Dear Mr. Hoekstre:

Acknowledged is the certificate recording fee in connection with permits numbered R-5269 and 33300 for which our receipts numbered 34147 and 34148 are enclosed.

On April 19, 1973, we submitted to you two final proof of appropriation forms, one in connection with your reservoir, the other in connection with the appropriation from Salt Creek and your reservoir for irrigation. At that time we requested that both forms be signed, dated and returned to this office along with \$1.50.

As of this date we have only received a certificate recording fee of \$1.50 for each permit and we have not received the signed final proof of appropriation forms.

Would you please check your records and if the forms have not been returned, please date, sign and return the forms at your earliest possible convenience. In case the forms previously provided have been misplaced new forms will be furnished upon request.

Very truly yours,

VESTAL R. GARNER

Dear Sir:

This will acknowledge receipt of your notice to the effect that complete application of water has been made under permit No. 33300.

Pursuant to your report and in line with the general practice of this office, a survey will be made at a later date.

After this survey, proof may be made and certificate issued covering the actual use of water as found by the engineer. In case of irrigation, any lands described in the permit that have not been irrigated will be automatically eliminated from the water right.

In the meantime, the permit which you hold will be valid evidence of the water right in question so long as you continue to use the water.

Dear Sir:

The plans and specifications for the John Hoekstre Irrigation Reservoir have been approved by the State Engineer, and a permit has been issued. Since this dam is under statutory regulations, construction must be supervised by a Registered Professional Engineer or authorized governmental agency. Since your agency has designed this reservoir, we will assume you will also supervise the construction. Please notify this office when construction is started so that an engineer from this office may perform an inspection during the construction period.

If during construction, conditions are encountered which require changes to the approved plans and specifications, then prior approval for these changes must be obtained in writing from the State Engineer. Engineers from this office will be available to assist you in making these changes if they should become necessary.

Very truly yours,

CHRIS L. WHEELER
