

## SECTION 2: PROPERTY OWNERSHIP

Please indicate if you own all the lands associated with the project from which the water is to be diverted, conveyed, and used.

- ☐ YES, there are no encumbrances.
- ☐ YES, the land is encumbered by easements, rights of way, roads or other encumbrances.
- ☒ NO, I have a recorded easement or written authorization permitting access.
- ☐ NO, I do not currently have written authorization or easement permitting access.
- ☐ NO, written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigation and/or domestic use only (ORS 274.040).
- ☐ NO, because water is to be diverted, conveyed, and/or used only on federal lands.

E-RECEIVED  
JUN 4 2025  
OWRD

**Affected Landowners:** List the names and mailing addresses of all owners of any lands that are not owned by the applicant and that are crossed by the proposed ditch, canal or other work, even if the applicant has obtained written authorization or an easement from the owner. *(Attach additional sheets if necessary).*

**Jerry and Linda Neff**  
8325 Lardon Rd NE  
Salem, OR 97305

**Legal Description:** You must provide the legal description of: 1. The property from which the water is to be diverted, 2. Any property crossed by the proposed ditch, canal or other work, and 3. Any property on which the water is to be used as depicted on the map.

## SECTION 3: WELL DEVELOPMENT

WELL NO.	NAME OF NEAREST SURFACE WATER	IF LESS THAN 1 MILE:	
		DISTANCE TO NEAREST SURFACE WATER	ELEVATION CHANGE BETWEEN NEAREST SURFACE WATER AND WELL HEAD
WELL 2	UNNAMED STREAM TO THE EAST	~ 775 FEET	~ 10 FEET
WELL 3	UNNAMED STREAM TO THE EAST	~ 650 FEET	~ 10 FEET

Revised  
6-4-25  
D.H.

Please provide any information for your existing or proposed well(s) that you believe may be helpful in evaluating your application. For existing wells, describe any previous alteration(s) or repair(s) not documented in the attached well log or other materials *(attach additional sheets if necessary).*

**Wells 2 and 3 specifications provided in the table below are estimates and subject to change based on actual conditions encountered in the field. The objective will be to construct each well to develop water from the alluvial aquifer.**

### SECTION 3: WELL DEVELOPMENT, continued

Total maximum rate requested: **0.21 cfs** (each well will be evaluated at the maximum rate unless you indicate well-specific rates and annual volumes in the table below).

The table below must be completed for each source to be evaluated or the application will be returned. If this is an existing well, the information may be found on the applicable well log. *(If a well log is available, please submit it in addition to completing the table.)* If this is a proposed well, or well-modification, consider consulting with a licensed well driller, geologist, or certified water right examiner to obtain the necessary information.

*Revised 6-4-25 DA*

\* Licensed drillers are required to attach a Department-supplied Well Tag, with a unique Well ID or Well Tag Number to all new or newly altered wells. Landowners can request a Well ID for existing wells that do not have one. The Well ID is intended to serve as a unique identification number for each well.

\*\* A well log ID (e.g. MARI 1234) is assigned by the Department to each log in the agency's well log database. A separate well log is required for each subsequent alteration of the well.

\*\*\* Source aquifer examples: Troutdale Formation, gravel and sand, alluvium, basalt, bedrock, etc.

OWRD

For Department Use: App. Number: \_\_\_\_\_

- If the use is **domestic**, indicate the number of households: **NA** (Exempt Uses: Please note that 15,000 gallons per day for single or group **domestic** purposes and 5,000 gallons per day for a single **industrial or commercial** purpose are exempt from permitting requirements.)
- If the use is **mining**, describe what is being mined and the method(s) of extraction (*attach additional sheets if necessary*): **NA**

## SECTION 6: WATER MANAGEMENT

### A. Diversion and Conveyance

What equipment will you use to pump water from your well(s)?

- ☒ Pump (give horsepower and type):  
**Wells 2 and 3: Submersible 20 Hp**  
☐ Other means (describe):

*Revised 6-4-25  
 DH*

E-RECEIVED  
 JUN 4 2025  
 OWRD

Provide a description of the proposed means of diversion, construction, and operation of the diversion works and conveyance of water.

**Water will be pump water from the well(s) using 20 Hp submersible pump and convey water through a buried mainline with hydrants to support various application methods, depending on the crop being irrigated.**

### B. Application Method

What equipment and method of application will be used? (e.g., drip, wheel line, high-pressure sprinkler) (*attach additional sheets if necessary*)

**All types of methods will be used depending on the crop being irrigated: drip, wheel line, impact sprinklers and/or high-pressure sprinklers.**

### C. Conservation

Please describe why the amount of water requested is needed and measures you propose to: prevent waste; measure the amount of water diverted; prevent damage to aquatic life and riparian habitat; prevent the discharge of contaminated water to a surface stream; prevent adverse impact to public uses of affected surface waters (*attach additional sheets if necessary*).

**Water will be applied to crops when needed. The most water efficient method of irrigation will be used for the crops being irrigated.**

## SECTION 7: PROJECT SCHEDULE

- Date construction will begin: Within three years after the permit is issued
- Date construction will be completed: Within five years after the permit has been issued
- Date beneficial water use will begin: Within five years after the permit has been issued

## SECTION 8: RESOURCE PROTECTION

In granting permission to use water the state encourages, and in some instances requires, careful control of activities that may affect adjacent waterway or streamside area. See instruction guide for a list of possible permit requirements from other agencies. Please indicate any of the practices you plan to undertake to protect water resources.

- ☒ Water quality will be protected by preventing erosion and run-off of waste or chemical products.  
 Describe: Water will be applied at the appropriate rate and duration to avoid excess use.
- ☒ Excavation or clearing of banks will be kept to a minimum to protect riparian or streamside areas.

# T.7S. R.2W. Section 11, W.M.

Proposed Well 2 is located 510 feet north and 670 feet west from the SE corner, Section 11.

Proposed Well 3 is located 775 feet north and 675 feet west from the SE corner, Section 11.

 Area (17.0 Acres) to be irrigated.

 Tax lot boundary

 Donation Land Claim boundary

**To:** Oregon Water Resources Department / Nick Reece  
**From:** Doann Hamilton, CWRE  
**CC:**  
**Date:** June 4, 2025  
**Re:** Application G-19455

The Well Construction Compliance (WCC) report for our client Blue Line Farms Inc. Application G-19455 was issued May 13, 2025, but was most recently posted on OWRD database.

Reviewing the WCC, proposed Well 1 (MARI 6957) most likely will not be approved unless the well was repaired to current well construction standards. If these repairs are not made the application could be denied.

Our client has decided to remove Well 1 (MARI 6957) from the application in hopes to obtain a more favorable review.

Attached are the revisions to the map and application
