and summer of each year.
2. The period of use identified on the application as spring and summer, does not provide clear and specific dates for when water use will occur. See the **Additional Information Required** section below for details.
3. The proposed use is not prohibited by law or rule except where otherwise noted below.
4. Irrigation use is allowable under the Umpqua Basin Program (OAR 690-516-0005(1)).
5. An assessment of water availability at 80% exceedance for the proposed use was completed using the Department's Water Availability Reporting System. A copy of this assessment is in the application file. This review is done consistent with OAR 690-410-0070(2)(a). The assessment established surface water is available from December 1 through June 30 of each year. See the **Additional Information Opportunity** section below.
6. The proposed use is not located within or above any state scenic waterway.

7. The application proposes a diversion rate for irrigation that is in excess of the general basin-wide standard, and the applicant has not submitted information that demonstrates the need for the higher rate for the Department to consider. In the absence of other information, if the application is approved, the rate allowed for irrigation will be limited to 0.006 CFS (or 1/80th of one CFS per acre).
8. Documentation has been submitted from the relevant land-use planning jurisdiction that indicates the proposed use is allowed outright.
9. See the **Additional Information Required** section below for deficiencies with the application.

<b>Summary of Preliminary Determinations</b>
<b>The diversion of 0.03 CFS, further limited to 0.5 AF annually, of water from the North Umpqua River, tributary to the Umpqua River, for irrigation of 0.5 acre during spring and summer of each year is not allowable.</b>

**Additional Information Opportunity:**

Surface water is not available during all months of the year (Preliminary Determination #5) and may not be available during the full period of use requested (Preliminary Determination #2 and **Additional Information Required** section below). Pursuant to OAR 690-300-0010(57)(b), a water right permit applicant has the opportunity to provide the following information for the Department to consider:

- Information that demonstrates the proposed use only requires water (and can make beneficial use of water) during the period of time when water is available for further appropriation.
- Information that demonstrates the applicant can obtain water from an alternate source during the period when water is not available.

If you are interested in pursuing the opportunity described above, please submit the requested information no later than **December 12, 2024**. If you need more time, you may request an administrative hold for up to an additional 180 days. You must submit the request in writing, stating how much more time is needed and why you need additional time. If an administrative hold is granted, your application will not be processed further until the requested information is received or the extended deadline has passed.

**Additional Information Required:**

**Although it is unlikely that a permit will be issued**, if the Department’s finding change, additional information will be required prior to issuance of any Proposed Final Order that may recommend permit approval. Please provide the following item(s):

- A. The period of use identified on the application as spring and summer, does not provide clear and specific dates for when water use will occur. Please provide a specific range of dates during which water will be used each year. Please submit this information alongside amended application pages, **and**

- B. The map submitted does not meet the requirements of OAR 690-310-0050(4)(b) and (c). Please provide a map that identifies the number of acres to be irrigated per quarter-quarter section.

**Please submit this information no later than December 12, 2024.** If you are unable to submit the information listed above by this date, you may request an administrative hold for up to an additional 180 days. You must submit the request in writing, stating how much more time is needed and why you need additional time. If an administrative hold is granted, your application will not be processed further until the requested information is received or the extended deadline has passed.

If we do not receive the information requested above or a request for an administrative hold by the above date, the Department may reject the application.

**Public Comment & Further Review:**

Public interest issues and/or public comments will be addressed as the Department prepares a Proposed Final Order. If significant public interest issues are identified, they could have an impact on the eventual outcome of the application.

Division 33 Review – The Department’s Division 33 administrative rules (OAR 690-033) establish additional procedures and standards to aid the Department in determining whether a proposed use will impair or be detrimental to the public interest with regard to sensitive, threatened, or endangered (STE) fish species. This Initial Review does not address the potential impact that your proposed use may have on these species.

Your application will now undergo an additional review from numerous federal, state, local, and tribal governmental entities. This review may cause your application to be limited, conditioned, or denied. Depending on the proposed use, you may be required to mitigate for potential impacts identified in the review.

Mitigation for impacts to STE Species – Mitigation is often complicated, time consuming, and expensive, and may include, but is not limited to, actions such as replacing the proposed amount of water within the impacted reach through purchasing or transferring an existing water right. Following the Initial Review, you will be notified if mitigation is required, due to impacts to STE fish species.

If you choose to pursue mitigation, you will likely need to place your application on administrative hold in order to explore options. There will be an additional fee of \$790 required with any mitigation proposal submitted.

**At this time, you must decide whether to proceed or to withdraw the application.**

- **To Proceed** - If you choose to proceed with the application, you do not have to notify the Department. The application will be placed on the Department's Public Notice to allow others the opportunity to comment. After the comment period the Department will complete a public interest review and issue a Proposed Final Order.
- **To Withdraw** - You may withdraw the application and receive a refund (minus a \$310 processing fee). You must notify the Department **in writing** by **November 22, 2024**. For your convenience you may use the enclosed "STOP PROCESSING" form.

**Although it is unlikely that a permit will be issued, if the Department's findings change and a permit is issued, it will likely include the following conditions:**

1. Construction of the water system shall begin within five years of the date of permit issuance. The deadline to begin construction may not be extended. A permit is subject to cancellation proceedings if the begin construction deadline is missed.
2. **Water Use Measurement, Recording, and Reporting:**
  - A. The Director may require the permittee to install a totalizing flow meter, or other suitable measuring device as determined by the watermaster, at each point of diversion. If the Director notifies the permittee to install a measuring device, the permittee shall install such device within the period stated in the notice. Once installed, the permittee shall maintain the device in good working order, and shall allow the watermaster access to the device.
  - B. The Director may require the permittee to keep and maintain a record of the volume of water diverted, and may require the permittee to report water-use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water-use information, the periods of water use and the place and nature of use of water under the permit.
  - C. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

The water source identified in the application may be affected by an Agricultural Water Quality Management Area Plan. These plans are developed by the Oregon Department of Agriculture (ODA) with the cooperation of local landowners and other interested stakeholders, and help to ensure that current and new appropriations of water are done in a way that does not adversely harm the environment. You are encouraged to explore ODA's Water Quality Program website at [www.oregon.gov/ODA](http://www.oregon.gov/ODA) to learn more about the plans and how they may affect the proposed water use.

**For Further Information:**

Feel free to contact me at Lucinda.R.Vranizan@water.oregon.gov or 971-375-2256 if you have any questions regarding the contents of this letter or the application. Please include the application number in all correspondence. General questions about water rights and water use permits should be directed to our customer service staff at 503-986-0900. When corresponding by mail, please use this address: Lucinda Vranizan, Oregon Water Resources Department, 725 Summer St NE Ste A, Salem OR 97301-1266. Our fax number is 503-986-0901.

Sincerely,

*Lucinda Vranizan*

# APPLICATION FACT SHEET

Application File Number: S-89846

Applicant: JOHN C. KATZENSTEIN

County: DOUGLAS

Watermaster: SUSAN DOUTHIT, #15, SWR

Priority Date: SEPTEMBER 30, 2024

Source: NORTH UMPQUA RIVER, TRIBUTARY TO UMPQUA RIVER

Purpose or Use: IRRIGATION OF 0.5 ACRE

Quantity: 0.03 CUBIC FOOT PER SECOND, FURTHER LIMITED TO 0.5 ACRE-FEET ANNUALLY

Period of Use: SPRING AND SUMMER

Basin Name & Number: UMPQUA, #16

WAB: N UMPQUA R > UMPQUA R - AT MOUTH

Point of Diversion:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
26 S	4 W	WM	15	SW NE	150 FEET SOUTH AND 180 FEET EAST FROM NW CORNER, DLC 42

Place of Use:

Twp	Rng	Mer	Sec	Q-Q	Acres
26 S	4 W	WM	15	SW NE	0.5

**PUBLIC NOTICE DATE: November 12, 2024**

**14 DAY STOP PROCESSING DEADLINE DATE: November 22, 2024**

**30 DAY COMMENT DEADLINE DATE: December 12, 2024**

## **APPLICATION PROCESS DESCRIPTION FOR GROUNDWATER, SURFACE WATER AND REGULAR RESERVOIR APPLICATIONS**

In order to use the waters of Oregon, an application must be submitted and a permit obtained from the Water Resources Department. The water must be used for beneficial purpose without waste. For more information about water right topics, weekly public notice, forms and fees please visit our website at: [www.oregon.gov/owrd](http://www.oregon.gov/owrd)

### **1. Pre-application considerations**

- Follow instructions in the application packet.
- If you have questions about completing an application or would like to arrange a pre-application conference, contact the Department's Water Rights Customer Service Group at (503) 986-0900.

### **2. Application filing**

- Application with fee is received by the Department.
- Department determines completeness of application.
- If use is not allowed by statute (ORS 538), the application and fees are returned to the applicant.
- An incomplete application and fees are returned to the applicant.
- Only a complete application receives a tentative priority date, is assigned a caseworker, and moves forward for processing.

### **3. Initial Review (IR)**

- Caseworker reviews application by considering basin plans, water availability, statutory restrictions, and all other appropriate factors.
- Caseworker sends IR report to Applicant.
- Four days after date of the IR, it is included in Department's weekly Public Notice.
- Public comments must be submitted within 30 days after the Public Notice.

### **4. Proposed Final Order (PFO)**

- Caseworker evaluates application against required criteria and develops draft permit, if appropriate.
- PFO includes instructions for filing of protests.
- Caseworker considers public comments and mails PFO to Applicant.
- The PFO is included in Department's weekly Public Notice.
- Public protests to the PFO must be submitted within 45 days after the Public Notice.

### **5. Final Order (FO)**

- If no protest is filed, Final Order is issued.

#### ***The protest process***

If one or more protests are filed, the process consists of:

- settlement discussion;
- contested case hearing;
- Proposed Order;
- period of time to file exceptions; or
- possible hearing by Water Resources Commission.
- Final Order is issued.

#### ***Permit holder responsibilities***

- Comply with all water use conditions of the permit.
- Advise Department of address change or assignment to new permit holder.
- If need arises, request extension of time or authorize cancellation of permit.
- Submit timely claim of beneficial use (COBU) to the Department.
- Most permits require COBU to be prepared by a Certified Water Right Examiner.
- Permits may be canceled by the permit holder or by the Department for failure to comply with or one or more permit conditions.

**STOP PROCESSING REQUEST FORM**

**FOR GROUNDWATER, SURFACE WATER AND REGULAR RESERVOIR APPLICATIONS**

---

- Stop processing deadline is within 14 days of Initial Review.

Applicant notification to withdraw Water Right Application **S-89846**.

After reviewing the Initial Review for my application, I request that processing be stopped, and the fees be refunded (minus a \$310 processing fee.) I understand that without a valid permit, I may not legally use the water as requested in my application.

Signature \_\_\_\_\_ Date \_\_\_\_\_

Signature \_\_\_\_\_ Date \_\_\_\_\_

Under ORS 537.150 (5) and 537.620 (5) timely submission of this request authorizes that the water right application process be stopped, and all filing fees (except \$310 processing fee) be returned.

- This notice must be received at Water Resources Department by:

**November 22, 2024**

- Return the notice to:

OWRD, Water Right Services Division  
STOP PROCESSING  
725 Summer Street, NE - Suite A  
Salem OR, 97301-1266
