Water Right Application Initial Review

October 21, 2022

JAKE MADISON
MID-COLUMBIA WATER COMMISSION
29299 MADISON RD
ECHO OR 97826

Reference: Application S-89259

This document is to inform you of the preliminary analysis of the water-use permit application and to describe your options. In determining whether an application may be approved, the Department must consider the factors listed below, all of which must be favorable to the proposed use if it is to be allowed. Based on the information supplied, the Water Resources Department has made the following preliminary determinations:

Preliminary Determinations (Oregon Administrative Rule (OAR) 690-310-0080)

1. The application proposes the diversion of 153.0 cubic feet per second (CFS) of water from Columbia River, tributary to Pacific Ocean, for irrigation of 679,756.6 acres March 1 through November 1 of each year.
2. The proposed use is not prohibited by law or rule except where otherwise noted below.
3. Irrigation is allowable under the Columbia River Basin Program (OAR 690-519-0000(1)).
4. An assessment of water availability utilizing discharge data produced by the U.S. Geological Survey is in the application file. This assessment is done consistent with OAR 690-410-0070(2)(a). During the period of use requested, the assessment established that water surface water is available.
5. OAR 690-033-0120(2) prohibits the diversion of water from April 15 through September 30 of each year. The proposed use is inconsistent with the Columbia River Basin Fish and Wildlife Program. However, if the use of water is inconsistent with the Fish and Wildlife Program, OAR 690-033-0120(4) allows mitigation if the mitigation is consistent with OAR 690-033-0120(2) and (3). The applicant has demonstrated intent to provide bucket-for-bucket mitigation of 153.0 CFS for the period April 15 through September 30 of each year at or above the point of impact for the life of the permit and subsequent certificate, consistent with OAR 690-033-0120. Prior to permit issuance, mitigation shall consist of an instream lease or temporary transfer of water instream at a rate equal

to that which is requested under this application. Permanent mitigation is required prior to water right certificate issuance.

6. The proposed use is not located within or above any state scenic waterway.
7. Documentation has been submitted from the relevant land-use planning jurisdictions that indicates the proposed use is allowed outright.
8. The Department understands that use under this application, together with use under Application S-89258, will replace the use of water under Permits S-55061, S-54633, S-55190, S-55192, S-55114, S-55263, S-55167, and S-55262 and that these permits will be cancelled concurrently with any permits issued under Applications S-89258 and S-89259.
9. The Department also understands that suggested condition modifications were submitted with the application materials. The Department will work with the Oregon Department of Fish and Wildlife and others, as appropriate, to identify further conditions as necessary.

Summary of Preliminary Determinations
The diversion of 153.0 CFS of water from Columbia River, tributary to Pacific Ocean, for irrigation of 679,756.6 acres may be allowable March 1 through November 1 of each year, contingent on the cancellation of Permits S-55061, S-54633, S-55190, S-55192, S-55114, S-55263, S-55167, and S-55262.

Public Comment & Further Review:

Public interest issues and/or public comments will be addressed as the Department prepares a Proposed Final Order. If significant public interest issues are identified, they could have an impact on the eventual outcome of the application.

Division 33 Review – The Department’s Division 33 administrative rules (OAR 690-033) establish additional procedures and standards to aid the Department in determining whether a proposed use will impair or be detrimental to the public interest with regard to sensitive, threatened, or endangered (STE) fish species. This Initial Review does not address the potential impact that your proposed use may have on these species.

Your application will now undergo an additional review from numerous federal, state, local, and tribal governmental entities. This review may cause your application to be limited, conditioned, or denied. Depending on the proposed use, you may be required to mitigate for potential impacts identified in the review.

Mitigation for impacts to STE Species – Mitigation is often complicated, time consuming, and expensive, and may include, but is not limited to, actions such as replacing the proposed amount of water within the impacted reach through purchasing or transferring an existing water right. Following the Initial Review, you will be notified if mitigation is required, due to impacts to STE fish species.

If you choose to pursue mitigation, you will likely need to place your application on administrative hold in order to explore options. There will be an additional fee of \$790 required with any mitigation proposal submitted.

At this time, you must decide whether to proceed or to withdraw the application.

- **To Proceed** - If you choose to proceed with the application you do not have to notify the Department. The application will be placed on the Department's Public Notice to allow others the opportunity to comment. After the comment period the Department will complete a public interest review and issue a Proposed Final Order.
- **To Withdraw** - You may withdraw the application and receive a refund (minus a \$310 processing fee per application). You must notify the Department **in writing** by **November 4, 2022**. For your convenience you may use the enclosed "STOP PROCESSING" form.

If a permit is issued, it will likely include the following conditions:

1. Construction of the water system shall begin within five years of the date of permit issuance. The deadline to begin construction may not be extended. A permit is subject to cancellation proceedings if the begin construction deadline is missed.
2. **Water Use Measurement, Recording, and Reporting:**
 - A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the device in good working order.
 - B. The permittee shall allow the watermaster access to the device; provided however, where any device is located within a private structure, the watermaster shall request access upon reasonable notice.
 - C. The permittee shall keep a complete record of the volume of water diverted each month, and shall submit a report which includes water-use measurements to the Department annually, or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
 - D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

The water source identified in the application may be affected by an Agricultural Water Quality Management Area Plan. These plans are developed by the Oregon Department of Agriculture (ODA) with the cooperation of local landowners and other interested stakeholders, and help to ensure that current and new appropriations of water are done in a way that does not adversely harm the environment. You are encouraged to explore ODA's Water Quality Program web site at <http://www.oregon.gov/ODA> to learn more about the plans and how they may affect the proposed water use.

For Further Information:

Feel free to contact me at elisabeth.a.graham@water.oregon.gov or 503-979-3130 if you have any questions regarding the contents of this letter or the application. Please include the application number in all correspondence. General questions about water rights and water use permits should be directed to our customer service staff at 503-986-0900. When corresponding by mail, please use this address: Lisa Graham, Oregon Water Resources Department, 725 Summer St NE Ste A, Salem OR 97301-1266. Our fax number is 503-986-0901.

Sincerely,

Lisa Graham
Water Right Application Specialist

30 DAY COMMENT DEADLINE DATE: November 24, 2022

APPLICATION PROCESS DESCRIPTION FOR
GROUNDWATER, SURFACE WATER AND REGULAR RESERVOIR APPLICATIONS

In order to use the waters of Oregon, an application must be submitted and a permit obtained from the Water Resources Department. The water must be used for beneficial purpose without waste. For more information about water right topics, weekly public notice, forms and fees please visit our web site at: www.wrd.state.or.us

1. Pre-application considerations

- Follow instructions in the application packet.
- If you have questions about completing an application or would like to arrange a pre-application conference contact the Department's Water Rights Customer Service Group at (503) 986-0900.

2. Application filing

- Application with fee is received by the Department.
- Department determines completeness of application.
- If use is not allowed by statute (ORS 538), the application and fees are returned to the applicant.
- An incomplete application and fees are returned to the applicant.
- Only a complete application receives a tentative priority date, is assigned a caseworker, and moves forward for processing.

3. Initial Review (IR)

- Caseworker reviews application by considering basin plans, water availability, statutory restrictions, and all other appropriate factors.
- Caseworker sends IR report to Applicant.
- Four days after date of the IR, it is included in Department's weekly Public Notice.
- Public comments must be submitted within 30 days after the Public Notice.

4. Proposed Final Order (PFO)

- Caseworker evaluates application against required criteria and develops draft permit, if appropriate.
- PFO includes instructions for filing of protests.
- Caseworker considers public comments and mails PFO to Applicant.
- The PFO is included in Department's weekly Public Notice.
- Public protests to the PFO must be submitted within 45 days after the Public Notice.

5. Final Order (FO)

- If no protest is filed, Final Order is issued.

The protest process

If one or more protests are filed, the process consists of:

- settlement discussion;
- contested case hearing;
- proposed Order;
- period of time to file exceptions; or
- Possible hearing by Water Resources Commission.
- Final Order is issued.

Permit holder responsibilities

- Comply with all water use conditions of the permit.
- Advise Department of address change or assignment to new permit holder.
- If need arises, request extension of time or authorize cancellation of permit.
- Submit timely claim of beneficial use (COBU) to the Department.
- Most permits require COBU to be prepared by a Certified Water Right Examiner.
- Permits may be canceled by the permit holder or by the Department for failure to comply with or one or more permit conditions.

STOP PROCESSING REQUEST FORM

FOR GROUNDWATER, SURFACE WATER AND REGULAR RESERVOIR APPLICATIONS

- Stop processing deadline is within 14 days of Initial Review.

Applicant notification to withdraw Water Right Application **S-89259**.

After reviewing the Initial Review for my application, I request that processing be stopped and the fees be refunded (minus a \$310 examination fee.) I understand that without a valid permit I may not legally use the water as requested in my application.

Signature _____ Date _____

Signature _____ Date _____

Under ORS 537.150 (5) and 537.620 (5) timely submission of this request authorizes that the water right application process be stopped and all filing fees (except \$310 processing fee) be returned.

- This notice must be received at Water Resources Department by:

November 4, 2022

- Return the notice to:

OWRD, Water Right Services Division

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application.
- I cannot legally use water until the Water Resources Department issues a permit.
- The Department encourages all applicants to wait for a permit to be issued before beginning construction of any proposed diversion. Acceptance of this application does not guarantee a permit will be issued.
- If I begin construction prior to the issuance of a permit, I assume all risks associated with my actions.
- If I receive a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be cancelled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water right holders to receive water to which they are entitled.

OWRD

I (we) affirm that the information contained in this application is true and accurate

Applicant Signature Print Name and Title if applicable Date

For Department Use: App. Number: _____

SECTION 2: PROPERTY OWNERSHIP

Please indicate if you own all the lands associated with the project from which the water is to be diverted, conveyed, and used.

YES, there are no encumbrances.

YES, the land is encumbered by easements, rights of way, roads or other encumbrances.

NO, I have a recorded easement or written authorization permitting access.

NO, I do not currently have written authorization or easement permitting access.

NO, written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigation and/or domestic use only (ORS 274.040).

NO, because water is to be diverted, conveyed, and/or used only on federal lands.

Affected Landowners: List the names and mailing addresses of all owners of any lands that are not owned by the applicant and that are crossed by the proposed ditch, canal or other work, even if the applicant has obtained written authorization or an easement from the owner. *(Attach additional sheets if necessary).*

SEE EXHIBIT A FOR A LIST OF NAMES AND ADDRESSES OF ALL INCLUDED LANDOWNERS BY MAP AND TAX LOT

Legal Description: You must provide the legal description of: 1. The property from which the water is to be diverted, 2. Any property crossed by the proposed ditch, canal or other work, and 3. Any property on which the water is to be used as depicted on the map.

SEE ATTACHMENT B FOR LEGAL DESCRIPTION OF DIVERSION & CONVEYANCE WORKS AND LEGAL DESCRIPTION OF MID-COLUMBIA MITIGATION USE BOUNDARY

SECTION 3: SOURCE OF WATER

A. Proposed Source of Water

Provide the commonly used name of the water body from which water will be diverted, and the name of the stream or lake it flows into (if unnamed, say so), and the locations of the point of diversion (POD):

B. Applications to Use Stored Water

Do you, or will you, own the reservoir(s) described in Section 3A above?

- Yes. No. (Enclose a copy of your written notification to the operator of the reservoir of your intent to file this application, which should have been mailed or delivered to the operator.)

If *all* sources listed in Section 3A are stored water, the Department will review your application using the expedited process provided in ORS 537.147, unless you check the box below. Please see the instruction booklet for more information.

- By checking this box, you are requesting that the Department process your application under the standard process outlined in ORS 537.150 and 537.153, rather than the expedited process provided by ORS 537.147. To file an application under the standard process, you must enclose the following:

- A copy of a signed non-expired contract or other agreement with the owner of the reservoir (if not you) to impound the volume of water you propose to use in this application.
- A copy of your written agreement with the party (if any) delivering the water from the reservoir to you.

SECTION 4: SENSITIVE, THREATENED OR ENDANGERED FISH SPECIES PUBLIC INTEREST INFORMATION

This information must be provided for your application to be accepted as complete. The Water Resources Department will determine whether the proposed use will impair or be detrimental to the public interest with regard to sensitive, threatened or endangered fish species.

To answer the following questions, use the map provided in Attachment 3 or the link below to determine whether the proposed point of diversion (POD) is located in an area where the Upper Columbia, the Lower Columbia, and/or the Statewide public interest rules apply.

For more detailed information, click on the following link and enter the T,R,S,QQ or the Lat/Long of a POD and click on "Submit" to retrieve a report that will show which section, if any, of the rules apply:
https://apps.wrd.state.or.us/apps/misc/lkp_trsqg_features/

If you need help to determine in which area the proposed POD is located, please call the customer service desk at (503) 986-0900.

RECEIVED
AUG 12 2022

Upper Columbia - OAR 690-033-0115 thru -0130

OWRD

Is the POD located in an area where the Upper Columbia Rules apply?

- X Yes No

If **yes, you are notified** that the Water Resources Department will consult with numerous federal, state, local and tribal governmental entities so it may determine whether the proposed use is consistent with the "Columbia River Basin Fish and Wildlife Program" adopted by the Northwest Power Planning Council in 1994 for the protection and recovery of listed fish species. The application may be denied, heavily conditioned, or if appropriate, mitigation for impacts may be needed to obtain approval for the proposed use.

If yes,

- I understand that the proposed use does not involve appropriation of direct streamflow during the time period April 15 to September 30, except as provided in OAR 690-033-0140.
- I understand that I will install, operate and maintain a fish screen and fish passage as listed in ORS 498.301 through 498.346, and 509.580 through 509.910, to the specifications and extent required by Oregon Department of Fish and Wildlife, prior to diversion of water under any permit issued pursuant to this application.
- I understand that the Oregon Department of Environmental Quality will review my application to determine if the proposed use complies with existing state and federal water quality standards.
- I understand that I will install and maintain water use measurement and recording devices as required by the Water Resources Department, and comply with recording and reporting permit condition requirements.

Lower Columbia - OAR 690-033-0220 thru -0230

Is the POD located in an area where the Lower Columbia rules apply?

Yes X No

If yes, you are notified that the Water Resources Department will determine, by reviewing recovery plans, the Columbia River Basin Fish and Wildlife Program, and regional restoration programs applicable to threatened or endangered fish species, in coordination with state and federal agencies, as appropriate, whether the proposed use is detrimental to the protection or recovery of a threatened or endangered fish species and whether the use can be conditioned or mitigated to avoid the detriment.

If a permit is issued, it will likely contain conditions to ensure the water use complies with existing state and federal water quality standards; and water use measurement, recording and reporting required by the Water Resources Department. The application may be denied, or if appropriate, mitigation for impacts may be needed to obtain approval of the proposed use.

If yes, provide the following information (the information must be provided with the application to be considered complete).

Yes X No The proposed use is for more than one cubic foot per second (448.8 gpm) and is not subject to the requirements of OAR 690, Division 86 (Water Management and Conservation Plans).

If yes, provide a description of the measures to be taken to assure reasonably efficient water use:

RECEIVED

AUG 12 2022

OWRD

Statewide - OAR 690-033-0330 thru -0340

Is the POD located in an area where the Statewide rules apply?

Yes X No

If yes, the Water Resources Department will determine whether the proposed use will occur in an area where endangered, threatened or sensitive fish species are located. If so, the Water Resources Department, Department of Fish and Wildlife, Department of Environmental Quality, and the Department of Agriculture will recommend conditions required to achieve "no loss of essential habitat of threatened and endangered (T&E) fish species," or "no net loss of essential habitat of sensitive (S) fish species." If conditions cannot be identified that meet the standards of no loss of essential T & E fish habitat or no net loss of essential S fish habitat, the agencies will recommend denial of the application unless they conclude that the proposed use would not harm the species.

SECTION 5: WATER USE

Provide the amount of water you propose to use from each source, for each use, in cubic feet-per-second (cfs) or gallons-per-minute (gpm). If the proposed use is from storage, provide the amount in acre-feet (af):
 (1 cfs equals 448.8 gpm. 1 acre-foot equals 325,851 gallons or 43,560 cubic feet)

SOURCE	USE	PERIOD OF USE	AMOUNT
Columbia River	Irrigation	March 1 to November 1	153 X cfs <input type="checkbox"/> gpm <input type="checkbox"/> af
			<input type="checkbox"/> cfs <input type="checkbox"/> gpm <input type="checkbox"/> af
			<input type="checkbox"/> cfs <input type="checkbox"/> gpm <input type="checkbox"/> af
			<input type="checkbox"/> cfs <input type="checkbox"/> gpm <input type="checkbox"/> af

Please indicate the number of primary, supplemental and/or nursery acres to be irrigated.
 Primary: 702,277.8 Acres Supplemental: See cover letter and section 10 Acres Nursery Use NA Acres
 If supplemental acres are listed, provide the Permit or Certificate number of the underlying primary water right(s): see narrative, per recommended conditions existing permit and certificates are included annually as part of the annual report.
 Indicate the maximum total number of acre-feet you expect to use in an irrigation season: 74,220.30

- If the use is **municipal or quasi-municipal**, attach **Form M**
- If the use is **domestic**, indicate the number of households: NA
- If the use is **mining**, describe what is being mined and the method(s) of extraction: NA

SECTION 6: WATER MANAGEMENT

A. Diversion and Conveyance

What equipment will you use to pump water from your source?

X Pump (give horsepower and type): See Attachment B

RECEIVED

AUG 12 2022

OWRD

Provide a description of the proposed means of diversion, construction, and operation of the diversion works and conveyance of water.

See Attachment A for a description of the diversion and conveyance works of all PODs associated with this application. See attachment C for description of POD D proposed means of diversion, construction and operation.

B. Application Method

What equipment and method of application will be used? (e.g., drip, wheel line, high-pressure sprinkler)
 Drip, wheel-line, low-pressure sprinkler, high-pressure sprinkler and some hand line use.

C. Conservation

For Department Use: App. Number: _____

Please describe why the amount of water requested is needed and measures you propose to: prevent waste; measure the amount of water diverted; prevent damage to public uses of affected surface waters.

See Exhibit D for data provided by IRZ Consulting regarding average annual water usage in the Umatilla basin for clarification of the purpose of the duty requested per acre.

SECTION 7: RESOURCE PROTECTION

In granting permission to use water from a stream or lake, the state encourages, and in some instances requires, careful control of activities that may affect the waterway or streamside area. See instruction guide for a list of possible permit requirements from other agencies. Please indicate any of the practices you plan to undertake to protect water resources:

- X Diversion will be screened per ODFW specifications in ORS 498.301 through 498.346 to prevent uptake of fish and other aquatic life.
Describe planned actions: All Columbia River Diversions have existing fish screens installed meeting NOAA standards in place as of 2022, or will have compliant fish screens installed prior to being included on the annual proposed use map for beneficial use of mitigation use water.

- X Excavation or clearing of banks will be kept to a minimum to protect riparian or streamside areas.
Note: If disturbed area is more than one acre, applicant should contact the Department of Environmental Quality to determine if a 1200C permit is required.
Describe planned actions and additional permits required for project implementation: No new construction is proposed at PODs A-C and E-M. All excavation at POD D will be completed in compliance with the conditions of the diversion owner's permit granted by the United States Army Corps of Engineers.

- X Operating equipment in a water body will be managed and timed to prevent damage to aquatic life.
Describe planned actions and additional permits required for project implementation: No improvements are anticipated to require work in waterways of the State. Should improvements require in-water work, all work will be performed after any necessary federal and state permits are granted and will remain in compliance with applicable state and federal permitting agencies and the applicable in-water work permits.

- X Water quality will be protected by preventing erosion and run-off of waste or chemical products.
Describe planned actions: No improvements are anticipated at PODs A-C and E-M. All construction and improvements to POD D will be in compliance with applicable state and federal permitting agencies and applicable permits.

- X List other federal and state permits or contracts to be obtained, if a water right permit is granted.
No additional permits are anticipated for PODs A-C and E-M. Additional federal permits are not anticipated for POD D. State permits required for POD D may include removal fill permitting (DSL), and ODOT crossing agreements (HWY 730).

SECTION 8: PROJECT SCHEDULE

NOTE: CONSTRUCTION SCHEDULE PROVIDED BELOW APPLICABLE TO POD D ONLY. NO NEW CONSTRUCTION IS PROPOSED OR NECESSARY FOR POD'S A-C AND E-M

- a) Date construction will begin: November, 2022
- b) Date construction will be completed: June, 2024
- c) Date beneficial water use will begin: June, 2024

SECTION 10: REMARKS

Use this space to clarify any information you have provided in the application. *(Attach additional sheets if necessary).*

Place of Use Acreage

As part of this application, the Mid-Columbia Water Commission is identifying a new exterior boundary (referred to as the "Mid-Columbia Mitigation Region Boundary"), within which the mitigation use water supplies may be used on an annual basis. The actual place of use and rate of use on an annual basis will be reported to OWRD by an annual reporting deadline of February 14 for the upcoming irrigation season. Lands not included in the annual place of use map submitted on or before February 14 will not be included within the authorized place of use for mitigation use water rights for that year even though they are within the broader Mid-Columbia

Mitigation Region Boundary and even though these lands may have received mitigation use water in previous years. The final place of use, as well as total primary and total supplemental acreages, will be detailed prior to the final proof survey. Lands that do not utilize water under this permit shall not be included in the final proof survey nor included on the interactive water rights map of the Oregon Water Resources Department.

Proposed Period of Use as related to Division 33 Mitigation

The Mid-Columbia Water Commission proposes a period of use from March 1 to November 1 of each year. Water from the Columbia River will be subject to mitigation from April 15 to September 30, as required by OAR 690-033. From March 1 to April 14 and from October 1 to November 1 of each year, the Mid-Columbia Water Commission may pump from the Columbia River without securing or providing proof of mitigation. Otherwise, the Mid-Columbia Water Commission has secured mitigation at the appropriate level required by regulating agencies to pump Columbia River water from April 15 to September 30. Sources of mitigation are documented and reported to OWRD prior to the start of the mitigation season, and the pumping rate during the mitigation season will be directly proportionate to the mitigation secured for that mitigation season. The period for mitigation requirements is currently 169 days of the proposed period of use. The Mid-Columbia Water Commission has secured mitigation that currently meets or exceeds the 169-day period of use.

B. Description of Proposed Use

Type of application to be filed with the Water Resources Department:

- Permit to Use or Store Water
- Water Right Transfer
- Permit Amendment or Groundwater Registration Modification
- Limited Water Use License
- Allocation of Conserved Water
- Exchange of Water

Source of water: Reservoir/Pond Groundwater Surface Water (name) Columbia River

Estimated quantity of water needed: 153 X cubic feet per second gallons per minute acre-feet

Intended use of water: Irrigation Commercial Industrial Domestic for ___ household(s)
 Municipal Quasi-Municipal Instream Other ___

Briefly describe:

Mitigated Columbia River water use permits and establishment of permanent mitigated Mid-Columbia River program boundary.

NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; **OR**
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or groundwater registration modification, and all of the following apply:
 - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b) The application involves a change in place of use only;
 - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
 - d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land use form and return it to the WRD. If no land use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0900.

For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form. This deals only with the local land use plan. Do not include approval for activities such as building or grading permits.

Please check the appropriate box below and provide the requested information

Land uses to be served by the proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): MORROW COUNTY ZONING ORDINANCE SECTION (3)

Land uses to be served by the proposed water uses (including proposed construction) involve discretionary land use approvals as listed in the table below. (Please attach documentation of applicable land use approvals which have already been obtained. Record of Action/land use decision and accompanying findings are sufficient.) If approvals have been obtained but all appeal periods have not ended, check "Being pursued."

Type of Land Use Approval Needed (e.g., plan amendments, rezones, conditional-use permits, etc.)	Cite Most Significant, Applicable Plan Policies & Ordinance Section References	Land Use Approval:	
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being Pursued <input type="checkbox"/> Not Being Pursued
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being Pursued <input type="checkbox"/> Not Being Pursued
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being Pursued <input type="checkbox"/> Not Being Pursued

Applicants for municipal use, or irrigation uses within irrigation districts may substitute existing and proposed service-area boundaries for the tax-lot information requested below.

Township	Range	Section	¼ ¼	Tax Lot #	Plan Designation (e.g., Rural Residential/RR-5)	Water to be:			Proposed Land Use:
					See attached map for map & tax lot information	<input checked="" type="checkbox"/> Diverted	<input checked="" type="checkbox"/> Conveyed	<input checked="" type="checkbox"/> Used	Farm Use/Irrigation
						<input type="checkbox"/> Diverted	<input type="checkbox"/> Conveyed	<input type="checkbox"/> Used	
						<input type="checkbox"/> Diverted	<input type="checkbox"/> Conveyed	<input type="checkbox"/> Used	
						<input type="checkbox"/> Diverted	<input type="checkbox"/> Conveyed	<input type="checkbox"/> Used	

List all counties and cities where water is proposed to be diverted, conveyed, and/or used or developed:

B. Description of Proposed Use

Type of application to be filed with the Water Resources Department:

- Permit to Use or Store Water
 Water Right Transfer
 Permit Amendment or Groundwater Registration Modification
 Limited Water Use License
 Allocation of Conserved Water
 Exchange of Water

Source of water: Reservoir/Pond
 Groundwater
 Surface Water (name) Columbia River

Estimated quantity of water needed: 27
 cubic feet per second
 gallons per minute
 acre-feet

Intended use of water: Irrigation
 Commercial
 Industrial
 Domestic for _____ household(s)
 Municipal
 Quasi-Municipal
 Instream
 Other _____

Briefly describe:

Mitigated Columbia River water use permits and establishment of permanent mitigated Mid-Columbia River program boundary.

For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form. This deals only with the local land use plan. Do not include approval for activities such as building or grading permits.

Please check the appropriate box below and provide the requested information

- Land uses to be served by the proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s):
JCC 152-056, 152.131, 152.156, 152.161
- Land uses to be served by the proposed water uses (including proposed construction) involve discretionary land use approvals as listed in the table below. (Please attach documentation of applicable land use approvals which have already been obtained. Record of Action/land use decision and accompanying findings are sufficient.) **If approvals have been obtained but all appeal periods have not ended, check "Being pursued."**

Type of Land Use Approval Needed (e.g., plan amendments, rezones, conditional-use permits, etc.)	Cite Most Significant, Applicable Plan Policies & Ordinance Section References	Land Use Approval:	
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being Pursued <input type="checkbox"/> Not Being Pursued
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being Pursued <input type="checkbox"/> Not Being Pursued
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being Pursued <input type="checkbox"/> Not Being Pursued

Land Use Information Form

Oregon Water Resources Department
725 Summer Street NE, Suite A
Salem, Oregon 97301-1266
503-986-0900
www.oregon.gov/OWRD

NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; **OR**
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or groundwater registration modification, and all of the following apply:
 - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b) The application involves a change in place of use only;
 - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
 - d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land use form and return it to the WRD. If no land use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0900.

Land Use Information Form

Oregon Water Resources Department
725 Summer Street NE, Suite A
Salem, Oregon 97301-1266
503-986-0900
www.oregon.gov/OWRD

Applicant

NAME MID-COLUMBIA WATER COMMISSION			PHONE (HM) 541-376-8107		
PHONE (WK) SAA		CELL 541-571-0569		FAX NA	
ADDRESS 29299 MADISON ROAD					
CITY ECHO		STATE OR	ZIP 97826	E-MAIL* JAKE@MADISONRANCHES.COM	

A. Land and Location

Please include the following information for all tax lots where water will be diverted (taken from its source), conveyed (transported), and/or used or developed. Applicants for municipal use, or irrigation uses within irrigation districts may substitute existing and proposed service-area boundaries for the tax-lot information requested below.

Township	Range	Section	¼ ¼	Tax Lot #	Plan Designation (e.g., Rural Residential/RR-5)	Water to be:			Proposed Land Use:
					See attached map for map & tax lot information	X Diverted	X Conveyed	X Used	Farm Use/Irrigation
						<input type="checkbox"/> Diverted	<input type="checkbox"/> Conveyed	<input type="checkbox"/> Used	
						<input type="checkbox"/> Diverted	<input type="checkbox"/> Conveyed	<input type="checkbox"/> Used	
						<input type="checkbox"/> Diverted	<input type="checkbox"/> Conveyed	<input type="checkbox"/> Used	

List all counties and cities where water is proposed to be diverted, conveyed, and/or used or developed:

B. Description of Proposed Use

Type of application to be filed with the Water Resources Department:

- Permit to Use or Store Water
- Water Right Transfer
- Permit Amendment or Groundwater Registration Modification
- Limited Water Use License
- Allocation of Conserved Water
- Exchange of Water

Source of water: Reservoir/Pond Groundwater Surface Water (name) Columbia River

Estimated quantity of water needed: 27 X cubic feet per second gallons per minute acre-feet

Intended use of water: Irrigation Commercial Industrial Domestic for _____ household(s)
 Municipal Quasi-Municipal Instream Other _____

Briefly describe:

Mitigated Columbia River water use permits and establishment of permanent mitigated Mid-Columbia River program boundary.

Note to applicant: If the Land Use Information Form cannot be completed while you wait, please have a local government representative sign the receipt at the bottom of the next page and include it with the application filed with the Water Resources Department.

For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form. This deals only with the local land use plan. Do not include approval for activities such as building or grading permits.

Please check the appropriate box below and provide the requested information

- Land uses to be served by the proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): see below
Land uses to be served by the proposed water uses (including proposed construction) involve discretionary land use approvals as listed in the table below. (Please attach documentation of applicable land use approvals which have already been obtained. Record of Action/land use decision and accompanying findings are sufficient.) If approvals have been obtained but all appeal periods have not ended, check "Being pursued."

Table with 3 columns: Type of Land Use Approval Needed, Cite Most Significant, Applicable Plan Policies & Ordinance Section References, and Land Use Approval (Obtained, Denied, Being Pursued, Not Being Pursued).

Local governments are invited to express special land use concerns or make recommendations to the Water Resources Department regarding this proposed use of water below, or on a separate sheet.

Gilliam County Comprehensive Land Use Plan Goal 3: To preserve and maintain agriculture lands; Goal 6: To maintain and improve the quality of the air, water and land resources of the state. Activity involves several landowners/tax lots within townships and range 4N 22E, 3N 22E, 2N 22E and 1N 22E. LUCS RE: 27 CSF request.

Form with fields for NAME (MICHELLE L. COLBY), TITLE (PLANNING DIRECTOR), SIGNATURE (Michelle L. Colby), PHONE (541-351-9517), DATE (5-24-2022), and GOVERNMENT ENTITY (GILLIAM COUNTY PLANNING DEPARTMENT).

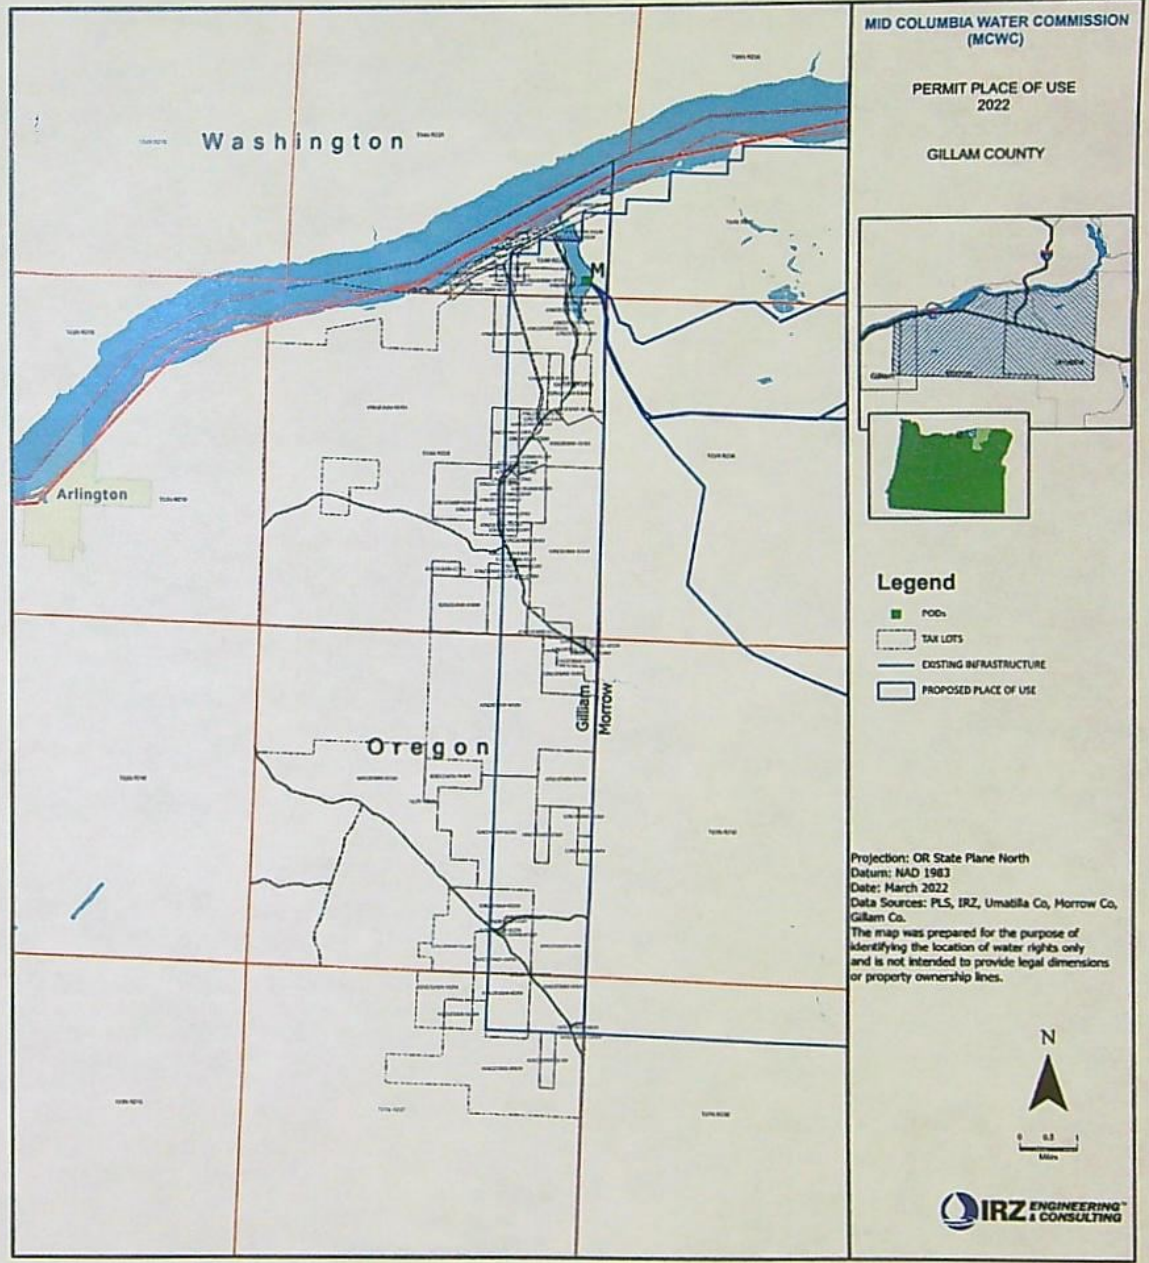

Note to local government representative: Please complete this form or sign the receipt below and return it to the applicant. If you sign the receipt, you will have 30 days from the Water Resources Department's notice date

Port of Umatilla
Ordnance Multi-Use Project(45 cfs)
CAPITAL COST FEASIBILITY STUDY

OWRD

Prepared by IRZ Consulting, LLC
August 9, 2019

BACKGROUND

Port of Umatilla (POU) contracted with IRZ Consulting of Hermiston, Oregon to complete a feasibility study. The purpose of the study was to determine the approximate capital cost of constructing a pipeline in northwestern Umatilla County, Oregon. The pipeline would convey water from the Columbia River to Ordnance. The total capacity of the system would be 45 cubic feet per second (cfs). The study was to consider an entirely new pipeline with necessary pump station and is referred to herein as the Ordnance Multi-Use Pipeline (45cfs). After contracting with IRZ, Umatilla County acquired the Intake Purchase Agreement and the Port of Umatilla notified IRZ that they would like IRZ to just finish work already started. In order to quickly finish, cost estimates were derived from other similar project instead of getting new quotes for material in this project.

SYSTEM DESCRIPTION

Layout of System Serving the Ordnance

The total length of the pipeline from the river to the end at on Ordnance would be about five and a half miles. The major obstacles for the pipeline include crossings of Highway 730, and the West Extension canal,. There are also a couple other minor farm road crossings.

The pipeline would consist of 2,720 feet 42 inch steel, 700 feet of 42 inch 125PSI PVC, 25,930 feet of 42 inch 100PSI PVC. The first section of pipeline from the river south would be steel because of pressure requirements. The pipeline reaches its peak elevation of around 664 feet at about 18,600 feet from the river. The minimum allowable pressure at this point is 10 psi while the resulting design pressure at this point is 16 psi.

River Pump Station

The system would require a new pump station on the Columbia River. The pump station would be located adjacent to the existing Amstad Farms river pump station. The system would share Amstad Farms intake screens and pipe. The used portion of the intake would be purchased or leased from Amstad Farms. The Amstad Farms intake screen and manifold will have 30 cfs of capacity beyond the maximum pumping rate for Amstad Farms. It is anticipated that during periods when Amstad Farms is not pumping at its full capacity that additional capacity in the intake may be leased up to a total of 45 cfs for the new system. The new pipeline as considered herein would have a capacity of 45 cfs.

The new River Pump Station would have a total capacity of 45 cfs (20,200 gpm) at a total head of 490 feet. The river pump station would likely require an upgrade to the electrical substation that currently serves the Amstad Farms station. The system will not need any additional booster pumps to convey water from the river to the delivery points.

COST ESTIMATE - SYSTEM TO SUPPLY WATER TO ORDNANCE

Capital Costs of the System to serve Ordnance

These cost estimates were based on experience with agricultural irrigation system pump station and pipeline construction in the Columbia Basin and should be considered feasibility level approximations. It is prudent, in studies of this scale, to account for unforeseen challenges and expenses by including a contingency cost. A contingency of 15% was determined reasonable for this study. There is also an additional 15% to cover the prevailing wage if required, 5% for engineering services (Surveying, Design, Construction Management) and 5% for project management based on the size and complexity of the proposed system. This cost does not expressly include expenses for obtaining easements and crossing agreements, above that which might be typical. A summary of the estimated capital costs for the project is found in Table 1. The estimated total capital cost for this system is **\$13,985,000**.

Table 1. Estimated Capital Costs for System Supplying Water to Ordnance

Description	Materials	Installation	Totals
Intake Purchase Agreement			\$885,000
River Pump Station (45 cfs)	\$1,720,000	\$640,000	\$2,360,000
Pipelines (42")	\$4,400,000	\$1,440,000	\$5,840,000
Crossings - Roads & Canal	\$280,000	\$760,000	\$1,040,000
Utility Upgrades			\$700,000
Total Construction Costs	\$6,400,000	\$2,840,000	\$10,825,000
Contingency			\$1,700,000
Engineering and Project Management			\$1,460,000
Grand Totals			\$13,985,000

Energy Costs of the System to supply water to Ordnance

The estimated energy usage for all users served by this system will be about 670 kWh per acre-foot of water pumped. The estimated energy cost will be about \$34 per acre-foot. This estimate is based on the system running at full capacity and a total energy cost of \$0.05 per kWh.

RE: New Columbia River Mitigated Water Right Permit Applications

Dear Director Byler,

Please find enclosed two new applications for Columbia River mitigated water right permits. These applications follow numerous discussions with you, your staff, and many stakeholders. If approved, the permits resulting from these applications would replace the existing permits, with the objectives of re-setting the authorized place of use for Columbia River mitigated water rights; simplifying the administration surrounding the measurement, accounting, and reporting of the diversion and use of mitigated water; and modifying several terms and conditions in the existing permits that have proven to be unnecessary or unworkable based now on several years of experience.

The detail surrounding the new place of use and the consolidation of the existing permits into two stand-alone permits is set forth in the applications themselves. A key change is that we have identified an exterior boundary within which lands would be eligible to receive water under the permits, while in any given year the actual acreage receiving water would be much less. This approach is similar to what is provided for in ORS 545.091, and we believe it will reduce the long-term administrative burden on the permit holders, the water users, and the Department as these permit applications represent the start to our permanent mitigation program and mitigation program boundary.

In addition, we wanted to highlight our proposed changes to several terms and conditions included in the existing permits. Set forth below are redlines of current condition language along with an explanation of the proposed change. We believe this detail may help to expedite the Department's review and consideration of our applications, and we look forward to discussing these matters further with you and your staff.

"1. Measurement Devices and Recording/Reporting of Annual Water Use Conditions:

"A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter with telemetry at each point of diversion from the Columbia River ~~and any other location as directed by the Watermaster~~. In addition, each irrigation district customer is required to install a totalizing flow meter at each re-diversion point from the common delivery system (each turn-out) and other locations as may be required by the Watermaster. The measuring devices need to be approved by the Watermaster prior to installation. The permittee and individual landowners shall maintain the required devices in good working order."

DISCUSSION: The language proposed for deletion above has introduced uncertainty as to what the permit holders are responsible for measuring. We would propose that this be worked out and agreed upon up front at the time of permit issuance, so that there is no confusion around what is being expected and required for measurement as water is developed and delivered over time.

“C. The permittee shall keep a complete record of the rate of flow and volume of water diverted and shall submit a report, which includes water-use measurements, to the Department annually and no later than February 14 of each year, or more frequently as may be required by the Director. Further, the Director shall require the permittee to report general water-use information, including the place and nature of use of water under the permit and documentary evidence that use of this water in conjunction with existing water rights for said lands did not exceed an average duty of 3.5 acre feet per acre. The documentary evidence shall include a listing of how many acre-feet each irrigation district customer used along with the associated number of acres irrigated.”

~~“The permittee shall also make raw data/information (the rate of flow and total volume of water diverted) from the telemetered measuring devices at the PODs available to the Department in near-real time.”~~

DISCUSSION: Similar to other water rights in the basin, an average duty would allow for exceedances of 3.5 acre feet per acre on some acres, which would be off-set on an annual basis by duties of less than 3.5 acre feet on other acres. Depending on soils, crop rotation, precipitation, and other factors, this sort of flexibility is necessary to ensure water is being used with maximum efficiency. Of course, having an average per acre duty will not change the maximum instantaneous rate of withdrawal. The deletion of the requirement to make raw data/information to the Department in near-real time is being proposed based on our recent discussions with Department staff. We understand there is little utility in having the Department receive the diversion data in near-real time, given the raw data does not differentiate between the many water rights authorizing diversion at the PODs, and thus does not enable the Department to regulate in real time. The data, which are provided as part of the other reporting requirements, requires interpretation and assessment, and removing this requirement would make the new permits consistent with other permits in the basin. In short, ending this requirement would remove a significant burden on the permit holders, which is providing no benefit to the management of the resource.

“2. In the interest of preserving the groundwater supplies, water use described under this permit as supplemental to a groundwater right, may be used as the primary supply when surface water is available for use under this permit. If water under this permit is supplemental to a primary groundwater right, and the water under the permit is used as the primary supply, then the primary groundwater right cannot be transferred separately from the supplemental water under this permit to another place or character of use. As provided for in Condition 7 below, where the primary groundwater right is deficient, then the water use under this permit shall be considered a second primary supply, whereby the primary groundwater right and secondary primary supply may be transferred separately to another place or character of use.”

RECEIVED

AUG 12 2022

DISCUSSION: The proposed language is consistent with Department policy such that when a primary water right is deficient, more than one primary water right may be assigned to the same ground at the same time, without the water rights becoming “married” for transfer purposes.

“6. The amount of water used for primary or supplemental irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of not to exceed ONE-SIXTIETH of one cubic foot per second and an average duty of 3.5 acre-feet for each acre irrigated during the irrigation season of each year. Notwithstanding the above sentence, in those instances in which water under this permit is effectively being diverted through POD D and utilized for irrigation on lands within the following areas:

“Sections 32 and 33 of Township 5 North, Range 28 West (all lying west of the Umatilla River); Sections 4, 5, 6, 7, 8, 9, 16, 17, 18, 19, 20, 29, and 30 of Township 4 North, Range 28 West (all lying west of the Umatilla River); and Sections 12, 13, 24 and 25 of Township 4 North, Range 27 West, all inside the boundary of Westland Irrigation District (WID);

then where such lands have pre-existing appurtenant water rights that provide for a higher cumulative total than ONE-SIXTIETH of one cubic foot per second and/or 3.5 acre feet for each acre irrigated during the irrigation season of each year, then the use of water under this permit on such lands shall instead be limited based on the following:

“For pre-existing primary and/or any supplemental rights on lands within the WID boundary that DO NOT subscribe to water made available from internal WID transfers resulting from this permit, and where such pre-existing primary and/or supplemental rights allow for a cumulative total of up to ONE-FORTIETH of one cubic foot per second and/or up to 4.5 acre feet per acre for each acre irrigated during the irrigation season of each year, then the use of water under this permit on such lands shall be limited to the same pre-existing cumulative total of up to ONE-FORTIETH of one cubic foot per second and/or up to an average duty of 4.5 acre-feet for each acre irrigated during the irrigation season of each year.

“For pre-existing primary and/or supplemental rights on lands within the WID boundary that DO subscribe to water made available from internal WID transfers resulting from this permit, such rights shall be limited to a cumulative total of up to ONE-SIXTIETH of one cubic foot per second and an average duty of 3.5 acre feet for each acre irrigated during the irrigation season of each year.”

DISCUSSION: Same proposed change as discussed above.

“7. When submitting a claim of beneficial use, the permittee may request that water under this permit that is identified as supplemental in the permit be certificated as primary irrigation, if the underlying primary water rights have been diminished to supplemental, canceled, or are deficient (i.e., where the underlying primary water rights are deficient up to ONE-SIXTIETH of one cubic foot per second and/or deficient up to 3.5 acre feet per acre).”

DISCUSSION: No proposed changes to this condition. We are including it here, as this condition is referenced in the proposed changes to Condition 2 above.

RECEIVED

“9. For this permit, withdrawals will be considered mitigated and at or above the point of impact if:

“***

“B. Withdrawals within the upper John Day Pool from River Mile 252270 to McNary Dam are mitigated with maximum instantaneous rate approved by the permit above their points of withdrawal or within the upper John Day Pool between River Mile 252270 and the McNary Dam (about River Mile 292).”

DISCUSSION: The referenced River Mile is proposed for change in order to include the Willow Creek Diversion and correct what we believe to be an error of the previous applications. We continue to believe that John Day Dam should be the downstream mitigation boundary for John Day pool diversions as the condition is intended to address mitigation pool impacts, not real time flow impacts at the point of diversion.

“16. The permittee or subsequent certificate holder shall provide an annual report to the Department by February 14 of each year. Items "A" and "B" must be submitted for the life of the permit and certificate. The report must be submitted to the Water Right Services Division and the Watermaster and include the following:

“A. Activity from the previous irrigation season: The permittee or certificate holder must report the total volume of water used in acre-feet for each use allowed under the permit, the total number of acres irrigated by each use and the instantaneous maximum amount (in CFS) pumped at the point(s) of diversion. A map shall be submitted showing the location of the acres irrigated by quarter-quarter and whether the use was primary or supplemental. The Report shall include the total number of primary acres, supplemental acres and deficient water right acres that were served by the permit. The report shall also include documentary evidence of mitigation water in place for the maximum instantaneous rate allowed by the permit for the previous year.”

DISCUSSION: We would propose replacing the above with the following: “The permittee or certificate holder shall report monthly volumes of water use to the Water Resources Department on an annual basis. The information shall be available to the State as a public record at any time. Further, the Director may require the water user to report general water use information, including the place and nature of use of water under the permit.” This language tracks monitoring and reporting conditions in other basin water rights. We would propose this more general approach, given district oversight of the water right permits or certificates, similar to other monitoring and reporting requirements established by the Department for districts.

“B. Planned activity for the next irrigation season: The permittee shall submit a map that indicates the location of acres to be irrigated by quarter-quarter. The map shall show underlying water rights and shall indicate which acres are going to be irrigated as primary and as supplemental irrigation and show the locations of any additional uses authorized by the permit. The report shall also include documentary evidence of mitigation water for the full instantaneous rate of the permit that will be in place for the next year. The irrigation season will be delayed by one day for every day that the annual report is submitted late to the Department.”

RECEIVED

AUG 12 2022

DISCUSSION: Similar to the discussion point above, we would propose either no ~~mitigation~~ requirement at all, or simply confirmation that delivery will be within the exterior district boundary.

“C. Water qualifying as permanent under a permanent Oregon mitigation program ~~Permanent mitigation~~ is required within 30 years of permit issuance. Until permanent mitigation is in place, the permit holder shall include a report indicating the steps taken in the past year and planned for the next year to acquire permanent mitigation credits. This report is due annually on February 14 starting with the February 14 report that is between three and four years from the date of permit issuance.”

DISCUSSION: We understand that the Department will be developing a permanent mitigation program for our basin soon. The permit condition should be written in a way to take into account what qualifies under the program.

“D. In addition to the reporting requirements of a through c above, in those instances in which water under this permit is effectively being diverted through POD D and utilized for irrigation on lands within the following areas:

“Sections 32 and 33 of Township 5 North, Range 28 West (all lying west of the Umatilla River); Sections 4, 5, 6, 7, 8, 9, 16, 17, 18, 19, 20, 29, and 30 of Township 4 North, Range 28 West (all lying west of the Umatilla River); Sections 12, 13, 24, and 25 of Township 4 North, Range 27 West, all inside the WID boundary (referred to below as the WID Audit Lands); then the following additional reporting requirements shall apply to those lands:

“***”

DISCUSSION: We are proposing a minor change here for clarification.

“17. In addition to existing enforcement mechanisms, if the Department determines that the permittee or certificate holder has exceeded the maximum authorized rate of diversion, the diversion of water will be reduced by an equal amount of water during the same time period as to when the infraction occurred the next year. Development of a Permanent Mitigation program is required to replace temporary mitigation within 30 years of permit issuance. This water right expires if a permanent mitigation program and water qualifying under the program is not secured within 30 years of permit issuance.”

“18. Before proof can be made, water qualifying as permanent under a permanent mitigation water-program must be legally protected. When the Department issues a certificate the rate will not exceed the amount of permanent mitigation that has been provided.

DISCUSSION: These proposed changes are consistent with above the proposed change, which is intended to take into account the Department’s anticipated rulemaking.

We look forward to discussing our applications with you and these matters with you further.

RECEIVED

Sincerely, JWC

Jake Madison, Chair

RE: New Columbia River Mitigated Water Right Permit Applications

Dear Director Byler,

Please find enclosed two new applications for Columbia River mitigated water right permits. These applications follow numerous discussions with you, your staff, and many stakeholders. If approved, the permits resulting from these applications would replace the existing permits, with the objectives of re-setting the authorized place of use for Columbia River mitigated water rights; simplifying the administration surrounding the measurement, accounting, and reporting of the diversion and use of mitigated water; and modifying several terms and conditions in the existing permits that have proven to be unnecessary or unworkable based now on several years of experience.

The detail surrounding the new place of use and the consolidation of the existing permits into two stand-alone permits is set forth in the applications themselves. A key change is that we have identified an exterior boundary within which lands would be eligible to receive water under the permits, while in any given year the actual acreage receiving water would be much less. This approach is similar to what is provided for in ORS 545.091, and we believe it will reduce the long-term administrative burden on the permit holders, the water users, and the Department as these permit applications represent the start to our permanent mitigation program and mitigation program boundary.

In addition, we wanted to highlight our proposed changes to several terms and conditions included in the existing permits. Set forth below are redlines of current condition language along with an explanation of the proposed change. We believe this detail may help to expedite the Department's review and consideration of our applications, and we look forward to discussing these matters further with you and your staff.

“1. Measurement Devices and Recording/Reporting of Annual Water Use Conditions:

“A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter with telemetry at each point of diversion from the Columbia River and any other location as directed by the Watermaster. In addition, each irrigation district customer is required to install a totalizing flow meter at each re-diversion point from the common delivery system (each turn-out) and other locations as may be required by the Watermaster. The measuring devices need to be approved by the Watermaster prior to installation. The permittee and individual landowners shall maintain the required devices in good working order.”

DISCUSSION: The language proposed for deletion above has introduced uncertainty as to what the permit holders are responsible for measuring. We would propose that this be worked out and agreed upon up front at the time of permit issuance, so that there is no confusion around what is being expected and required for measurement as water is developed and delivered over time.

“C. The permittee shall keep a complete record of the rate of flow and volume of water diverted and shall submit a report, which includes water-use measurements, to the Department annually and no later than February 14 of each year, or more frequently as may be required by the Director. Further, the Director shall require the permittee to report general water-use information, including the place and nature of use of water under the permit and documentary evidence that use of this water in conjunction with existing water rights for said lands did not exceed an average duty of 3.5 acre feet per acre. The documentary evidence shall include a listing of how many acre-feet each irrigation district customer used along with the associated number of acres irrigated.”

~~“The permittee shall also make raw data/information (the rate of flow and total volume of water diverted) from the telemetered measuring devices at the PODs available to the Department in near-real time.”~~

DISCUSSION: Similar to other water rights in the basin, an average duty would allow for exceedances of 3.5 acre feet per acre on some acres, which would be off-set on an annual basis by duties of less than 3.5 acre feet on other acres. Depending on soils, crop rotation, precipitation, and other factors, this sort of flexibility is necessary to ensure water is being used with maximum efficiency. Of course, having an average per acre duty will not change the maximum instantaneous rate of withdrawal. The deletion of the requirement to make raw data/information to the Department in near-real time is being proposed based on our recent discussions with Department staff. We understand there is little utility in having the Department receive the diversion data in near-real time, given the raw data does not differentiate between the many water rights authorizing diversion at the PODs, and thus does not enable the Department to regulate in real time. The data, which are provided as part of the other reporting requirements, requires interpretation and assessment, and removing this requirement would make the new permits consistent with other permits in the basin. In short, ending this requirement would remove a significant burden on the permit holders, which is providing no benefit to the management of the resource.

“2. In the interest of preserving the groundwater supplies, water use described under this permit as supplemental to a groundwater right, may be used as the primary supply when surface water is available for use under this permit. If water under this permit is supplemental to a primary groundwater right, and the water under the permit is used as the primary supply, then the primary groundwater right cannot be transferred separately from the supplemental water under this permit to another place or character of use. As provided for in Condition 7 below, where the primary groundwater right is deficient, then the water use under this permit shall be considered a second primary supply, whereby the primary groundwater right and secondary primary supply may be transferred separately to another place or character of use.”

RECEIVED

AUG 12 2022

OWRD

DISCUSSION: The proposed language is consistent with Department policy such that when a primary water right is deficient, more than one primary water right may be assigned to the same ground at the same time, without the water rights becoming “married” for transfer purposes.

“6. The amount of water used for primary or supplemental irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of not to exceed ONE-SIXTIETH of one cubic foot per second and an average duty of 3.5 acre-feet for each acre irrigated during the irrigation season of each year. Notwithstanding the above sentence, in those instances in which water under this permit is effectively being diverted through POD D and utilized for irrigation on lands within the following areas:

“Sections 32 and 33 of Township 5 North, Range 28 West (all lying west of the Umatilla River); Sections 4, 5, 6, 7, 8, 9, 16, 17, 18, 19, 20, 29, and 30 of Township 4 North, Range 28 West (all lying west of the Umatilla River); and Sections 12, 13, 24 and 25 of Township 4 North, Range 27 West, all inside the boundary of Westland Irrigation District (WID);

then where such lands have pre-existing appurtenant water rights that provide for a higher cumulative total than ONE-SIXTIETH of one cubic foot per second and/or 3.5 acre feet for each acre irrigated during the irrigation season of each year, then the use of water under this permit on such lands shall instead be limited based on the following:

“For pre-existing primary and/or any supplemental rights on lands within the WID boundary that DO NOT subscribe to water made available from internal WID transfers resulting from this permit, and where such pre-existing primary and/or supplemental rights allow for a cumulative total of up to ONE-FORTIETH of one cubic foot per second and/or up to 4.5 acre feet per acre for each acre irrigated during the irrigation season of each year, then the use of water under this permit on such lands shall be limited to the same pre-existing cumulative total of up to ONE-FORTIETH of one cubic foot per second and/or up to an average duty of 4.5 acre-feet for each acre irrigated during the irrigation season of each year.

“For pre-existing primary and/or supplemental rights on lands within the WID boundary that DO subscribe to water made available from internal WID transfers resulting from this permit, such rights shall be limited to a cumulative total of up to ONE-SIXTIETH of one cubic foot per second and an average duty of 3.5 acre feet for each acre irrigated during the irrigation season of each year.”

DISCUSSION: Same proposed change as discussed above.

“7. When submitting a claim of beneficial use, the permittee may request that water under this permit that is identified as supplemental in the permit be certificated as primary irrigation, if the underlying primary water rights have been diminished to supplemental, canceled, or are deficient (i.e., where the underlying primary water rights are deficient up to ONE-SIXTIETH of one cubic foot per second and/or deficient up to 3.5 acre feet per acre).”

DISCUSSION: No proposed changes to this condition. We are including it here, as this condition is referenced in the proposed changes to Condition 2 above.

RECEIVED

AUG 12 2022

OWRD

if: “9. For this permit, withdrawals will be considered mitigated and at or above the point of impact

“B. Withdrawals within the upper John Day Pool from River Mile 252270 to McNary Dam are mitigated with maximum instantaneous rate approved by the permit above their points of withdrawal or within the upper John Day Pool between River Mile 252270 and the McNary Dam (about River Mile 292).”

DISCUSSION: The referenced River Mile is proposed for change in order to include the Willow Creek Diversion and correct what we believe to be an error of the previous applications. We continue to believe that John Day Dam should be the downstream mitigation boundary for John Day pool diversions as the condition is intended to address mitigation pool impacts, not real time flow impacts at the point of diversion.

“16. The permittee or subsequent certificate holder shall provide an annual report to the Department by February 14 of each year. Items "A" and "B" must be submitted for the life of the permit and certificate. The report must be submitted to the Water Right Services Division and the Watermaster and include the following:

“A. Activity from the previous irrigation season: The permittee or certificate holder must report the total volume of water used in acre-feet for each use allowed under the permit, the total number of acres irrigated by each use and the instantaneous maximum amount (in CFS) pumped at the point(s) of diversion. A map shall be submitted showing the location of the acres irrigated by quarter-quarter and whether the use was primary or supplemental. The Report shall include the total number of primary acres, supplemental acres and deficient water right acres that were served by the permit. The report shall also include documentary evidence of mitigation water in place for the maximum instantaneous rate allowed by the permit for the previous year.”

DISCUSSION: We would propose replacing the above with the following: “The permittee or certificate holder shall report monthly volumes of water use to the Water Resources Department on an annual basis. The information shall be available to the State as a public record at any time. Further, the Director may require the water user to report general water use information, including the place and nature of use of water under the permit.” This language tracks monitoring and reporting conditions in other basin water rights. We would propose this more general approach, given district oversight of the water right permits or certificates, similar to other monitoring and reporting requirements established by the Department for districts.

“B. Planned activity for the next irrigation season: The permittee shall submit a map that indicates the location of acres to be irrigated by quarter-quarter. The map shall show underlying water rights and shall indicate which acres are going to be irrigated as primary and as supplemental irrigation and show the locations of any additional uses authorized by the permit. The report shall also include documentary evidence of mitigation water for the full instantaneous rate of the permit that will be in place for the next year. The irrigation season will be delayed by one day for every day that the annual report is submitted late to the Department.”

RECEIVED

AUG 12 2022

DISCUSSION: Similar to the discussion point above, we would propose either no mapping requirement at all, or simply confirmation that delivery will be within the exterior district boundary.

“C. Water qualifying as permanent under a permanent Oregon mitigation program Permanent mitigation is required within 30 years of permit issuance. Until permanent mitigation is in place, the permit holder shall include a report indicating the steps taken in the past year and planned for the next year to acquire permanent mitigation credits. This report is due annually on February 14 starting with the February 14 report that is between three and four years from the date of permit issuance.”

DISCUSSION: We understand that the Department will be developing a permanent mitigation program for our basin soon. The permit condition should be written in a way to take into account what qualifies under the program.

“D. In addition to the reporting requirements of a through c above, in those instances in which water under this permit is effectively being diverted through POD D and utilized for irrigation on lands within the following areas:

“Sections 32 and 33 of Township 5 North, Range 28 West (all lying west of the Umatilla River); Sections 4, 5, 6, 7, 8, 9, 16, 17, 18, 19, 20, 29, and 30 of Township 4 North, Range 28 West (all lying west of the Umatilla River); Sections 12, 13, 24, and 25 of Township 4 North, Range 27 West, all inside the WID boundary (referred to below as the WID Audit Lands); then the following additional reporting requirements shall apply to those lands:

“***.”

DISCUSSION: We are proposing a minor change here for clarification.

RECEIVED

AUG 12 2022

OWRD

“17. In addition to existing enforcement mechanisms, if the Department determines that the permittee or certificate holder has exceeded the maximum authorized rate of diversion, the diversion of water will be reduced by an equal amount of water during the same time period as to when the infraction occurred the next year. Development of a Permanent Mitigation program is required to replace temporary mitigation within 30 years of permit issuance. This water right expires if a permanent mitigation program and water qualifying under the program is not secured within 30 years of permit issuance.”

“18. Before proof can be made, water qualifying as permanent under a permanent mitigation water program must be legally protected. When the Department issues a certificate the rate will not exceed the amount of permanent mitigation that has been provided.

DISCUSSION: These proposed changes are consistent with above the proposed change, which is intended to take into account the Department’s anticipated rulemaking.

We look forward to discussing our applications with you and these matters with you further.

Sincerely,

Jake Madison, Chair

Mid-Columbia Water Commission

Note: Attach multiple copies as needed

* By providing an e-mail address, consent is given to receive all correspondence from the Department electronically. (Paper copies of the proposed and final order documents will also be mailed.)

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application.
- I cannot legally use water until the Water Resources Department issues a permit.
- The Department encourages all applicants to wait for a permit to be issued before beginning construction of any proposed diversion. Acceptance of this application does not guarantee a permit will be issued.
- If I begin construction prior to the issuance of a permit, I assume all risks associated with my actions.
- If I receive a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be cancelled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water right holders to receive water to which they are entitled.

I (we) affirm that the information contained in this application is true and accurate

SECTION 2: PROPERTY OWNERSHIP

Please indicate if you own all the lands associated with the project from which the water is to be diverted, conveyed, and used.

- YES, there are no encumbrances.
- YES, the land is encumbered by easements, rights of way, roads or other encumbrances.
- NO, I have a recorded easement or written authorization permitting access.
- NO, I do not currently have written authorization or easement permitting access.
- NO, written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigation and/or domestic use only (ORS 274.040).
- NO, because water is to be diverted, conveyed, and/or used only on federal lands.

Affected Landowners: List the names and mailing addresses of all owners of any lands that are not owned by the applicant and that are crossed by the proposed ditch, canal or other work, even if the applicant has obtained written authorization or an easement from the owner. (Attach additional sheets if necessary).

SEE EXHIBIT A FOR A LIST OF NAMES AND ADDRESSES OF ALL INCLUDED LANDOWNERS BY MAP AND TAX LOT

Legal Description: You must provide the legal description of: 1. The property from which the water is to be diverted, 2. Any property crossed by the proposed ditch, canal or other work, and 3. Any property on which the water is to be used as depicted on the map.

SEE ATTACHMENT B FOR LEGAL DESCRIPTION OF DIVERSION & CONVEYANCE WORKS AND LEGAL DESCRIPTION OF MID-COLUMBIA MITIGATION USE BOUNDARY

SECTION 3: SOURCE OF WATER

A. Proposed Source of Water

Provide the commonly used name of the water body from which water will be diverted, and the name of the stream or lake it flows into (if unnamed, say so), and the locations of the point of diversion (POD):

Source 1: Columbia River (PODs A, B, C)	Tributary to: Pacific Ocean
TRSQQ of POD: See Attachment B	
Source 2: Columbia River (POD D)	Tributary to: Pacific Ocean
TRSQQ of POD: See Attachment B	
Source 3: Columbia River (PODs E, F, G, H, and I)	Tributary to: Pacific Ocean
TRSQQ of POD: See Attachment B	
Source 4: Columbia River (POD J)	Tributary to: Pacific Ocean
TRSQQ of POD: See Attachment B	
Source 5: Place Columbia River (POD K)	Tributary to: Pacific Ocean
TRSQQ of POD: See Exhibit B	

Source 5: Columbia River (POD L)	Tributary to: Pacific Ocean
TRSQQ of POD: See Exhibit B	
Source 5: Columbia River (POD M)	Tributary to: Pacific Ocean
TRSQQ of POD: See Exhibit B	

If any source listed above is stored water that is authorized under a water right permit, certificate, or decree, attach a copy of the document or list the document number (for decrees, list the volume, page and/or decree name).

B. Applications to Use Stored Water

Do you, or will you, own the reservoir(s) described in Section 3A above?

Yes. No. (Enclose a copy of your written notification to the operator of the reservoir of your intent to file this application, which should have been mailed or delivered to the operator.)

If *all* sources listed in Section 3A are stored water, the Department will review your application using the expedited process provided in ORS 537.147, unless you check the box below. Please see the instruction booklet for more information.

By checking this box, you are requesting that the Department process your application under the standard process outlined in ORS 537.150 and 537.153, rather than the expedited process provided by ORS 537.147. To file an application under the standard process, you must enclose the following:

- A copy of a signed non-expired contract or other agreement with the owner of the reservoir (if not you) to impound the volume of water you propose to use in this application.
- A copy of your written agreement with the party (if any) delivering the water from the reservoir to you.

SECTION 4: SENSITIVE, THREATENED OR ENDANGERED FISH SPECIES PUBLIC INTEREST INFORMATION

This information must be provided for your application to be accepted as complete. The Water Resources Department will determine whether the proposed use will impair or be detrimental to the public interest with regard to sensitive, threatened or endangered fish species.

To answer the following questions, use the map provided in [Attachment 3](#) or the link below to determine whether the proposed point of diversion (POD) is located in an area where the Upper Columbia, the Lower Columbia, and/or the Statewide public interest rules apply.

For more detailed information, click on the following link and enter the T,R,S,QQ or the Lat/Long of a POD and click on "Submit" to retrieve a report that will show which section, if any, of the rules apply:
https://apps.wrd.state.or.us/apps/misc/lkp_trsqq_features/

If you need help to determine in which area the proposed POD is located, please call the customer service desk at (503) 986-0900.

Upper Columbia - OAR 690-033-0115 thru -0130

Is the POD located in an area where the Upper Columbia Rules apply?

X Yes No

If yes, you are notified that the Water Resources Department will consult with numerous federal, state, local and tribal governmental entities so it may determine whether the proposed use is consistent with the "Columbia River Basin Fish and Wildlife Program" adopted by the Northwest Power Planning Council in 1994 for the protection and recovery of listed fish species. The application may be denied, heavily conditioned, or if appropriate, mitigation for impacts may be needed to obtain approval for the proposed use.

RECEIVED
AUG 12 2022

WRD

If yes,

- I understand that the proposed use does not involve appropriation of direct streamflow during the time period April 15 to September 30, except as provided in OAR 690-033-0140.
- I understand that I will install, operate and maintain a fish screen and fish passage as listed in ORS 498.301 through 498.346, and 509.580 through 509.910, to the specifications and extent required by Oregon Department of Fish and Wildlife, prior to diversion of water under any permit issued pursuant to this application.
- I understand that the Oregon Department of Environmental Quality will review my application to determine if the proposed use complies with existing state and federal water quality standards.
- I understand that I will install and maintain water use measurement and recording devices as required by the Water Resources Department, and comply with recording and reporting permit condition requirements.

Lower Columbia - OAR 690-033-0220 thru -0230

Is the POD located in an area where the Lower Columbia rules apply?

Yes No

If yes, you are notified that that the Water Resources Department will determine, by reviewing recovery plans, the Columbia River Basin Fish and Wildlife Program, and regional restoration programs applicable to threatened or endangered fish species, in coordination with state and federal agencies, as appropriate, whether the proposed use is detrimental to the protection or recovery of a threatened or endangered fish species and whether the use can be conditioned or mitigated to avoid the detriment.

If a permit is issued, it will likely contain conditions to ensure the water use complies with existing state and federal water quality standards; and water use measurement, recording and reporting required by the Water Resources Department. The application may be denied, or if appropriate, mitigation for impacts may be needed to obtain approval of the proposed use.

If yes, provide the following information (the information must be provided with the application to be considered complete).

Yes No The proposed use is for more than one cubic foot per second (448.8 gpm) and is not subject to the requirements of OAR 690, Division 86 (Water Management and Conservation Plans).

If yes, provide a description of the measures to be taken to assure reasonably efficient water use:

Statewide - OAR 690-033-0330 thru -0340

Is the POD located in an area where the Statewide rules apply?

Yes No

If yes, the Water Resources Department will determine whether the proposed use will occur in an area where endangered, threatened or sensitive fish species are located. If so, the Water Resources Department, Department of Fish and Wildlife, Department of Environmental Quality, and the Department of Agriculture will recommend conditions required to achieve "no loss of essential habitat of threatened and endangered (T&E) fish species," or "no net loss of essential habitat of sensitive (S) fish species." If conditions cannot be identified that meet the standards of no loss of essential T & E fish habitat or no net loss of essential S fish habitat, the agencies will recommend denial of the application unless they conclude that the proposed use would not harm the species.

RECEIVED

AUG 12 2022

OWRD

SECTION 5: WATER USE

Provide the amount of water you propose to use from each source, for each use, in cubic feet-per-second (cfs) or gallons-per-minute (gpm). If the proposed use is from storage, provide the amount in acre-feet (af):
 (1 cfs equals 448.8 gpm. 1 acre-foot equals 325,851 gallons or 43,560 cubic feet)

SOURCE	USE	PERIOD OF USE	AMOUNT
Columbia River	Irrigation	March 1 to November 1	153 X cfs <input type="checkbox"/> gpm <input type="checkbox"/> af
			<input type="checkbox"/> cfs <input type="checkbox"/> gpm <input type="checkbox"/> af
			<input type="checkbox"/> cfs <input type="checkbox"/> gpm <input type="checkbox"/> af
			<input type="checkbox"/> cfs <input type="checkbox"/> gpm <input type="checkbox"/> af

Please indicate the number of primary, supplemental and/or nursery acres to be irrigated.
 Primary: 702,277.8 Acres Supplemental: See cover letter and section 10 Acres Nursery Use NA Acres
 If supplemental acres are listed, provide the Permit or Certificate number of the underlying primary water right(s): see narrative, per recommended conditions existing permit and certificates are included annually as part of the annual report.
 Indicate the maximum total number of acre-feet you expect to use in an irrigation season: 74,220.30

- If the use is **municipal or quasi-municipal**, attach **Form M**
- If the use is **domestic**, indicate the number of households: NA
- If the use is **mining**, describe what is being mined and the method(s) of extraction: NA

RECEIVED
 AUG 12 2022
OWRD

SECTION 6: WATER MANAGEMENT

A. Diversion and Conveyance

What equipment will you use to pump water from your source?

X Pump (give horsepower and type): See Attachment B

Provide a description of the proposed means of diversion, construction, and operation of the diversion works and conveyance of water.

See Attachment A for a description of the diversion and conveyance works of all PODs associated with this application. See attachment C for description of POD D proposed means of diversion, construction and operation.

B. Application Method

What equipment and method of application will be used? (e.g., drip, wheel line, high-pressure sprinkler) Drip, wheel-line, low-pressure sprinkler, high-pressure sprinkler and some hand line use.

C. Conservation

Please describe why the amount of water requested is needed and measures you propose to: prevent waste; measure the amount of water diverted; prevent damage to public uses of affected surface waters.

See Exhibit D for data provided by IRZ Consulting regarding average annual water usage in the Umatilla basin for clarification of the purpose of the duty requested per acre.

SECTION 7: RESOURCE PROTECTION

In granting permission to use water from a stream or lake, the state encourages, and in some instances requires, careful control of activities that may affect the waterway or streamside area. See instruction guide for a list of possible permit requirements from other agencies. Please indicate any of the practices you plan to undertake to protect water resources:

- X Diversion will be screened per ODFW specifications in ORS 498.301 through 498.346 to prevent uptake of fish and other aquatic life.
Describe planned actions: All Columbia River Diversions have existing fish screens installed meeting NOAA standards in place as of 2022, or will have compliant fish screens installed prior to being included on the annual proposed use map for beneficial use of mitigation use water.
- X Excavation or clearing of banks will be kept to a minimum to protect riparian or streamside areas.
Note: If disturbed area is more than one acre, applicant should contact the Department of Environmental Quality to determine if a 1200C permit is required.
Describe planned actions and additional permits required for project implementation: No new construction is proposed at PODs A-C and E-M. All excavation at POD D will be completed in compliance with the conditions of the diversion owner's permit granted by the United States Army Corps of Engineers.
- X Operating equipment in a water body will be managed and timed to prevent damage to aquatic life.
Describe planned actions and additional permits required for project implementation: No improvements are anticipated to require work in waterways of the State. Should improvements require in-water work, all work will be performed after any necessary federal and state permits are granted and will remain in compliance with applicable state and federal permitting agencies and the applicable in-water work permits.
- X Water quality will be protected by preventing erosion and run-off of waste or chemical products.
Describe planned actions: No improvements are anticipated at PODs A-C and E-M. All construction and improvements to POD D will be in compliance with applicable state and federal permitting agencies and applicable permits.
- X List other federal and state permits or contracts to be obtained, if a water right permit is granted.
No additional permits are anticipated for PODs A-C and E-M. Additional federal permits are not anticipated for POD D. State permits required for POD D may include removal fill permitting (DSL), and ODOT crossing agreements (HWY 730).

SECTION 8: PROJECT SCHEDULE

NOTE: CONSTRUCTION SCHEDULE PROVIDED BELOW APPLICABLE TO POD D ONLY. NO NEW CONSTRUCTION IS PROPOSED OR NECESSARY FOR POD'S A-C AND E-M

- a) Date construction will begin: November, 2022
- b) Date construction will be completed: June, 2024
- c) Date beneficial water use will begin: June, 2024

Place of Use Acreage

As part of this application, the Mid-Columbia Water Commission is identifying a new exterior boundary (referred to as the "Mid-Columbia Mitigation Region Boundary"), within which the mitigation use water supplies may be used on an annual basis. The actual place of use and rate of use on an annual basis will be reported to OWRD by an annual reporting deadline of February 14 for the upcoming irrigation season. Lands not included in the annual place of use map submitted on or before February 14 will not be included within the authorized place of use for mitigation use water rights for that year even though they are within the broader Mid-Columbia

Mitigation Region Boundary and even though these lands may have received mitigation use water in previous years. The final place of use, as well as total primary and total supplemental acreages, will be detailed prior to the final proof survey. Lands that do not utilize water under this permit shall not be included in the final proof survey nor included on the interactive water rights map of the Oregon Water Resources Department.

Proposed Period of Use as related to Division 33 Mitigation

The Mid-Columbia Water Commission proposes a period of use from March 1 to November 1 of each year. Water from the Columbia River will be subject to mitigation from April 15 to September 30, as required by OAR 690-033. From March 1 to April 14 and from October 1 to November 1 of each year, the Mid-Columbia Water Commission may pump from the Columbia River without securing or providing proof of mitigation. Otherwise, the Mid-Columbia Water Commission has secured mitigation at the appropriate level required by regulating agencies to pump Columbia River water from April 15 to September 30. Sources of mitigation are documented and reported to OWRD prior to the start of the mitigation season, and the pumping rate during the mitigation season will be directly proportionate to the mitigation secured for that mitigation season. The period for mitigation requirements is currently 169 days of the proposed period of use. The Mid-Columbia Water Commission has secured mitigation that currently meets or exceeds the 169-day period of use.

OWRD

Include the following additional items:

- Land Use Information Form with approval and signature of local planning department (*must be an original*) or signed receipt.
- Provide the legal description of: (1) the property from which the water is to be diverted, (2) any property crossed by the proposed ditch, canal or other work, and (3) any property on which the water is to be used as depicted on the map.
- Fees - Amount enclosed: \$69,350
See the Department's Fee Schedule at www.oregon.gov/owrd or call (503) 986-0900.
- Map that includes the following items:
 - Permanent quality and drawn in ink
 - Even map scale not less than 4" = 1 mile (example: 1" = 400 ft, 1" = 1320 ft, etc.)
 - North Directional Symbol
 - Township, Range, Section, Quarter/Quarter, Tax Lots
 - Reference corner on map
 - Location of each diversion, by reference to a recognized public land survey corner (distances north/south and east/west)
 - Indicate the area of use by Quarter/Quarter and tax lot identified clearly.
 - Number of acres per Quarter/Quarter and hatching to indicate area of use if for primary irrigation, supplemental irrigation, or nursery
 - Location of main canals, ditches, pipelines or flumes (if well is outside of the area of use)

Water-Use Permit Application Processing

1. Completeness Determination

The Department evaluates whether the application and accompanying map contain all of the information required under OAR 690-310-0040 and OAR 690-310-0050. The Department also determines whether the proposed use is prohibited by statute. If the Department determines that the application is incomplete, all fees have not been paid, or the use is prohibited by statute, the application and all fees submitted are returned to the applicant.

2. Initial Review

The Department reviews the application to determine whether water is available during the period requested, whether the proposed use is restricted or limited by rule or statute, and whether other issues may preclude approval of or restrict the proposed use. An Initial Review (IR) containing preliminary determinations is mailed to the applicant. The applicant has 14 days from the mailing date to withdraw the application from further processing and receive a refund of all fees paid minus \$310. The applicant may put the application on hold for up to 180 days and may request additional time if necessary.

3. Public Notice

Within 7 days of the mailing of the initial review, the Department gives public notice of the application in the weekly notice published by the Department at www.oregon.gov/owrd. The public comment period is 30 days from publication in the weekly notice.

4. Proposed Final Order Issued

The Department reviews any comments received, including comments from other state agencies related to the protection of sensitive, threatened or endangered fish species. Within 60 days of completion of the IR, the Department issues a Proposed Final Order (PFO) explaining the proposed decision to deny or approve the application. A PFO proposing approval of an application will include a draft permit, and may request additional information or outstanding fees required prior to permit issuance.

RECEIVED
AUG 12 2022

5. Public Notice

Within 7 days of issuing the PFO, the Department gives public notice in the weekly notice. Notice includes information about the application and the PFO. Protest must be received by the Department within 45 days after publication of the PFO in the weekly notice. Anyone may file a protest. The protest filing fee is \$480.00 for the applicant and \$950.00 for non-applicants. Protests are filed on approximately 10 percent of Proposed Final Orders. If a protest is filed the Department will attempt to settle the protest but will schedule a contested case hearing if necessary.

OWRD

6. Final Order Issued

If no protests are filed, the Department can issue a Final Order within 60 days of the close of the period for receiving protest. If the application is approved, a permit is issued. The permit specifies the details of the authorized use and any terms, limitations or conditions that the Department deems appropriate

Land Use Information Form

Oregon Water Resources Department
725 Summer Street NE, Suite A
Salem, Oregon 97301-1266
503-986-0900
www.oregon.gov/OWRD

NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; **OR**
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or groundwater registration modification, and all of the following apply:
 - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b) The application involves a change in place of use only;
 - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
 - d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land use form and return it to the WRD. If no land use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0900.

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application.
- I cannot legally use water until the Water Resources Department issues a permit.
- The Department encourages all applicants to wait for a permit to be issued before beginning construction of any proposed diversion. Acceptance of this application does not guarantee a permit will be issued.
- If I begin construction prior to the issuance of a permit, I assume all risks associated with my actions.
- If I receive a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be cancelled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water right holders to receive water to which they are entitled.

I (we) affirm that the information contained in this application is true and accurate

SECTION 2: PROPERTY OWNERSHIP

Please indicate if you own all the lands associated with the project from which the water is to be diverted, conveyed, and used.

RECEIVED
AUG 12 2022

- YES, there are no encumbrances.
- YES, the land is encumbered by easements, rights of way, roads or other encumbrances.

NO, I have a recorded easement or written authorization permitting access.

NO, I do not currently have written authorization or easement permitting access.

- NO, written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigation and/or domestic use only (ORS 274.040).
- NO, because water is to be diverted, conveyed, and/or used only on federal lands.

Affected Landowners: List the names and mailing addresses of all owners of any lands that are not owned by the applicant and that are crossed by the proposed ditch, canal or other work, even if the applicant has obtained written authorization or an easement from the owner. *(Attach additional sheets if necessary).*

SEE EXHIBIT A FOR A LIST OF NAMES AND ADDRESSES OF ALL INCLUDED LANDOWNERS BY MAP AND TAX LOT

Legal Description: You must provide the legal description of: 1. The property from which the water is to be diverted, 2. Any property crossed by the proposed ditch, canal or other work, and 3. Any property on which the water is to be used as depicted on the map.

SEE ATTACHMENT B FOR LEGAL DESCRIPTION OF DIVERSION & CONVEYANCE WORKS AND LEGAL DESCRIPTION OF MID-COLUMBIA MITIGATION USE BOUNDARY

SECTION 3: SOURCE OF WATER

A. Proposed Source of Water

Provide the commonly used name of the water body from which water will be diverted, and the name of the stream or lake it flows into (if unnamed, say so), and the locations of the point of diversion (POD):

Source 1: Columbia River (PODs A, B, C)	Tributary to: Pacific Ocean
TRSQQ of POD: See Attachment B	
Source 2: Columbia River (POD D)	Tributary to: Pacific Ocean
TRSQQ of POD: See Attachment B	
Source 3: Columbia River (PODs E, F, G, H, and I)	Tributary to: Pacific Ocean
TRSQQ of POD: See Attachment B	
Source 4: Columbia River (POD J)	Tributary to: Pacific Ocean
TRSQQ of POD: See Attachment B	
Source 5: Place Columbia River (POD K)	Tributary to: Pacific Ocean
TRSQQ of POD: See Exhibit B	

Source 5: Columbia River (POD L)	Tributary to: Pacific Ocean
TRSQQ of POD: See Exhibit B	
Source 5: Columbia River (POD M)	Tributary to: Pacific Ocean
TRSQQ of POD: See Exhibit B	

If any source listed above is stored water that is authorized under a water right permit, certificate, or decree, attach a copy of the document or list the document number (for decrees, list the volume, page and/or decree name).

OWRD

B. Applications to Use Stored Water

Do you, or will you, own the reservoir(s) described in Section 3A above?

- Yes. No. (Enclose a copy of your written notification to the operator of the reservoir of your intent to file this application, which should have been mailed or delivered to the operator.)

If *all* sources listed in Section 3A are stored water, the Department will review your application using the expedited process provided in ORS 537.147, unless you check the box below. Please see the instruction booklet for more information.

- By checking this box, you are requesting that the Department process your application under the standard process outlined in ORS 537.150 and 537.153, rather than the expedited process provided by ORS 537.147. To file an application under the standard process, you must enclose the following:

- A copy of a signed non-expired contract or other agreement with the owner of the reservoir (if not you) to impound the volume of water you propose to use in this application.
- A copy of your written agreement with the party (if any) delivering the water from the reservoir to you.

SECTION 4: SENSITIVE, THREATENED OR ENDANGERED FISH SPECIES PUBLIC INTEREST INFORMATION

This information must be provided for your application to be accepted as complete. The Water Resources Department will determine whether the proposed use will impair or be detrimental to the public interest with regard to sensitive, threatened or endangered fish species.

To answer the following questions, use the map provided in [Attachment 3](#) or the link below to determine whether the proposed point of diversion (POD) is located in an area where the Upper Columbia, the Lower Columbia, and/or the Statewide public interest rules apply.

For more detailed information, click on the following link and enter the T,R,S,QQ or the Lat/Long of a POD and click on "Submit" to retrieve a report that will show which section, if any, of the rules apply:
https://apps.wrd.state.or.us/apps/misc/lkp_trsqg_features/

If you need help to determine in which area the proposed POD is located, please call the customer service desk at (503) 986-0900.

Upper Columbia - OAR 690-033-0115 thru -0130

Is the POD located in an area where the Upper Columbia Rules apply?

X Yes No

If **yes**, you are notified that the Water Resources Department will consult with numerous federal, state, local and tribal governmental entities so it may determine whether the proposed use is consistent with the "Columbia River Basin Fish and Wildlife Program" adopted by the Northwest Power Planning Council in 1994 for the protection and recovery of listed fish species. The application may be denied, heavily conditioned, or if appropriate, mitigation for impacts may be needed to obtain approval for the proposed use.

RECEIVED
AUG 1 2011
OWRD

If yes,

- I understand that the proposed use does not involve appropriation of direct streamflow during the time period April 15 to September 30, except as provided in OAR 690-033-0140.
- I understand that I will install, operate and maintain a fish screen and fish passage as listed in ORS 498.301 through 498.346, and 509.580 through 509.910, to the specifications and extent required by Oregon Department of Fish and Wildlife, prior to diversion of water under any permit issued pursuant to this application.
- I understand that the Oregon Department of Environmental Quality will review my application to determine if the proposed use complies with existing state and federal water quality standards.
- I understand that I will install and maintain water use measurement and recording devices as required by the Water Resources Department, and comply with recording and reporting permit condition requirements.

Lower Columbia - OAR 690-033-0220 thru -0230

Is the POD located in an area where the Lower Columbia rules apply?

Yes X No

If yes, you are notified that that the Water Resources Department will determine, by reviewing recovery plans, the Columbia River Basin Fish and Wildlife Program, and regional restoration programs applicable to threatened or endangered fish species, in coordination with state and federal agencies, as appropriate, whether the proposed use is detrimental to the protection or recovery of a threatened or endangered fish species and whether the use can be conditioned or mitigated to avoid the detriment.

If a permit is issued, it will likely contain conditions to ensure the water use complies with existing state and federal water quality standards; and water use measurement, recording and reporting required by the Water Resources Department. The application may be denied, or if appropriate, mitigation for impacts may be needed to obtain approval of the proposed use.

If yes, provide the following information (the information must be provided with the application to be considered complete).

Yes X No The proposed use is for more than one cubic foot per second (448.8 gpm) and is not subject to the requirements of OAR 690, Division 86 (Water Management and Conservation Plans).

If yes, provide a description of the measures to be taken to assure reasonably efficient water use:

RECEIVED

AUG 12 2022

OWRD

Statewide - OAR 690-033-0330 thru -0340

Is the POD located in an area where the Statewide rules apply?

Yes X No

If yes, the Water Resources Department will determine whether the proposed use will occur in an area where endangered, threatened or sensitive fish species are located. If so, the Water Resources Department, Department of Fish and Wildlife, Department of Environmental Quality, and the Department of Agriculture will recommend conditions required to achieve "no loss of essential habitat of threatened and endangered (T&E) fish species," or "no net loss of essential habitat of sensitive (S) fish species." If conditions cannot be identified that meet the standards of no loss of essential T & E fish habitat or no net loss of essential S fish habitat, the agencies will recommend denial of the application unless they conclude that the proposed use would not harm the species.

SECTION 5: WATER USE

Provide the amount of water you propose to use from each source, for each use, in cubic feet-per-second (cfs) or gallons-per-minute (gpm). If the proposed use is from storage, provide the amount in acre-feet (af):
 (1 cfs equals 448.8 gpm. 1 acre-foot equals 325,851 gallons or 43,560 cubic feet)

SOURCE	USE	PERIOD OF USE	AMOUNT
Columbia River	Irrigation	March 1 to November 1	153 X cfs <input type="checkbox"/> gpm <input type="checkbox"/> af
			<input type="checkbox"/> cfs <input type="checkbox"/> gpm <input type="checkbox"/> af
			<input type="checkbox"/> cfs <input type="checkbox"/> gpm <input type="checkbox"/> af
			<input type="checkbox"/> cfs <input type="checkbox"/> gpm <input type="checkbox"/> af

Please indicate the number of primary, supplemental and/or nursery acres to be irrigated.
 Primary: 702,277.8 Acres Supplemental: See cover letter and section 10 Acres Nursery Use NA Acres
 If supplemental acres are listed, provide the Permit or Certificate number of the underlying primary water right(s): see narrative, per recommended conditions existing permit and certificates are included annually as part of the annual report.
 Indicate the maximum total number of acre-feet you expect to use in an irrigation season: 74,220.30

- If the use is **municipal or quasi-municipal**, attach **Form M**
- If the use is **domestic**, indicate the number of households: **NA**
- If the use is **mining**, describe what is being mined and the method(s) of extraction: **NA**

SECTION 6: WATER MANAGEMENT

A. Diversion and Conveyance

What equipment will you use to pump water from your source?

X Pump (give horsepower and type): See Attachment B

Provide a description of the proposed means of diversion, construction, and operation of the diversion works and conveyance of water.

See Attachment A for a description of the diversion and conveyance works of all PODs associated with this application. See attachment C for description of POD D proposed means of diversion, construction and operation.

B. Application Method

What equipment and method of application will be used? (e.g., drip, wheel line, high-pressure sprinkler)
 Drip, wheel-line, low-pressure sprinkler, high-pressure sprinkler and some hand line use.

C. Conservation

For Department Use: App. Number: _____

Please describe why the amount of water requested is needed and measures you propose to: prevent waste; measure the amount of water diverted; prevent damage to public uses of affected surface waters.

See Exhibit D for data provided by IRZ Consulting regarding average annual water usage in the Umatilla basin for clarification of the purpose of the duty requested per acre.

SECTION 7: RESOURCE PROTECTION

In granting permission to use water from a stream or lake, the state encourages, and in some instances requires, careful control of activities that may affect the waterway or streamside area. See instruction guide for a list of possible permit requirements from other agencies. Please indicate any of the practices you plan to undertake to protect water resources:

- X Diversion will be screened per ODFW specifications in ORS 498.301 through 498.346 to prevent uptake of fish and other aquatic life.
Describe planned actions: All Columbia River Diversions have existing fish screens installed meeting NOAA standards in place as of 2022, or will have compliant fish screens installed prior to being included on the annual proposed use map for beneficial use of mitigation use water.

- X Excavation or clearing of banks will be kept to a minimum to protect riparian or streamside areas.
Note: If disturbed area is more than one acre, applicant should contact the Department of Environmental Quality to determine if a 1200C permit is required.
Describe planned actions and additional permits required for project implementation: No new construction is proposed at PODs A-C and E-M. All excavation at POD D will be completed in compliance with the conditions of the diversion owner's permit granted by the United States Army Corps of Engineers.

- X Operating equipment in a water body will be managed and timed to prevent damage to aquatic life.
Describe planned actions and additional permits required for project implementation: No improvements are anticipated to require work in waterways of the State. Should improvements require in-water work, all work will be performed after any necessary federal and state permits are granted and will remain in compliance with applicable state and federal permitting agencies and the applicable in-water work permits.

- X Water quality will be protected by preventing erosion and run-off of waste or chemical products.
Describe planned actions: No improvements are anticipated at PODs A-C and E-M. All construction and improvements to POD D will be in compliance with applicable state and federal permitting agencies and applicable permits.

- X List other federal and state permits or contracts to be obtained, if a water right permit is granted.
No additional permits are anticipated for PODs A-C and E-M. Additional federal permits are not anticipated for POD D. State permits required for POD D may include removal fill permitting (DSL), and ODOT crossing agreements (HWY 730).

SECTION 8: PROJECT SCHEDULE

NOTE: CONSTRUCTION SCHEDULE PROVIDED BELOW APPLICABLE TO POD D ONLY. NO NEW CONSTRUCTION IS PROPOSED OR NECESSARY FOR POD'S A-C AND E-M

- a) Date construction will begin: November, 2022
- b) Date construction will be completed: June, 2024
- c) Date beneficial water use will begin: June, 2024

SECTION 10: REMARKS

Use this space to clarify any information you have provided in the application. *(Attach additional sheets if necessary).*

Place of Use Acreage

As part of this application, the Mid-Columbia Water Commission is identifying a new exterior boundary (referred to as the "Mid-Columbia Mitigation Region Boundary"), within which the mitigation use water supplies may be used on an annual basis. The actual place of use and rate of use on an annual basis will be reported to OWRD by an annual reporting deadline of February 14 for the upcoming irrigation season. Lands not included in the annual place of use map submitted on or before February 14 will not be included within the authorized place of use for mitigation use water rights for that year even though they are within the broader Mid-Columbia

Mitigation Region Boundary and even though these lands may have received mitigation use water in previous years. The final place of use, as well as total primary and total supplemental acreages, will be detailed prior to the final proof survey. Lands that do not utilize water under this permit shall not be included in the final proof survey nor included on the interactive water rights map of the Oregon Water Resources Department.

Proposed Period of Use as related to Division 33 Mitigation

The Mid-Columbia Water Commission proposes a period of use from March 1 to November 1 of each year. Water from the Columbia River will be subject to mitigation from April 15 to September 30, as required by OAR 690-033. From March 1 to April 14 and from October 1 to November 1 of each year, the Mid-Columbia Water Commission may pump from the Columbia River without securing or providing proof of mitigation. Otherwise, the Mid-Columbia Water Commission has secured mitigation at the appropriate level required by regulating agencies to pump Columbia River water from April 15 to September 30. Sources of mitigation are documented and reported to OWRD prior to the start of the mitigation season, and the pumping rate during the mitigation season will be directly proportionate to the mitigation secured for that mitigation season. The period for mitigation requirements is currently 169 days of the proposed period of use. The Mid-Columbia Water Commission has secured mitigation that currently meets or exceeds the 169-day period of use.

Include the following additional items:

- Land Use Information Form with approval and signature of local planning department (*must be an original*) or signed receipt.
- Provide the legal description of: (1) the property from which the water is to be diverted, (2) any property crossed by the proposed ditch, canal or other work, and (3) any property on which the water is to be used as depicted on the map.
- Fees - Amount enclosed: **\$68,740**
See the Department's Fee Schedule at www.oregon.gov/owrd or call (503) 986-0900.
- Map that includes the following items:
 - Permanent quality and drawn in ink
 - Even map scale not less than 4" = 1 mile (example: 1" = 400 ft, 1" = 1320 ft, etc.)
 - North Directional Symbol
 - Township, Range, Section, Quarter/Quarter, Tax Lots
 - Reference corner on map
 - Location of each diversion, by reference to a recognized public land survey corner (distances north/south and east/west)
 - Indicate the area of use by Quarter/Quarter and tax lot identified clearly.
 - Number of acres per Quarter/Quarter and hatching to indicate area of use if for primary irrigation, supplemental irrigation, or nursery
 - Location of main canals, ditches, pipelines or flumes (if well is outside of the area of use)

Water-Use Permit Application Processing

1. Completeness Determination

The Department evaluates whether the application and accompanying map contain all of the information required under OAR 690-310-0040 and OAR 690-310-0050. The Department also determines whether the proposed use is prohibited by statute. If the Department determines that the application is incomplete, all fees have not been paid, or the use is prohibited by statute, the application and all fees submitted are returned to the applicant.

2. Initial Review

The Department reviews the application to determine whether water is available during the period requested, whether the proposed use is restricted or limited by rule or statute, and whether other issues may preclude approval of or restrict the proposed use. An Initial Review (IR) containing preliminary determinations is mailed to the applicant. The applicant has 14 days from the mailing date to withdraw the application from further processing and receive a refund of all fees paid minus \$310. The applicant may put the application on hold for up to 180 days and may request additional time if necessary.

RECEIVED
AUG 1 2 2022

3. Public Notice

Within 7 days of the mailing of the initial review, the Department gives public notice of the application in the weekly notice published by the Department at www.oregon.gov/owrd. The public comment period is 30 days from publication in the weekly notice.

OWRD

4. Proposed Final Order Issued

The Department reviews any comments received, including comments from other state agencies related to the protection of sensitive, threatened or endangered fish species. Within 60 days of completion of the IR, the Department issues a Proposed Final Order (PFO) explaining the proposed decision to deny or approve the application. A PFO proposing approval of an application will include a draft permit, and may request additional information or outstanding fees required prior to permit issuance.

5. Public Notice

Within 7 days of issuing the PFO, the Department gives public notice in the weekly notice. Notice includes information about the application and the PFO. Protest must be received by the Department within 45 days after publication of the PFO in the weekly notice. Anyone may file a protest. The protest filing fee is \$480.00 for the applicant and \$950.00 for non-applicants. Protests are filed on approximately 10 percent of Proposed Final Orders. If a protest is filed the Department will attempt to settle the protest but will schedule a contested case hearing if necessary.

6. Final Order Issued

If no protests are filed, the Department can issue a Final Order within 60 days of the close of the period for receiving protest. If the application is approved, a permit is issued. The permit specifies the details of the authorized use and any terms, limitations or conditions that the Department deems appropriate

Attachment 2: Land Use Information Form

Oregon Water Resources Department
725 Summer Street NE, Suite A
Salem, Oregon 97301-1266
503-986-0900
www.oregon.gov/OWRD

NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; OR
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or groundwater registration modification, and all of the following apply:
 - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b) The application involves a change in place of use only;
 - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
 - d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land use form and return it to the WRD. If no land use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0900.

For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form. This deals only with the local land use plan. Do not include approval for activities such as building or grading permits.

Please check the appropriate box below and provide the requested information

- Land uses to be served by the proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): _____.
- Land uses to be served by the proposed water uses (including proposed construction) involve discretionary land use approvals as listed in the table below. (Please attach documentation of applicable land use approvals which have already been obtained. Record of Action/land use decision and accompanying findings are sufficient.) **If approvals have been obtained but all appeal periods have not ended, check "Being pursued."**

Mid-Columbia Water Commission
C/O Jake Madison
29299 Madison Rd
Echo, OR 97826

Dear Applicant:

The Oregon Water Resources Department has received your surface water application for a water use permit. Your application has been assigned file number **S-89259**. Please refer to this number when contacting the Department. Should you have any questions about your application, please contact the following Water Rights Specialist assigned to your application:

Kim French, Water Rights Specialist	Phone: 503-979-3168
	Email: kim.r.french@oregon.gov

A description of the steps that are used for processing a surface water application are shown on the reverse side of this letter. Surface water applications that propose to use stored water exclusively are reviewed using an expedited process and contain slightly different processing steps.

The Department's goal is to process applications within statutory deadlines. The first step in the process is issuance of an Initial Review, which summarizes the Department's preliminary determinations. Surface water applications typically receive an Initial Review in approximately two to three months. Copies of the Initial Review, Proposed Final Order, and Final Order will be mailed to you. Applications proposing to use stored water only under the expedited process will receive a Final Order.

Please note that your application is subject to review and comment from other state agencies and interested parties.

Sincerely,

Corie Lovrien
Customer Service Representative
Oregon Water Resources Department

cc: File S-89259

Water-Use Permit Application Processing Steps

Oregon Water Resources Department

Standard Process for a Surface Water Application:

1. Initial Review

The Department reviews the application to determine whether water is available during the period requested, whether the proposed use is restricted or limited by rule or statute, and whether other issues may preclude approval of or restrict the proposed use. An Initial Review (IR) containing preliminary determinations is mailed to the applicant. The applicant has 14 days from the mailing date to withdraw the application from further processing and receive a refund of all fees paid minus \$310.00. The applicant may put the application on hold for up to 180 days and may request additional time if necessary.

2. Public Notice

Within 7 days of the mailing of the Initial Review, the Department gives public notice of the application in the weekly notice published by the Department at www.oregon.gov/owrd. The public comment period is 30 days from publication in the weekly notice.

3. Proposed Final Order Issued

The Department reviews any comments received, including comments from other state agencies related to the protection of sensitive, threatened, or endangered fish species. Within 60 days of completion of the Initial Review, the Department issues a Proposed Final Order (PFO) explaining the proposed decision to deny or approve the application. A PFO proposing approval of an application will include a draft permit and may request additional information or outstanding fees required prior to permit issuance.

4. Public Notice & Protest Opportunity

Within 7 days of issuing the PFO, the Department gives public notice in the weekly notice. Notice includes information about the application and the PFO. A protest must be received by the Department within 45 days after publication of the PFO in the weekly notice. Anyone may file a protest. The protest filing fee is \$480.00 for the applicant and \$950.00 for non-applicants. Protests are filed on approximately 10 percent of Proposed Final Orders. If a protest is filed the Department will attempt to settle the protest but will schedule a contested case hearing, if necessary.

5. Final Order Issued

If no protests are filed, the Department can issue a Final Order within 60 days of the close of the period for receiving protest. If the application is approved, a permit is issued. The permit will specify the details of the authorized use and any terms, limitations, or conditions that the Department deems appropriate.

Expedited Process for a Surface Water Application:

Note: The expedited process only applies to an application using stored water only under ORS 537.147.

The expedited process allows the Department to process an application within several weeks in cases where no public interest concerns are identified. It does not provide an opportunity to protest the Department's recommendation unless public interest issues are identified, in which case the Department will then evaluate the application using the standard process and a protest opportunity will be available. For expedited applications, the Department issues a Final Order only. Once accepted by the Department, these applications are published in the weekly public notice every Tuesday and a 30-day public comment period begins. Following the public comment period, the Department can issue the Final Order.

Water-Use Permit Application Processing

1. Completeness Determination

The Department evaluates whether the application and accompanying map contain all of the information required under OAR 690-310-0040 and OAR 690-310-0050. The Department also determines whether the proposed use is prohibited by statute. If the Department determines that the application is incomplete, all fees have not been paid, or the use is prohibited by statute, the application and all fees submitted are returned to the applicant.

2. Initial Review

The Department reviews the application to determine whether water is available during the period requested, whether the proposed use is restricted or limited by rule or statute, and whether other issues may preclude approval of or restrict the proposed use. An Initial Review (IR) containing preliminary determinations is mailed to the applicant. The applicant has 14 days from the mailing date to withdraw the application from further processing and receive a refund of all fees paid minus \$310. The applicant may put the application on hold for up to 180 days and may request additional time if necessary.

3. Public Notice

Within 7 days of the mailing of the initial review, the Department gives public notice of the application in the weekly notice published by the Department at www.oregon.gov/owrd. The public comment period is 30 days from publication in the weekly notice.

4. Proposed Final Order Issued

The Department reviews any comments received, including comments from other state agencies related to the protection of sensitive, threatened or endangered fish species. Within 60 days of completion of the IR, the Department issues a Proposed Final Order (PFO) explaining the proposed decision to deny or approve the application. A PFO proposing approval of an application will include a draft permit, and may request additional information or outstanding fees required prior to permit issuance.

RECEIVED

AUG 12 2022

OWRD

5. Public Notice

Within 7 days of issuing the PFO, the Department gives public notice in the weekly notice. Notice includes information about the application and the PFO. Protest must be received by the Department within 45 days after publication of the PFO in the weekly notice. Anyone may file a protest. The protest filing fee is \$480.00 for the applicant and \$950.00 for non-applicants. Protests are filed on approximately 10 percent of Proposed Final Orders. If a protest is filed the Department will attempt to settle the protest but will schedule a contested case hearing if necessary.

6. Final Order Issued

If no protests are filed, the Department can issue a Final Order within 60 days of the close of the period for receiving protest. If the application is approved, a permit is issued. The permit specifies the details of the authorized use and any terms, limitations or conditions that the Department deems appropriate
