6. Transfer Application T-14318 proposes an additional point of appropriation less than 100 feet from the existing points of appropriation located:

Twp	Rng	Mer	Sec	Q-Q	Glot	Measured Distances
3 N	2 W	WM	13	NE SW	3	DC-3 – 1425 FEET NORTH AND 1855 FEET EAST FROM THE SW CORNER OF SECTION 13

Transfer Review Criteria [OAR 690-380-0100(14), 690-380-4010(2) and OAR 690-380-2110(2)]

- 7. Water has been used within the last five years according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
- 8. A water delivery system sufficient to use the full amount of water allowed under the existing right was present within the five-year period prior to submittal of Transfer Application T-14318.

- The water right is subject to transfer as defined in ORS 540.505(4) and OAR 690-380-0100(14).
- 10. The proposed point of appropriation develops groundwater from the same aquifer as the authorized points of appropriation, as required by OAR 690-380-2110(2).
- 11. The proposed change, as conditioned, would not result in enlargement of the right.
- 12. The proposed change, as conditioned, would not result in injury to other existing water rights.
- 13. All other application requirements are met.

Conclusions of Law

The additional point of appropriation proposed in Transfer Application T-14318 is consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

- 1. The additional point of appropriation proposed in Transfer Application T-14318 is approved.
- The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificate 96891 and any related decree.
- Approval of this transfer application does not constitute nor grant legal access onto or through another person's property for purposes of accessing the new point of appropriation.
- 4. Water right Certificate 96891 is cancelled.
- 5. The quantity of water diverted at the new additional point of appropriation (DC-3), together with that diverted at the original points of appropriation (Dutch Canyon Well 1 and Dutch Canyon Well 2), shall not exceed the quantity of water lawfully available at the original points of appropriation (Dutch Canyon Well 1 and Dutch Canyon Well 2).
- 6. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
- 7. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each new point of appropriation, with the exception that water rights issued to the Bureau of Reclamation or an irrigation district (or similar entity) are not subject to this condition.

- b. The water user shall maintain the meters or measuring devices in good working order.
- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
- 8. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before October 1, 2030. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.
- 9. After satisfactory proof of beneficial use is received, a new certificate confirming the right transferred will be issued.
