WATER RESOURCES DEPT
SALEM, OREGON

Form C (690-9-77)

IMPORTANT—This form is a notice to the Water Resources Director that permittee is ready to make final proof to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the final proof inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the Water Resources Department until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated.

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when all of the water has been applied ^{8023 water use from Pond & Spencer Cr.}

Application No. R-68151-Pond

NOTICE OF COMPLETE APPLICATION OF WATER TO A BENEFICIAL USE

I, Harry S. Spencer, the holder of Permit No. 49345-water use from Pond R 10479-Pond Permit

appropriate the public waters of the state of Oregon, completely applied the waters to a beneficial use in accordance with the terms of said permit, on the 15th day of April, 1985

Remarks: Transplanted first field with 20 Douglas Fir seedlings on April 15, 1985 and watered them that afternoon with rainbird irrigation pumped from this pond.

IN WITNESS WHEREOF, I have hereunto set my hand this 19th day of February, 1986

Harry S. Spencer

STATE OF OREGON

COUNTY OF COOS

PROPOSED CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

HARRY G. SPENCER
P.O. BOX 291
LANGLOIS, OREGON 97450

confirms the right to use the waters of SPENCER CREEK AND SPENCER RESERVOIR 2 CONSTRUCTED UNDER PERMIT R-10479, a tributary of CONNER CREEK, for the purpose of IRRIGATION OF 8.0 ACRES AND TEMPERATURE CONTROL OF 8.0 ACRES.

The right has been perfected under Permit 49345. The date of priority is JANUARY 31, 1985. The right is limited to not more than 0.20 CUBIC FOOT PER SECOND; BEING 0.10 CFS FOR IRRIGATION AND 0.20 CFS FOR TEMPERATURE CONTROL, or its equivalent in case of rotation, measured at the point of diversion from the source.

The point of diversion is located as follows:

NW 1/4 NE 1/4, SECTION 13, T 30 S, R 15 W, W.M.; 500 FEET SOUTH AND 3150 FEET EAST FROM THE NW CORNER OF SECTION 13.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated from direct flow and shall be further limited to a diversion of not to exceed 2.5 acre-feet per acre for each acre irrigated during the irrigation season of each year from direct flow and storage.

The right shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

NW 1/4 NE 1/4 8.0 ACRES
SECTION 13
TOWNSHIP 30 SOUTH, RANGE 15 WEST, W.M.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described. The right is subject to minimum flows established by the Water Resources Commission with an effective date prior to this right.

Dear Mr. Spencer:

REFERENCE: Files R-68151, 68023 and G-11296

This is to acknowledge your amended Applications R-68151, 68023 and G-11296.

The Reservoir Application R-68151 now describes the proposed construction of a reservoir and storage of 1.0 acre-feet of water from Spencer Creek for irrigation and temperature control, being 0.8 acre-foot for irrigation and 0.2 acre-foot for temperature control.

The secondary Application 68023 now describes the proposed use of 0.3 cubic foot per second from Spencer Creek and the reservoir for irrigation and temperature control, being 0.1 cfs for irrigation and 0.2 cfs for temperature control.

The Ground Water Application G-11296 now describes the proposed use of 0.3 cfs from Well 1 with any deficiency in supply to be appropriated from Well 2 for supplemental irrigation and temperature control on 8.0 acres, being 0.1 cfs for irrigation and 0.2 cfs for temperature control.

Your three applications are now in satisfactory form and will be placed with the group to be considered for approval.

Sincerely,

WAYNE J. OVERCASH

Your Applications G-11296, 68023 and R-68151 which were returned to you have not been received. They were endorsed so that in order to retain their priority dates, they must have been received in this office on or before November 13, 1984.

Your applications have lost their priority, but may be reinstated with a new priority date when they are again received.

Sincerely,

WAYNE J. OVERCASH
Senior Water Rights Examiner

WJO:tcb

September 11, 1984

Harry G. Spencer
PO Box 291
Langlois, OR 97450

Dear Mr. Spencer:

REFERENCE: Files R-68151, 68152, 68023 and G-11296

Your Reservoir Application R-68151 describing the proposed construction of a reservoir and storage of 1.0 acre-foot of water therein from Spencer Creeks 1 and 2 and wells for irrigation and temperature control purposes, being 0.8 acre-foot for irrigation and 0.2 acre-foot for temperature control, has been reviewed.

Your secondary application describing the proposed use of 0.3 cubic foot of water per second from Spencer Creek 1 with any deficiency in supply to come from Spencer Creek 2 and stored water for irrigation and temperature control on 8.0 acres, being 0.1 cfs for irrigation and 0.2 cfs for temperature control, has been reviewed. This secondary application, when first received, was inadvertently assigned the Application Number 68152 instead of superseding your original Application 68023. The File 68152 has now been considered a misfiling and the fees in the amount of \$380 credited to the File 68152 will be transferred to your Reservoir File R-68151, the secondary File 68023, and your Ground Water Application G-11296.

Your Ground Water Application G-11296 describing the proposed use of 0.3 cfs from two drilled wells for supplemental irrigation and temperature control on the 8.0 acres has also been reviewed.

We will need some clarification and you will need to make certain amendments to your applications before they can be considered for approval.

According to the information supplied on your supporting map, it appears that the dam for the reservoir is located downstream below the confluence of Spencer Creek 1 and Spencer Creek 2. If so, only the creek downstream from the two Spencer Creeks should be listed in Item 1 of the Reservoir application as the stream for filling the reservoir. Since there are no provisions in the law for storage of water from wells in a reservoir, the mention of the wells in Item 1 of the Reservoir application will need to be deleted. If you intend to utilize the reservoir area as in-system storage for the use of water from the wells, this may be noted in the remarks section of your Reservoir application.

Harry G. Spencer

page two

Also, if you will be diverting water downstream below the confluence of the two creeks for the irrigation and temperature control use, Item 1 on the secondary Application 68023 will also need to be amended to only list the one creek as the source of water. Information relative to Spencer Creek 1 and 2 will also need to be deleted from Item 5 of the application.

Since the water stored in the reservoir would also be considered a source of water, the reservoir will need to be included as a source in Item 1 of your secondary Application 68023.

Items 6 and 7 on your Ground Water Application G-11296 will need to be further completed to state the amount of water to be appropriated from each well for each use.

You have noted in Item 10 of the Reservoir Application R-68151 that you may utilize an 18-inch CMP overflow pipe for the spillway. Depending upon the drainage area involved, the 18-inch pipe may be satisfactory providing an adequate trash rack is installed. I am not sure from our maps in our records how much drainage area is upstream from your reservoir. Therefore, you should further note in the remarks section of the application the acres or square miles that may drain towards your reservoir.

I am returning your three applications for correction and completion. The applications are endorsed so that in order to retain their priority date they must be received in this office on or before November 13, 1984.

Sincerely,

WAYNE J. OVERCASH
Senior Water Rights Examiner

Dear Mr. Spencer:

REFERENCE: File 68023

Will you please advise us of the action you wish taken on your Application 68023. As mentioned in my earlier correspondence, we can withhold action on your application for a reasonable length of time to allow you to consider another project on some other property in the vicinity.

If you do not anticipate another project in the vicinity within a reasonable length of time, it may be best that you request that the application be withdrawn. We could then close the file and refund the permit recording fee in the amount of \$120 you submitted.

Sincerely,

WAYNE J. OVERCASH

We have received your application for use of water for irrigation along with the supporting data and fees. Our Receipt 41749 is enclosed. Your application has been filed and assigned number 68023.

Applications which are received in proper form for a permit, including maps, supporting data and fees, will be considered for approval shortly after the mandatory 30-day waiting period. Applications which are defective, conflict with existing rights or require additional information will be reviewed in detail and will be returned for completion or correction within 45 days.

If your application is approved, the project described in the application will be subject to the Water Policy Review Board's Basin Program statements, existing minimum flows and demands of prior rights during periods of low water.

Sincerely,

RALPH H. JACKSON, Supervisor
Application/Permit Section
