The assignment of permits R-4407, R-7308, R-8796, R-10289, R-10290, R-10302, R-10637, R-10646, R-10648, R-10649, R-10650, R-10651, R-10676, R-10681, R-10683, and R-10689 from the Bureau of Land Management, Vale District, to you have been recorded in the records of the Water Resources Department.

Our records have been changed accordingly and the original assignment form, attachment list, along with our receipt 58883 covering the \$20 recording fee, is enclosed.

Old Johnson Reservoir (0049), South Indian Reservoir (0258), Turnbull Peak Reservoir (1781), Mud Puddle Reservoir (1789), and Seventy Seven Pit Reservoir (5035) have not been assigned because there is no record of them with this agency.

Permit numbers R-3670 (0075), R-3462 (0080), R-3461 (0161), R-3374 (0164), R-3373 (0167), R-3839 (0168), R-3838 (0169), R-3669 (0170), R-3658 (0179), R-3653 (0183), R-3656 (0192), R-3664 (0197), R-7262 (0256), R-5226 (1780), R-5227 (1783), R-5225 (1791), R-7470 (3843), R-7434 (3844), R-7435 (3847), R-7471 (3851), R-4277 (0003), R-4408 (0797) and R-7304 (1829) could not be assigned because certificates of water right have been issued confirming beneficial use of water made under the terms of the permits. Such perfected rights are appurtenant to the specific place of use upon which the rights were established and travel with the land with change of ownership.

Sincerely,

Thomas E. Shook

PLEASE READ THE FOLLOWING INSTRUCTIONS CAREFULLY

Your permit has been recorded in this office, but you should hold the original permit as evidence of your water right. If the land is sold, an assignment to the new owner must be recorded in this office. Assignment blanks will be furnished upon request.

The permit fixes time limits for beginning of construction, completion of construction and complete application of water to beneficial use. The law requires that you begin actual construction within one year from the date of issuance of the permit or your right will be lost. The Water Resources Director is authorized to extend the time for completion of construction and for complete application of water upon proper showing, but has no authority to extend the time limit for beginning of construction.

Forms A, B and C may be attached for submitting (A) Notice of Beginning of Construction, (B) Notice of Completion of Construction and (C) Notice of Complete Application of Water. If your application has stated that construction has already been started, or that construction work is completed, or that complete application of water has been made, only the required forms will be attached.

If your project will require only a portable pumping plant and pipelines, the acquisition of such equipment will be considered construction.

When complete application of water has been made, Form C should be submitted as the first step in proof of appropriation. When proof satisfactory to the Water Resources Director has been made, the right will be confirmed by issuance of a certificate. The certificate will limit the right to the extent that water has been applied to beneficial use in accordance with the terms of the permit.

The late summer flow in nearly all streams is required to satisfy existing rights. Your permit grants a right to use water only when there is a surplus in the source involved over and above that required to satisfy prior rights.

Sincerely,

William H. Young
