T 11269

BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON

In the Matter of Transfer Application	)	FINAL ORDER APPROVING A
T-11269, Sherman County	)	CHANGE IN PLACE OF USE

Authority

ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Findings of Fact

Background

1. On July 7, 2011, WILLIAM, DOUGLAS, AND THOMSON MARTIN filed an application to change the place of use under Certificate 64105. The Department assigned the application number T-11269.

2. On July 27, 2011, the applicant corrected a scrivener's error in the place of use proposed to be transferred.

3. The portion of the right to be transferred is as follows:

Certificate: 64105 in the name of WILLIAM F. AND BARBARA B. MARTIN
(perfected under Permit G-7301)

Use: IRRIGATION of 16.2 ACRES

Priority Date: MARCH 7, 1977

Rate: 0.086 CUBIC FOOT PER SECOND

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

4. Transfer Application T-11269 proposes to change the place of use of the right to:

IRRIGATION					
Twp	Rng	Mer	Sec	Q-Q	Acres
2 N	16 E	WM	12	NE NE	5.2
2 N	16 E	WM	12	NW NE	11.0

5. Notice of the application for transfer was published on July 12, 2011, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
6. On August 12, 2011, the Department mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-11269 to the applicants. The draft Preliminary Determination cover letter set forth a deadline of September 8, 2011, for the applicants to respond. The applicants requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.
7. On November 3, 2011, the Department issued a Preliminary Determination proposing to approve Transfer Application T-11269 and mailed a copy to the applicants. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on November 8, 2011, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

Transfer Review Criteria (OAR 690-380-4010)

8. Water has been used within the last five years according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.

9. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Transfer Application T-11269.
10. The proposed change would not result in enlargement of the right.
11. The proposed change would not result in injury to other water rights.

Conclusions of Law

The change in place of use proposed in Transfer Application T-11269 is consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The change in place of use proposed in Transfer Application T-11269 is approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 64105 and any related decree.
3. Water right certificate 64105 is cancelled. A new certificate will be issued describing that portion of the right not affected by this transfer.
4. The Director may require the water user to install a totalizing flow meter or other suitable measuring devices at each point of appropriation. If the Director notifies the water user to install totalizing flow meters or other measuring devices, the water user shall install such devices specified by the Director within the period allowed in the notice. Once installed, the water user shall maintain the meters or measuring devices in good working order and shall allow the Watermaster access to the meters or measuring devices.
5. The former place of use of the transferred right shall no longer receive water under the right.
6. The approved change shall be completed and full beneficial use of the water shall be made on or before **October 1, 2013**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.
7. When satisfactory proof of the completed change is received, a new certificate confirming the right transferred will be issued.

Dated at Salem, Oregon this 9 day of December 2011.

PERMIT

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 1.23 ^{0.88} cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from a well sub Columbia Basin

The use to which this water is to be applied is irrigation of 166.0 acres

If for irrigation, this appropriation shall be limited to 1/80th of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3 acre feet per acre for each acre irrigated during the irrigation season of each year;

$$Q_{ACRES} = \frac{166.0}{80} = 2.07$$

$$Q_{PUMP} = \frac{40(7.04)}{300(1.42)(1.70)} = .88$$

$$Q_{WELL} = 400 = .89$$

$$80 \times 1.8 = 394$$

ALLOW 0.88 cfs because of system

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be cased as necessary in accordance with good practice and if the flow is artesian the works shall include proper capping and control valve to prevent the waste of ground water.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is March 7, 1977

Actual construction work shall begin on or before July 21, 1978 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1978

Complete application of the water to the proposed use shall be made on or before October 1, 1979

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same, **SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING MINIMUM FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD** and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 1.11 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from a well.

trib. Col. Basin

The use to which this water is to be applied is irrigation. of 201.5 acres

If for irrigation, this appropriation shall be limited to 1/80th of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3 acre feet per acre for each acre irrigated during the irrigation season of each year;

$$Q_{ACRES} \frac{201.5}{80} = 2.51$$

$$Q_{PUMP} \frac{50(2.04)}{1.1 + 1.1(50)(2.31)} = 1.15$$

$$Q_{HEAD} \frac{600}{460} = 1.33$$

$$Q_{ALLOW} 1.11 \text{ cfs}$$

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is August 23, 1977

Actual construction work shall begin on or before January 20, 1979 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1979

Complete application of the water to the proposed use shall be made on or before October 1, 1980

Re: William F. and Barbara B. Martin
Application No. G-7891

Attention: Vestal R. Garner
Water Rights Engineer

Dear Sir:

In accordance with your letter of April 18, 1977,
I enclose herewith the above-referenced application of
William F. Martin and Barbara B. Martin corrected as requested
in the letter.

As you are probably aware, the applicants did not
survey the acres to be irrigated. Rather, the location of
the acres to be irrigated is their best estimate based on
old and existing fence lines and other monuments.

Also enclosed herewith you will find the map support-
ing the Martins' application showing the quarter section lines
in Sections 11 and 12 and listing the acreage in each quarter-
quarter section listed.

If there are any additional questions concerning the
application or accompanying map, please contact the undersigned.

Very truly yours,

Douglas J. White, Jr.

Dear Mr. White:

We have received a map, legal land description, fees of \$70.80 and application submitted in the name of William and Barbara Martin for a permit to use 550 gallons of water per minute from a well for irrigation of 166 acres. For reference, their application is No. G-7891.

The map supporting the application must show the quarter-quarter section lines in Sections 1 and 12 and list the acreage in each quarter-quarter section.

Lot 1 (NW $\frac{1}{4}$ NW $\frac{1}{4}$), Section 7 is a large quarter-quarter section and contains 53.98 acres. The acreage for this quarter-quarter section must be changed under Item No. 12 of the application. Please make further adjustments in the listing of acreage in Item No. 12 and the map to total 166 acres. Item No. 12 must agree with the map.

Please list the quarter-quarter section where the well is located under Item No. 4.

I am returning the map and application for the required corrections. The application is endorsed so that in order to retain its priority date, it must be received in this office on or before June 20, 1977.

Sincerely,

Vestal R. Garner
Water Rights Engineer
