

**Oregon Water Resources Department
Water Right Services Division**

Application for Extension of Time

In the Matter of the Application for an Extension of Time) PROPOSED
for Permit S-55199, Water Right Application S-69623) FINAL
in the name of Tualatin Valley Irrigation District) ORDER

Permit Information

Application:	S-69623
Permit:	S-55199
Basin:	Lower Willamette / Watermaster District 18
Date of Priority:	May 24, 1988, for 43.75 cfs and December 16, 1988 for 37.5 cfs
Source of Water:	Scoggins Reservoir, constructed under Permit R-5777 and Scoggins Creek, tributaries to the Tualatin River; and the Tualatin River, tributary to the Willamette River
Purpose or Use:	agricultural use on 34,258.78 acres; and primary irrigation of 17,179.98 acres, subject to the following limitation: no more than 17,000 acres shall be irrigated in any one irrigation season. The District must submit a list of all the acres to be irrigated to the Watermaster by June 1, of each year
Maximum Rate/Volume:	81.25 cubic feet per second (cfs), being up to 81.25 cfs from the Tualatin River and 23.6 cfs from Scoggins Creek, with any deficiency in live flow made up from stored water in Scoggins Reservoir, constructed under Permit R-5777

Please read this Proposed Final Order in its entirety as it contains additional conditions not included in the original permit.

In summary, the Department proposes to:

- Grant an extension of time to apply water to full beneficial use from August 8, 2024, to October 1, 2049.¹
- Make the extension subject to certain conditions set forth below.

This Extension of Time request is being processed in accordance with Oregon Revised Statute 537.230 and 539.010(5), and Oregon Administrative Rule Chapter 690, Division 315

¹ Pursuant to ORS 537.230(5), upon the completion of beneficial use of water allowed under the permit, the permit holder shall hire a certified water rights examiner to survey the appropriation. Within one year after the complete application of water to a beneficial use (or by the date allowed for the complete application of water to a beneficial use), the permit holder shall submit a map of the survey and the claim of beneficial use.

ACRONYM QUICK REFERENCE

FOF – Finding of Fact
cfs - cubic feet per second

AUTHORITY

Generally, see ORS 537.230 and OAR Chapter 690 Division 315.

ORS 537.230(2) provides in pertinent part that the Oregon Water Resources Department (Department) may, for good cause shown, order an extension of time within which irrigation or other works shall be completed or the right perfected. In determining the extension, the Department shall give due weight to the considerations described under ORS 539.010(5) and to whether other governmental requirements relating to the project have significantly delayed completion of construction or perfection of the right.

ORS 539.010(5) instructs the Director to consider: the cost of the appropriation and application of the water to a beneficial purpose; the good faith of the appropriator; the market for water or power to be supplied; the present demands therefor; and the income or use that may be required to provide fair and reasonable returns upon the investment.

OAR 690-315-0040 provides that in order to approve an application for an extension of time to complete construction or apply water to full beneficial use, the Department shall make the findings in OAR 690-315-0040(1) including a finding that there is “good cause” to approve the extension. OAR 690-315-0040(2)-(4) contains the factors that the Department must consider to make findings that support a “good cause” determination.

OAR 690-315-0050(6) requires the Department, for extensions exceeding five years, to establish checkpoints to determine if diligence is being exercised in the development and perfection of the water use permit. Intervals between checkpoints will not exceed five year periods.

FINDINGS OF FACT

1. On August 8, 2019, Permit S-55199 was issued by the Department. The permit authorizes the use of up to 81.25 cfs of water being up to 81.25 cfs from the Tualatin River, and 23.6 cfs from Scoggins Creek, with any deficiency in live flow made up from stored water in Scoggins Reservoir, constructed for agricultural use on 34,258.78 acres; and primary irrigation of 17,179.98 acres, subject to the following limitation: no more than 17,000 acres shall be irrigated in any one irrigation season. The District must submit a list of all the acres to be irrigated to the watermaster by June 1 of each year. The permit specified construction was to begin by and complete application of water was to be made within five years from the date of permit issuance, being August 8, 2024.

2. On June 5, 2024, Bobby Nuvolini, District Manager for Tualatin Valley Irrigation District, submitted an “Application for Extension of Time” (Application) to the Department, requesting the time to apply water to full beneficial use under the terms and conditions of Permit S-55199 be extended from August 8, 2024, to October 1, 2049. This is the first permit extension requested for Permit S-55199.
3. On June 18, 2024, notification of the Application for Permit S-55199 was published in the Department’s Public Notice. No public comments were received.

Review Criteria [OAR 690-315-0040]

In order to approve an Application for an Extension of Time to complete construction and/or apply water to full beneficial use pursuant to ORS 537.230 or 537.630, or to begin construction, pursuant to ORS 537.248, the Department must make the findings in OAR 690-315-0040(1)(a) – (d).

Complete Extension of Time Application [OAR 690-315-0040(1)(a)]

4. On June 5, 2024, the Department received a completed Application and the fee specified in ORS 536.050 from the permit holder.

Start of Construction [OAR 690-315-0040(1)(b) and 690-315-0040(5)]

5. Construction of the water system and reservoir began prior to permit issuance.
6. According to the Application construction began in 1950 under work accomplished in the development for Certificate 88122.

Based on Findings of Fact (FOF) 5, and 6, the Department has determined the permit holder began construction prior to August 8, 2024.

Good Cause [OAR 690-315-0040(1)(d)]

The Department must find that there is “good cause” to approve the extension. In making a “good cause” finding, the Department shall consider the requirements set forth under OAR 690-315-0040(2).

Reasonable Diligence of the Appropriator [OAR 690-315-0040(2)(a)]

In order to make a finding of “good cause” to approve the extension, the Department shall consider whether the applicant has demonstrated “reasonable diligence” in previous performance under the permit. OAR 690-315-0040(2)(a). In determining “reasonable diligence”, the Department shall consider, but is not limited to, the following factors: a) The amount of construction completed within the time allowed in the permit or previous extension; b) The amount of beneficial use made of the water during the permit or previous extension time limits; c) Water right holder conformance with the permit or previous extension conditions; and d) Financial investments made toward developing the beneficial use of water.

Amount of Construction [OAR 690-315-0040(3)(a)]

The amount of construction completed within the time allowed in the permit or previous extension.²

7. Construction of the water system and reservoir began prior to August 8, 2024.
8. Work accomplished during the original development time frame under Permit S-55199 consists of extending the water conveyance system to additional properties.

The Application provides evidence that progress of physical work, enough to qualify as the minimum necessary, has been made towards completion of the water system for the Department to find good cause and reasonable diligence towards complete application of water to a beneficial use.

Compliance with Conditions [OAR 690-315-0040(3)(c)]

The water right permit holder's conformance with the permit or previous extension conditions.

9. The Department has considered the permit holder's compliance with conditions, and did not identify any concerns.

Based on FOF 9, the Department has determined that the permit holder has demonstrated compliance with permit conditions as required by Permit S-55199.

Beneficial Use of Water [OAR 690-315-0040(3)(b)]

The amount of beneficial use made of the water during the permit time limits or previous extension time limits.

10. A maximum combined rate of 13.3 cfs of water has been diverted from Scoggins Creek and Tualatin River; and a maximum volume of 2,707 acre feet has been estimated to have been diverted to irrigate a maximum of 2,707 acres. The maximum rate and volume have been identified as being diversion that exceed the maximum diversion under the District's other water right certificates.

Based on FOF 10, the Department has determined that beneficial use of water has been demonstrated under Permit S-55199.

Financial Investments to appropriate and Apply Water to a Beneficial Purpose [OAR 690-315-0040(2)(b),(3)(d),(4)(d)]

11. An investment of approximately \$63,097 has been made, which is about 15 percent of the total projected cost for complete development of this project. The permit holder

² "Actual Construction" is defined in OAR 690-315-0020(3)(d)(A) and (B) as physical work performed toward completion of the water system which demonstrates the water right permit holder's good faith and intention to complete the project with reasonable diligence. Actual construction does not include planning a diversion system, formulating a business plan, securing financing, letting contracts, purchasing but not installing equipment, surveying, clearing land or planting crops.

anticipates an additional \$350,000 investment is needed for the completion of this project. These costs do not include the investment made in the existing infrastructure developed under Certificate 88122.

The Department has determined that the permit holder had made an investment, which provides evidence of good cause and reasonable diligence towards the complete application of water to a beneficial use.

Reasonable Diligence of the Appropriator [OAR 690-315-0040(2)(a)]

The Application provides evidence that work has been accomplished towards completion of the water system; the permit holder has demonstrated compliance with permit conditions; a financial investment has been made, and; beneficial use of water has been demonstrated. The Department has determined the applicant has demonstrated reasonable diligence in previous performance under Permit S-55199.

The Market and Present Demands for Water [OAR 690-315-0040(4)(a-f)]

The Department's determinations of market and present demand for water or power to be supplied shall consider the requirements set forth under OAR 690-315-0040(4)(a-f). In accordance with OAR 690-315-0040(4), the Department shall consider, but is not limited to, the following factors when determining the market and the present demand for water or power to be supplied:

- *(a) The amount of water available to satisfy other affected water rights and scenic waterway flows;*
- *(b) Special water use designations established since permit issuance, including but not limited to state scenic waterways, federal wild and scenic rivers, serious water management problem areas or water quality limited sources established under 33 U.S.C. 1313(d);*
- *(c) The habitat needs of sensitive, threatened or endangered species, in consultation with the Oregon Department of Fish and Wildlife;*
- *(d) Economic investment in the project to date;*
- *(e) Other economic interests dependent on completion of the project; and*
- *(f) Other factors relevant to the determination of the market and present demands for water and power.*

OAR 690-315-0040(4)(a)

The amount of water available to satisfy other affected water rights and scenic waterway flows.

12. A review of the amount of water available to satisfy other affected water rights and scenic waterway flows was determined at the time of issuance of Permit S-55199; furthermore, water availability for other affected water rights and scenic waterway flows after the permit was issued is determined when an application for a new water right is submitted.

13. Current Water Availability Analysis for Scoggins Creek, (Tributary to Tualatin River) at the mouth (watershed ID 30201005) shows that no water is available at any time of the year.
14. Current Water Availability Analysis for Tualatin River (tributary to Willamette River) at the mouth (watershed ID 175) shows that water is available during the months of January, February, March, April, May, and December.
15. Current Water Availability Analysis has determined water is available from Scoggins Reservoir, constructed under R-5777, under contract 14-06-100-6956, between the District and the U.S. Bureau of Reclamation.

OAR 690-315-0040(4)(b)

Special water use designations established since permit issuance, including but not limited to state scenic waterways, federal wild and scenic rivers, serious water management problem areas or water quality limited sources established under 33 U.S.C. 1313(d).

16. The points of diversion are located on Scoggins Reservoir, Scoggins Creek, and the Tualatin River, and are not located within a Withdrawn Area.
17. The Scoggins Reservoir, Scoggins Creek, and the Tualatin River, tributary to the Willamette River are not located within or above a state or federal scenic waterway.
18. The points of diversion are not in a location listed by the Department of Environmental Quality as a water quality limited stream.

OAR 690-315-0040(4)(c)

The habitat needs of sensitive, threatened or endangered species, in consultation with the Oregon Department of Fish and Wildlife.

19. Scoggins Creek, tributaries to the Tualatin River; and the Tualatin River, tributary to the Willamette River are located within an area ranked “moderate” for stream flow restoration needs as determined by the Department in consultation with the Oregon Department of Fish and Wildlife, and are located within a Sensitive, Threatened or Endangered Fish Species Area as identified by the Department in consultation with Oregon Department of Fish and Wildlife.

OAR 690-315-0040(4)(d)

Economic interests dependent on completion of the project.

20. An approximate total of \$63,097 has been invested in the project. This investment does not include the investment in the development of the water system perfected under Certificate 88122.

OAR 690-315-0040(4)(e)

Other economic interests dependent on completion of the project.

21. Economic interests dependent on the completion of the project include patrons who are served by the District.

OAR 690-315-0040(4)(f)

Other factors relevant to the determination of the market and present demand for water and power.

22. No other factors relevant to the determination of the market and present demand for water and power have been identified.
23. OAR 690-315-0050(6) requires the Department to place a checkpoint condition on this extension of time in order to ensure diligence is exercised in the development and perfection of the water use permit. A “Checkpoint Condition” is specified under Item 1 of the “Limitations and Conditions” section of this PFO to meet this condition.

Fair Return Upon Investment [OAR 690-315-0040(2)(f)]

24. The use and income from the permitted water development will likely result in reasonable returns upon the investment made to date.

Other Governmental Requirements [OAR 690-315-0042(2)(g)]

25. Delay in the development of this project that was caused by other governmental requirements have not been identified.

Unforeseen Events [OAR 690-315-0040(2)(h)]

26. The effects of the COVID-19 Pandemic have been identified as unforeseen events which caused delay in the complete development of the authorized use.

Denial of an Extension Would Result in Undue Hardship [OAR 690-315-0040(2)(i)]

27. A denial of the extension would result in undue hardship, and there are no other reasonable alternatives that exist for meeting water use needs.

Good Faith of the Appropriator [OAR 690-315-0040(2)(c)]

28. The Application provides evidence of good faith of the appropriator under Permit S-55199.

The Department has determined that the applicant has shown good faith and reasonable diligence.

Duration of Extension [OAR 690-315-0040(1)(c)]

Under OAR 690-315-0040(1)(c), in order to approve an extension of time for water use permits the Department must find that the time requested is reasonable and the applicant can complete the project within the time requested.

29. As of June 5, 2024, the permit holder states the remaining work to be completed consists of completing construction of the water system and applying water to full beneficial use.

Given the amount of development left to occur, the Department has determined that the permit holder's request to have until October 1, 2049, to accomplish the application of water to beneficial use under the terms and conditions of Permit S-55199 is both reasonable and necessary.

Good Cause [OAR 690-315-0040(1)(d)]

The Department must find that there is "good cause" to approve the extension. In making a "good cause" finding, the Department shall consider the requirements set forth under OAR 690-315-0040(2).

The Department has considered the reasonable diligence and good faith of the appropriator, the cost to appropriate and apply water to a beneficial purpose, the market and present demands for water to be supplied, the financial investment made and fair and reasonable return upon the investment, the requirements of other governmental agencies, and unforeseen events over which the permit holder had no control, whether denial of the extension will result in undue hardship to the applicant and whether there are no other reasonable alternatives for meeting water use needs, any other factors relevant to a determination of good cause, and has determined that the applicant has shown that good cause exists for an extension of time to complete construction and apply water to full beneficial use pursuant to OAR 690-315-0040(1)(d).

LIMITATIONS AND CONDITIONS

1. OAR 690-315-0050(6) requires a checkpoint condition on this extension of time in order to ensure diligence is exercised in the development and perfection of the water use permit. A "Checkpoint Condition" is specified under Item 1 of the "Conditions" section of this PFO to meet this condition.

CONCLUSIONS OF LAW

1. The Applicant has submitted a complete extension application form and the fee specified in ORS 536.050, as required by OAR 690-315-0040(1)(a).
2. The Applicant complied with construction timeline requirements to begin construction as required by ORS 537.230, OAR 690-315-0040(1)(b) and OAR 690-315-0040(5).
3. Based on Finding of Facts 5, through 28, completion of construction and full application of water to beneficial use can be accomplished by October 1, 2049³, as required by OAR

³Pursuant to ORS 537.230(5), upon the completion of beneficial use of water allowed under the permit, the

690-315-0040(1)(c).

4. The Applicant can complete the project within the time period requested for the extension on the project.
5. The Applicant has demonstrated good cause for the extension.
6. For extensions exceeding five years, the Department shall establish progress checkpoints to determine if diligence is being exercised in the development and perfection of the water use permit. Intervals between progress check points will not exceed five years periods, as required by OAR 690-315-0050(6).

PROPOSED ORDER

Based upon the foregoing Findings of Fact and Conclusions of Law, the Department proposes to issue an order to:

Extend the time to apply water to beneficial use under Permit S-55199 from August 8, 2024, to October 1, 2049.

Subject to the following conditions:

LIMITATIONS AND CONDITIONS

1. **Checkpoint Condition**

The permit holder must submit a completed Progress Report Form to the Department by **October 1, 2028, 2033, 2038, 2043, and 2048**. *A form will be enclosed with your Final Order.*

(a) At each checkpoint, the permit holder shall submit and the Department shall review evidence of the permit holder's diligence towards completion of the project and compliance with terms and conditions of the permit and extension. If, after this review, the Department determines the permit holder has not been diligent in developing and perfecting the water use permit, or complied with all terms and conditions, the Department shall modify or further condition the permit or extension to ensure future compliance, or begin cancellation proceedings on the undeveloped portion of the permit pursuant to ORS 537.260 or 537.410, or require submission of a final proof survey pursuant to ORS 537.250;

(b) The Department shall provide notice of receipt of progress reports in its weekly notice and shall allow a 30 day comment period for each report. The

permittee shall hire a certified water rights examiner to survey the appropriation. Within one year after the complete application of water to a beneficial use (or by the date allowed for the complete application of water to a beneficial use), the permittee shall submit a map of the survey and a new or revised claim of beneficial use as deemed appropriate by the Department.

Department shall provide notice of its determination to anyone who submitted comments.

DATED: November 19, 2024

Dwight French, Administrator
Water Right Services Division

*If you have any questions,
please check the information
box on the last page for the
appropriate names and
phone numbers.*

Protests

Pursuant to OAR 690-315-0060(1), the applicant or any other person adversely affected or aggrieved by the proposed final order may submit a written protest to the proposed final order. Protests must be received by the Water Resources Department no later than **January 3, 2025**, at this address: Oregon Water Resources Department, Water Right Services Division, 725 Summer St NE, Suite A, Salem, OR 97301-1266. Protests may not be submitted by electronic mail. OAR 690-002-0025(3).

Protests must be in writing and include all of the following:

- The name, address, and telephone number of the protestant
- A detailed description of the protestant's interest in the proposed final order, and, if the protestant claims to represent the public interest, a precise statement of the public interest represented
- A detailed description of how the action proposed in the proposed final order would impair or be detrimental to the protestant's interest
- A detailed description of how the proposed final order is in error or deficient, and how to correct the alleged error or deficiency
- If the applicant protests, a statement of whether a hearing is requested
- Citation of legal authority supporting the protestant, if known
- Proof of service of the protest on the water right permit holder, if protestant is other than the water right permit holder, and
- If you are the applicant, the protest fee of \$480 required by ORS 536.050; and
- If you are not the applicant, the protest fee of \$950 required by ORS 536.050.

Within 60 days after the close of the period for requesting a contested case hearing, the Director shall either issue a final order on the extension request, or schedule a contested case hearing if a
