

SITE REPORT
APPLICATION FOR PRE-1909 VESTED WATER RIGHT CLAIM

GENERAL INFORMATION

Report for: Dan Napier
32214 Highway 31
Summer Lake, OR 97640

WATER RESOURCES DEPT.
SALEM, OREGON

LOCATION OF AREA INVOLVED

Section 2, Township 32 South, Range 16 East

DESCRIPTION

This report covers the survey and site inspection of several irrigated areas for Dan Napier in Summer Lake, Oregon. Information was compiled from a field survey and visiting with the owner on what had been done in the past in these irrigated areas. Four areas are shown on the outlet map with four diversion points.

The area under diversion point #1 is fed by a small spring running about 25 gpm. A ditch has been developed along the edge of the irrigated area, and the area had been flood irrigated using the spring source and the ditch. A small pond was present which caught spring water.

The area irrigated under diversion point #2 was also a small spring with an 8" cmp outlet pipe in the spring which had been packed with drain rock. A small ditch ran out from the outlet pipe of which flood irrigation was done over the area.

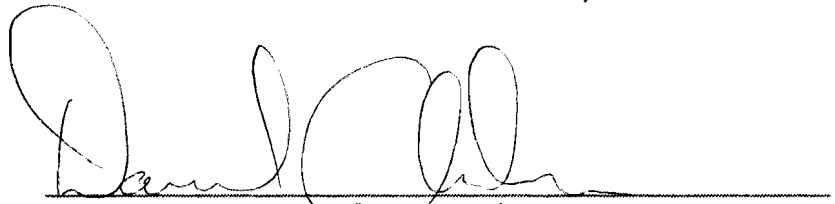

The area irrigated under diversion point #3 had as its source another spring which was flowing approximately 35 gpm at the time of our survey. This spring ran naturally over the area and irrigated the areas as shown. A small ditch was cut from the spring to carry water around the area so that flood irrigation could be done.

The last area was a very small area along the highway. A small spring was running at approximately 5 gpm which is noted as diversion point #4. Water had covered the area as shown. The owner indicated that berms had been built here in the past. These berms were built across the irrigated area to trap the water and keep the water contained to keep this area green. This area had evidently been developed some time ago. It was difficult to tell exactly what had been done to divert the water on this area.

The fourth area is located in the Northwest corner of Section 2. It contains a small pond and approximately 2.2 acres were covered with water. This is a marshy area with no real apparent point of diversion. It is undoubtedly spring fed and the area was green at the time of our survey. The area has had water on it for some time.

The diversion points are located as shown on the map. The survey tie for this survey was the Northwest corner of Section 2 and the meander corner between Section 35 and Section 2. The original meander line or high water line is shown on the map as per existing records. The areas shown on the plat are what areas were green and water was over these areas at the time of our survey.

The ditch out of diversion point #1 was approximately an average of 1' deep, 18" to 2' wide. The ditch out of outlet #2 was a very small ditch that had been dug. It averaged 6" deep. Out of outlet #3 the ditch was approximately 1' deep and 2' wide on the average. The water measurement for the springs was measured by using the average ditch size and comparing that with the estimate of the water coming out of the springs at the time of our survey. This being the third year of the drought and a very low water year, the spring, probably run additional water on normal water years.

A handwritten signature in black ink, appearing to read 'Darryl J. Anderson', is written over a horizontal line.

INTERDEPARTMENT MEMO

TO: Watermaster District # 12
FROM: Adjudication Section
RE: Surface Water Registration

Enclosed is a copy of a Registration Statement and accompanying map that has been filed in your district. It has been numbered SWR #86

We are gathering information about this claim to a pre-1909 water use and would like you to assist us by filing out the checklist below and including any comments that you think might be of significance.

(Yes or No)

1. Do you know anything about this water use? Yes
2. Have there been any distribution problems relating to this claim? NO
3. Do you have reason to believe that the claimed priority date is not accurate? NO
4. Does the quantity of water claimed look unreasonable for the uses named? NO
5. Does the place of use look to be accurately depicted by the CWRE map enclosed? Yes
6. Do you know if there has been a period of more than a five years of non-use? NO
7. Should someone in our section contact you concerning this claim? NO

If you answered yes to any of the above questions, please explain below on an additional sheet of paper.

Attach any memo's or correspondence that deal with this water use and return to the Adjudication Section at the address below.

Thank you for your assistance.

Sincerely,

Dan

RE: Surface Water Registration

Dear Dan Napier,

This will acknowledge that your Surface Water Registration Statement in the name of Dan Napier has been received by our office. The fees in the amount of \$37.00 have been received and our receipt # 91302 is enclosed. Your registration statement has been numbered SWR-86.

Our office will review your form and map in the near future. If necessary we will schedule a meeting with you that will include a site inspection. If there are problems with your form we are usually able to take care of them during our visit. We will be able to answer any questions you might have about the adjudication process at that time.

Please feel free to contact this office if you have any questions.

Sincerely,

Dwight French
