OF THE
STATE OF OREGON**

In the Matter of Application for Extension)	FINAL ORDER APPROVING AN
of Time for Transfer of Water Right)	EXTENSION OF TIME
Authorized by T-8584, Wasco County,)	
Oregon)	

Applicant

Wasco County, Oregon Public Works Department
511 Washington Street
The Dalles, OR 97058

Findings of Fact

1. On May 26, 2004, the Department received an application for extension of time for transfer of water right from Donald J. Branton, CWRE, on behalf of Wasco County.
2. The Water Resources Department issued an order approving Transfer Application T-8584 on July 23, 2001. The order was recorded in Special Order Volume 55, at Page 791. The order set a transfer completion date of October 1, 2002, and the date for submission of a claim of beneficial use as October 1, 2003.
3. The applicant requested an extension because they are unable to develop the remaining requested point of diversions #1 and #2 by the completion date. Development of point of diversion #1 has been developed delayed due to budget restrictions, available equipment, and manpower. The development of point of diversion #2 requires a cooperative effort with another municipal entity which also has budget restrictions at this time.
4. The applicant has accomplished usage for road maintenance and construction including the necessary portable pumps to divert and load tanker trucks, and is using two of the four requested point of diversions. The applicant requests an extension until October 1, 2008, to complete construction of the two remaining point of diversions.

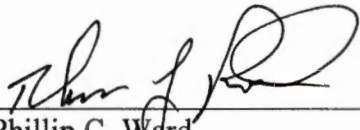

Conclusions of Law

Pursuant to OAR 690-380-6020, the Director of the Water Resources Department concludes the applicant has shown reasonable diligence to complete the transfer within the time period established by the order approving Transfer Application T-8584.

Now, therefore, it is ORDERED:

The time for completion of the changes in point of diversion and place of use and character of use, authorized by T-8584 shall be extended to October 1, 2008.

Gentlemen:

Your letter of the 29th of January together with the form release is received.

I feel that there is some misunderstanding regarding the abandoning of the well under the former permit U-145. We wished to imply that the passing of the new Columbia River Highway through this property might rupture the water vein or otherwise ruin this water hole for future use. It is not our wish to abandon this claim nor the use of this well if this does not happen as the water from the river under claim 26814 (above) is not fit for domestic use and the well water is. We have a dwelling on this property and may in the future have more use of this water or water of like nature for home use.

You will note that a great part of this new claim is for water to be used not only for irrigating but for industrial or commercial use, and is so used at this time for the purpose of washing sand and gravel which we will use in the manufacturing of Concrete.

We trust that this information will clear up this matter with your office.

Very truly yours,
