Subject: Water Right Permit Number G- 12178

Dear Permit holder,

Oregon Administrative Rule 690-217-0020(1) requires that ground water permit holders with a priority date after December 20, 1988, submit the results of a pump test before the Water Resources Department can issue a water right certificate. A copy of your permit is enclosed. The purpose of this letter is to remind you of the pump test requirement.

Pump tests are intended to provide aquifer and well information for ground water resource characterization and to help solve well problems. There is no penalty for not submitting a pump test.

If there is a reason why a pump test cannot be performed on a well, the owner may request from the Director an exemption from the pump test requirement. Requests shall be in writing and include the reason why a pump test cannot be performed. Exemptions, or conditioned exemptions, shall be granted if the reasons are found to be valid and eliminating the problem would place an unreasonable burden on the well owner. Exemptions shall be granted for public water supply wells if pump testing will cause interruption of service to customers.

Pump tests shall not be required of wells with diameters greater than 36 inches and depths less than 30 feet. Pump tests shall not be required of collector-type wells or infiltration galleries. If your well meets one of these two requirements please let us know.

If you are interested in conducting the pump test yourself, you should first review the requirements at http://arcweb.sos.state.or.us/rules/OARS_600/OAR_690/690_217.html or ask that a copy of the rules be sent to you.

A copy of the pump test form has been included. If you have questions, if you are not the owner of a ground water permit or if you have moved, please call the Department at 503-986-0900.

Sincerely,

Diana Durbin
Water Rights Certificate Staff

C: Permit File

690-217-0050

Qualifications for Conducting Pump Tests

Only pump tests conducted by the well owner, a full-time employee of the well owner who routinely works with and is familiar with wells and pumps, or a qualified individual authorized by the well owner shall be accepted by the Director. Individuals in the following groups will be considered qualified and authorized provided they have significant experience conducting pump tests:

- (1) Oregon licensed water well constructors.
- (2) Oregon registered professional geologists or certified engineering geologists.
- (3) Certified water rights examiners.
- (4) Oregon registered professional engineers.
- (5) Individuals whose primary occupation involves, wholly or in significant part, pump installation, service or testing.

STATE OF OREGON

COUNTY OF Sherman

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

THOMSON S MARTIN
PO BOX 128
RUFUS, OREGON 97050

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: G-13482

SOURCE OF WATER: A WELL IN THE GIRKLING CANYON BASIN

PURPOSE OR USE: IRRIGATION OF 33.23 ACRES

Rate of use: 0.33 CUBIC FOOT PER SECOND

Period of allowed use: APRIL 1 THROUGH NOVEMBER 1

DATE OF PRIORITY: August 6, 1993

POINT OF DIVERSION LOCATION: SE 1/4 NE 1/4, SECTION 7, T2N, R17E, W.M.;
1265.6 FEET NORTH AND 2076 FEET EAST FROM THE C 1/4 CORNER OF SECTION 7.

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

NE 1/4 NW 1/4 16.62 ACRES
NW 1/4 NW 1/4 16.61 ACRES
SECTION 8

TOWNSHIP 2 NORTH, RANGE 17 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well shall begin within one year from permit issuance, and shall be completed on or before October 1, 1997. Complete application of the water to the use shall be made on or before October 1, 1998.

Issued October 17, 1995

Reviewer's Name

SUBJECT: Application G-13482

1. PER THE _____ Basin rules, one or more of the proposed POA's is/is not within _____ feet/mile of a surface water source (_____) and taps a groundwater source hydraulically connected to the surface water.
2. BASED UPON OAR 690-09 currently in effect, I have determined that the proposed groundwater use
- a. _____ will, or } have the potential for substantial interference with the nearest surface water
 - b. ☒ will not } source, namely intermittent Parker Canyon Stream; or
 - c. _____ will, if properly conditioned, adequately protect the surface water from interference:
 - i. _____ The permit should contain condition #(s) _____;
 - ii. _____ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. _____ The permit should be conditioned as indicated in item 4 below; or
 - d. _____ will, with well reconstruction, adequately protect the surface water from substantial interference.
3. BASED UPON available data, I have determined that groundwater for the proposed use
- a. ☒ will, or } likely be available in the amounts requested without injury to prior rights and/or
 - b. _____ will not } within the capacity of the resource; or
 - c. _____ can, if properly conditioned, avoid injury to existing rights or to the groundwater resource;
 - i. _____ The permit should contain condition #(s) _____;
 - ii. _____ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. _____ The permit should be conditioned as indicated in item 4 below.
4. a. _____ THE PERMIT should allow groundwater production from no deeper than _____ ft. below land surface;
- b. _____ The permit should allow groundwater production from no shallower than _____ ft. below land surface;
- c. _____ The permit should allow groundwater production only from the _____ groundwater reservoir between approximately _____ ft. and _____ ft. below land surface;
- d. _____ Well reconstruction is necessary to accomplish one or more of the above conditions.
- e. _____ One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.

REMARKS:

G-13482

WELL CONSTRUCTION (If more than one well doesn't meet standards, attach an additional sheet.)

5. THE WELL which is the point of appropriation for this application does not meet current well construction standards based upon:
- a. ☐ review of the well log;
 - b. ☐ field inspection by _____;
 - c. ☐ report of CWRE _____;
 - d. ☐ other: (specify) _____
6. THE WELL construction deficiency:
- a. ☐ constitutes a health threat under Division 200 rules;
 - b. ☐ commingles water from more than one groundwater reservoir;
 - c. ☐ permits the loss of artesian head;
 - d. ☐ permits the de-watering of one or more groundwater reservoirs;
 - e. ☐ other: (specify) _____
7. THE WELL construction deficiency is described as follows: _____
8. THE WELL a. ☐ was, or } constructed according to the standards in effect at the time of
 b. ☐ was not } original construction or most recent modification.
 c. ☐ I don't know if it met standards at the time of construction.

RECOMMENDATION:

- A. ☐ I recommend including the following condition in the permit:
"No water may be appropriated under terms of this permit until the well(s) has been repaired to conform to current well construction standards and proof of such repair is filed with the Enforcement Section of the Water Resources Department."
- B. ☐ I recommend withholding issuance of the permit until evidence of well reconstruction is filed with the Enforcement Section of the Water Resources Department.
- C. ☐ REFER this review to Enforcement Section for concurrence.

THIS SECTION TO BE COMPLETED BY ENFORCEMENT PERSONNEL

I concur in G/H's recommendation A or B above relating to conditioning or withholding the permit.
_____, 1992.

(Signature)

I do not concur in G/H's recommendation A or B above relating to conditioning or withholding the permit for the following reasons: _____

FINAL PROOF SITE & CLAIM OF BENEFICIAL USE REPORT
for
THOMSON S. MARTIN
REFERENCE: FILE G-13482/PERMIT G-12178

September 24, 1999

PAGE 1 OF 2

INFORMATION: Mr. Thomson S. Martin made an application to appropriate ground water from the Girkling Canyon for irrigation of 33.23 acres within the Deschutes Basin in August, 1995. Mr. Martin is currently farming the parcel. His current address and phone number are as follows:

Thomson S. Martin
P.O. box 128
Rufus, Oregon 97050
Phone: 1.541.739.2204

The current ownership of the property is vested in the following persons:
Thomson S. Martin, Ann Hill, Judy Lidstrom and Carol Jonasson.

Mr. Martin contacted myself to complete the final proof requirements. I went to the site on September 22, 1999, met with him and measured the area and elevation of the site being irrigated, observed the type of pump, number of sprinkler nozzles, motor horsepower and the general character of the site.

I observed: (1) 50, 5/32" sprinklers on a center pivot and hand line. The total length of system is 975.0 lineal feet. (the application states 1,100 feet)

(2) 1, Gould submersible turbine pump with a 25 h.p. Franklin motor rated at 3410 r.p.m. with an estimated discharge pressure of 40 p.s.i.. (the application states 20 h.p.)

- (3) A total of 34.28 acres of grain and row crops.
- (4) The pump intake pipe is 4" in diameter. The discharge pipe from the pump to the distribution system is 4" in diameter. The casing is steel and 10" in diameter.
- (5) The well was drilled by Austin Well Drilling located in The Dalles, Oregon.
- (6) The well was drilled March 12, 1990 and deepened November 27, 1990. The casing is steel and 10" in diameter.

SEP 30 1999

**WATER RESOURCES DEPT.
SALEM, OREGON**

FINAL PROOF SITE & CLAIM OF BENEFICIAL USE REPORT
for
THOMSON S. MARTIN
REFERENCE: FILE G-13482/PERMIT G-12178

September 24, 1999

PAGE 2 OF 2

- (7) The depth of the pumping level is 248 feet with a static water level of 187 feet.
- (8) The elevation of the land surface datum is from the U.S.G.S Rufus Quadrangle and is 942 M.S.L., the top of the pivot outlet is 945 M.S.L. and the elevation of the first sprinklers are 945 M.S.L.

My calculations of the motor & pump are as follows:

Turbine factor of $7.04 * 25 \text{ h.p.} / 187 + (248 - 187) + 5 + (2.31 * 40 \text{ p.s.i.}) = 0.51 \text{ c.f.s.}$

My calculations for the sprinklers are as follows:

Output of 5/32" nozzles @ 40 p.s.i. = 4.4 gal./min. * 50 nozzles / 449 = 0.49 c.f.s.

No rate of use per acre was specified in the Permit to appropriate public water.

My calculations show the existing capacity of the system to be 0.49 c.f.s..

The permit to appropriate the public water allowed for the irrigation of 33.23 acre and a rate of use of 0.33 c.f.s.

The final proof survey and inspection of the use as found to be completed under the terms and conditions of File No. G-13482/Permit No. G-12178 was completed by me on September 22, 1999. The facts contained in this report and accompanying final proof map are correct to the best of my knowledge.

I, Thomson S. Martin, agree to the findings of the CWRE and do submit this site report and map as my Claim of Beneficial Use of the water as provided under the terms and conditions of my permit No. G-12178.

Thomson S. Martin

REFERENCE: File G-13482

This letter is in regard to your water use Permit G-12178. As we pointed out to you in our November 4, 1998 letter, your claim of beneficial use must be received in this office by **October 1, 1999**.

Oregon Administrative Rule 690-14-190 states: "The claim of beneficial use shall be submitted to the Department within one year after the use was reported..as being complete...Failure to comply with this section shall cause the Director to initiate permit cancellation proceedings as provided by ORS 537.260."

The "claim" consists of a site report and map of the developed use prepared by a Certified Water Rights Examiner, which accompany a request from the permittee for issuance of a certificate of water right.

You are hereby notified that unless your claim is received on or before **October 1, 1999** your permit will be canceled without further notice.

If you have any questions, please contact the Water Rights Section.

Sincerely,

DALLAS MILLER
Water Rights Specialist

Salem, OR 97310-0210
(503) 378-3739
FAX (503) 378-8130

THOMSON MARTIN
PO BOX 128
RUFUS OR 97050

REFERENCE: File G-13482

The date for the complete application of water to a beneficial use for your water use Permit G-12178 was **October 1, 1998**. To date we have not received notice that your project was completed.

If the project was completed, you should promptly submit the notice of complete application of water. If you were unable to complete the project within the time allowed, you may wish to request an extension of the time limits.

Water Right Certificate

In order to obtain a certificate of water right, you are required by law to hire a certified water right examiner to conduct the final proof survey of the completed use. This must be done within one year after the use is reported as being complete or within one year after the beneficial use date allowed in the permit, whichever occurs first. Accordingly, the map and claim of beneficial use must be received in this office on or before **October 1, 1999**. A list of certified water right examiners is enclosed for your information.

Upon receipt of the map and claim of beneficial use, the information will be reviewed and a brief field inspection may be conducted by a representative of this office. Following that, a proposed certificate of water right will be mailed to you for review.

Extension of Time

If you wish to apply for an extension of time, please fill out the enclosed form. Permit extension rules, adopted by the Water Resources Commission in October 1998, require that the Department consider this information when determining whether or not to approve an extension request. You should request to extend your permit for the amount of time necessary to fully complete your project and put the water to beneficial use. Should the permit extension be approved, it is the Department's expectation that it will be the last extension granted. Copies of the new extension rules will be furnished upon request.

If you are no longer interested in the project, please let us know. We will provide forms for you to authorize the cancellation of the permit.

If you have any questions, please contact me at extension 272, at 503-378-3739, or toll-free 1-800-624-3199.

Sincerely,

DALLAS S. MILLER
Water Rights Specialist

STATE OF OREGON

COUNTY OF Sherman

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

THOMSON S MARTIN
PO BOX 128
RUFUS, OREGON 97050

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: G-13482

SOURCE OF WATER: A WELL IN THE GIRKLING CANYON BASIN

PURPOSE OR USE: IRRIGATION OF 33.23 ACRES

Rate of use: 0.33 CUBIC FOOT PER SECOND

Period of allowed use: APRIL 1 THROUGH NOVEMBER 1

DATE OF PRIORITY: August 6, 1993

POINT OF DIVERSION LOCATION: SE 1/4 NE 1/4, SECTION 7, T2N, R17E, W.M.;
1265.6 FEET NORTH AND 2076 FEET EAST FROM THE C 1/4 CORNER OF SECTION 7.

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

NE 1/4 NW 1/4 16.62 ACRES
NW 1/4 NW 1/4 16.61 ACRES
SECTION 8
TOWNSHIP 2 NORTH, RANGE 17 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well shall begin within one year from permit issuance, and shall be completed on or before October 1, 1997. Complete application of the water to the use shall be made on or before October 1, 1998.

Issued October 17, 1995

Sister: Carol Jonasson 200 Mariposa Terrace Medford 97504

I/We certify that the information I have provided in this application is an accurate representation of the proposed water use and is true and correct to the best of my knowledge.

NOTE: The permit, when issued, is for the beneficial use of water without waste. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible the land use you propose may not be allowed if it is not in keeping with the goals and acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.

In the matter of	)	FINAL
Groundwater Application	)	ORDER
G-13482 submitted by	)	
THOMSON S MARTIN		

FINDINGS OF FACT

Water Use Request

1. THOMSON S MARTIN requested use of 150.0 GALLONS PER MINUTE of water from A WELL IN THE GIRKLING CANYON BASIN for IRRIGATION OF 33.23 ACRES within the Deschutes basin.
2. The area of proposed use is in Sherman County within SECTION 8, TOWNSHIP 2 NORTH, RANGE 17 EAST, W.M.
3. The water delivery system is described by the applicant as 1100 feet of 5 inch pipe and a 20 hp pump. The system is a center pivot and a handline.
4. The request was made in Application G-13482 which was received by the Water Resources Department on August 6, 1993.

Affected Waters

1. This proposed use of groundwater is not within or above a State Scenic Waterway.
2. There are no senior water rights from this point of appropriation.

Department Actions

1. The application was determined to be complete and not defective.
2. The Department determined, based upon OAR 690-09, that the proposed groundwater use will not have the potential for substantial interference with the nearest surface water source, an unnamed stream.
3. A technical review of the application was completed and a report of the results of that review was mailed to the applicant on April 26, 1994.
4. The technical review determined:

- a. IRRIGATION is allowed under the Deschutes Basin Program.
- b. The use is not prohibited by Statute.
- c. Water for the proposed use is available in the amounts requested
- d. The use would not injure existing water rights.

5. The report of technical review listed these determinations and disclosed a number of conditions and restrictions that would likely be included in the permit if issued. These conditions and restrictions are listed in PERMIT G-12178.

Assessment

1. In proceeding with evaluation of Application G-13482, the following criteria were found to be relevant by the Department.

- a. The Deschutes Basin Program (OAR Chapter 690, Division 505)
- b. The Sherman County Comprehensive Plan and Zoning Ordinance
- c. Groundwater availability as determined by the Groundwater/Hydrology staff (OAR Chapter 690, Division 9)
- d. The established rate and duty for the proposed use
- e. Pending, senior applications and existing water rights of record

CONCLUSIONS OF LAW

1. Based upon continued evaluation, the Department finds the determinations of the technical review remain valid.

2. The period of allowed use is APRIL 1 THROUGH NOVEMBER 1.

3. The Department finds that no more than 0.42 CUBIC FOOT PER SECOND would be necessary for the proposed use. The amount of water requested, 0.33 CUBIC FOOT PER SECOND, is allowed.

4. Sherman County Planning Department staff completed the Department's Land Use Information Form and indicated thereon that the land use associated with the proposed use is compatible with the Sherman County Comprehensive Land Use Plan.

5. The proposed use would not conflict with existing water rights, and, if exercised in accordance with law, rule, and the proposed conditions would not result in injury to existing water users.

6. The proposed use complies with all other rules of the Commission.

7. Pursuant to Chapter 416, Oregon laws, 1995, enacted by the 68th Oregon Legislative Assembly, and given the findings listed above, a rebuttable presumption has been established that the use will not impair or be detrimental to the public interest if exercised in the manner described in PERMIT G-12178.

8. No protests were timely filed in response to the Technical Review of April 26, 1994, and no significant issues or disputes are known to the Department at this time.

9. Therefore, the proposed use, as conditioned, and described in PERMIT G-12178, would not impair or be detrimental to the public interest.

ORDER

IT IS HEREBY ORDERED that Application G-13482 in the name of THOMSON S MARTIN be approved for IRRIGATION OF 33.23 ACRES as provided in PERMIT G-12178.

DATED October 17, 1995

Martha O. Pagel
Director
Water Resources Department

NOTICE:

This Final Order is issued by the Department pursuant to Chapter 416, Oregon laws, 1995, enacted by the 68th Oregon Legislative Assembly.

If this Final Order has modified the Department's prior findings or conditions, the applicant may request a contested case hearing within 14 days from the date of this order. Issues on which a contested case hearing may be requested and conducted are limited to issues based on modifications to the Proposed Final Order.

Requests for a contested case hearing must be made in proper form, submitting the information required under Section 11(6), Chapter 416, Oregon Laws, 1995.

Requests for a contested case hearing must be received by the Water Resources Department in Salem, Oregon by 5:00 pm on October 31, 1995.

Only the applicant and any persons who timely filed a protest may appeal the provisions of this final order.

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

THOMSON S MARTIN
PO BOX 128
RUFUS, OREGON 97050

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: G-13482

SOURCE OF WATER: A WELL IN ~~SPANISH HOLLOW~~ ^{Girking Canyon} BASIN within the Deschutes basin

PURPOSE OR USE: IRRIGATION OF 33.23 ACRES

Rate of use: 0.33 CUBIC FOOT PER SECOND

Period of allowed use: APRIL 1 THROUGH NOVEMBER 1

DATE OF PRIORITY: August 6, 1993

POINT OF DIVERSION LOCATION: SE 1/4 NE 1/4, SECTION 7, T2N, R17E, W.M.; 1265.6 FEET NORTH AND 2076 FEET EAST FROM THE C 1/4 CORNER OF SECTION 7.

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

NE 1/4 NW 1/4 16.62 ACRES
NW 1/4 NW 1/4 16.61 ACRES
SECTION 8
TOWNSHIP 2 NORTH, RANGE 17 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well shall begin within one year from permit issuance, and shall be completed on or before October 1, 1997. Complete application of the water to the use shall be made on or before October 1, 1998.

WATER
RESOURCES
DEPARTMENT

Reference: File G 13482

Hello:

This letter informs you of the current status of your application for a water use permit and accompanies the Satisfactory Report of Technical Review For Water Use Permit(s). We apologize for the delay in transmitting this information and Report to you and for any inconvenience the wait may have caused you.

The enclosed Report of Technical Review is the Department's summary of a specialized analysis of various legal and scientific aspects of your application and proposed water use. We are required by the state of Oregon's administrative rules (in OAR 690-11-160) to conduct this official technical review of each application submitted to the Oregon Water Resources Department for a water use permit. This process was designed to insure that your application receives a fair evaluation and to secure protection of existing water rights and of the public at large.

AS THE RESULT OF OUR TECHNICAL EVALUATION, WE HAVE DETERMINED THAT YOUR APPLICATION SATISFIES THE REQUIREMENTS OF THE TECHNICAL REVIEW.

The Department will now move your application to the next phase of processing. This phase includes a public interest review of your proposed water use. No final action may be taken on your application until the public interest review is completed.

You should also note that the Report of Technical Review describes conditions currently anticipated which may limit the water use proposed in your application.

If you wish to object to any of the analyses contained in the Report, you must submit your objection to the Department in writing within 60 days of the date of mailing of this Report or by the date specified below. Your objection must allege that the technical review is defective and you may also submit evidence which demonstrates that your proposed water use will not impair or be detrimental to the public interest.

Copies of the Report of Technical Review will be distributed to all persons who have filed comments or otherwise expressed an interest in the water use proposed in your application. Interested parties must also submit their objections within the prescribed objection period. Those objections must allege that the technical review is defective and/or that the proposed water use may impair or be detrimental to the public interest.

Commerce Building
158 12th Street NE
Salem, OR 97310-0210
(503) 378-3739
FAX (503) 378-8130

If an objection contains allegations that the technical review is defective, it must be accompanied by facts which support such allegations. If an objection contains allegations that the proposed water use may impair or be detrimental to the public interest, the objection must specify the particular public interest standards which apply as set out in Oregon Revised Statutes (ORS 537.170(5)) and Oregon Administrative Rules (OAR 690-11-195) and state facts showing how such standards would be violated.

All evidence and objections must be received by our Salem office no later than 5:00 p.m. on or before JULY 1, 1994 or the Department may presume there is no opposition to any of the analyses set out in the technical review report. Evidence and objections must be addressed and delivered to: Oregon Water Resources Department, Water Rights Section, 3850 Portland Road, Northeast, Salem, Oregon 97310.

If objections and evidence are submitted on or before the above time and date, the Director of the Water Resources Department will evaluate each issue raised in the objections and either accept or deny them. Objectors are encouraged to indicate whether they would be interested in resolving their concerns through alternative dispute resolution.

If any of the objections are denied, the objector will be allowed thirty days to submit a protest to the denial. The protest must meet the standards set forth in OAR 690-02-030 through 080.

If you have any questions, please feel free to telephone me or any of the Department's Water Rights Section staff. My telephone number is 378-3739, in Salem, or you may call toll free from within the state to 1-800-624-3199.

Sincerely,

A handwritten signature in cursive script that reads "Dallas Miller".

DALLAS MILLER
Water Rights Division

Enclosures

Report Date: APRIL 26, 1994

OREGON WATER RESOURCES DEPARTMENT

SATISFACTORY REPORT OF TECHNICAL REVIEW
FOR WATER USE PERMIT(S)

OBJECTIONS TO THE PROPOSED WATER USE AS DESCRIBED BELOW MUST BE RECEIVED IN WRITING BY THE OREGON WATER RESOURCES DEPARTMENT, 3850 PORTLAND ROAD N.E., SALEM, OREGON 97310, BY 5 P.M. ON OR BEFORE: JULY 1, 1994

1. APPLICATION FILE NUMBER - G 13482

2. MINIMUM APPLICATION INFORMATION

Applicant name/address/county/phone:

THOMSON S. MARTIN
PO BOX 128
RUFUS, OREGON 97050
SHERMAN CO PH 739-2204

Date application received for filing and/or tentative date
of priority: 8/6/93

SOURCE: A WELL TRIBUTARY TO: COLUMBIA RIVER

Purpose and/or use: IRRIGATION OF 37.0 ACRES

Flow: 150.0 GALLONS PER MINUTE

Point of Diversion Location:
SENE SEC 7, T 2 N, R 17 E, WM.

Place of use:

SE NW 21.0 ACRES
SW NE 9.0 ACRES
NW SE 7.0 ACRES
SEC 8
T 2 N, R 17 E, WM.

GROUNDWATER AVAILABILITY

This is an application for use of groundwater. The Groundwater/Hydrology Section report indicates that:

Pursuant to OAR 690-09-040, the proposed groundwater withdrawal will not have the potential to cause substantial interference with surface water.

In addition, the Groundwater/Hydrology Section has reported the water is likely to be available to supply the proposed use.

CONFLICTS WITH OTHER WATER RIGHTS:

There are no existing rights from this point of diversion.

There are no existing water rights appurtenant to the lands described in the application.

REPORT CONCLUSIONS:

Based on the Department's review of water availability and Oregon Administrative Rules, water in the amount of 0.33 CFS is likely available for 7 months. Therefore, the Director finds that water is available in sufficient amount and during periods which will reasonably support the proposed use.

THE PROPOSED WATER USE, AS CONDITIONED, SATISFIES THE REQUIREMENTS OF THIS TECHNICAL REVIEW.

This Report of Technical Review sets out the Director's technical analysis of the application. In addition to this technical analysis, the Director will evaluate this application to determine whether the proposed water use might impair or be detrimental to the public interest under the standards set out in ORS 537.170(5) and OAR 690-11-195. Matters relating to public interest in the proposed water use which are raised in objections will be evaluated following the 60-day objection period.

PROPOSED PERMIT CONDITIONS

Application: G 13482

The following conditions will apply to water use under the permit, and will appear in the permit, if issued.

1. Use of water under this permit is subject to all prior rights.
2. Period of allowed use: IRRIGATION OF 37.0 ACRES FROM APRIL 1 THROUGH NOVEMBER 1.
3. Rate of use: 0.33 CUBIC FOOT PER SECOND (150 GPM)
4. Water use development requirements:
 - A. Begin construction by (one year from issuance of permit).
 - B. Complete construction by October 1, 1996.
 - C. Completely apply the water to beneficial use by October 1, 1997.
5. Measurement, recording and reporting conditions:
 - A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
 - B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
 - C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

6. Failure to comply with any of the provisions of the permit may result in action including, but not limited to, restrictions on the use, penalties, or cancellation of the permit.
7. The permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
8. The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.
9. The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times. The use of water shall be limited when it interferes with any prior surface or ground water rights.
10. Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.
11. The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE- EIGHTIETH of one cubic foot per second (or its equivalent) and 3 acre-feet for each acre irrigated during the irrigation season of each year.

WATER RESOURCES DEPT.
SALEM, OREGON

This information is needed to determine compatibility with local comprehensive plans as required by ORS 197.180. The Water Resources Department will use this and other information to evaluate the water use application. DO NOT FILL OUT THIS FORM IF water is to be diverted, conveyed, and/or used only on federal lands.

Applicant's Name: Thomson S. Martin
Address: P.O. Box 128
City: BUTTS State: Ore Zip: 97050 Day Phone: 503-739-2204

Please provide information as requested below for all tax lots on or through which water will be diverted or used. (Attach extra sheets as necessary.) Applicants for municipal use, or irrigation uses within irrigation districts, may substitute existing and proposed service area boundaries for the tax lot information requested below.

Tax Lot or Local I.D.#	Plan Designation/Zoning (e.g. Rural Residential/RR-5)	Check All That Apply		
		Water Diverted	Water Conveyed	Water Use
<u>T2 R14+17 EUM</u>	<u>PLAN: Range Land & Crop Land</u>			
<u>Sec 12+8</u>	<u>ZONING: EFU</u>			

Please list all counties and cities within which water is proposed to be diverted, conveyed, and/or used. Sherman

The following section must be completed by a planning official from each county and city listed unless your project will be located entirely within city limits. In this case, only the city planning agency must complete this form. Please request extra forms as needed.

For Local Government Use Only

Local government planning officials are to complete the remainder of this form. If this form can not be completed while the applicant waits, please sign and detach the receipt as instructed below. Please mail the completed form directly to the Water Resources Department (3850 Portland Rd. NE, Salem, OR, 97310) within 60 days of the date of receipt as shown below. If the form is not completed within 60 days, the Department may take action to approve the water use.

a) Check the appropriate box below and provide requested information.

☒ Land uses to be served by proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): ARTICLE 3 SEC. 10. Go to section b) on reverse side.
SHERMAN CO. ZONING ORDINANCE

☐ Land uses to be served by proposed water uses (including proposed construction) involve discretionary land use approvals as listed in the table below. **Note:** Please attach documentation of applicable local land use approvals which have already been obtained. (Record of Action plus any accompanying findings is sufficient.)

WATER RESOURCES DEPARTMENT

Application for a Permit to Appropriate Ground Water

Applicant(s) Thomson S. Martin
(Please print or type - use dark ink)

Mailing Address: P.O. Box 128
Rufus Oregon 97050 503-739-2204
City State Zip Daytime Phone No.

I (We) make application for a permit to appropriate the following described ground waters of the State of Oregon:

1. THE DEVELOPMENT (number of wells, tile lines, infiltration galleries, etc.):
(1) irrigation well

If development is less than one mile from a natural stream, give the following:

Distance from development to stream: _____

Elevation difference between streambed and development: _____

NOTE: Wells must be constructed according to standards set by the department for the construction and maintenance of water wells. If the well is already constructed, please enclose a copy of the well driller's log with this application, and skip to Section 2 below.

Diameter of well: _____ Depth in feet: _____

Type and size of well casing: _____ No. of feet: _____

Estimated depth to water: _____

Type of access port or measuring device: _____

Wells to be drilled by: _____

Address: _____

If the water well is flowing artesian, describe your water control and conservation works: _____

2. TOTAL AMOUNT OF WATER to be applied to beneficial use: _____ cubic feet per second, OR ASO gallons per minute. If water is to be used from more than one ground water source, give the quantity of water from each: _____

3. **INTENDED USE(s) OF WATER:** Agricultural Irrigation

If for more than one use, give the quantity of water from each source for each use; _____

If for **DOMESTIC** use, state the number of households to be supplied; _____

If for **MUNICIPAL OR QUASI-MUNICIPAL** use, state the present population to be served, and an estimate of the future requirements; (List population projections, water needs, anticipated areas to be provided water.)

If for **MINING** use, state the nature (gold, silver, etc.) of the mines to be served; _____

If for **IRRIGATION**, or other land area use, state the **TOTAL** number of acres to be developed under each use;

Irrigation 37

Other (describe) _____

4. **DESCRIPTION OF WATER DELIVERY SYSTEM:** Include dimensions and type of construction of diversion works, length and dimensions of supply ditches or pipelines, size and type of pump and motor. If for irrigation, describe the type of system (i.e., flood, wheel line, hand line, drip, other).

1100 feet 5" ID PUC Pipe
20HP Submersible Pump
System is Center Pivot and Hand line

5. **PROJECT SCHEDULE:** (List month and year)

Proposed date construction work will begin well drilled Spring 1990

Proposed date construction work will be completed Spring 1993

Proposed date water use will be completed 1993

NOTE: A map prepared by a Certified Water Right Examiner (CWRE) and a complete legal description of the subject property are required under ORS 537.140 and OAR 690 as a part of your application. The legal description may be copied from your deed, title insurance policy, or land sales contract.

6. a) In the event any deficiencies are noted involving the application map enclosed herein, please return the map with instructions for correction to (check one):

☒ Applicant ☐ CWRE ☐ Other (Identify in REMARKS section)

b) In the event any deficiencies are noted involving the application, please return the application with instructions for correction to (check one):

☒ Applicant ☐ CWRE ☐ Other (Identify in REMARKS section)

7. Are all lands involved (including the proposed diversion site, place of use, and access for conveying the water) under your ownership? No. If not, list in the REMARKS section below, or on an attached sheet, the names and mailing addresses of the legal owners of all property involved in the proposed development.

NOTE: Prior to receiving a certificate of water right, the permit holder must submit to the Water Resources Department the results of a pump test meeting the department's standards. The Director will require water level or pump test results every ten years thereafter.

REMARKS: All ownership is in the family

Mother - Barbara B. Martin 21410 Highway 224 Clackamas 97015

Sister: Ann Hill 3921 S.E. Aldercrest Milwaukie 97222

Sister: Judy Lidstrom 2537 S.W. Arden Portland 97201

Sister: Carol Jonasson 210 Mariposa Terrace Medford 97504

I/We certify that the information I have provided in this application is an accurate representation of the proposed water use and is true and correct to the best of my knowledge.

NOTE: The permit, when issued, is for the beneficial use of water without waste. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible the land use you propose may not be allowed if it is not in keeping with the goals and acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.

Dear Applicant:

Your application file was recently reviewed. Before we can process your application further, you need to provide us with additional information.

Your application requests to use the waters of A WELL IN THE GIRKING CANYON BASIN for IRRIGATION OF 37 ACRES. The application map identifies 33.23 acres.

It will be necessary for you to revise the map to identify the 37 acres noted in the application, **OR** correct your application to agree with the map.

If you wish to correct your application, you must do so in writing. A signed note or letter referencing file G-13482 and describing the change would be sufficient.

The original mylar map will be returned for correction upon request.

If you need further assistance please contact the Water Rights Section at the address listed below or phone (503)378-3739.

Sincerely,

Douglas L. Baer
Senior Water Rights Technician

Legal Description

Legal Description

TOWNSHIP 2 NORTH, RANGE 16 E.W.M. Sherman County, Oregon

Section 1: The South half of the Southeast quarter (S $\frac{1}{2}$ SE $\frac{1}{4}$); the South half of the Southwest quarter (S $\frac{1}{2}$ SW $\frac{1}{4}$), and a triangular piece following the bluff in the North half of the Southwest quarter (N $\frac{1}{2}$ SW $\frac{1}{4}$), excepting therefrom that certain property conveyed by Charles A. Tom and Lorraine V. Tom, husband and wife, husband, grantors, unto Tom Farms, Inc., an Oregon corporation, by a warranty deed dated June 26, 1974, and recorded in Book 42, page 79, Sherman County Deed Records.

Section 2: The Southeast quarter of the Southeast quarter (SE $\frac{1}{4}$ SE $\frac{1}{4}$).

Section 11: The Southwest quarter (SW $\frac{1}{4}$); the West 70 acres of the West half of the Northeast quarter (W $\frac{1}{2}$ NE $\frac{1}{4}$); the East half of the Northwest quarter (E $\frac{1}{2}$ NW $\frac{1}{4}$); and the East 20 acres of the West half of the Northwest quarter (W $\frac{1}{2}$ NW $\frac{1}{4}$).

Section 12: The Northwest quarter (NW $\frac{1}{4}$) and the Northeast quarter (NE $\frac{1}{4}$).

TOWNSHIP 2 NORTH, RANGE 17 E.W.M. Sherman County, Oregon

Section 5: The Southwest quarter (SW $\frac{1}{4}$).

Section 6: The Southeast quarter (SE $\frac{1}{4}$); the South half of the Northwest quarter of the Southwest quarter (S $\frac{1}{2}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$); the South half of the Southwest quarter (S $\frac{1}{2}$ SW $\frac{1}{4}$) and the Northeast quarter of the Southwest quarter (NE $\frac{1}{4}$ SW $\frac{1}{4}$).

Section 7: The Northwest quarter (NW $\frac{1}{4}$); the Northeast quarter (NE $\frac{1}{4}$) and the Southeast quarter (SE $\frac{1}{4}$).

Section 8: The Northwest quarter (NW $\frac{1}{4}$); the Southwest quarter (SW $\frac{1}{4}$) and the West half of the East half (W $\frac{1}{2}$ E $\frac{1}{2}$) lying West of the county road.

AUG 28 1995

WATER
SALEM, OREGON

Section 17: All.

Section 18: The Northeast quarter (NE $\frac{1}{4}$).

ALSO, the Southerly 1,485 feet, more or less, of the Southeast quarter of Section 11, Township 2 North, Range 16 E.W.M., containing 90 acres, more or less, and also an easement for ingress and egress over the Easterly 75 feet of that portion of the Southeast quarter of Section 11, Township 2 North, Range 16 E.W.M. not herein conveyed.

EXCEPTING therefrom, a parcel of land being a portion of Sections 6 and 7, Township 2 North, Range 17 E.W.M., Sherman County, Oregon, described as follows with reference to the Oregon State Coordinate System, North Zone

Beginning at a point which is South $89^{\circ} 23' 14''$ East 2390.0 feet from the corner of Sections 1, 6, 7 and 12, Twp. 2 North, Ranges 16 and 17 E.W.M.; (Y=733,694.1, and X=1,936,325.8 U.S. Engineers) from the initial corner of metes and bounds North $56^{\circ} 30' 30''$ East 1856.1 feet to the Northerly corner, South $0^{\circ} 22' 50''$ East 1678.0 feet to the easterly corner, South $61^{\circ} 08' 40''$ 1050.00 feet to Southerly corner, North $28^{\circ} 51' 20''$ West 1325.00 feet to Westerly corner and point of beginning.

ALSO excepting therefrom, a parcel of land in the Southwest quarter of Section 6, Township 2 North, Range 17 E.W.M., Sherman County, Oregon, containing 0.06 of an acre, more or less, and described as follows:

Beginning at a point which is North $52^{\circ} 17' 00''$ East, 2110.3 feet from the Southwest corner of Section 6, Twp. 2 North, Range 17 E.W.M.; thence North $10^{\circ} 41' 20''$ West 50 feet; thence North $79^{\circ} 18' 40''$ East 50 feet; thence South $10^{\circ} 41' 20''$ East 50 feet; thence South $79^{\circ} 18' 40''$ West, 50 feet to the point of beginning. The bearings refer to the Oregon Coordinate System, North Zone. The Survey is shown on B.P.A. Drawing 111358, dated September 15, 1970.

RESOURCES
DEPARTMENT

Dear Applicant:

Your application file was reviewed recently and was found to be lacking the following item(s):

- ☒ FEES -- Please submit recording fees in the amount of \$ 174.00.
- ☒ MAP -- The map must be prepared by a Certified Water Rights Examiner.
- ☒ LEGAL DESCRIPTION -- A complete legal description of the property. This may be found in your deed or title insurance policy.
- ☒ EASEMENT -- Permission/Authorization to access lands included in the application but not owned by the applicant.
- ☐ OATH -- The following statement must be signed, dated, and included in the application file:
"I/We certify that the information I have provided in this application is an accurate representation of the proposed water use and is true and correct to the best of my knowledge."
- ☐ CONFLICT RESOLUTION -- Your proposed use conflicts with an existing water right. Please advise us of how you plan to resolve the conflict.
- ☐ OTHER: _____.

These items must be received before a permit may be issued. If these items are not received within 30 days (90 days for the map) from the date of this letter, the Department may begin the procedure for rejecting the application. If for any reason you are not able to submit the required material(s) within the time allotted, please let me know as soon as possible.

To help speed processing, please mark the envelope "URGENT" and send the requested items to my attention at the address listed below.

Sincerely,

Douglas L. Baer
Senior Water Rights Technician

DEPARTMENT

RE: Application File # G-13482

Dear Mr. Martin:

On December 1, 1994, a letter was sent from the Department requesting additional information necessary to complete your application for water use. As of this date these items have not been received:

- ▶ Recording fees in the amount of \$174.00.
- ▶ A signed statement that you either own all lands involved in the proposed water use, or have written authorization or easement permitting access to lands owned by others.
- ▶ A map meeting the requirements of OAR 690-11-070, copy enclosed. The map must show the place where water is to be used and the point where water will be diverted. The map must identify the township, range, section, and nearest quarter-quarters where the water will be diverted and used. If the proposed use is irrigation, the map must also indicate the number of acres irrigated in each quarter-quarter.
- ▶ A complete legal description of the property. This may be found in your deed or title insurance policy.

Please submit these items by **August 28, 1995**. If we do not receive the items requested above by this date, we will reject your application consistent with ORS Chapter 537. If your application is rejected, any fees submitted in excess of the examination fee will be refunded; however, the examination fee of \$200.00 is non-refundable and will not be returned. In addition, the priority date associated with your application will be lost.

Should you have any questions regarding your application or the required materials listed above, or if you need to request an extension of time, please call me personally at 1-800-624-3199, extension 458.

Sincerely,

Jerry Gainey

Map to Accompany Application for Water Use Permit

690-11-070 Maps submitted with water use applications shall [REDACTED] meet the following criteria:

(1) The application map, which is made part of the record, shall be of permanent quality and drawn with sufficient clarity so as to be easily reproduced.

(2) Maps shall be drawn on tracing linen, tracing vellum or mylar except that maps measuring 11" x 17" or smaller may be prepared on good-quality paper. All maps shall be drawn to a standard, even scale of not less than 4 inches = 1 mile. Small area maps may be more easily and clearly drawn to a larger scale, such as 1 inch = 400 feet.

(3) Four prints of a platted and recorded subdivision may be submitted as the application map if all of the required information is clearly shown on each print. Notwithstanding the provisions of subsection (5)(a) of this rule, the location of the diversion point may be given with reference to a lot or block corner of the subdivision.

(4) Four permanent-quality prints of other maps, such as deed description survey maps or county assessor maps, also may be used if all the required information is clearly shown on each print. A single print of these may be used only if it is reproduced as a transparency, such as a sepia print or on mylar film.

(5) Each copy of the map shall show clearly each of the following requirements that apply to the proposed appropriation:

(a) The location of each diversion point, well, or dam by reference to a recognized public land survey corner. The locations may be shown by distance and bearing or by coordinates (distance north or south and distance east or west from the corner);

(b) The location of main canals, ditches, pipelines, or flumes;

(c) The location of the place where water is to be used. If for irrigation, the area to be irrigated in each quarter-quarter of a section shall be indicated by shading or hatching and the number of acres in each quarter-quarter section, donation land claim, government lot or other recognized public land survey lines indicated; and

(d) The scale to which the map is drawn, the section number, township, and range, and a North directional symbol.

Hello:

Under separate cover I have enclosed our report of technical review. Your application file was recently reviewed. Before we can process your application further, you need to provide us with additional information, documentation, or fees.

Prior to issuance of the permit, we will need to receive total fees in the amount of \$ 374.00; being an examination fee of \$200.00, permit recording fee for the irrigation of 37.00 acres of \$ 174.00. Since you have previously submitted \$ 200.00, an additional amount of \$ 174.00 is required.

In addition, please send the following:

a map prepared by a Certified Water Rights Examiner;

a legal description of the property where you plan to use water (you may copy this from your deed, title insurance policy, or sales contract);

a copy of written authorization or easement permitting access to land not owned by you, the applicant;

After the file is complete and the deadline for objections to the technical review expires, staff will again review the file for objections and further process your application as soon as possible.

Please feel free to contact me if you have any questions and I will be happy to address any concerns you may have.

Sincerely,

Dallas Miller

STATE OF OREGON
COUNTY OF SHERMAN
PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

PO BOX 128
RUFUS, OREGON 97050

503-739-2204

to use the waters of A WELL ~~TRIBUTARY TO: COLUMBIA RIVER~~ in the ~~DRAINAGE~~
BASIN for IRRIGATION OF 37.0 ACRES.

This permit is issued approving APPLICATION G-13482. The date of priority is AUGUST 6, 1993. The use is limited to not more than 150.0 GALLONS PER MINUTE ~~FT PER SECOND~~, or its equivalent in case of rotation, measured at the well.

The wells are located as follows:

SENE SEC 7, T 2 N, R 17 E, WM.

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and ~~3.0~~ acre-feet for each acre irrigated during the irrigation season of each year.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the proposed place of use under this permit is as follows:

SE NW 21.0 ACRES
SW NE 9.0 ACRES
NW SE 7.0 ACRES
SECTION 8
T 2 N, R 17 E, W.M.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

~~M&R~~

~~Use of water under this permit is subject to all prior rights.~~

~~Period of allowed use: IRRIGATION OF 37.0 ACRES FROM APRIL 1 THROUGH NOVEMBER 1.~~

~~Rate of use: 0.33 CUBIC FOOT PER SECOND (150 GPM)~~

Water use development requirements:

- A. Begin construction by (one year from issuance of permit).
- B. Complete construction by October 1, 1996.
- C. Completely apply the water to beneficial use by October 1, 1997.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.

- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

Failure to comply with any of the provisions of the permit may result in action including, but not limited to, restrictions on the use, penalties, or cancellation of the permit.

The permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times. The use of water shall be limited when it interferes with any prior surface or ground water rights.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE- EIGHTIETH of one cubic foot per second (or its equivalent) and 3 acre-feet for each acre irrigated during the irrigation season of each year.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Actual construction work shall begin on or before M@NTH , 1995 and shall be completed on or before October 1, 1996. Complete application of the water shall be made on or before October 1, 1997.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for beneficial use of water without waste. The water user is advised that new regulations may require use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director of the Water Resources Department has found that the proposed use of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Issued this date, M@NTH , 1994.

1. PER THE _____ Basin rules, one or more of the proposed POA's is/is not within _____ feet/mile of a surface water source (_____) and taps a groundwater source hydraulically connected to the surface water.

2. BASED UPON OAR 690-09 currently in effect, I have determined that the proposed groundwater use
 - a. _____ will, or } have the potential for substantial interference with the nearest surface water
 - b. ☒ will not } source, namely intermittent Parker Canyon Stream; or
 - c. _____ will, if properly conditioned, adequately protect the surface water from interference:
 - i. _____ The permit should contain condition #(s) _____;
 - ii. _____ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. _____ The permit should be conditioned as indicated in item 4 below; or
 - d. _____ will, with well reconstruction, adequately protect the surface water from substantial interference.

3. BASED UPON available data, I have determined that groundwater for the proposed use
 - a. ☒ will, or } likely be available in the amounts requested without injury to prior rights and/or
 - b. _____ will not } within the capacity of the resource; or
 - c. _____ can, if properly conditioned, avoid injury to existing rights or to the groundwater resource;
 - i. _____ The permit should contain condition #(s) _____;
 - ii. _____ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. _____ The permit should be conditioned as indicated in item 4 below.

4.
 - a. _____ THE PERMIT should allow groundwater production from no deeper than _____ ft. below land surface;
 - b. _____ The permit should allow groundwater production from no shallower than _____ ft. below land surface;
 - c. _____ The permit should allow groundwater production only from the _____ groundwater reservoir between approximately _____ ft. and _____ ft. below land surface;
 - d. _____ Well reconstruction is necessary to accomplish one or more of the above conditions.
 - e. _____ One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.

REMARKS:

WELL CONSTRUCTION (If more than one well doesn't meet standards, attach an additional sheet.)

5. THE WELL which is the point of appropriation for this application does not meet current well construction standards based upon:
- a. ☐ review of the well log;
 - b. ☐ field inspection by _____;
 - c. ☐ report of CWRE _____;
 - d. ☐ other: (specify) _____
6. THE WELL construction deficiency:
- a. ☐ constitutes a health threat under Division 200 rules;
 - b. ☐ commingles water from more than one groundwater reservoir;
 - c. ☐ permits the loss of artesian head;
 - d. ☐ permits the de-watering of one or more groundwater reservoirs;
 - e. ☐ other: (specify) _____
7. THE WELL construction deficiency is described as follows: _____
8. THE WELL
- a. ☐ was, or
 - b. ☐ was not
 - c. ☐ I don't know if it met standards at the time of construction.
- constructed according to the standards in effect at the time of original construction or most recent modification.

RECOMMENDATION:

- A. ☐ I recommend including the following condition in the permit:
"No water may be appropriated under terms of this permit until the well(s) has been repaired to conform to current well construction standards and proof of such repair is filed with the Enforcement Section of the Water Resources Department."
- B. ☐ I recommend withholding issuance of the permit until evidence of well reconstruction is filed with the Enforcement Section of the Water Resources Department.
- C. ☐ REFER this review to Enforcement Section for concurrence.

THIS SECTION TO BE COMPLETED BY ENFORCEMENT PERSONNEL

I concur in G/H's recommendation A or B above relating to conditioning or withholding the permit.
_____, 1992.

(Signature)

I do not concur in G/H's recommendation A or B above relating to conditioning or withholding the permit for the following reasons: _____

INSTRUCTIONS FOR WELL LOG

Complete each numbered item as appropriate.

- (1) Owner: Enter owner's name and address as completely as possible.
- (2) Type of Work: Check one.
Describe reconditioning or abandonment procedures under Item 11.
- (3) Drill Methods: Mark the correct box: rotary air, rotary mud, cable, or other.
- (4) Proposed Use: Check as many boxes as apply.
A community well is one that serves four or more households.
- (5) Borehole Construction: Indicate depth of completed well.
If special standards were used, mark the date approval was received from the Water Resources Department.
Describe each change in borehole size or construction.
For full descriptions of seal methods see Appendix B of Rules and Regulations Prescribing General Standards for the Construction and Maintenance of Water Wells in Oregon. Seal methods may include:
Method A) Use of a borehole plug plus casing with float shoe. Grout is pumped inside casing until it completely fills the volume to be sealed.
B) A sealed cap is on the head of well casing. Grout is pumped or air pressure injection continuously until grout returns to surface outside of casing. Pressure is maintained at least 24 hours or until set. Neat cement grout of minimum one inch annular space around the casing is required.
C) The well bore is plugged and the well casing is seated firmly at the bottom of the drill hole. Grout pipe is run through the annular space between casing and well bore. Grout pumped through pipe until it returns to land surface or completely fills the volume to be sealed.
D) Well bore is plugged and the casing is plugged. Grout is pumped or placed by bailer in the casing. Second plug is put in the casing and casing is capped with pressure cap. Water or mud is pumped under pressure forcing the grout and upper casing plug down the casing. When plug reaches the point desired above the bottom of the casing, the pump is stopped and the casing is seated.
E) If sealing depth is less than 30 feet, the well bore may be plugged at the lowest point to be sealed. Grout is placed by dump bailer, grout pipe or tremie pipe at the bottom of the drill hole. Well casing is fitted with plug and lowered into hole forcing grout upward into annular space.
If well was gravel packed, show locations where gravel was placed and the size of the gravel used.
- (6) Casing/Liner: Describe each type of casing and liner and the locations.
If one or more shoes were left in the well, show the final locations.
- (7) Perforations/Screens: Describe each type of perforation and the location. Methods may include use of drill, mills knife, torch or other. Show if perforations were in the casing, liner or both.
Describe the type of screens installed, if any. Mark whether the diameter is telescope or pipe size.
- (8) Well Tests: Mark the type of test that was used to determine the quantity of water available from the well. Indicate the temperatures of water strata found, and the depths at which artesian flows were found.
If a chemical or biological water analysis was done, show who performed the test.
If any strata contained water not suitable for use, mark the reason it was not usable. The method that the strata were sealed should be indicated in Section 5 (bore hole construction).
- (9) Location of Well:
Indicate the location of the well as accurately as possible so that it can be located by other parties in the future. Section, Township, Range and Tax Lot location, with a clear street address must be indicated. If LORAN equipment is available, please report latitude and longitude in degrees, minutes and seconds.
- (10) Static Water Level: Show the static water level of the completed well.
Indicate the artesian pressure, if appropriate.
- (11) Water Bearing Zones: Indicate the depth at which water was first found. Show the waterbearing strata and the position of the static water levels (SWL). Include an estimate of flow rate, if possible.
- (12) Well Log: Show the approximate beginning ground elevation above mean sea level. This information may be determined from county topographical maps if available.
Describe the color, texture, grain size, and structure of materials and show the thickness of each stratum and aquifer drilled. There should be at least one entry for each change of formation.
Mark the dates and sign as appropriate at the bottom of the form.

The white copies of this report must be filed with the Water Resources Department, 3850 Portland Road, NE, Salem, OR 97310 within 30 days from the date of well construction, alteration or abandonment. The yellow copy is for the Well Constructor, the pink copy is for the Landowner.

COMMENT FORM

Please list below the Application Number of the water use application(s) that are of interest to you. When the technical evaluation is completed a report of the technical review of these applications will be delivered to you.

WATER RESOURCES DEPT.
SALEM, OREGON

Application #s G13480 G13481 G13482, _____, _____

Send to: Steve Schneider
21881 River Rd NE
St. Paul, OR 97137

Please include specific comments or concerns. Use additional sheets if necessary.

Return to:
Oregon Water Resources Department
3850 Portland Road N.E.
Salem, Oregon 97310

This Comment corresponds to the AUG/11/1993 Public Notice.

August 10, 1993

THOMSON S MARTIN

PO BOX 128
RUFUS, OR 97050

REFERENCE: File(s) G-13481, G-13482

We have received your application(s) for a water use permit along with your supporting data, documentation, and fees. A receipt is enclosed here unless you were previously issued one. Your application has been assigned the above referenced file number. Please refer to this number whenever you contact us about your application.

Even though your application has been received, filed and assigned an application reference number, no authorization has been granted to develop your water use. The filing of an application does not create a water right. Water may not be used without a water right permit.

After an application has been accepted for filing, public notification of the application is made, followed by the mandatory 30-day comment period. Thereafter, applications can be considered for processing as time allows.

At present the Water Resources Department has a backlog of several thousand applications for water use permits which has delayed our application processing time. Applications are processed in the order in which they are received.

The processing of an application does not guarantee that a water right permit will be issued. Each application must undergo a specialized analysis called a technical review and a public interest review. There is no way to determine at this time whether your particular proposed water use will be recommended for a permit.

REFERENCE: File(s) - G-13481, G-13482

When the report on the technical review is completed and sent to you, a 60-day objection period begins during which you, the applicant, or anyone who has expressed an interest in your proposed water use may communicate to us their disagreement with what we have said in our report on your application. After the 60-day objection period, the Department conducts the public interest review and considers any objections which have been made.

After any objections have been considered, there may follow time to allow parties to resolve conflicts over the proposed water use. In addition, a 30-day protest period may be required. Lastly, it may be necessary to schedule a hearing or send the application to the Water Resources Commission for their review. In most cases no objections are received and the application processing can proceed without further conflict resolution, protest, or hearing.

If your application is recommended for approval and a permit is issued, the use allowed by the permit will be subject to the Basin Program Rules of the Water Resources Commission, instream flow requirements, and the demands of prior right holders, and other conditions to conform the water use to particular standards.

Please contact the Water Rights Section of the Water Resources Department if you have any questions. You may write to us at 3850 Portland Road, Northeast, Salem, Oregon 97310 or you may call 378-3739 in Salem or toll free from within the state 1-800-624-3199.

Sincerely,

Steve Brown ⁶⁷
Manager _{PAH}
Water Rights Division
