REMARKS

Form C

IMPORTANT—This form is a notice to the State Engineer that permittee is ready to make final proof to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the final proof inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the State Engineer until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated. Fill out, detach and mail to the State Engineer, Salem, Oregon 97310, when all of the water has been applied.

OF THE
STATE OF OREGON

In the Matter of Transfer Application	)	FINAL ORDER APPROVING A
T-13154, Umatilla County	)	TEMPORARY CHANGE IN PLACE OF
	)	USE

Authority

Oregon Revised Statute (ORS) 540.505 to 540.580 establish the process in which a water right holder may submit a request to temporarily transfer the place of use and, if necessary to convey the water to the temporary place of use, the point of diversion authorized under an existing water right.

Oregon Administrative Rule (OAR) Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

IVAN COOK
1870 SOUTH 1ST STEET
HERMISTON, OR 97838

Agent

DR. PAUL WATTENBURGER
IRZ CONSULTING
500 NORTH 1ST STREET
HERMISTON, OR 97838

Findings of Fact

1. On March 25, 2019, IVAN COOK filed an application to temporarily change the place of use under Certificates 87368 and 87374 for a period of one year. The Department assigned the application number T-13154.
2. Notice of the application for transfer was published on April 2, 2019, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On May 17, 2019, the Department notified the agent for the applicant that Certificate 87374 has been allocated 0 acre feet under the Stage Gulch Critical Groundwater Area final order for 2019. On June 3, 2019, the agent for the applicant submitted a request to withdraw Certificate 87374 from the transfer.

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. The portion of the right to be temporarily transferred is as follows:

Certificate: 87368 in the name of IVAN COOK (perfected under Permit G-7183)

Use: IRRIGATION OF 25.9 ACRES

Priority Date: FEBRUARY 25, 1977

Rate: 0.32 CUBIC FOOT PER SECOND (CFS), BEING 0.27 CFS FROM WELL 1 AND 0.05 CFS FROM WELL 3

Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

Temporary Transfer Review Criteria

- Water has been used within the last five years according to the terms and conditions of the right. There is no evidence available that would demonstrate that the right is subject to forfeiture under ORS 540.610.
- Wells, pumps, pipeline and sprinkler irrigation systems sufficient to use the full amount of water allowed under the existing right are present.
- The proposed change would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(5) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

The temporary change in place of use proposed in Temporary Transfer Application T-13154 is consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is **ORDERED**:

1. The temporary change in place of use proposed in Temporary Transfer Application T-13154 is approved.
2. The former place of use **shall not** be irrigated as part of this water right during the 2019 irrigation season.
3. The use shall revert to the authorized place of use at the end of the 2019 irrigation season.
4. The approval of this temporary transfer may be revoked or modified if the Department finds the change causes injury to any existing water right.
5. A subsequent application for permanent transfer of Certificate 87368 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
6. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificate 87368.
7. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
8. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each new point of diversion.
 - b. The water user shall maintain the meter or measuring device in good working order.
 - c. The water user shall allow the Watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the Watermaster shall request access upon reasonable notice.

9. The use of the remaining water right described by Certificate 87368 shall continue to be in accordance with the terms and conditions of Certificate 87368.
