

CLAIM OF BENEFICIAL USE REPORT

SWR - 180

On December 12, 1992, I and my instrument man met with Mr. Edwin L. Owens and made the field survey of the existing place of use and tied the Point of Diversion's. The Owens address is 93790 Horton Road, Blachly, OR., 97412. Their phone number is 1-503-925-3321. The existing use appears to be the same as the pre-1909 use as explained to me.

The source of water for Diversion Point No. 1 is Lake Creek and the source of water for Diversion Point No. 2 is a shallow well.

The diversion point No. 1 is a screened foot valve attached to an 1 1/2 plastic pipe in the water. This 1 1/2 inch plastic pipe runs to a Jet on the bank of the creek. From this Jet, a 1 1/2 inch plastic pipe and an 1 inch plastic pipe runs underground to the pump with motor within their garage. These pipes run from the Diversion Point to the Pump at a bearing of South 61° East 110 feet. The Diversion Point No. 2 is a shallow well near the house.

For the surface water from Lake Creek, a 1/2 Horsepower Century Electric Motor Model No. CA-680V-FXM1-1AFA, Serial No. AS9 with a rated RPM of 3500. This pump is connected direct by a steel shaft to Dempster Pump. This pump has 1 1/2 inch and 1 inch pipes running to the jet on the intake side and has a 3/4 inch discharge outlet to the pressure tank. For the Well at Diversion Point No. 2, a Franklin Electric 1/2 horsepower motor, Model No. 1104345409 with a rated RPM of 3450 is connected direct by a steel shaft to a Dempster Pump with an 1 1/4 inch intake and a 3/4 inch discharge openings.

At this time of the year, the irrigation system was not in operation so no pressure readings were taken. 5/16th inch diameter garden hoses are used for the irrigation system using two Nelson No. 182 "Cant Beat 'Em" sprinklers having 3/16 inch opening on top of a 1 3/4 inch diameter x 1 inch high chamber.

The use of the surface water from Diversion Point No. 1 is for irrigation (yard and garden) and for domestic use after the ground water lowers so that the shallow well goes dry. The ground water from Diversion Point No. 2 is used for domestic as long as the well has water in it.

The ground elevation at the corner of the garage where the pump is located for Diversion No. 1 is some 14.1 feet above the water surface of Lake Creek at the Point of Diversion on October 21, 1994. The area used for irrigation is basically flat ground.

Assuming that the pump was running at 75% efficiency with the 14.1 foot lift a 45 psi, I calculate the csf to be 0.03.

$$\frac{7.04 \times 0.5}{14.1 + (45 \times 2.31)} = \frac{3.52}{118.95} = 0.030 \text{ cfs.}$$

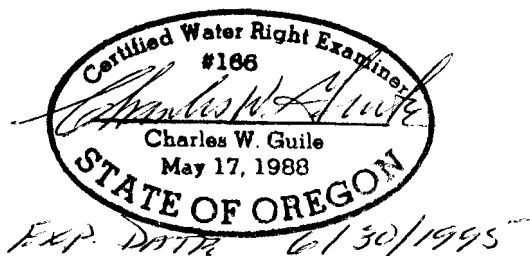

Using the sprinklers at 45 psi, I calculate the cfs to be 0.03. $\frac{2 \times 6.8}{449} = \frac{13.6}{449} = 0.030 \text{ cfs.}$

For the domestic use of the residence, I used 2.5 gpm and divided by 449 gpm which calculates the cfs to be 0.01. $\frac{2.5}{449} = 0.006 \text{ cfs.}$

The Point of Beginnings are the Diversion Points which were tied by survey using a Total Station instrument. Bearings were based on Lane County Department of Public Works published bearings of the County Road running along the Owens property. The Point of Diversion No. 1 computes to be 35 feet North and 570 feet East of the Brass Cap monument marking the Section Corner to Sections 2, 3 10 and 11, Township 16 South, Range 7 West of the Willamette Meridian and the Point of Diversion No. 2 computes to be 55 feet South and 660 feet East of the same Section Corner.

On the front page of the application form, line 6, "Location of Place of Use", the Owens copied from their tax statement 16-07-11, not realizing the the County placed the Section Number last whereas you ask for the Section Number first. Therefore, the use of the water is in Section 11, Township 16 South, Range 7 West of the Willamette Meridian, in Lane County, Oregon.

The final proof survey and inspection of the use as found to be for SWR - 180 was completed by me on October 21, 1994 and the facts contained in this report and accompanying final proof map are correct to the best of my knowledge.

Charles W. Guile CWRE - 166

I, Edwin L. Owens, agree to the findings of the CWRE and do submit this site report and map as my Claim of Beneficial Use of the water as provided in my application being SWR - 163.

Edwin L. Owens

RE: SWR-180

Dear Mr. Owens:

In regards to your Pre-1909 Vested Water Right Claim, Mr. Don Knauer of the State of Oregon Water Resources Department says that the Map I prepared for you is not right, that I should have prepared a **FINAL PROOF MAP AND A BENEFICIAL USE REPORT** for you to submit along with your claim. On May 29, 1991, Mr. Knauer did send out a memo stating this, of which I placed it in my water right's file along with numerous other mailings from the Department and forgot about receiving his memo when you contacted me to prepare the map.

I was not asked to do a map for a Pre-1909 claim until late in 1992 and early in 1993. The instructions to you that we discussed was only that a map prepared by a CWRE must be submitted along with your claim of use. The instructions to you did not specify that a final proof map and beneficial use report was require. If it had, I would have known what was needed and would have advised you differently and would have prepared the final proof map and the beneficial use report, if you still thought that you had a claim.

To prepare a Final Proof Map, I will need to survey the area of actual use and make a tie to a government corner. To prepare the Beneficial Use Report, I will need to get data from the motor, pump, sprinklers, etc., so to prepare the report. In case of springs, we will have to survey the spring and the lines to the place of use for the map.

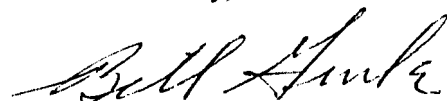

For the maps that I prepared from records, I will have to charge for the field survey and the data collected for the beneficial use report, but will prepare the new final proof map at no charge. For the maps that I did do a field survey for, I will only charge for the time spent in gathering the data for and preparing the Beneficial Use Report.

The above four sentences are a form type letter for you and others. The Water Resources Department received your application map and on July 30, 1993, Mr. Knauer wrote you a letter that additional information was needed.

I will need to come to your property and collect the data that we will need for the beneficial use report. The field survey that we did should be alright for the final proof map.

I would like to make an appointment towards the end of this month, at a time that I can visit with the Tradues on the same trip. Please write or give me a call to set up a time for us to get together, or have Jeanne coordinate the trip with me.

Sincerely,

Bill Guile

RE: Beneficial Use Permits and Final Proof Maps
For Adjudication

Dear Mr. Knauer:

I have misplaced your last letter but I remember by the tone of your letter it appears that I am not only the CWRE that has not responded to your request of submitting a Beneficial Use Report and a Final Proof Map for the various owners that I prepared a map for their adjudicated request's.

Again, I feel that the property owners were misled when the application only stated that a map by a CWRE was needed and did not explain to them that the above was needed.

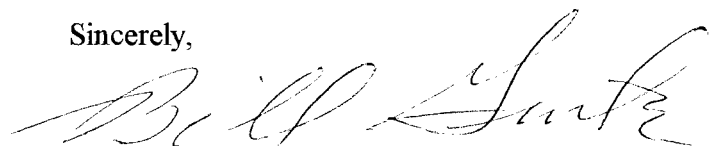

I will begin contacting the clients that I was involved with. Some, I did not know they were applying for adjudication as they also applied for a Water Permit with the maps that I prepared. One I only revised the map as her first CWRE was sick not knowing the background. The City of Eugene had specialist Attorney's in Water Rights from Portland involved and they did not mention that the above was needed. Some I would have advised against if I knew the above was needed.

Anyway, I am now in the process of notifying my clients that additional data is needed. I cannot give you a precise time table, only that it will probably run into next year. I will concentrate first on the ones that are irrigating land. Some of them might not qualify.

I am enclosing a copy of my letter to you dated December 14, 1993 which shows the ones that I have to contact. I have already completed the field survey for the Bryan's.

Thank you.

Sincerely,

Charles W. "Bill" Guile

File # SWR-355 dated October 29, 1993 - City of Eugene	(92-89B)

Dear Mr. Knauer:

I apologize for being so late in answering the above referred letters from you for the above referred File numbers.

When I began to receive your letters, I got so disgusted that I just threw them into a file as I could see that all would be returned. I think that all of the maps that I prepared for my clients who applied for Adjudicated Rights have now been returned. Also, I had many projects that had to be done by the end of 1993 which have now been completed. Therefore, I must take care of the above referred Files.

I guess what disturbs me the most is that I do not remember seeing anything that said the CWRE had to make a final proof map and a beneficial use report to be submitted along with my clients application for their Adjudicated Rights claims.

I have a copy of your pamphlet titled "Should I File a Pre-1909 Water Right Claim" dated April, 1990 which says that the claimant needs a map prepared by a CWRE and that the claimant needs to document their claims. I do not see where a beneficial use report from the CWRE is required.

Also, as I remember, the forms that my clients filled out with their application for their claim only said that a map by a CWRE was required. I told some of my clients who asked before they made application if they felt that they could document their proof of use, I would make the map.

RECEIVED

DEC 20 1993

WATER RESOURCES DEPT
SALEM, OREGON

Page 2

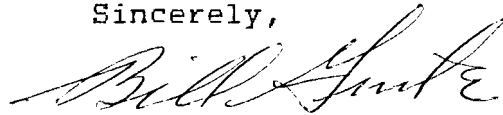

Therefore, I called my maps application maps and except for 5 of the maps, they were prepared from records and not from a field survey.

It appears that in all of the above referred File Numbers, you are asking me to prepare a Final Proof Map and a Beneficial Use Report for each. Please let me know by letter if this is what you expect for each and I will contact each client as to how I should proceed to meet your requirements as stated in your letters.

I have another client, Mr. Dale Carlson, who wants me to prepare the map for his claim. I want to do it correct the first time and I would appreciate hearing from you first. I told him I could do it in January, 1994.

Thank you for your understanding and promptness in replying.

Sincerely,

Charles W. "Bill" Guile

AFFIDAVIT

WATER DIV.
SALEM, OREGON

I, Raymond Wolfe, make this statement regarding the water usage practices of the residents of the property known as 93740 and 93754 Horton Road, Blachly, OR; and 93790 Horton Road, Blachly, OR. The information following is based on my personal knowledge or was told me by my parents.

I was born, as were my brothers and sisters, on the property now known as 93740 Horton Road, Blachly. I was born on January 8, 1924. At that time there was no second house in the immediate vicinity of our farmhouse.

Our family came into the Lake Creek Valley early in this century. The facts are that my grandfather, Lucian J. Wolf, along with my grandmother, Harriet Wolf, and my father, Ervin M. Wolf, came west in 1890 and settled in the Lake Creek Valley just after the turn of the century.

On August 4, 1903, my grandfather and my father purchased the 80 acre property at known as 93740 Horton Road, Blachly, from C. W. Washburne. My father and mother told me that they drew water from Lake Creek from the time they settled on the farm. They used water from Lake Creek to water stock, water a large garden, and for use in the house.

Our family kept dairy cattle and some pigs. When my brother, Harold, was in charge of the farm he raised beef cattle for a time. The cattle have always grazed the land on both sides of Lake Creek where it crosses the property, which is about a quarter-mile or more. And the cattle have always gone down to the creek to get their water, we never drew it out for them. They drink all along the full length of the creek on our property.

My Father later sunk a shallow well near the farmhouse. The well had a pitcher pump and the water was used for household use. The creek water was plumbed to a faucet with a sink on the back porch and was also plumbed into the milk-house. When the well went dry in the summer water from the creek was used for household use as well.

On November 29, 1911, my grandfather sold his interest in the property to my father, Ervin M. Wolf. Then on August 6, 1941, my father sold my mother, Clara J. Wolf, an undivided one half interest in the property.

I remember when I was a little kid that my uncle, who was also named Lucian Wolf, lived in a little shack on an acre of land at the north edge of the property which is now known as 93790 Horton Road, Blachly, OR. Dad kept his feeder calves up there, too. Water from Lake Creek was used to water a garden, for household use by my uncle, and the cattle went down to the creek to drink. I don't know when my uncle first moved onto that acre of land. He died when I was a young child.

After my uncle died my parents, E. M. Wolf and Clara Wolf, sold that acre of land on April 25, 1930, to I. J. Yates. After he bought it Yates sunk a shallow well near the house. The well water was used for household use. I. J. Yates kept a cow or two and the water from the creek continued to be used for stock watering, to water a garden and, when the well went dry in the summer, for household use as well.

Then on April 10, 1940, I. J. Yates sold the property to Melvin A. Shove and Elnora Shove. From my personal knowledge I can say that Melvin Shove used the land and the water exactly as it had been used by my Dad, my uncle, and I. J. Yates. To water a garden, for household use and to water stock by letting them go down to the creek to drink.

My sister, Margaret Owens, and her husband, Edwin Owens, then agreed to buy the property from Mr. & Mrs. Shove and moved there in September 1943. They paid it off and recorded the sale of the property and transfer of title from Melvin A. Shove and Elnora Shove to Edwin Owens and Margaret I. Owens on November 29, 1946. They continue to use the water from from the well for household use and, when the well goes dry in the summer, they use the water from Lake Creek for household use as well as to water the lawns and garden. When they keep cattle on the property the cattle go down to the creek to drink water.

WATER RESOURCES DEPT.
SALEM, OREGON

I, June Hanes nee Wolf, make this statement regarding the water usage practices of the residents of the property known as 93740 and 93754 Horton Road, Blachly, OR; and 93790 Horton Road, Blachly, OR. The information following is based on my personal knowledge or was told me by my parents.

I was born, as were my brothers and sisters, on the property now known as 93740 Horton Road, Blachly. I was born on January 8, 1924. At that time there was no second house in the immediate vicinity of our farmhouse.

Our family came into the Lake Creek Valley early in this century. The facts are that my grandfather, Lucian J. Wolf, along with my grandmother, Harriet Wolf, and my father, Ervin M. Wolf, came west in 1890 and settled in the Lake Creek Valley just after the turn of the century.

On August 4, 1903, my grandfather and my father purchased the 80 acre property at known as 93740 Horton Road, Blachly, from C. W. Washburne. My father and mother told me that they drew water from Lake Creek from the time they settled on the farm. They used water from Lake Creek to water stock, water a large garden, and for use in the house.

Our family kept dairy cattle and some pigs. When my brother, Harold, was in charge of the farm he raised beef cattle for a time. The cattle have always grazed the land on both sides of Lake Creek where it crosses the property, which is about a quarter-mile or more. And the cattle have always gone down to the creek to get their water, we never drew it out for them. They drink all along the full length of the creek on our property.

My Father later sunk a shallow well near the farmhouse. The well had a pitcher pump and the water was used for household use. The creek water was plumbed to a faucet with a sink on the back porch and was also plumbed into the milk-house. When the well went dry in the summer water from the creek was used for household use as well.

On November 29, 1911, my grandfather sold his interest in the property to my father, Ervin M. Wolf. Then on August 6, 1941, my father sold my mother, Clara J. Wolf, an undivided one half interest in the property.

I remember when I was a little kid that my uncle, who was also named Lucian Wolf, lived in a little shack on an acre of land at the north edge of the property which is now known as 93790 Horton Road, Blachly, OR. Dad kept his feeder calves up there, too. Water from Lake Creek was used to water a garden, for household use by my uncle, and the cattle went down to the creek to drink. I don't know when my uncle first moved onto that acre of land. He died when I was a young child.

After my uncle died my parents, E. M. Wolf and Clara Wolf, sold that acre of land on April 25, 1930, to I. J. Yates. After he bought it Yates sunk a shallow well near the house. The well water was used for household use. I. J. Yates kept a cow or two and the water from the creek continued to be used for stock watering, to water a garden and, when the well went dry in the summer, for household use as well.

Then on April 10, 1940, I. J. Yates sold the property to Melvin A. Shove and Elnora Shove. From my personal knowledge I can say that Melvin Shove used the land and the water exactly as it had been used by my Dad, my uncle, and I. J. Yates. To water a garden, for household use and to water stock by letting them go down to the creek to drink.

My sister, Margaret Owens, and her husband, Edwin Owens, then agreed to buy the property from Mr. & Mrs. Shove and moved there in September 1943. They paid it off and recorded the sale of the property and transfer of title from Melvin A. Shove and Elnora Shove to Edwin Owens and Margaret I. Owens on November 29, 1946. They continue to use the water from the well for household use and, when the well goes dry in the summer, they use the water from Lake Creek for household use as well as to water the lawns and garden. When they keep cattle on the property the cattle go down to the creek to drink water.

re: SWR-180

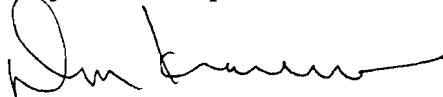

Dear Mr Guile,

I completed the review of the map and site report received from you on Nov. 14, 1994 in support of the pre-1909 vested water right claim in the name of EDWIN & MARGARET OWENS. The map and report meet the requirements for filing. I have added them to the file.

Thank you for your attention to this matter. If you have any questions, please give me a call.

Sincerely,

EUGENE OR 97401

Dear Mr Guile,

This will acknowledge your letter of December 14, 1993. I have thought about how I can best address your distress over the problems with the maps you prepared to support pre-1909 vested water right claims. There has been some misunderstanding with regards to the pre-1909 map requirements in the past by both claimants and Certified Water Right Examiners (CWRE). When I took this project over, I made many efforts to provide the necessary information to the folks involved. I arranged and held public meetings, mailed notices and memos, had public notices published in local newspapers, among other things.

I took a look in my files and copied two of the memos I hope will help to show my attempt to inform you of the pre-1909 vested water right mapping requirements. I have always made myself available to the CWRE,s. I do not have a record, nor do I recall, you contacting me about the pre-1909 mapping requirements.

My notes show I sent copies of my checklist, the mapping requirements and the claim of beneficial use sheet while returning the maps for SWR-139, SWR-163 and SWR-268. I am sending you another copy.

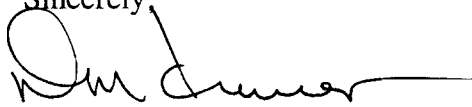

3850 Portland Rd NE
Salem, OR 97310
(503) 378-3739
FAX (503) 378-8130

On to the problem at hand. You must prepare a "final proof map and a beneficial use report" to satisfy the statutory and administrative requirements for the map to support a pre-1909 vested water right claim.

I am sending one of my cards and if there is anything you want to discuss please give me a call. The toll free number is 1-800-624-3199.

Sincerely,

A handwritten signature in black ink, appearing to read "Don Knauer", with a long horizontal flourish extending to the right.

EDWIN L & MARGARET I OWENS
93790 HORTON RD
BLACHLY OR 97412

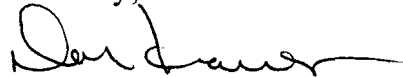

RE: SWR-180

Dear Mr & Mrs Owens,

The map that you submitted with your surface water registration statement (SWR) is a copy of a water right application map. The statutory and administrative requirements for a SWR and an application map are quite different. The map for a SWR is in effect a final proof map, that is, it must show and be certified by a Water Right Examiner (CWRE) as to what beneficial water use is happening at the time of the CWRE survey. Your pre-1909 vested water right claim will not be processed until we receive the required map. I will provide you or your CWRE with copies of the statutory and administrative requirements for the map to support your pre-1909 claim if requested.

Please feel free to contact this office if you have any questions.

Sincerely,

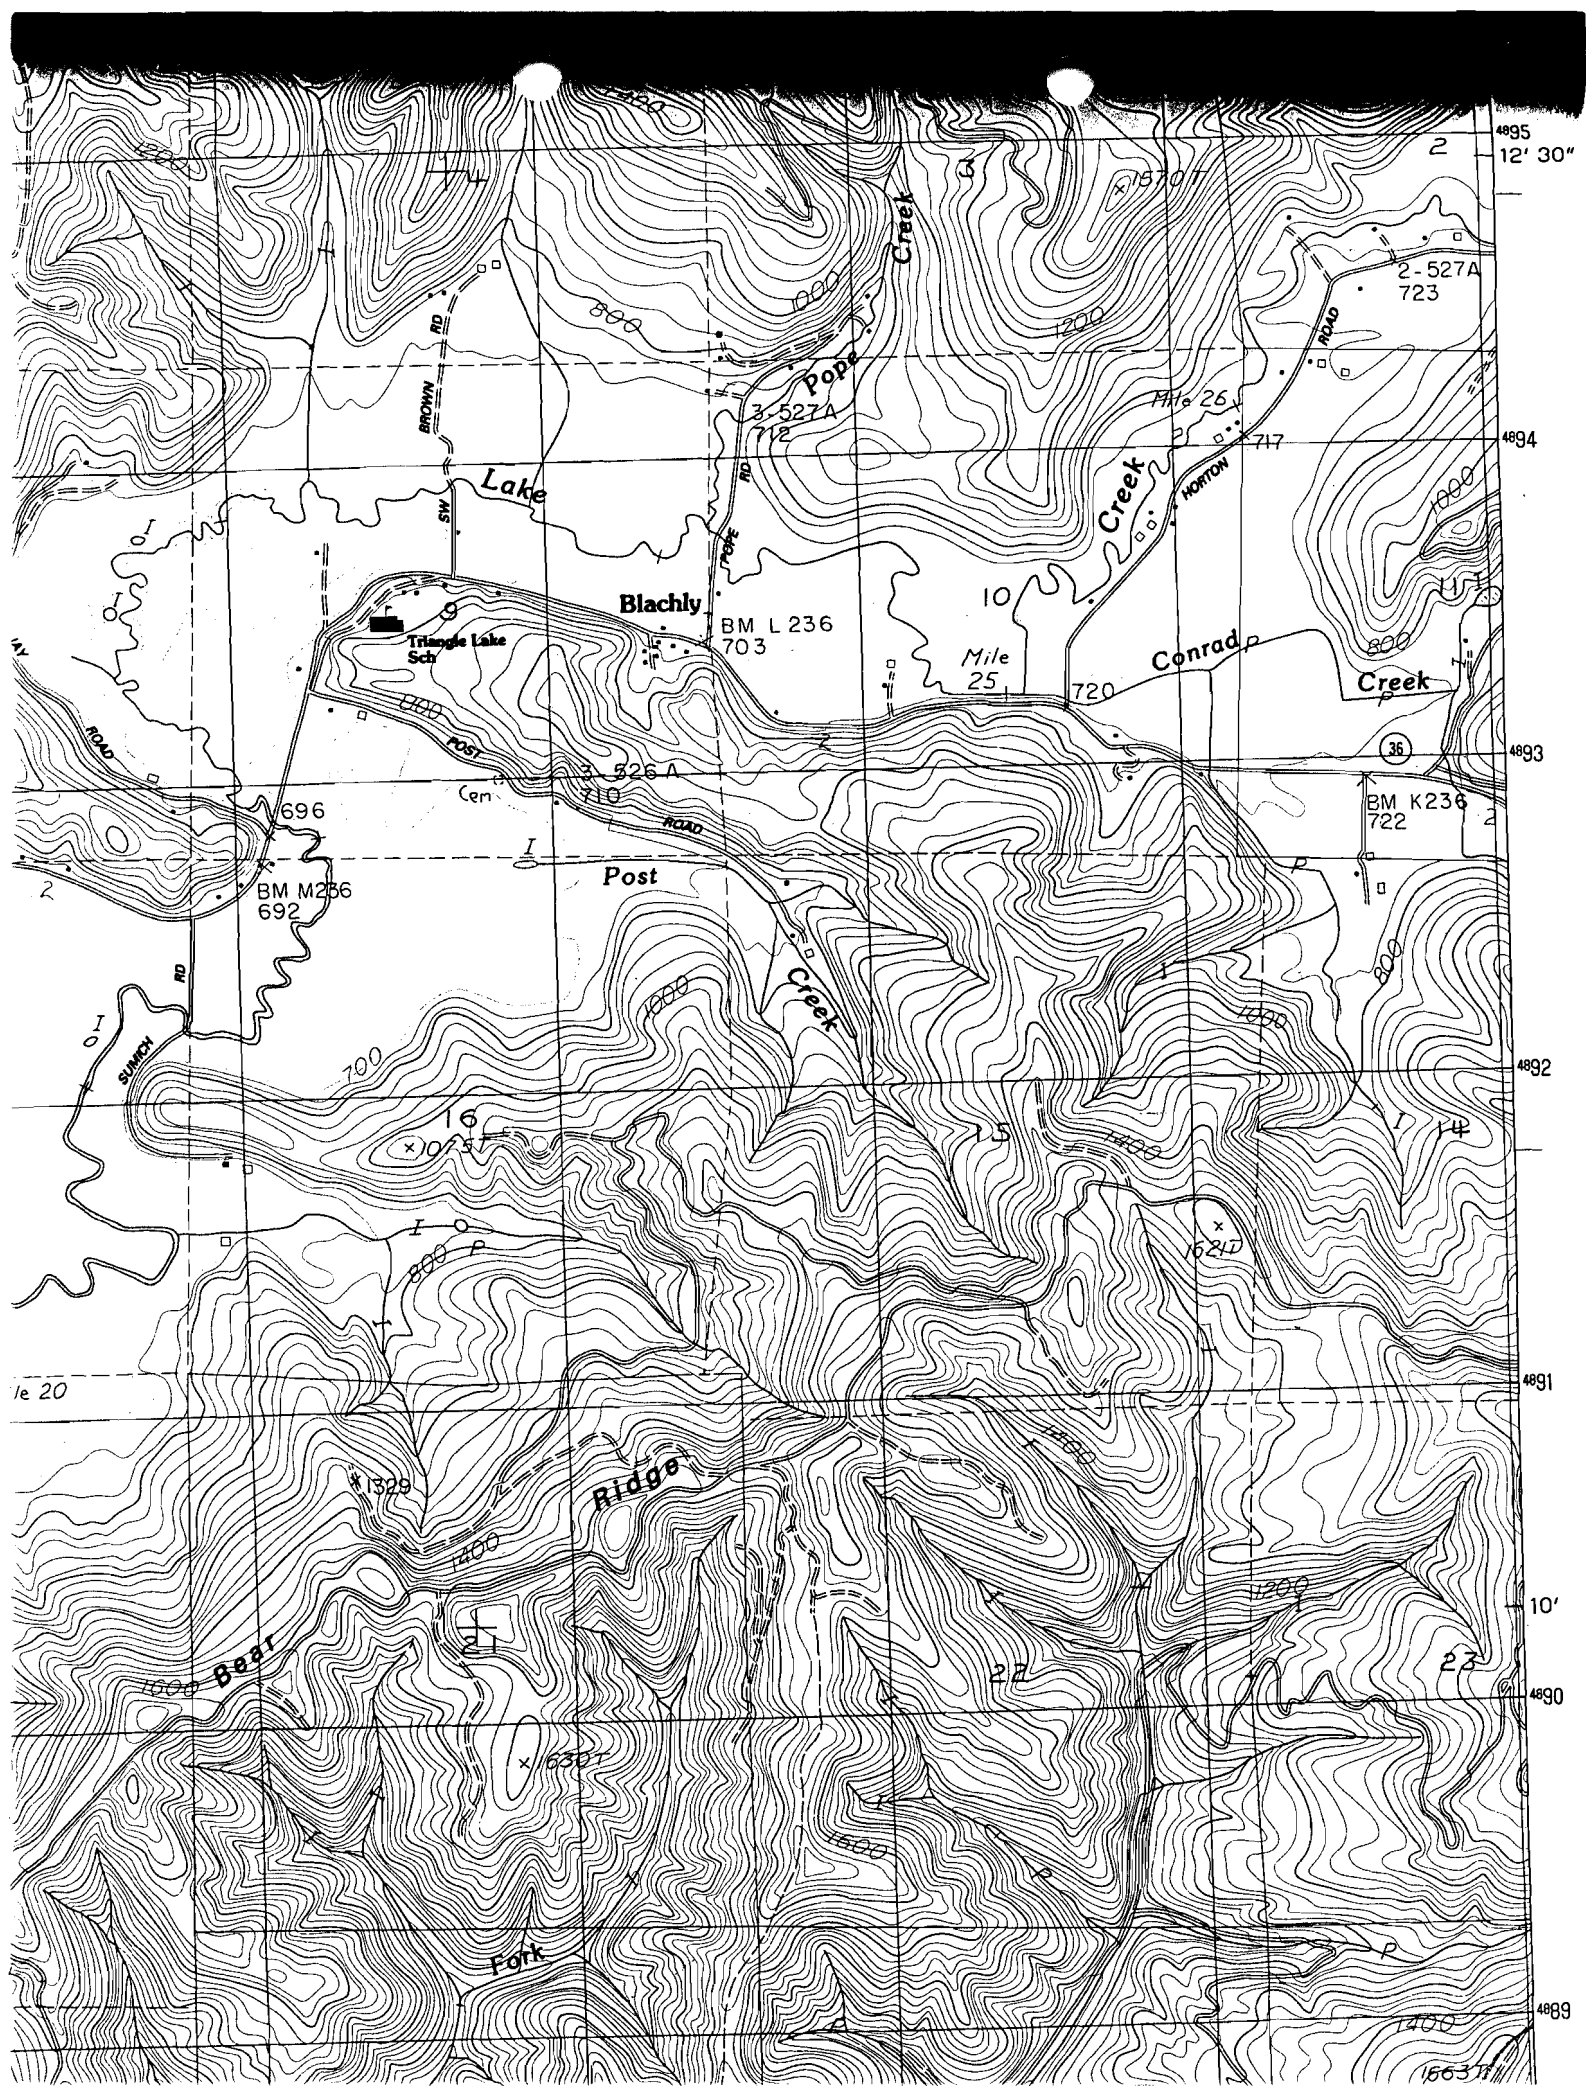

Don Knauer
Adjudication Specialist

Dear EDWIN & MARGARET OWENS,

This will acknowledge that your Surface Water Registration Statement in the name of EDWIN L & MARGARET I OWENS has been received by our office. The fees in the amount of \$230.00 have been received and our receipt #95353 is enclosed. Your registration statement has been numbered SWR-180.

Our office will review your form and map in the near future. If necessary we will schedule a meeting with you that will include a site inspection. If there are problems with your form we are usually able to take care of them during our visit. We will be able to answer any questions you might have about the adjudication process at that time.

Please feel free to contact this office if you have any questions.

Sincerely,

Dwight French
