Apps. No. 2082 & 3017

Aug. 12, 1913.

Register & Receiver, U. S. Land Office,
The Dalles, Oreg.

Gentlemen:-

In accordance with the request of Mr. Charles R. Neal of Fossil, I am inclosing a certified copy of his applications Nos. 2082 & 3017, Permits Nos. 1080 & 1601, together with a certificate to the effect that failure to issue final water right certificate is not due to laches on the part of entryman. As I understand the matter, Mr. Neal has recently made proof on a desert land entry, reference to which has not been furnished me, and desires this information furnished with you to establish his right to the use of the necessary water.

Very respectfully,

John H. Lewis,

State Engineer.

I, John H. Lewis, State Engineer of the State of Oregon, and ex-officio President of the State Water Board of the State of Oregon, do hereby certify that no water right certificates, as provided by Section 6633 of Lord's Oregon Laws, have been issued by the State Water Board to Chas. R. Neal, of Fossil, Oregon, permittee under Permits Nos. ¹⁰⁸⁰ 2082 and ¹⁶⁰¹ 2607, issued by me; and I further certify that the failure to issue such certificates is not due to any laches on the part of said Chas. R. Neal, or on account of his non-compliance with the law.

IN WITNESS WHEREOF, I have hereunto set my hand
this 12th day of August, 1913.

State Engineer of the State of Oregon
and ex-officio President of the State
Water Board of the State of Oregon.

"In the State of Oregon, in cases where claimants in desert-land entries, through no fault of theirs, have not obtained a water right certificate, it will be necessary to show, in addition to compliance with the usual requirements of this office in desert-land proofs, - (1) the possession of a permit to appropriate water, issued by the State Engineer, (2) full compliance, with all the requirements of the state law relating to the acquisition of title to water to the time of submission of final proof, and (3) a certificate of the State Engineer to the effect that the final certificate of appropriation has not been issued by the Board of Control, and that failure to issue such certificate is not due to claimants laches. A certified copy of the permit granted by the State Engineer; the affidavit of the claimant showing complete compliance with state law, and the absence of fault on his part, in cases where the Board of Control has not issued the water right certificate; and the certificate of the State Engineer last above referred to, will be accepted by this office as the 'best evidence obtainable at the time proof is made.' "

The above is a copy of a portion of a letter to the State Engineer of Oregon from the Assistant Commissioner of the General Land Office, dated August 22, 1911, with respect to water rights in the State of Oregon.

STATE OF OREGON

OFFICE OF THE
STATE ENGINEER

JOHN H. LEWIS, STATE ENGINEER
PRESIDENT OF THE BOARD OF CONTROL
SECRETARY OF THE DESERT LAND BOARD
PERCY A. CUPPER
ASSISTANT STATE ENGINEER

SALEM, OREGON March 27, 1912.

Mr. Scott Sasser,

Fossil, Ore.

Dear Sir:

I enclose herewith Application No 2082 , by Charles R. Neal , being Permit No. 1080 , which has been approved and recorded in this office. ~~I am also enclosing~~ map . It is not necessary to record this in your county, or to publish notice of its issuance. This permit is not a water right, but is, in a way, a contract between you and the State. It should be held by the owner of the right, and not disposed of in making final proof on desert land, or for any other purpose.

You should make annual proof under this permit upon the forms attached hereto. Within the time as limited by the State Engineer for the beginning of construction, for completion, and for the application of water to beneficial use, you should fill out the proper blank, detach, and mail to the Secretary, Board of Control, Salem, Oregon. If more than one year is allowed for completion of construction you should give on the proper blank a detailed description of the work performed each year so that the Board may judge as to whether or not the law is being complied with as to the prosecution of work with reasonable diligence.

Final proof will be taken by the Board, through the proper division superintendent, as soon as possible after the expiration of time for the complete application of water to beneficial use, or any extension thereof. The Board of Control will thereafter issue a "Certificate of Water Right" to be recorded with the county clerk of the proper county, which to your water title will correspond to a patent from the United States as foundation for your land title.

Should it be impossible for you to complete the work or to put the water to beneficial use before the expiration of the time fixed in the permit, you should, if you have good reasons for so doing, apply to the State Engineer for an extension of time. All such requests must be received before the date of expiration, otherwise you will have to re-file and lose something in priority by your neglect. No extension of time can be granted for the beginning of work, nor in any case where request is made after the expiration of the time limit as fixed in the permit.

Any assignment of this permit should be made in writing and recorded in the State Engineer's office at Salem. The assignee should make all proofs required after date of assignment.

Water belongs to the land it irrigates and not to the ditch, or ditch owner. The transfer of land will carry with it the water appurtenant thereto.

Failure to fill out and mail the annual proofs required by the Board may jeopardise your rights under this permit and result in its cancellation after proper notice, as the law provides that proof must be made "to the satisfaction of the Board of Control".

Respectfully yours,

John H. Lewis,

State Engineer.
