The following problems were noted on at least one of the pump tests listed above:

- Pre-test static water levels or shut in pressures were not measured at the specified intervals.
- Water levels or shut in pressures were not measured during the recovery phase of the test.

Without an approved pump test, the Department may not be able to process the Claim of Beneficial Use submitted for this permit. The person or persons conducting the test need to be thoroughly familiar with all the test requirements, which are described in the Water Resources Department's administrative rules OAR 690-217.

Approved pump test letters will be digitally posted to the water right in WRIS; all other pump test letters will be mailed to permit holder.

Please contact me if you have any questions.

Sincerely,
