Ph (503) 584-2460

Located NE1/4NE1/4, 0.5 Ac, Section 7, T22S, R8W, WM.

On December 10, 1992, I made a survey of the above listed property and viewed the water system installed and in use. I used an assessor map and an aerial photo during the course of preparing this final proof survey and site map.

SOURCE: Water is taken from an Unnamed Stream, tributary to the Umpqua River.

DIVERSION POINT: The diversion point is a natural depression in the south side of the Unnamed Stream.

MOTOR: General Electric, 220 volts, 1 1/2 hp.

PUMP: Fairbanks-Morse, Model SBM3834A, 15 GPM discharge.

PIPE: The water distribution main line is 1 1/2" PVC from the point of diversion to the lawn and garden areas. The lawn and garden areas are irrigated with hoses attached to standpipes and feeding lawn sprinklers.

USE(S): Water is used for irrigation.

HEAD: Elevation difference between the point of diversion and the highest point on the lawn was estimated to be ten feet.

CALCULATIONS:

Irrigation			
0.5 ac @ 1/80 cfs/ac	0.006 cfs		2.7 GPM
pump capacity	0.033 cfs		15.0 GPM
5 lawn sprinklers @ 3 GPM	0.033 cfs		15.0 GPM

POINT OF BEGINNING: Assessor's maps and aerial photos were used to draw the accompanying map.

I, Ralph A Sawyers, the son of Ralph Andrew Sawyers and Ruth Sawyers, was born March 21, 1919 in Gardner, Oregon. My father died just before my birth. My mother took me and moved to Elkton to live with her mother, my grandmother from 1919 until 1930 when we moved to Drain.

On my twenty first birthday, I inherited the ranch and in 1945 after my tour of duty with the Army Air Force, I returned to live on the ranch and have lived there continuously to the present time. From the time I was born until I inherited the ranch, the ranch was rented to various people who lived and used the property for earning their living. My grandparents lived on a portion of the property to the west. In conversations with them, they told me the ranch was used continuously during the time I was away. During this time, the garden was used to provide food for the families living there.

The above statements are true and accurate to the best of my knowledge.

RE: File# SWR-240

DEAR MAURICE E. FARR,

The Water Resources Department (WRD) received a little over 500 surface water registration statements in December, 1992. All of the files have been set up and receipts for the fees have been sent. The next step is to insure the maps received in support of the claims are acceptable based on Oregon Revised Statutes (ORS) and Oregon Administrative Rules (OAR).

I am returning the map you prepared for Ralph A. or Donna B. Sawyers. You will find the item which requires completion or correction shown below. I have the description followed by the ORS or OAR site and paraphrased statute or rule.

✓ conveyance

ORS 539.120 "...the location of and each ditch, canal, pipeline or other means of conveying the water..."

✓ diversion point size

OAR 690-28-025-(4)-(c) "The dimensions and capacity of any existing diversion systems."

You must return the map before the claim can be processed. If you cannot have the map to the WRD within 60 days, please inform me as to when it can be expected. Please mark all correspondence with the file number.

As always, if you have any questions, please give me a call.

Sincerely,

Don Knauer
