### Application Supplement for Human Consumption & Livestock Uses

For water use permit applications within or above scenic waterways, or from streams for which water is not available due to required instream flows, the Department may issue limited permits for human consumption and livestock uses. Human consumption use is limited to 500 gallons per day for indoor use only for drinking, cooking, and sanitation, and does not include other uses such as lawn or garden watering or other related water uses.

In order to issue a permit to you for human consumption or livestock use, the Department must find that you cannot reasonably obtain water from any other source. For human consumption, an additional finding must be made that denial of the water right would result in loss of reasonable expectations for use of your property. For livestock use, additional findings must be made that issuance of a permit is necessary to prevent the livestock from watering in or along the stream bed and that you have excluded livestock from the stream and the adjacent riparian zone.

Please answer the following questions, and sign and return this form to Oregon Water Resources Department, 725 Summer St NE Ste A, Salem OR 97301-1266. You may also email the signed form to your caseworker.

1. Can you reasonably obtain water from any other source? YES ☐ NO ☒

If not, please describe why each of the following options are not reasonable:

- a. Groundwater, such as a well on yours or a neighbor=s property. (If expense is the reason groundwater is not reasonable, please provide two estimates of the cost.)

There are no wells on this property. Surrounding property with wells have *sulfer or salt water very few good wells*

- b. Securing stored water from upstream reservoirs.

There are no upstream reservoirs in Little River.

- c. Trucking water. (If expense is the reason this option is not reasonable, please provide a copy of an estimate of the cost of trucking water.)

There is no sevice in my area, I am to far out.

d. Community or municipal water suppliers.

No service is available

e. Tying in to a neighboring property's spring.

OWRD

No springs available from neighbors. My property has springs that have been used since before Oregon was a state.

g. Transferring existing water rights to your proposed use(s).

There are no existing water rights. The state closed pre 1909 applications even though the springs have been used since the 1850's.

Please identify any other alternate water sources you have considered, and why they are not feasible:

Little River is too far to pump from and I want to maintain the gravity flow system without pumps or power needed.

2. If you are seeking a permit for **human consumption use**, would denial of your application result in loss of reasonable expectations for use of your property?

YES ☒ NO ☐ NOT APPLICABLE ☐

If so, please describe how:

I have no other reasonable source other than the springs that have been used for 170+ years here.

3. If you are seeking a permit for **livestock use**, is the proposed use necessary to prevent the livestock from watering in or along the stream bed?

YES ☒ NO ☐ NOT APPLICABLE ☐

4. If you are seeking a permit for **livestock use**, have you excluded livestock from the stream and the adjacent riparian zone?

YES ☒ NO ☐ NOT APPLICABLE ☐
