

SURFACE WATER AVAILABILITY REPORT

Application G-19363

A WAB does not exist for the POD location proposed by the attached application. If the source is a well, it has been determined to have the potential for substantial interference with surface water, therefore surface water availability must be considered. **Based on the definitions below**, please make a determination of surface water availability by completing this form.

Determination Exceedance Level ☐ 50% ☒ 80%

Do water rights exist downstream from the proposed point of diversion? ☒ Yes ☐ No

Is there a history of regulation at/near this proposed point of diversion? ☐ Yes ☒ No
Note: if there is no history of regulation, the Department could find water is available.

Is there enough water available to satisfy the proposed use plus the consumption portion of all relevant rights of record during the full season requested? ☐ Yes ☐ No ☒ Unsure

What information was used to determine water availability?

- ☐ Investigation of stream flow or groundwater measurement records
☐ Watermaster distribution records ☐ Flow requirements of existing water rights
☐ Stream flow modeling in ungauged basins ☐ Minimum perennial streamflows
☐ Scenic waterway flow requirements ☒ Other _____

If a permit is issued, what conditions would you recommend from the following list?

☒ The period of use has been limited to Nov through April.

☒ **Med**
MRR Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion/appropriation. The permittee shall maintain the device in good working order.

☒ **Lrg**
MRR Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion/appropriation. The permittee shall maintain the device in good working order; AND the permittee shall keep a complete record of the volume of water diverted each month, and shall submit a report which includes water-use measurements to the Department annually

☒ **Staff**
Gage Before water use may begin under this permit, a staff gage that measures the entire range and stage between full reservoir level and dead-pool storage shall be installed in the reservoir. If no dead-pool, the gage must measure the full depth of the reservoir. The permittee shall maintain the device in good working order.

Comments Water availability was the one used in the groundwater review but at the 80% exceedance level.

Water is also not available in January.
