COUNTY OF Josephine

CERTIFICATE OF WATER RIGHT (HB - 2153)

THIS CERTIFICATE ISSUED TO

RONALD M LENHERT  
3886 WINONA RD  
GRANTS PASS, OR 97526

confirms the right to store the waters of  
AN UNNAMED RESERVOIR AND STORE WATERS OF JUMPOFF JOE CREEK, A  
TRIBUTARY OF ROGUE RIVER  
for IRRIGATION.

The right to store and use these waters was perfected under Reservoir Application R-80292.  
The date of priority is January 1, 1993. The amount of water entitled to be stored and  
used each year under this right is not more than 0.37 ACRE-FOOT

Located as follows:

1/4 1/4 SECTION 5, TOWNSHIP 35 SOUTH, RANGE 5 WEST WM.

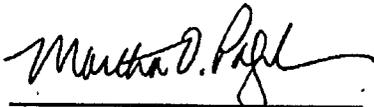

ORS 498.351 and ORS 509.605 through 509.625 provides that no person shall construct an artificial obstruction across a waterway in which anadromous, game or food fish exist unless that person provides a fishway deemed adequate by the Oregon Department of Fish and Wildlife (ODFW). If the subject pond is in-channel and fish are present, the certificate holder is directed to contact the ODFW Fish Passage Program Coordinator, P.O. Box 59, Portland, OR. 97207. If fish presence is in question, the certificate holder should contact the nearest ODFW Fish District office for a determination.

If water is to be diverted from an in-channel pond where fish are present, the certificate holder shall install, maintain and operate fish screening and by-pass devices as required by ORS 498.306 through ORS 498.346 and approved by ODFW. Contact the ODFW Fish Screening Program Coordinator, P.O. Box 59, Portland, OR. 97207. If fish presence is in question, the certificate holder should contact the nearest ODFW Fish District office for a determination.

The storage of water allowed herein is subject to the installation and maintenance of an outlet pipe, with a minimum diameter of 8", or the provision of other means to evacuate water when determined necessary for public safety or to satisfy prior downstream rights as determined by the Water Resources Director.

The right to store and use the water for the above purpose is restricted to beneficial use at the place of use listed above.

WITNESS the signature of the Water Resources Director, affixed FEBRUARY 27, 1996.

REFERENCE: File # R-80292;

We have received your application(s) for a water use permit along with your supporting data, documentation, and fees. A receipt is enclosed here unless you were previously issued one. Your application has been assigned the above referenced file number. Please refer to this number whenever you contact us about your application.

Your application will be considered under House Bill 2153 enacted by the 1993 Oregon Legislature. You may continue the storage of water while a decision is pending on your application.

After an application has been accepted for filing, public notification of the application is made, followed by a mandatory 30-day comment period. Thereafter, applications can be considered for processing as time allows.

At present the Water Resources Department has a backlog of several thousand applications for water use permits which has delayed our application processing time. In general, the Department works through Oregon's 18 river basins on a rotating schedule, processing applications in the order in which they have been received.

The processing of an application does not guarantee that a water right permit will be issued. Each application must undergo specialized analysis called a technical review and a public interest review. Until your application is reviewed, it is not possible to determine whether your particular proposed water use will be recommended for a permit.

Technical Reviews are processed in accordance with Oregon Administrative Rules. The Water Resources Commission is considering the adoption of rules to protect stream flows for fish species. This action is being contemplated in response to current and future Endangered Species Act fish listings, including many runs of salmon, steelhead and resident fish throughout the state.

The proposed rules, if adopted, could limit the issuance of new water right permits in certain areas of the state. If and when the Commission adopts these rules, new criteria or restrictions may be imposed on water use applications received after:

July 17, 1992, for use of water in the Upper Columbia/Snake Basin (above Bonneville Dam), including the mainstem Columbia and Snake Rivers and the Hood, Deschutes, John Day, Umatilla, Grande Ronde, Powder, Malheur and Owyhee Basins;

April 8, 1994, for use of water in the North Coast, Mid Coast, South Coast, Rogue and Umpqua Basins and the Clackamas Subbasin of the Willamette Basin; and

June 3, 1994, for use of water in all Oregon basins.

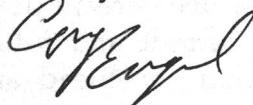

When the report on the technical review is completed and sent to you, a 60-day objection period begins during which you, the applicant, or anyone who has expressed an interest in your proposed water use may communicate to us their disagreement with what we have said in our report on your application. After the 60-day objection period, the Department conducts the public interest review and considers any objections which have been made.

After any objections have been considered, there may follow time to allow parties to resolve conflicts over the proposed water use. In addition, a 30-day protest period may be required. Lastly, it may be necessary to schedule a hearing or send the application to the Water Resources Commission for their review.

If your application is recommended for approval and a permit is issued, the use allowed by the permit will be subject to the Basin Program Rules of the Water Resources Commission, instream flow requirements, the demands of prior right holders and other conditions to conform the water use to particular standards.

Please contact the Water Rights Information Group (WRIG) if you have any questions. You may write to us at 158 12th ST NE, Salem, Oregon 97310 or you may call 378-3739 in Salem or toll free from within the state 1-800-624-3199.

**Permit No.**

Dear Ron,

As you requested I studied the instructions about ponds that may be exempt from filing water rights, and looked at the five ponds on Tax Lot 100. Section 5, Township 35 South, Range 5 West Willamette Meridian, Josephine County, Oregon.

I have shown the five ponds on the attached copy of a section of the assessors map and numbered them one through five.

Ponds 3,4, and 5 are, in my opinion, exempt because:

1. It is obvious from the vegetation surrounding these pond they have existed prior to January 1, 1993: I have been working adjacent to the property prior to 1993 and know they existed before then; all but the smallest pond #5 are visible on the attached copy of a portion of an aerial photograph dated June 22, 1986.
2. Based on measurements I made of the perimeters of the ponds and estimates of depth none of the ponds store 9.2 acre-feet of water or have dams 10 feet high.
3. None of the ponds appear to be in a natural channel or divert water from a natural waterway.

You can register ponds 2,3, and 4 by completing the enclosed "NOTICE OF EXEMPT RESERVOIR" form. I have provided the tax lot map and aerial photo to go with your application. You know better than I the height of the dams, depth and size of outlet pipes. I have calculated the "storage capacity" based on my estimate of depth.

Ponds one and two are, as I understand it, an integral part of the original water right. Obviously you don;t need a water right for the water. You may need a right to store the water. However, as the ponds are part of the original system they may

have been authorized at that time. Quite often the early water right maps, if they exist, are vague about such details.

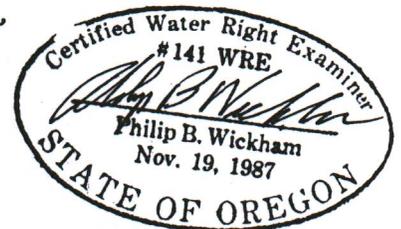

You can have personnel at the Water Masters Office, second floor in City Hall at 6th and A Street research your water right. They charge a minimum of \$15.00 and \$4.00 for each one-half hour after the first hour. If your ponds were not covered in the original water right you will have to hire a registered Land Surveyor with a license to do water right surveys. He will survey the ponds and tie them with a survey to the nearest Section subdivision monument and prepare a map to be submitted with your application. If your application is approved you will have to hire the surveyor again to do a final proof report and survey and map, all over again. If it is the same surveyor and nothing has changed, then the surveyor can see that and omit a new survey. He still has to submit a new map and his final proof report.

Since the interval between the two surveys is often over 5 years and it is unlikely I will be around for the entire process or, at least, well enough long enough to do all of the above you should hire someone else if you need to apply for a pond storage permit. In Grants Pass the following surveyors are certified water rights examiners.

**NOTE TO LOCAL GOVERNMENTS**

The person presenting the attached request for land use information is applying for a water right. The Water Resources Department (WRD) requires its applicants to obtain land use information to be sure water rights do not result in land uses that would violate your comprehensive plan.

WRD will not accept applications which are not accompanied by this completed land use form or the signed, dated receipt stub detached from the bottom of the land use information form.

You will receive notice once the applicant formally submits his or her request to WRD. The notice will give more detailed information about WRD's water rights process and comment opportunities. If you give the applicant the receipt stub in lieu of completing the form, you will have 30 days from the date of the notice mentioned above to complete the form and return it to WRD. If no land use information is received from you within that 30 day period, WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan.

Your attention to this request for information is greatly appreciated by both the applicant and WRD. If you have questions concerning the form, please contact WRD at 378-3739.

\_\_\_\_\_

Item (4) on the application concerning The Amount of Water to be stored was not completed. Please complete the statement below.  
The Amount of Water to be stored is: \_\_\_\_\_ acre-feet.  
The area submerged by the reservoir, when filled, will be \_\_\_\_\_ acres.  
and the maximum depth of the water will be \_\_\_\_\_ feet.

- A Quick Calculation For Reservoir Volumes:

- Volume= (length X width) (maximum depth) (.4)  
(cu/ft) (surface area)
- To determine Acre Feet, divide above number by 43,560 which is the number of gallons in one acre foot.  
(1 acre, 1 foot deep in water)
- The "factor" of 0.4 is to be used in all cases where sufficient information is not available for use in determining a more precise reservoir volume.
