# Certificate of Water Right Ownership Update

## NOTICE TO SELLERS & BUYERS:

By law, all water belongs to the public (ORS 537.110). In almost every instance, a permit or water right certificate from the Water Resources Department is needed before using, diverting or storing water (ORS 537.130). However, most domestic wells do not require water rights. A certificate of water right stays with the land. In order to keep track of water right ownership, the Department requests that this form be submitted to the Department.

Water that has been used for a long time in one place or that involves a water structure (like a dam) that already exists is no guarantee that there is a water right which would allow the water use to continue.

If you have any questions about this form or water right requirements, please contact your local watermaster or call the Water Resources Department at 503-986-0900.

BEFORE THE WATER RESOURCES DIRECTOR OF OREGON

HARNEY COUNTY

IN THE MATTER OF THE CANCELLATION )  
OF A PORTION OF A WATER RIGHT IN )  
THE NAME OF FRANK CLUSTER )

O R D E R

On August 18, 1988, James Towery, Robert Young, and Vernon Morgan submitted an affidavit that they are the owners of a certain water right and the lands to which the water right is appurtenant; that they have abandoned any and all interest in and to the said water right and request the same be cancelled.

The water right in question is a portion of the right described by the certificate recorded at page 29362, Volume 21, State Record of Water Right Certificates, in the name of Frank Cluster. It is for the use of not to exceed 3.60 cubic feet per second of water from Chickahominey Creek and Reservoir, with a date of priority of September 17, 1951, for irrigating 8.0 acres NE 1/4 SE 1/4, 20.0 acres NW 1/4 SE 1/4, 37.4 acres SW 1/4 SE 1/4, and 24.8 acres SE 1/4 SE 1/4, Section 2; 31.4 acres NE 1/4 NE 1/4, 37.4 acres NW 1/4 NE 1/4, 25.6 acres SW 1/4 NE 1/4, 17.6 acres SE 1/4 NE 1/4, 21.4 acres NE 1/4 NW 1/4, and 4.8 acres NW 1/4 NW 1/4, Section 11, Township 24 South, Range 27 East, WM.

ORS 540.621 provides that: "Whenever the owner of a perfected and developed water right certifies under oath to the Water Resources Commission that the water right has been abandoned by the owner and that the owner desires cancellation thereof, the Commission shall enter an order cancelling the water right."

NOW THEREFORE, it is hereby ORDERED that the said water right, being a portion of the right described by the certificate recorded at page 29362, Volume 21, State Record of Water Right Certificates, is cancelled.

If is FURTHER ORDERED that the said certificate of water right is cancelled and in lieu thereof, a new certificate be issued to describe the balance of water right NOT involved in this proceeding.

Dated at Salem, Oregon, this 26<sup>th</sup> day of January, 1989.

Dear Sir:

The certificate recorded at page 29361 was issued to Frank Cluster for the storage of 4767.0 acre feet of water from Chickahominy Creek for irrigation. Later there was a change in use of the stored water, so 1500.0 acre feet of the storage is held for recreation and public fishery. The remaining 3267.0 acre feet of water is for the supplemental irrigation of 1302.3 acres.

I do not know whom presently owns the land on which the water from the reservoir is used, but the use of water is restricted to the lands described in the certificate recorded at page 29362. The owners of the lands could submit an application for a change in place of use from the lands presently irrigated to other lands for which a valid primary right exists which could be irrigated from the stored water. If the place of use is changed to lands for which no right exists, the direct flow primary right would have to be changed along with the supplemental use from the reservoir.

Water legally stored during the runoff period may be held as long as physically possible for use. There is no restriction as to what part of the irrigation season the water may be used.

Very truly yours,

Trevor Jones  
Assistant

Dear Mr. Cluster:

As you know the final proof survey in connection with your permits numbered 19525, 19162, 20743 and R-1256 was made in October, 1960. When we attempted to make the final proof forms for your signature a problem developed, in that the land being irrigated is not entirely the same as that described in the applications.

The application which was approved by permit 19525 lists lands in Sections 10, 11, 13 and 15 and a few acres in the northwest corner of Section 14. The application approved by permit number 19162 lists lands in Sections 2, 3, and 11. The land applied for under both of these permits is substantially the same as mapped by our field engineer, but did not include the number of acres we mapped. No problem develops under permit 19162 and the right apparently can be completed to the limit of the permit. This would leave 900 acres not covered; 668.6 of which could be covered by permit number 19162. This leaves 231.6 acres not covered by either permit.

I am enclosing a print of the final proof survey map so you may compare it with maps attached to permits 19162 and 19525.

Permit number 20743 describes the appropriation of water from Chickahominy Creek and Reservoir for supplemental irrigation. The application lists lands in Sections 2, 3, 10, 11, 13, 14 and 15. This is restricted to use of water on lands having a prior right. You will note that Section 14, most of which is covered by an earlier right from Silver Creek, was included in permit number 20743, but not claimed apparently when our field engineer mapped the area irrigated. You will also note that the  $W\frac{1}{2}$  of Section 2 was not described in any of the applications. The total acres described in permit number 20743 is very close to that listed by our field engineer, but we could not include the 231.6 acres mentioned above in a certificate confirming permit 20743 as this land does not have a primary right.

Frank Cluster

- 2 -

May 19 1961

We could prepare the proof for permit number 20743 covering lands described in the other two permits; you could then make application for a new permit from both Silver Creek and Chickahominy Creek and Reservoir for the 231.6 acres for which no right exists. To conform as closely as possible to the applications, this land should be that in the southerly part of Section 13.

Further action will be withheld to enable you to reply to this letter. If any further information is required we will furnish it on request.

Pursuant to your report and in line with the general practice of this office a survey will be made at a later date. After this survey, proof may be made and certificate issued covering the actual use of water as found by the engineer. In case of irrigation, any lands described in the permit that have not been irrigated will be automatically eliminated from the water right.

We received today your letter under date of January 20, 1960, concerning permit No. 20743 for appropriation of water from Chickahominy Creek and reservoir, and calling our attention to the necessity of submitting notice of complete application, which ~~same~~ notice was due October 1, 1959.

We left the ranch in October, 1954, and since that time everything concerning it has been completely in the hands of my father, Mr. Frank Cluster, Riley, Oregon. We are forwarding your letter to him, and suggest that all further correspondence concerning water rights, etc., be carried on directly with him.

We are sorry for the tardiness in the filing of notice of complete application, but previous letters have not reached us, and were probably mislaid somewhere along the line.

Yours truly,

Dear Mr. Cluster:

According to the terms of your permit No. 20743, which is for the appropriation of 21.5 cubic feet per second of water from Chickahominy Creek and reservoir, application No. R-26455, permit No. R-1256, complete application of water was to have been made on or before October 1, 59. It appears from our records that you have failed to submit notice of complete application, although a notice calling this matter to your attention was mailed to you on October 9, 1959.

Complete application of water means the application of water to beneficial use to the full extent the permittee intends under the terms of the permit. In the case of irrigation, it means beneficial irrigation of all the lands the permittee intends to cover under the terms of the permit.

If you have complied with the terms of the permit, you should promptly submit notice describing the extent of the use.

ORS 537.260 provides that under a permit the permittee must register the permit with the State Engineer.

He is unable to locate his permit to construct the reservoir. However, he has in his possession a letter dated October 22, 1951, directed to Mr. Glen Cluster, his partner, stating that his application number R-26455-6 appears to be satisfactory and is being placed in line for approval by issuance of permits. Would you be so kind as to send us a copy of his permit giving the permit number, date of issue and other pertinent data.

Also, we are in need of the plat filed by Mr. Revis who was the Engineer on the job. Therefore, would you be so kind as to send us a copy of same. We need these documents since there is a minor question in regard to some of the boundaries of the reservoir.

Thank you very much for your cooperation.

Dear Mr. Cluster:

According to the terms of your Permit No. 20743, which is for the appropriation of 21.5 second-foot of water from Chickahominy creek & reservoir complete application of water was to have been made on or before October 1, 1957. It appears from our records that you have failed to submit the notice of complete application, although a notice, calling this matter to your attention, was mailed to you on October 28, 1957.

ORS 537.260 provides: "Whenever the time within which any appropriation under a permit should have been perfected has expired and the owner of the permit fails or refuses within three months thereafter to submit to the State Engineer proof of completion of the appropriation as required by ORS 537.230 and 537.250, the State Engineer may, after 60 days' notice by registered mail, order the cancelation of the permit.\*\*\*"

If you have complied with the terms of this permit, you should promptly submit the notice of complete application of water, after which we will take up with you the matter of final proof. If, however, you have abandoned your plan of development, we would appreciate your authority to cancel the permit, so that the permit may be canceled without the necessity for following the legal procedure.

Complete application of water under an irrigation permit means the irrigation of ALL of the land described in the permit, which it is intended to irrigate.

In accordance with the provisions of ORS 537.260, you are hereby notified that unless proof of beneficial use is received within 60 days from the date of this letter, your permit will be canceled without further notice.

Very truly yours,

appropriate the public waters of the state of Oregon.

Under the terms and conditions of said permit, construction work is required to be completed on or  
before Oct. 1, 1956, and complete application of water is required to be  
made on or before Oct. 1, 1956.

I have heretofore done the following work described under said permit during the past year:

Completed 80% of Ditch and  
built diversion Concrete structure  
in Chuckahorning creek and in new ditch  
and did the following work prior to last year: did some Road work  
on ditch at rocky points

costing \$ 1500<sup>00</sup>, and I estimate the cost of completion to be \$ 500<sup>00</sup>.

I have heretofore used water under said permit to the following extent:

Used about 8 cuth per sec for 73 days  
and irrigated  
approx. 1400 acres.  
I am unable to {complete construction work  
make complete application of water} within the required time, for the following  
(Strike out phrase not applicable)

reasons, to wit:

After using water the past season  
water table was too high to use  
tractor or equipment.

(If additional space is required, attach separate sheet)

(The fee provided by law in the amount of \$2.00 for filing an application for an extension of time should accompany the application for extension.)

Dear Mr. Wheeler:

Enclosed please find copies of Permits No's. R-1256 and 20743, which you recently sent to me. It would appear to me that in order for these to be used in a court proceeding, that they should be certified to be true copies from the originals on file in your office. I should appreciate it therefore, if you would have these copies properly certified so that they would be admissible in evidence, and then return them to me.

I enclose a check in the amount of \$2.80, and if there is any further fee, please let me know.

Thank you very kindly.
