FROM: Groundwater/Hydrology Section

Koehler

Reviewer's Name

SUBJECT: Application G- 13481

1. PER THE _____ Basin rules, one or more of the proposed POA's is/is not within _____ feet/mile of a surface water source (_____) and taps a groundwater source hydraulically connected to the surface water.
2. BASED UPON OAR 690-09 currently in effect, I have determined that the proposed groundwater use
- a. _____ will, or } have the potential for substantial interference with the nearest surface water
- b. ☒ will not } source, namely Columbia River; or
- c. _____ will, if properly conditioned, adequately protect the surface water from interference:
- i. _____ The permit should contain condition #(s) _____;
- ii. _____ The permit should contain special condition(s) as indicated in "Remarks" below;
- iii. _____ The permit should be conditioned as indicated in item 4 below; or
- d. _____ will, with well reconstruction, adequately protect the surface water from substantial interference.
3. BASED UPON available data, I have determined that groundwater for the proposed use
- a. ☒ will, or } likely be available in the amounts requested without injury to prior rights and/or
- b. _____ will not } within the capacity of the resource; or
- c. _____ can, if properly conditioned, avoid injury to existing rights or to the groundwater resource;
- i. _____ The permit should contain condition #(s) _____;
- ii. _____ The permit should contain special condition(s) as indicated in "Remarks" below;
- iii. _____ The permit should be conditioned as indicated in item 4 below.
4. a. _____ THE PERMIT should allow groundwater production from no deeper than _____ ft. below land surface;
- b. _____ The permit should allow groundwater production from no shallower than _____ ft. below land surface;
- c. _____ The permit should allow groundwater production only from the _____ groundwater reservoir between approximately _____ ft. and _____ ft. below land surface;
- d. _____ Well reconstruction is necessary to accomplish one or more of the above conditions.
- e. _____ One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.

REMARKS: Well should have been sealed 5 ft into basalt. Probably not a big problem with this well however, based on hydraulics noted locally, & distance from surface water.

2 N 16 E 1

WELL CONSTRUCTION (If more than one well doesn't meet standards, attach an additional sheet.)

5. THE WELL which is the point of appropriation for this application does not meet current well construction standards based upon:
- a. ☐ review of the well log;
 - b. ☐ field inspection by _____;
 - c. ☐ report of CWRE _____;
 - d. ☐ other: (specify) _____
6. THE WELL construction deficiency:
- a. ☐ constitutes a health threat under Division 200 rules;
 - b. ☐ commingles water from more than one groundwater reservoir;
 - c. ☐ permits the loss of artesian head;
 - d. ☐ permits the de-watering of one or more groundwater reservoirs;
 - e. ☐ other: (specify) _____
7. THE WELL construction deficiency is described as follows: _____
8. THE WELL
- | | |
|---|--|
| a. ☐ was, or | } constructed according to the standards in effect at the time of original construction or most recent modification. |
| b. ☐ was not | |
| c. ☐ I don't know if it met standards at the time of construction. | |

RECOMMENDATION:

- A. ☐ I recommend including the following condition in the permit:
"No water may be appropriated under terms of this permit until the well(s) has been repaired to conform to current well construction standards and proof of such repair is filed with the Enforcement Section of the Water Resources Department."
- B. ☐ I recommend withholding issuance of the permit until evidence of well reconstruction is filed with the Enforcement Section of the Water Resources Department.
- C. ☐ REFER this review to Enforcement Section for concurrence.

THIS SECTION TO BE COMPLETED BY ENFORCEMENT PERSONNEL

I concur in G/H's recommendation A or B above relating to conditioning or withholding the permit.
_____, 1992.

FINAL PROOF SITE & CLAIM OF BENEFICIAL USE REPORT

for

THOMSON S. MARTIN

REFERENCE: FILE G-13481/PERMIT G-12404

December 21, 2002

PAGE 1 OF 2

INFORMATION: Mr. Thomson S. Martin made an application to appropriate ground waters from the Deschutes River Basin for supplemental irrigation of 120 acres within the Deschutes Basin in November, 1995. Mr. Martin is currently farming the parcel. His current address and phone number are as follows:

Thomson S. Martin

P.O. box 128

Rufus, Oregon 97050

Phone: 1.541.739.2204

The current ownership of the property is vested in the following persons:

Thomson S. Martin, Ann Hill, Judy Lidstrom and Carol Jonasson.

Mr. Martin contacted myself to complete the final proof requirements. I went to the site on December 6, 2002, met with him and measured the area and elevation of the site being irrigated, observed the type of pump, number of sprinkler nozzles, motor horsepower and the general character of the site.

1. I observed: 63, drops with Nelson rotator applications. The sprinkler head nozzles were sized from 1/8" at the first drop to 3/8" at the last drop. The total length of the Wade center pivot is 1,251 lineal feet.
2. A total of 113.1 acres of grain and row crops from both the supplementary and primary system are being irrigated at the present time. The high-pressure end gun sprinkler of the pivot main line had been removed.

The following was noted about the supplemental well site.

3. 1, 4" Hitachi submersible turbine pump with a 30 h.p. Franklin, 480V, 3 phase motor connected to a 3" diameter column.

WATER RESOURCES DEPT.
SALEM, OREGON

FINAL PROOF SITE & CLAIM OF BENEFICIAL USE REPORT CONTINUED

for

THOMSON S. MARTIN

REFERENCE: FILE G-13481/PERMIT G-12404

PAGE 2 OF 2

4. The pump intake pipe is 4" in diameter. The discharge pipe from the pump to the distribution system is 5" in diameter PVC pipe to the primary well (Certificate Number 60446). The casing is steel and 10" in diameter. The capacity of the supplementary pumping system is 200 gallons per minute.
5. Austin Well Drilling located in The Dalles, Oregon, drilled the well.
6. The well was drilled January 24, 1990. The casing is steel and 8" in diameter and extends to a depth of 60 feet. The well was drilled to a depth of 220 feet.
7. The depth of the static water level is 151 feet.
8. The elevation of the land surface datum (NAVD 1988) at the supplementary well head is 1004 M.S.L., the primary well head is 963 M.S.L., the top of the pivot outlet is 953 M.S.L. and the elevation of the highest area at the end of the pivot arm is 996 M.S.L.

I made no calculations regarding the capacity of the total system. The supplementary well feeds to add capacity to the 8" PVC line that goes to the pivot head. The irrigation system is being operated under Certificate of Water Right Number 60446.

The final proof survey and inspection of the use as found to be completed under the terms and conditions of File No. G-13481/Permit No. G-12404, December 6, 2002. The facts that are contained within this report and accompanying final proof map are correct to the best of my knowledge.

I, Thomson S. Martin, agree to the findings of the CWRE and do submit this site report and map as my Claim of Beneficial Use of the water as provided under the terms and conditions of my permit No. G-12404.

Dear Permit Holder:

This letter is in regard to your water use permit as referenced above. Your permit required you to complete the development of your water use by October 1, 1999.

In order for the Department to consider issuance of a certificate of water right, you are required by law to hire a certified water right examiner to prepare and submit a claim of beneficial use, to include a final proof survey map of the development. The map and claim of beneficial use was to have been submitted to our Department within one year of October 1, 1999. A list of certified water right examiners is enclosed for your use.

If you are not finished with the development of your permit, you need to file for an extension of time to complete your development. An extension form is also enclosed with this letter.

In the event that you are no longer using water as allowed by this permit, you should cancel it so that we may clear our records. A cancellation form is enclosed, if you are interested in this option.

If you have not submitted either a Claim of Beneficial Use or a request for an extension of time of your permit, within 60 days of the date of this letter (December 28, 2002) the Department may cancel your permit without further notice.

Please give me a call if you have questions. My phone number is 503-378-8455 extension 274.

Sincerely,

Jerry Sauter
Water Rights Program Analyst

Final Order

Application History

On August 6, 1993, THOMSON S. MARTIN submitted an application to the Department for a water use permit. The Department issued a Proposed Final Order on February 20, 1996. The protest period closed April 5, 1996, and no protest was filed.

The proposed use would not impair or be detrimental to the public interest.

Order

The application therefore is approved as proposed by the Proposed Final Order, and Permit Number G-12404 is issued as limited by the conditions proposed by the Proposed Final Order.

DATED April 18, 1996

for 
Martha O. Page
Director

Appeal Rights

Under the provisions of ORS 183.484, the applicant may appeal this order by filing a petition for review in the Circuit Court for Marion County or the circuit court for the county in which the applicant resides or has a principal business office. The petition for review must be filed within 60 days after the date this order is served.

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

THOMSON S. MARTIN
PO BOX 128
RUFUS, OREGON 97050

(541) 739-2204

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: G-13481

SOURCE OF WATER: A WELL IN THE DESCHUTES RIVER BASIN

PURPOSE OR USE: SUPPLEMENTAL IRRIGATION OF 120.0 ACRES

RATE OF USE: 0.45 CUBIC FOOT PER SECOND

PERIOD OF ALLOWED USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: AUGUST 6, 1993

POINT OF DIVERSION LOCATION: SW 1/4 SE 1/4, SECTION 1, T2N, R16E, W.M.;
233 FEET NORTH AND 3765 FEET EAST FROM THE NW CORNER OF SECTION 12

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

NW 1/4 NE 1/4	22.0 ACRES
SW 1/4 NE 1/4	26.5 ACRES
NE 1/4 NW 1/4	32.0 ACRES
NW 1/4 NW 1/4	2.5 ACRES
SW 1/4 NW 1/4	3.0 ACRES
SE 1/4 NW 1/4	34.0 ACRES

SECTION 12

TOWNSHIP 2 NORTH, RANGE 16 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.

- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

This right is limited to any deficiency in the available supply of any prior right existing for the same land.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well shall begin within one year from permit issuance, and shall be completed on or before October 1, 1998. Complete application of the water to the use shall be made on or before October 1, 1999.

Issued April 18, 1996

STATE OF OREGON
WATER RESOURCES DEPARTMENT
WATER RIGHTS DIVISION

Before the Director of the Water Resources Department

In the matter of	)	PROPOSED
Groundwater Application	)	FINAL
G-13481 submitted by	)	ORDER
THOMSON S MARTIN		

FINDINGS OF FACT

Water Use Request

1. THOMSON S MARTIN requested use of 200.0 GALLONS PER MINUTE of water from A WELL for SUPPLEMENTAL IRRIGATION OF 120.0 ACRES WITHIN THE DESCHUTES RIVER BASIN.
2. The area of proposed use is in Sherman County within SECTION 12, TOWNSHIP 2 NORTH, RANGE 16 EAST, W.M.
3. The water delivery system is described by the applicant as follows: The applicant proposes to appropriate water directly from a well using a 2 horsepower submersible pump. The water will be conveyed through 4 inch existing line to handlines, wheel lines & center pivots.
4. The request was made in Application G-13481 which was received by the Water Resources Department on August 6, 1993.

Affected Waters

1. This proposed use of groundwater is not in or above a State Scenic Waterway.
2. There are no senior water rights from this point of appropriation.

Department Actions

1. The application was determined to be complete and not defective.
2. The Department determined, based upon OAR 690-09, that the proposed groundwater use will not have the potential for substantial interference with the nearest surface water source, namely the Columbia River.
3. A technical review of the application was completed and a report of the results of that review was mailed to the applicant on December 23, 1993.
4. The technical review determined:
 - a. IRRIGATION is allowed under the Deschutes Basin Program.
 - b. The use is not prohibited by Statute.
 - c. Water for the proposed use is available in the amounts requested for the period April 1 through November 1
 - d. The use would not injure existing water rights.

5. The report of technical review listed these determinations and disclosed a number of conditions and restrictions that would likely be included in the permit if issued. These conditions and restrictions are listed in the attached draft permit.

Assessment

1. In proceeding with evaluation of Application G-13481, the following criteria were found to be relevant by the Department.
 - a. The Deschutes Basin Program (OAR Chapter 690, Division 505)
 - b. The Sherman County Comprehensive Plan and Zoning Ordinance
 - c. The Scenic Waterway Act (ORS 390) as amended by SB 1033 enacted by the 68th Legislative Assembly
 - d. Groundwater availability as determined by the Groundwater/Hydrology staff (OAR Chapter 690, Division 9)
 - e. The established rate and duty for the proposed use as allowed for any deficiency in rate from Certificate 60446. This underlying certificate does not describe a full (allowed) rate
 - f. The established irrigation season for all new groundwater application filings
 - g. Pending, senior applications and existing water rights of record

CONCLUSIONS OF LAW

1. Based upon continued evaluation, the Department finds the determinations of the technical review require modification as follows: The established irrigation season for new groundwater applications is MARCH 1 THROUGH OCTOBER 31.
2. Based on data received, the Department has determined that at this time the Department is unable to find that there is a preponderance of evidence that the proposed use of ground water will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife.
3. The period of allowed use is MARCH 1 THROUGH OCTOBER 31.
4. The Department finds that no more than 1.5 CUBIC FEET PER SECOND would be necessary for the proposed use. The amount of water requested, 0.45 CFS (200.0 GALLONS PER MINUTE), is allowable to make up a deficiency in rate on the lands identified under Certificate 60446.
5. Sherman County Planning Department staff completed the Department's Land Use Information Form and indicated thereon that the land use associated with the proposed use is compatible with the Sherman County Comprehensive Land Use Plan.
6. The proposed use would not conflict with existing water rights, and, if exercised in accordance with law, rule, and the proposed conditions would not result in injury to existing water users.
7. The proposed use complies with all other rules of the Commission.

8. Pursuant to Chapter 416, Oregon laws, 1995, enacted by the 68th Oregon Legislative Assembly, and given the findings listed above, a rebuttable presumption has been established that the use will not impair or be detrimental to the public interest if exercised in the manner described in the attached draft permit.
9. Therefore, the proposed use, as conditioned, and described in the attached draft permit, would not impair or be detrimental to the public interest.

PROPOSED ORDER

IT IS PROPOSED that Application G-13481 in the name of THOMSON S MARTIN be approved for SUPPLEMENTAL IRRIGATION (deficiency of rate) as provided in the attached draft permit.

DATED February 20, 1996

Steven P. Applegate
Administrator
Water Rights and Adjudications Division

NOTICE:

This Proposed Final Order is issued by the Department pursuant to Chapter 416, Oregon laws, 1995, enacted by the 68th Oregon Legislative Assembly.

To seek changes in this proposed final order, you must file a formal protest.

Formal protests to this proposed final order must be made in proper form and accompanied by the statutory fee in the amount of \$200. Note: The applicant is not subject to this fee.

For other than the applicant, if you agree with the findings in this proposed order, but wish to maintain your right to participate in any contested case proceeding or judicial review, you must file a written request for standing. Requests for standing in proceedings relating to this application must be made in the proper form and accompanied by the statutory fee in the amount of \$50.

Protests or requests for standing, along with the appropriate fees must be received by the Water Resources Department in Salem, Oregon by 5:00 pm on April 5, 1996.

Only the applicant and any persons who timely file a protest or request for standing may participate in further proceedings before the Department or the Commission which deal with this Application.

DRAFT
STATE OF OREGON

COUNTY OF SHERMAN

DRAFT PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS DRAFT PERMIT IS HEREBY ISSUED TO

THOMSON S MARTIN
PO BOX 128
RUFUS, OREGON 97050

(503) 739-2204

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: G-13481

SOURCE OF WATER: A WELL IN THE DESCHUTES RIVER BASIN

PURPOSE OR USE: SUPPLEMENTAL IRRIGATION OF 120.0 ACRES

RATE OF USE: 0.45 CUBIC FOOT PER SECOND (DEFICIENCY IN RATE)

PERIOD OF ALLOWED USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: AUGUST 6, 1993

POINT OF DIVERSION LOCATION: SW 1/4 SE 1/4, SECTION 1, T 2 N, R 16 E, W.M.; 233 FEET NORTH AND 3765 FEET EAST FROM THE NW COR SECTION 12

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

NW 1/4 NE 1/4	22.0 ACRES
SW 1/4 NE 1/4	26.5 ACRES
NE 1/4 NW 1/4	32.0 ACRES
NW 1/4 NW 1/4	2.5 ACRES
SW 1/4 NW 1/4	3.0 ACRES
SE 1/4 NW 1/4	34.0 ACRES
SECTION 12	

TOWNSHIP 2 NORTH, RANGE 16 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

This right is limited to any deficiency in the available supply of any prior right existing for the same land.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well shall begin within one year from permit issuance, and shall be completed on or before October 1, 1998. Complete application of the water to the use shall be made on or before October 1, 1999.

**INTEROFFICE MEMO
WATER RESOURCES DEPARTMENT
NORTH CENTRAL REGION**

=====

RECEIVED

FEB 22 1996

WATER RESOURCES DEPT.
SALEM, OREGON

=====

DATE: February 20, 1996

TO: File G-13481

FROM: Larry Toll, Watermaster - District #3 *LNT*

SUBJECT: PFO Input

Under water use request #3, there appears to be an error in pump size. Is **2 HP** correct?

In one place (Affected Waters, #1), the PFO lists not above or in a scenic waterway, but in Conclusions of Law, #2, the PFO lists no injury to scenic waterway. Is all this necessary?

The Proposed Order is to approve for supplemental irrigation and the proposed permit concurs. In the Conclusion of Law, it says modification is required which would change the use to primary and supplemental. This seems contradictory.

The use is Supplemental - acreages are somewhat different from Cert 60446 and this application due to a slight map variation. The Pivot covers the same area under both uses.

NO, it should be 20 HP

*yes,

WATER
RESOURCES
DEPARTMENT

Reference: File #G13481

Hello:

This letter informs you of the current status of your application for a water use permit and accompanies the Satisfactory Report of Technical Review For Water Use Permit(s). We apologize for the delay in transmitting this information and Report to you and for any inconvenience the wait may have caused you.

The enclosed Report of Technical Review is the Department's summary of a specialized analysis of various legal and scientific aspects of your application and proposed water use. We are required by the state of Oregon's administrative rules (in OAR 690-11-160) to conduct this official technical review of each application submitted to the Oregon Water Resources Department for a water use permit. This process was designed to insure that your application receives a fair evaluation and to secure protection of existing water rights and of the public at large.

AS THE RESULT OF OUR TECHNICAL EVALUATION, WE HAVE DETERMINED THAT YOUR APPLICATION SATISFIES THE REQUIREMENTS OF THE TECHNICAL REVIEW.

The Department will now move your application to the next phase of processing. This phase includes a public interest review of your proposed water use. No final action may be taken on your application until the public interest review is completed.

You should also note that the Report of Technical Review describes conditions currently anticipated which may limit the water use proposed in your application.

If you wish to object to any of the analyses contained in the Report, you must submit your objection to the Department in writing within 60 days of the date of mailing of this Report or by the date specified below. Your objection must allege that the technical review is defective and you may also submit evidence which demonstrates that your proposed water use will not impair or be detrimental to the public interest.

Copies of the Report of Technical Review will be distributed to all persons who have filed comments or otherwise expressed an interest in the water use proposed in your application. Interested parties must also submit their objections within the prescribed objection period. Those objections must allege that the technical review is defective and/or that the proposed water use may impair or be detrimental to the public interest.

3850 Portland Rd NE
Salem, OR 97310
(503) 378-3739
FAX (503) 378-8130

If an objection contains allegations that the technical review is defective, it must be accompanied by facts which support such allegations. If an objection contains allegations that the proposed water use may impair or be detrimental to the public interest, the objection must specify the particular public interest standards which apply as set out in Oregon Revised Statutes (ORS 537.170(5)) and Oregon Administrative Rules (OAR 690-11-195) and state facts showing how such standards would be violated.

All evidence and objections must be received by our Salem office no later than 5:00 p.m. on or before March 9, 1994 or the Department may presume there is no opposition to any of the analyses set out in the technical review report. Evidence and objections must be addressed and delivered to: Oregon Water Resources Department, Water Rights Section, 3850 Portland Road, Northeast, Salem, Oregon 97310.

If objections and evidence are submitted on or before the above time and date, the Director of the Water Resources Department will evaluate each issue raised in the objections and either accept or deny them. Objectors are encouraged to indicate whether they would be interested in resolving their concerns through alternative dispute resolution.

If any of the objections are denied, the objector will be allowed thirty days to submit a protest to the denial. The protest must meet the standards set forth in OAR 690-02-030 through 080.

If you have any questions, please feel free to telephone me or any of the Department's Water Rights Section staff. My telephone number is 378-3739, in Salem, or you may call toll free from within the state to 1-800-624-3199.

Sincerely,

STEVE BROWN
Manager
Water Rights Division

GROUNDWATER AVAILABILITY

This is an application for use of groundwater. The Groundwater/Hydrology Section report indicates that:

Pursuant to OAR 690-09-040, the proposed groundwater withdrawal will not have the potential to cause substantial interference with surface water.

In addition, the Groundwater/Hydrology Section has reported the water will likely be available in the amounts requested without injury to prior rights and/or within the capacity of the resource.

CONFLICTS WITH OTHER WATER RIGHTS:

There are no existing rights from this point of diversion.

There are existing water rights appurtenant to the lands described in the application. See permit conditions.

REPORT CONCLUSIONS:

Based on the Department's review of water availability and Oregon Administrative Rules, water in the amount of 200 gpm is likely available for 8 months. Therefore, the Director finds that water is available in sufficient amount and during periods which will reasonably support the proposed use.

THE PROPOSED WATER USE, AS CONDITIONED, SATISFIES THE REQUIREMENTS OF THIS TECHNICAL REVIEW.

This Report of Technical Review sets out the Director's technical analysis of the application. In addition to this technical analysis, the Director will evaluate this application to determine whether the proposed water use might impair or be detrimental to the public interest under the standards set out in ORS 537.170(5) and OAR 690-11-195. Matters relating to public interest in the proposed water use which are raised in objections will be evaluated following the 60-day objection period.

PROPOSED PERMIT CONDITIONS

Application: G13481

The following conditions will apply to water use under the permit, and will appear in the permit, if issued.

1. Use of water under this permit is subject to all prior rights.
2. Period of allowed use: APRIL 1 THROUGH NOVEMBER 1
OF EACH YEAR. *OCTOBER 31*
3. Rate of use: 200 GPM FOR IRRIGATION AND SUPPLEMENTAL IRRIGATION.
4. Water use development requirements:
 - A. Begin construction by (one year from issuance of permit).
 - B. Complete construction by October 1, 1996.
 - C. Completely apply the water to beneficial use by October 1, 1997.
5. Measurement, recording and reporting conditions:
 - A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
 - B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
 - C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

6. Failure to comply with any of the provisions of the permit may result in action including, but not limited to, restrictions on the use, penalties, or cancellation of the permit.
7. The permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
8. The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.
9. The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times. The use of water shall be limited when it interferes with any prior surface or ground water rights.
10. Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.
11. This right is limited to any deficiency in the available supply of any prior right existing for the same land.
12. The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2 acre-feet for each acre irrigated during the irrigation season of each year.

RE: Application File # G-13481

Dear Thomson,

Per our telephone conversation on November 8, 1995, I have enclosed a copy of your application and map for correction.

- Item 3 of your application indicates 50 acres for irrigation, but the new map submitted reflects more acreage than the 50 requested. Please make corrections as needed on the map and application. The map must identify the tax lot, township, range, section, and nearest quarter-quarters where the water will be diverted and used.

In order to expedite the processing of your application, we request that you submit these items by **NOVEMBER 27, 1995**. I have enclosed a stamped envelope for your use.

Should you have any questions regarding your application or the required materials listed above, please call me personally at 1-800-624-3199 extension 458.

Sincerely,

Jerry Gainey

WATER
RESOURCES
DEPARTMENT

RE: Application File # G-13481

Dear Mr. Martin:

On December 1, 1994, a letter was sent from the Department requesting additional information necessary to complete your application for water use. As of this date these items have not been received:

- ▶ Recording fees in the amount of \$336.00.
- ▶ A signed statement that you either own all lands involved in the proposed water use, or have written authorization or easement permitting access to lands owned by others.
- ▶ A map meeting the requirements of OAR 690-11-070, copy enclosed. The map must show the place where water is to be used and the point where water will be diverted. The map must identify the township, range, section, and nearest quarter-quarters where the water will be diverted and used. If the proposed use is irrigation, the map must also indicate the number of acres irrigated in each quarter-quarter.
- ▶ A complete legal description of the property. This may be found in your deed or title insurance policy.

Please submit these items by **August 28, 1995**. If we do not receive the items requested above by this date, we will reject your application consistent with ORS Chapter 537. If your application is rejected, any fees submitted in excess of the examination fee will be refunded; however, the examination fee of \$200.00 is non-refundable and will not be returned. In addition, the priority date associated with your application will be lost.

Should you have any questions regarding your application or the required materials listed above, or if you need to request an extension of time, please call me personally at 1-800-624-3199, extension 458.

Sincerely,

Jerry Gainey

Map to Accompany Application for Water Use Permit

690-11-070 Maps submitted with water use applications shall [REDACTED]

[REDACTED] meet the following criteria:

(1) The application map, which is made part of the record, shall be of permanent quality and drawn with sufficient clarity so as to be easily reproduced.

(2) Maps shall be drawn on tracing linen, tracing vellum or mylar except that maps measuring 11" x 17" or smaller may be prepared on good-quality paper. All maps shall be drawn to a standard, even scale of not less than 4 inches = 1 mile. Small area maps may be more easily and clearly drawn to a larger scale, such as 1 inch = 400 feet.

(3) Four prints of a platted and recorded subdivision may be submitted as the application map if all of the required information is clearly shown on each print. Notwithstanding the provisions of subsection (5)(a) of this rule, the location of the diversion point may be given with reference to a lot or block corner of the subdivision.

(4) Four permanent-quality prints of other maps, such as deed description survey maps or county assessor maps, also may be used if all the required information is clearly shown on each print. A single print of these may be used only if it is reproduced as a transparency, such as a sepia print or on mylar film.

(5) Each copy of the map shall show clearly each of the following requirements that apply to the proposed appropriation:

(a) The location of each diversion point, well, or dam by reference to a recognized public land survey corner. The locations may be shown by distance and bearing or by coordinates (distance north or south and distance east or west from the corner);

(b) The location of main canals, ditches, pipelines, or flumes;

(c) The location of the place where water is to be used. If for irrigation, the area to be irrigated in each quarter-quarter of a section shall be indicated by shading or hatching and the number of acres in each quarter-quarter section, donation land claim, government lot or other recognized public land survey lines indicated; and

(d) The scale to which the map is drawn, the section number, township, and range, and a North directional symbol.

WATER
RESOURCES
DEPARTMENT

Dear Applicant:

Your application file was reviewed recently and was found to be lacking the following item(s):

- ☒ FEES -- Please submit recording fees in the amount of \$ 336⁰⁰.
- ☒ MAP -- The map must be prepared by a Certified Water Rights Examiner.
- ☒ LEGAL DESCRIPTION -- A complete legal description of the property. This may be found in your deed or title insurance policy.
- ☒ EASEMENT -- Permission/Authorization to access lands included in the application but not owned by the applicant.
- ☐ OATH -- The following statement must be signed, dated, and included in the application file:
"I/We certify that the information I have provided in this application is an accurate representation of the proposed water use and is true and correct to the best of my knowledge."
- ☐ CONFLICT RESOLUTION -- Your proposed use conflicts with an existing water right. Please advise us of how you plan to resolve the conflict.
- ☐ OTHER: _____.

These items must be received before a permit may be issued. If these items are not received within 30 days (90 days for the map) from the date of this letter, the Department may begin the procedure for rejecting the application. If for any reason you are not able to submit the required material(s) within the time allotted, please let me know as soon as possible.

To help speed processing, please mark the envelope "URGENT" and send the requested items to my attention at the address listed below.

Sincerely,

Douglas L. Baer

TOTAL
DUE:

A checkmark (✓) indicates that the item is incomplete or defective.

- ☒ 1. Examination fees (and recording fees, if for PFO/FO).
- ☐ 2. Name and address of the applicant, and title if applicable.
- ☐ 3. Source of water.
- ☐ 4. Use of water.
- ☐ 5. Amount of water.
- ☐ 6. Description of delivery system.
- ☐ 7. A statement of whether the applicant has written authorization or easements permitting access to lands owned by others.
- ☐ 8. Name(s) and address(es) of the owners of any lands involved, but not owned by the applicant.
- ☐ 9. Proposed dates of beginning and completion of construction, and complete application of water.
- ☐ 10. If for **municipal use**, the present population to be served and expected future water requirements.
- ☐ 11. If for **mining use**, the type of mines and methods of supplying & utilizing the water.
- ☐ 12. If for a **reservoir**:
 - ☐ a. The height of the dam.
 - ☐ b. The storage capacity.
 - ☐ c. The area submerged.
 - ☐ d. The maximum depth.
 - ☐ e. The construction method (earthfill, concrete, flashboard, etc.).
 - ☐ f. A description of the outlet conduit.
 - ☐ g. A description of the spillway.
- ☐ 13. If for **groundwater**, the horizontal distance from the well to the nearest surface water source (if within one mile), and the difference in land surface elevation between them.
- ☐ 14. If the application was made under **HB 2107**:
 - ☐ a. Name and address of each adjacent property owner and verification that each owner has been mailed a copy of the completed notice.
 - ☐ b. A description of the proposed water used and related project, the condition it will address, and the benefits that are expected to result from the project.
 - ☐ c. The number of reservoirs per application is appropriate as per OAR 690-11-049 (3)(b)
- ☒ 15. An oath that the application information is true and correct.
- ☒ 16. The signature of the applicant(s).
- ☒ 17. A satisfactory map of the proposed POD & POU.
- ☒ 18. A Land Use Information Form or receipt.
- ☒ 19. A legal description of the property where water will be used.

STATE OF OREGON
COUNTY OF SHERMAN
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

WILLIAM F. AND BARBARA B. MARTIN
21410 HIGHWAY 224
CLACKAMAS, OREGON 97015

confirms the right to use the waters of A WELL in the COLUMBIA BASIN for the purpose of IRRIGATING 166.0 ACRES.

The right has been perfected under Permit G-7301. The date of priority is MARCH 7, 1977. The right is limited to not more than 0.88 CUBIC FOOT PER SECOND or its equivalent in case of rotation, measured at the well.

The well is located as follows:

LOT 7 (SW 1/4 SW 1/4), SECTION 6, T 2 N, R 17 E, W.M.;
60 FEET NORTH AND 1050 FEET EAST FROM THE SW CORNER OF SECTION 6.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The right shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

SE 1/4 SE 1/4	10.3 ACRES
SECTION 1	
NE 1/4 NE 1/4	35.2 ACRES
SE 1/4 NE 1/4	2.2 ACRES
SECTION 12	
TOWNSHIP 2 NORTH, RANGE 16 EAST, W.M.	
LOT 7 (SW 1/4 SW 1/4)	32.1 ACRES
SE 1/4 SW 1/4	12.4 ACRES
SECTION 6	
NE 1/4 NW 1/4	23.4 ACRES
LOT 1 (NW 1/4 NW 1/4)	49.2 ACRES
LOT 2 (SW 1/4 NW 1/4)	1.2 ACRES
SECTION 7	
TOWNSHIP 2 NORTH, RANGE 17 EAST, W.M.	

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

WITNESS the signature of the Water Resources Director, affixed this date MARCH 12, 1990.

WATER RESOURCES DEPARTMENT

Application for a Permit to Appropriate Ground Water

Applicant(s) Thomson S. MARTIN
(Please print or type - use dark ink)

Mailing Address: P.O. Box 128
Rufus Oregon 97050 503-739-2204
City State Zip Daytime Phone No.

I (We) make application for a permit to appropriate the following described ground waters of the State of Oregon:

1. THE DEVELOPMENT (number of wells, tile lines, infiltration galleries, etc.):
(1) irrigation well - Supplemental to
Existing System

If development is less than one mile from a natural stream, give the following:

Distance from development to stream: _____

Elevation difference between streambed and development: _____

NOTE: Wells must be constructed according to standards set by the department for the construction and maintenance of water wells. If the well is already constructed, please enclose a copy of the well driller's log with this application, and skip to Section 2 below.

Diameter of well: See log Depth in feet: _____

Type and size of well casing: _____ No. of feet: _____

Estimated depth to water: _____

Type of access port or measuring device: _____

Wells to be drilled by: _____

Address: _____

If the water well is flowing artesian, describe your water control and conservation works: _____

2. TOTAL AMOUNT OF WATER to be applied to beneficial use: _____ cubic feet per second, OR 200 gallons per minute. If water is to be used from more than one ground water source, give the quantity of water from each: _____

3. INTENDED USE(s) OF WATER: Supplemental Irrigation

If for more than one use, give the quantity of water from each source for each use; _____

If for DOMESTIC use, state the number of households to be supplied; _____

If for MUNICIPAL OR QUASI-MUNICIPAL use, state the present population to be served, and an estimate of the future requirements; (List population projections, water needs, anticipated areas to be provided water.)

If for MINING use, state the nature (gold, silver, etc.) of the mines to be served; _____

If for IRRIGATION, or other land area use, state the TOTAL number of acres to be developed under each use;

Irrigation

Other (describe)

Adjacent to well G-9559
and land (50 acres) between well
69559 & G7301
Supplemental & new - 50 acres total

4. DESCRIPTION OF WATER DELIVERY SYSTEM: Include dimensions and type of construction of diversion works, length and dimensions of supply ditches or pipelines, size and type of pump and motor. If for irrigation, describe the type of system (i.e., flood, wheel line, hand line, drip, other).

4" into Existing line - 120 ft
20 Hp Submersible pump
Hand line, wheel lines & Center Pivots

5. PROJECT SCHEDULE: (List month and year)

Proposed date construction work will begin Well drilled Spring 1990

Proposed date construction work will be completed Spring 1992

Proposed date water use will be completed Spring 1992

NOTE: A map prepared by a Certified Water Right Examiner (CWRE) and a complete legal description of the subject property are required under ORS 537.140 and OAR 690 as a part of your application. The legal description may be copied from your deed, title insurance policy, or land sales contract.

NOTE: The permit, when issued, is for the beneficial use of water without waste. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible the land use you propose may not be allowed if it is not in keeping with the goals and acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.

REMARKS OR FURTHER INSTRUCTIONS:

Reviewer: Kochly

TO: Water Rights Section

Dec. 06, 1993

FROM: Groundwater/Hydrology Section

Koehler

Reviewer's Name

SUBJECT: Application G- 13481

1. PER THE _____ Basin rules, one or more of the proposed POA's is/is not within _____ feet/mile of a surface water source (_____) and taps a groundwater source hydraulically connected to the surface water.
2. BASED UPON OAR 690-09 currently in effect, I have determined that the proposed groundwater use
 - a. _____ will, or } have the potential for substantial interference with the nearest surface water
 - b. ☒ will not } source, namely Columbia River; or
 - c. _____ will, if properly conditioned, adequately protect the surface water from interference:
 - i. _____ The permit should contain condition #(s) _____;
 - ii. _____ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. _____ The permit should be conditioned as indicated in item 4 below; or
 - d. _____ will, with well reconstruction, adequately protect the surface water from substantial interference.
3. BASED UPON available data, I have determined that groundwater for the proposed use
 - a. ☒ will, or } likely be available in the amounts requested without injury to prior rights and/or
 - b. _____ will not } within the capacity of the resource; or
 - c. _____ can, if properly conditioned, avoid injury to existing rights or to the groundwater resource;
 - i. _____ The permit should contain condition #(s) _____;
 - ii. _____ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. _____ The permit should be conditioned as indicated in item 4 below.
4.
 - a. _____ THE PERMIT should allow groundwater production from no deeper than _____ ft. below land surface;
 - b. _____ The permit should allow groundwater production from no shallower than _____ ft. below land surface;
 - c. _____ The permit should allow groundwater production only from the _____ groundwater reservoir between approximately _____ ft. and _____ ft. below land surface;
 - d. _____ Well reconstruction is necessary to accomplish one or more of the above conditions.
 - e. _____ One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.

REMARKS: Well should have been sealed 5 ft into basalt. Probably not a big problem with this well however, based on hydraulics noted locally, + distance from surface water.

WELL CONSTRUCTION (If more than one well doesn't meet standards, attach an additional sheet.)

5. THE WELL which is the point of appropriation for this application does not meet current well construction standards based upon:
- a. ☐ review of the well log;
 - b. ☐ field inspection by _____;
 - c. ☐ report of CWRE _____;
 - d. ☐ other: (specify) _____
6. THE WELL construction deficiency:
- a. ☐ constitutes a health threat under Division 200 rules;
 - b. ☐ commingles water from more than one groundwater reservoir;
 - c. ☐ permits the loss of artesian head;
 - d. ☐ permits the de-watering of one or more groundwater reservoirs;
 - e. ☐ other: (specify) _____
7. THE WELL construction deficiency is described as follows: _____
8. THE WELL
- a. ☐ was, or
 - b. ☐ was not
 - c. ☐ I don't know if it met standards at the time of construction.
- constructed according to the standards in effect at the time of original construction or most recent modification.

RECOMMENDATION:

- A. ☐ I recommend including the following condition in the permit:
"No water may be appropriated under terms of this permit until the well(s) has been repaired to conform to current well construction standards and proof of such repair is filed with the Enforcement Section of the Water Resources Department."
- B. ☐ I recommend withholding issuance of the permit until evidence of well reconstruction is filed with the Enforcement Section of the Water Resources Department.
- C. ☐ REFER this review to Enforcement Section for concurrence.

THIS SECTION TO BE COMPLETED BY ENFORCEMENT PERSONNEL

I concur in G/H's recommendation A or B above relating to conditioning or withholding the permit.
_____, 1992.

(Signature)

I do not concur in G/H's recommendation A or B above relating to conditioning or withholding the permit for the following reasons: _____

(Signature)

_____, 1992.

Hello:

Under separate cover I have enclosed our report of technical review. Your application file was recently reviewed. Before we can process your application further, you need to provide us with additional information, documentation, or fees.

Please send the following:

- * permit fees in the amount of \$336.00;
- * a legal description of the new property where you plan to use water (you may copy this from your deed, title insurance policy, or sales contract);
- * it will be necessary for you to submit an oath certifying that the information provided in the application is an accurate representation of the proposed use and is true and correct to the best of your knowledge; ✓
- * a copy of written authorization, contract or easement permitting access to the land or reservoir not owned by the applicant;
- * a map prepared by a Certified Water Rights Examiner.

After the file is complete and the deadline for objections to the technical review expires, staff will again review the file for objections and further process your application as soon as possible.

Please feel free to contact me if you have any questions and I will be happy to address any concerns you may have.

Sincerely,

STEVE BROWN
Manager

- (6) S Proposed dates of beginning and completion of construction, and complete application of water.

- (7) S MAP: ☐ Prepared by a CWRE
☒ Exempt under OAR 690-14-150(3)
☐ A map or drawing included (non-CWRE)
☐ No map or drawing in file

- (8) N/A A CWRE map is not required for applications filed before November 9, 1987.
- (9) U A written copy of the legal description of the property on which the water is to be used.
- (10) U A copy of written authorization, contract or easement permitting access to the land or reservoir not owned by the applicant.
- (11) S The proposed use is not restricted or prohibited by statute.
- (12) S The source of water is not withdrawn from appropriation by order of the State Engineer or Water Resources Commission, or legislatively withdrawn under ORS Chapter 538.
- (13) S JAR. use(s) is/are classified uses(s) under the DESCHUTES Basin Program, OAR 690 - 505.
- (14) U The application, map and supporting data are complete and free of defects.

Land Use Compatibility:

- (15) As expressed by the Planning Department of SHERMAN COUNTY
- (16) S The land uses to be served by proposed water uses (including proposed construction) are allowed or are not regulated by the local comprehensive plan (ordinance section Art. 3 sec 10).
- (17) N/A The land uses to be served by proposed water uses (including proposed construction) involve discretionary land use approvals which have been obtained.
- (18) N/A The local government was notified, and sent no comment pursuant to the rules at the time; land use was presumed in compliance per such statement printed on the application.

For ground water applications:

- (20) S A copy of the constructor's log, if available, for any well already constructed, or required information regarding actual or anticipated construction.
- (21) S The report from groundwater section has been received.

For reservoir applications:

- (22) N/A Plans, specifications and supporting information for the dam and impoundment area.

Land Use Information Form: Permits, Hydroelectric Licenses, Water Uses in
Addition to Classified Uses

RECEIVED

AUG 6 1993

WATER RESOURCES DEPT
SALEM, OREGON

This information is needed to determine compatibility with local comprehensive plans as required by ORS 197.180. The Water Resources Department will use this and other information to evaluate the water use application. DO NOT FILL OUT THIS FORM IF water is to be diverted, conveyed, and/or used only on federal lands.

Applicant's Name: Thomson S. Martin
Address: P.O. Box 128
City: BUTTS State: Ore Zip: 97050 Day Phone: 503-739-2204

Please provide information as requested below for all tax lots on or through which water will be diverted or used. (Attach extra sheets as necessary.) Applicants for municipal use, or irrigation uses within irrigation districts, may substitute existing and proposed service area boundaries for the tax lot information requested below.

Tax Lot or Local I.D.#	Plan Designation/Zoning (e.g. Rural Residential/RR-5)	Check All That Apply		
		Water Diverted	Water Conveyed	Water Use
T2 R14+17E W.M. Sec 12+8	PLAN: Rangeland & Crop Land ZONING: EFU			

Please list all counties and cities within which water is proposed to be diverted, conveyed, and/or used. Sherman

The following section must be completed by a planning official from each county and city listed unless your project will be located entirely within city limits. In this case, only the city planning agency must complete this form. Please request extra forms as needed.

For Local Government Use Only

Local government planning officials are to complete the remainder of this form. If this form can not be completed while the applicant waits, please sign and detach the receipt as instructed below. Please mail the completed form directly to the Water Resources Department (3850 Portland Rd. NE, Salem, OR, 97310) within 60 days of the date of receipt as shown below. If the form is not completed within 60 days, the Department may take action to approve the water use.

a) Check the appropriate box below and provide requested information.

☒ Land uses to be served by proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): ARTICLE 3 SEC. 10. Go to section b) on reverse side.

SHERMAN CO. ZONING ORDINANCE

☐ Land uses to be served by proposed water uses (including proposed construction) involve discretionary land use approvals as listed in the table below. **Note:** Please attach documentation of applicable local land use approvals which have already been obtained. (Record of Action plus any accompanying findings is sufficient.)

Local governments are invited to express special land use concerns or make recommendations to the Department regarding this proposed use of water below, or on a separate sheet. For additional information call Roberta Jortner or Rick Bastasch at 378-3671.

Additional Comments:

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

Description of Water Use

Note to Applicant: This sheet will provide local planning staff with a basic description of your proposed water use. Please fill out this sheet before bringing the attached land use form to your local planning office. It will help local planning offices complete your land use information form quickly.

Note to Local Planning Officials: Please initial this sheet. Do not separate it from the land use information form. If needed, please make a separate copy for your records.

REFERENCE: File(s) G-13481, G-13482

We have received your application(s) for a water use permit along with your supporting data, documentation, and fees. A receipt is enclosed here unless you were previously issued one. Your application has been assigned the above referenced file number. Please refer to this number whenever you contact us about your application.

Even though your application has been received, filed and assigned an application reference number, no authorization has been granted to develop your water use. The filing of an application does not create a water right. Water may not be used without a water right permit.

After an application has been accepted for filing, public notification of the application is made, followed by the mandatory 30-day comment period. Thereafter, applications can be considered for processing as time allows.

At present the Water Resources Department has a backlog of several thousand applications for water use permits which has delayed our application processing time. Applications are processed in the order in which they are received.

The processing of an application does not guarantee that a water right permit will be issued. Each application must undergo a specialized analysis called a technical review and a public interest review. There is no way to determine at this time whether your particular proposed water use will be recommended for a permit.

REFERENCE: File(s) - G-13481, G-13482

When the report on the technical review is completed and sent to you, a 60-day objection period begins during which you, the applicant, or anyone who has expressed an interest in your proposed water use may communicate to us their disagreement with what we have said in our report on your application. After the 60-day objection period, the Department conducts the public interest review and considers any objections which have been made.

After any objections have been considered, there may follow time to allow parties to resolve conflicts over the proposed water use. In addition, a 30-day protest period may be required. Lastly, it may be necessary to schedule a hearing or send the application to the Water Resources Commission for their review. In most cases no objections are received and the application processing can proceed without further conflict resolution, protest, or hearing.

If your application is recommended for approval and a permit is issued, the use allowed by the permit will be subject to the Basin Program Rules of the Water Resources Commission, instream flow requirements, and the demands of prior right holders, and other conditions to conform the water use to particular standards.

Please contact the Water Rights Section of the Water Resources Department if you have any questions. You may write to us at 3850 Portland Road, Northeast, Salem, Oregon 97310 or you may call 378-3739 in Salem or toll free from within the state 1-800-624-3199.

Sincerely,

Steve Brown
Manager
Water Rights Division
