

STATE OF OREGON
COUNTY OF DOUGLAS
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

UMPQUA BASIN WATER ASSOCIATION INC.
4972 GARDEN VALLEY RD
ROSEBURG OR 97470

confirms the right to use the waters of NORTH UMPQUA RIVER, TRIBUTARY OF THE UMPQUA RIVER, for COMMERCIAL AND INDUSTRIAL USE.

This right was perfected under Permit S-54592. The date of priority is SEPTEMBER 29, 2008. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 1.41 CUBIC FEET PER SECOND or its equivalent in case of rotation, measured at the point of diversion.

The period of use is year-round.

The point of diversion is located as follows:

Twp	Rng	Mer	Sec	Q-Q	DLC	Measured Distances
26 S	6 W	WM	33	NW NE	54	610 FEET SOUTH AND 1400 FEET WEST FROM NE CORNER, SECTION 33

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

Measurement, recording and reporting conditions:

- A. The water user shall maintain the totalizing flow meter in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

Notwithstanding that Oregon Department of Fish and Wildlife has made a determination that fish screens and/or by-pass devices are not necessary at this time, the water user may be required in the future to install, maintain, and operate fish screening and/or by-pass devices to prevent fish from entering the diversion, and to provide adequate upstream and downstream passage for fish.

The water user shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the water user has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The water user is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to the agreement.

The use may be restricted if the quality of the source stream or downstream waters decrease to the point that those waters no longer meet state and federal water quality standards due to reduced flows.

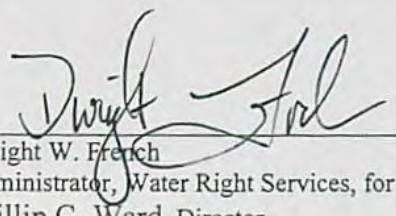

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use

of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The water user shall bypass flows at all times when sufficient water is not available to satisfy all prior rights, including prior rights for maintaining instream flows.

Issued AUG 02 2013

Dwight W. French

Administrator, Water Right Services, for
Phillip C. Ward, Director

Oregon

John A. Kitzhaber, M.D., Governor

Water Resources Department
North Mall Office Building
725 Summer Street NE, Suite A
Salem, OR 97301-1271
503-986-0900
FAX 503-986-0901

Date Mailed: August 2, 2013

NOTICE OF CERTIFICATE ISSUANCE

The attached certificate confirms the water right established under the terms of a permit issued by this Department. The water right is now appurtenant to the specific place where the use was established as described by the certificate. The water right is limited to a specific amount of water, but not more than can be beneficially used for the purposes stated within the certificate.

The certificate is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

Oregon law does not allow the Director to reissue a certificate because of a change in the ownership of the appurtenant place of use. The water must be controlled and not wasted. To change the location of the point of diversion, the character of use, or the location of use requires the advance approval of the Water Resources Director.

If any portion of this water right is not used for five or more consecutive years, that portion of the right may be subject to forfeiture according to ORS 540.610. Land enrolled in a Federal Reserve Program is not subject to forfeiture during the period of enrollment. Other exceptions to forfeiture are explained in ORS 540.610.

If you have any questions please contact Craig Kohanek at 503-986-0823.

SECTION 36

TOWNSHIP 27 SOUTH, RANGE 7 WEST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the meter(s) in good working order. The permittee shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter(s); provided however, where any meter is located within a private structure, the watermaster shall request access upon reasonable notice.

The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW prior to diversion of any water. The permittee may submit evidence in writing that ODFW has determined screens and/or by-pass devices are not necessary.

The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the permittee has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The permittee is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

STANDARD CONDITIONS

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of

any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

The use may be restricted if the quality of the source stream or downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

Completion of construction and application of the water shall be made within five years of the date of permit issuance. If beneficial use of permitted water has not been made before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after making beneficial use of water, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner.

Subject: One final review of the proposed certificate for Umpqua Water Association; application S-87299
Attachments: 87299-or-prop_2.pdf

Clay,

I wanted to provide you a final opportunity to review the proposed certificate for Umpqua Water Association; application S-87299. I would appreciate your giving particular attention to the place of use to ensure its accuracy and completeness. Once I have your feedback or approval I will proceed with issuance of the certificate.

STATE OF OREGON
COUNTY OF DOUGLAS
CERTIFICATE OF WATER RIGHT

*2010 mm
Date*

THIS CERTIFICATE ISSUED TO

UMPQUA BASIN WATER ASSOCIATION INC.
4972 GARDEN VALLEY RD
ROSEBURG OR 97470

confirms the right to use the waters of NORTH UMPQUA RIVER, TRIBUTARY TO UMPQUA RIVER, for COMMERCIAL AND INDUSTRIAL USE.

This right was perfected under Permit S-54592. The date of priority is SEPTEMBER 29, 2008. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 1.41 CUBIC FEET PER SECOND measured at the point of diversion.

The period of use is year-round.

The point of diversion is located as follows:

Twp	Rng	Mer	Sec	Q-Q	DLC	Measured Distances
26 S	6 W	WM	33	NW NE	54	610 FEET SOUTH AND 1400 FEET WEST FROM NE CORNER, SECTION 33

A description of the place of use is as follows:

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

Measurement, recording and reporting conditions:

- A. The water user shall maintain the totalizing flow meter in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

Notwithstanding that Oregon Department of Fish and Wildlife has made a determination that fish screens and/or by-pass devices are not necessary at this time, the water user may be required in the future to install, maintain, and operate fish screening and/or by-pass devices to prevent fish from entering the diversion, and to provide adequate upstream and downstream passage for fish.

The water user shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the water user has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The water user is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to the agreement.

The use may be restricted if the quality of the source stream or downstream waters decrease to the point that those waters no longer meet state and federal water quality standards due to reduced flows.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The water user shall bypass flows at all times when sufficient water is not available to satisfy all prior rights, including prior rights for maintaining instream flows.

Clay,

Having just finished an internal discussion about the situation below, I can report that since the permit delineates the place of use to specific quarter, quarters the Department can't increase it at certification. However, if you wanted those areas included in the certificate you could submit a permit amendment.

Please let me know if you'd like me to proceed with the processing of the attached document toward certification or if you intend to pursue a permit amendment.

Craig

Subject: Re: Proposed certificate for RA project R-12040-11, for Umpqua Water Association, application S-87299, permit S-54592.

Hi Craig:

Please note, our first review, we noticed several changes from the permit to the claim not reflected in the proposed certificate. This is why we are a strong advocate for it to be simply stated "within the boundaries of...."

1. Need to add 26S 6W Sec. 20, E 1/2 NE 1/4 (sec. 20 not in certificate)
2. 26S 6W - 24 - Change E 1/2 NE 1/4 to NE 1/4 and add SE NW
3. 26S 6W - 28 - Change SW SE to W 1/2 SE 1/4
4. Need to add 26S 6W -31, SE SW, NE SE and S 1/2 SE 1/4
5. 26S 6W - 32 - Change SW NE to NE 1/4 ; Change N 1/2 NW 1/4 to NW 1/4 ; add N 1/2 SW 1/4 and SW SW ; change NW SE to N 1/2 SE 1/4
6. 26S 6w - 33 - Change NW SW to SW 1/4 ; Change NE SE to SE 1/4
7. 27S 6W - 4 - Change E 1/2 SW 1/4 to SE SW
8. 27S 6W - 6 Add NW NE
9. 27S 7W - 12 Add this section and W 1/2 /SE 1/4
10. 27S 7W - 13 Add this section and E 1/2 NE 1/4 ; NE SE
11. 27S 7W - 25 Add SW SW
12. 28S 7W - 4 Add this section and SW SE

Thanks, Clay

Clay,

Attached for your review is the proposed certificate for application S-87299, permit S-54592 for the Umpqua Water Association. Please review it for both accuracy and completeness and provide me with your edits or comments. If the document meets with your approval, please let me know this by replying to that effect to this email and I will continue with the processing of the document toward certification.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

Measurement, recording and reporting conditions:

- A. The water user shall maintain the totalizing flow meter in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

Notwithstanding that Oregon Department of Fish and Wildlife has made a determination that fish screens and/or by-pass devices are not necessary at this time, the water user may be required in the future to install, maintain, and operate fish screening and/or by-pass devices to prevent fish from entering the diversion, and to provide adequate upstream and downstream passage for fish.

The water user shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the water user has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The water user is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to the agreement.

The use may be restricted if the quality of the source stream or downstream waters decrease to the point that those waters no

longer meet state and federal water quality standards due to reduced flows.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The water user shall bypass flows at all times when sufficient water is not available to satisfy all prior rights, including prior rights for maintaining instream flows.

Subject: RE: Proposed certificate for RA project R-12040-11, for Umpqua Water Association, application S-87299, permit S-54592.

Clay,

Having just finished an internal discussion about the situation below, I can report that since the permit delineates the place of use to specific quarter, quarters the Department can't increase it at certification. However, if you wanted those areas included in the certificate you could submit a permit amendment.

Please let me know if you'd like me to proceed with the processing of the attached document toward certification or if you intend to pursue a permit amendment.

Subject: Re: Proposed certificate for RA project R-12040-11, for Umpqua Water Association, application S-87299, permit S-54592.

Hi Craig:

Please note, our first review, we noticed several changes from the permit to the claim not reflected in the proposed certificate. This is why we are a strong advocate for it to be simply stated "within the boundaries of...."

1. Need to add 26S 6W Sec. 20, E 1/2 NE 1/4 (sec. 20 not in certificate)
2. 26S 6W - 24 - Change E 1/2 NE 1/4 to NE 1/4 and add SE NW
3. 26S 6W - 28 - Change SW SE to W 1/2 SE 1/4
4. Need to add 26S 6W -31, SE SW, NE SE and S 1/2 SE 1/4
5. 26S 6W - 32 - Change SW NE to NE 1/4 ; Change N 1/2 NW 1/4 to NW 1/4 ; add N 1/2 SW 1/4 and SW SW ; change NW SE to N 1/2 SE 1/4
6. 26S 6w - 33 - Change NW SW to SW 1/4 ; Change NE SE to SE 1/4
7. 27S 6W - 4 - Change E 1/2 SW 1/4 to SE SW
8. 27S 6W - 6 Add NW NE
9. 27S 7W - 12 Add this section and W 1/2 /SE 1/4
10. 27S 7W - 13 Add this section and E 1/2 NE 1/4 ; NE SE
11. 27S 7W - 25 Add SW SW

Thanks, Clay

Subject: Water use reporting for application S-87299, permit S-54592 for Umpqua Basin Water Association Inc.

Shaun,

I'm checking to see if the Umpqua Basin Water Association Inc. has reported its water use for application S-87299, permit S-54592. I am working on the certificate and need to know if they've complied with the permit condition requiring that they make annual report of water use under the permit.

- Purpose.** The purpose of this Agreement is to expedite the processing of the **Claim of Beneficial Use**.
(Application Number:S-87299)
- Authority.** ORS 536.055 authorizes the OWRD to enter into a voluntary agreement with any applicant, permittee or regulated entity (collectively Applicant) for expediting or enhancing a regulatory process. In making this agreement, OWRD shall require the applicant to pay the full cost of expedited process.
- Restrictions.** Umpqua Basin Water Association Inc. and OWRD agree that this Agreement shall not be construed to restrict in any way the decisions and actions by OWRD. OWRD shall be free to exercise independent judgment consistent with existing laws and regulations.
- Effective Date and Duration.** Unless otherwise terminated by non-deposit of funds by the Applicant, this Agreement shall become effective on the date on which both parties have signed the Agreement and the full deposit of the estimated cost of the proposed service has been received by OWRD.
- Consideration.** Umpqua Basin Water Association Inc. shall pay OWRD in advance for actual costs incurred by OWRD. Umpqua Basin Water Association Inc. agrees to pay the full amount of \$770 to OWRD prior to commencement of any work stated in this Agreement. This payment will be placed in an account administered by OWRD and drawn upon as costs are actually incurred. If the actual cost of performing the work is less than payments received, OWRD will refund the unspent balance. If the actual cost of processing exceeds the estimate, the Applicant can either elect to terminate this Agreement or amend the Agreement to reflect the increase in cost. The costs stated in this Agreement do not include the statutory application processing and filing fees.
- Confidentiality.** Umpqua Basin Water Association Inc. agrees that any information provided to or acquired by OWRD under this Agreement will be subject to the Oregon Public Records Law and shall be considered public records.
- Indemnity.** Applicant shall defend, save, hold harmless, and indemnify the State of Oregon, OWRD, and their officers, employees, and agents from and against all claims, suits, actions, losses, damages, liabilities, costs and expenses of any nature resulting from or arising out of, or relating to the activities of Applicant or its representatives, officers, employees, contractors, or agents under this Agreement or with respect to the expedited service. The Applicant acknowledges that the Oregon Water Resources Department cannot and does not guarantee a favorable review under the subject regulatory process.

- Consideration.** Umpqua Basin Water Association Inc. shall pay OWRD in advance for actual costs incurred by OWRD. Umpqua Basin Water Association Inc. agrees to pay the full amount of **\$770** to OWRD prior to commencement of any work stated in this Agreement. This payment will be placed in an account administered by OWRD and drawn upon as costs are actually incurred. If the actual cost of performing the work is less than payments received, OWRD will refund the unspent balance. If the actual cost of processing exceeds the estimate, the Applicant can either elect to terminate this Agreement or amend the Agreement to reflect the increase in cost. The costs stated in this Agreement do not include the statutory application processing and filing fees.
- Confidentiality.** Umpqua Basin Water Association Inc. agrees that any information provided to or acquired by OWRD under this Agreement will be subject to the Oregon Public Records Law and shall be considered public records.
- Indemnity.** Applicant shall defend, save, hold harmless, and indemnify the State of Oregon, OWRD, and their officers, employees, and agents from and against all claims, suits, actions, losses, damages, liabilities, costs and expenses of any nature resulting from or arising out of, or relating to the activities of Applicant or its representatives, officers, employees, contractors, or agents under this Agreement or with respect to the expedited service. The Applicant acknowledges that the Oregon Water Resources Department cannot and does not guarantee a favorable review under the subject regulatory process.

8. **Termination.** Applicant may request to terminate this agreement only in writing at anytime during the process. The Applicant agrees to pay for the work done by the Reimbursement Authority personnel up until the time of the written termination request. OWRD, upon receiving such written termination request from the Applicant, will refund any unspent balance after paying the Reimbursement Authority personnel for the work done.
9. **Funds Authorized and Available.** By its execution of this Agreement, Applicants certifies that sufficient funds are authorized and available to cover the expenditures contemplated by this Agreement.
10. **Duration of Estimate.** The Estimate of Time to complete the work is no later than one hundred and twenty days (120) days once this Agreement has been fully executed and payment of the estimated cost deposited. However, this estimate is contingent on the Applicant's expeditious resolution of any deficiency and may be affected by the Department's work load. This Estimate of Time may become null and void after thirty (30) days from the date the Applicant's Agreement is mailed. If the Applicant's Agreement is not received by the Department within thirty (30) days of mailing the Agreement, the Applicant may need to re-apply for a new estimate.
11. **Completion Date.** OWRD, by the execution of this Agreement does not guarantee the completion date indicated in this Agreement. Completion date is only an estimate and may be affected by the Department's workload, issues arising from the processing of the requested services and Applicant's timely response to requests for additional information.
12. **Captions.** The captions or headings in this Agreement are for the convenience only and in no way define limit or describe the scope or intent of any provision of this Agreement.
13. **Amendment and Merger.** The terms of this Agreement shall not be waived, altered, modified, supplemented or amended in any manner whatsoever, except by written instrument signed by both parties. Such waiver, consent, modification or change, if made, shall be effective only in the specific instance and for the specific purpose given. There are no understandings, agreements or representations, oral or written, not specified herein regarding this Agreement.
14. **Signatures.** All parties, by the authorized representative's signature below, hereby acknowledge that they have read this Agreement, understand it and agree to be bound by its terms and conditions.

I certify that I (check one):

have previously filed a Claim of Beneficial Use
 am attaching the Claim of Beneficial Use with this request and have included the appropriate claim fee.

I understand the following:

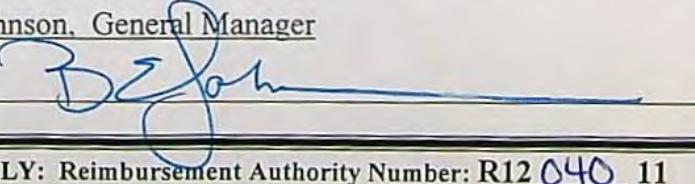

- That upon receipt of my non-refundable application fee in the amount of \$ 125.00, OWRD will, within fourteen (14) days, notify me in writing of the estimates of cost and time frame for the expedited service.
- That this fee covers the reimbursement authority staff to evaluate and provide the estimate for processing of the request.
- That upon receiving the estimate I may agree or decline to enter into a formal contract to pay the estimated cost in advance to initiate the expedited service.
- An incomplete or inaccurate Claim of Beneficial Use may delay the process and increase the cost to process my request.
- Expedited processing does not guarantee a favorable review of my request.
- Send completed Application and payment to:

Claim of Beneficial Use:
Application S-87299
Permit S-54592

February 22, 2013

Mr. Clark:

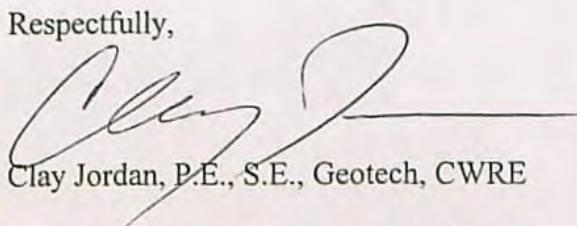

Inclosed is the Claim of Beneficial Use (COBU) with 4 attachments:

- (1)- Department of Fish and Wildlife letter addressing approved fish screens stating bypass device and fishway not required.
- (2)- Oregon Water Resources Department letter approving gravity flow calculation waver.
- (3)- Water use recording and reporting form.
- (4)- UBWA commercial - industrial place of use spread-sheet and five 24" by 36" drawings of your system.

Also inclosed is a Reimbursement Authority form to expedite the claim to a certificate. There is one check #33545 in the sum of \$275 (Claim = 150 and Reimbursement estimate request = 125) made out to the Department.

Any official correspondence should be with the applicant with a copy to me.

Respectfully,

CLAIM OF BENEFICIAL USE for Permits claiming more than 0.1 cfs and All Transfers

Oregon Water Resources Department
725 Summer Street NE, Suite A
Salem, Oregon 97301-1266
(503) 986-0900
www.wrd.state.or.us

No fee is required for submitting this form for a transfer.

A fee of \$150 must accompany this form to be accepted for permits
with a priority date of July 9, 1987, or later. (ORS 536.050(1))

A separate form shall be completed for each permit.

In cases where a permit has been amended through the permit amendment process, a separate claim for the permit amendment is not required. Incorporate the permit amendment into the claim for the permit.

This form is subject to revision. Begin each new claim by checking for a new version of this form at:
http://www.wrd.state.or.us/OWRD/WR/cwre_info.shtml.

The completion of this form is required by OAR 690-014-0100(1) and 690-014-0110(4).

Please type or print in dark ink. If this form is found to contain errors or omissions, it may be returned to you. Every item must have a response. If any requested information does not apply to the claim, insert "NA." Do not delete or alter any section of this form unless directed by the form. The Department may require the submittal of additional information from any water user or authorized agent.

If you have questions regarding the completion of this form, please call 503-986-0900 and ask for the Certificate Section.

The Department has a program that allows it to enter into a voluntary agreement with an applicant for expedited services. Under such an agreement, the applicant pays the cost to hire additional staff that would not otherwise be available. This program means a certificate may be issued in about a month. For more information on this program see
http://www.wrd.state.or.us/OWRD/mgmt_reimbursement_authority.shtml.

SECTION 2

SYSTEM DESCRIPTION

A. Points of Diversion/Appropriation

1. Point of diversion/appropriation name or number:

POINT OF DIVERSION/APPROPRIATION (POD/POA) NAME OR NUMBER (CORRESPOND TO MAP)	WELL LOG ID # FOR ALL WORK PERFORMED ON THE WELL (IF APPLICABLE)	WELL TAG # (IF APPLICABLE)
POD		

Attach each well log available for the well (include the log for the original well and any subsequent alterations, reconstructions, or deepenings)

2. Point of diversion/appropriation source and, if from surface water, the tributary:

POD/POA NAME OR NUMBER	SOURCE	TRIBUTARY
POD	North Umpqua River	Umpqua River

3. Developed use(s), period of use, and rate for each use:

POD/POA NAME OR NUMBER	USES	IF IRRIGATION, LIST CROP TYPE	SEASON OR MONTHS WHEN WATER WAS USED	RATE OR VOLUME FOR USE (CFS, GPM, OR AF)
POD	Commercial/Industrial	NA	Year Round	1.41 CFS
Total Quantity of Water Used				1.41 CFS

4. Provide a general narrative description of the distribution works. This description must trace the water system from each point of diversion or appropriation to the place of use:

Water is pumped from the river using 2 – 25 HP centrifugal pumps and 2 – 48 HP submersible pumps. Water is pumped through an 18 inch ductile iron pipe to a sedimentation pond. From the pond water goes through a membrane treatment plant then to a chemical plant. Water is pumped (3-75 HP and 1-125 HP pumps) after treatment to the distribution system consisting of 272 miles of main water lines ranging from 18 inch to 2 inch. The system contains 22 reservoirs totaling 4.685 million gallons. This includes two clear wells at the treatment plant. Water is delivered through a long established system used to deliver quasi-municipal water.

RECEIVED BY OWRD
FEB 26 2013
SALEM, OR

SECTION 2

SYSTEM DESCRIPTION (B through H)

Are there multiple PODs or POAs?

NO

If "YES" you will need to copy and complete Sections 2B through 2H for each POD/POA.

POD/POA Name or Number this section describes (only needed if there is more than one):

POD

B. Place of Use SEE ATTACHED PLACE OF USE LISTING Attachment - 4

1. Is the right for municipal use?

NO

If "YES" the table below may be deleted.

TWP	RNG	MER	SEC	QQ	GLOT	DLC	USE	IF IRRIGATION, # PRIMARY ACRES	IF IRRIGATION, # SUPPLEMENTAL ACRES
Total Acres Irrigated									

Reminder: The map associated with this claim must identify Donation Land Claims (DLC), Government Lots (GLot), Quarter Quarters (QQ), and if for irrigation, the number of acres irrigated within each projected DLC, GLot, and QQ.

C. Diversion and Delivery System Information

Provide the following information concerning the diversion and delivery system. Information provided must describe the equipment used to transport and apply the water from the point of diversion/appropriation to the place of use.

1. Is a pump used?

YES

If "NO" items 2 through item 6 may be deleted.

2. Pump Information

MANUFACTURER	MODEL	SERIAL NUMBER	TYPE (CENTRIFUGAL, TURBINE OR SUBMERSIBLE)	INTAKE SIZE	DISCHARGE SIZE
Cornell	4NNT VM 25-4	18818	Centrifugal	8 in	8 in
Cornell	4NNT VM 25-4	102155	Centrifugal	8 in	8 in
Barnes	6SE 480044 HL	463276	Submersible	8 in	8 in
Barnes	6SE 480044 HL	463275	Submersible	8 in	8 in

3. Motor Information

MANUFACTURER	HORSEPOWER
GE	25
GE	25
Unknown	48
Unknown	48

RECEIVED BY OWRD
FEB 26 2013
SALEM, OR

4. Theoretical Pump Capacity

HORSEPOWER	OPERATING PSI	LIFT FROM SOURCE TO PUMP *IF A WELL, THE WATER LEVEL DURING PUMPING	LIFT FROM PUMP TO PLACE OF USE	TOTAL PUMP OUTPUT (IN CFS)
2 @ 25	30±	4	66	2.26
2 @ 48	30±	0	70	4.62

5. Provide pump calculations:

$$Q = \frac{(HP)(Pump\ Efficiency)}{(Total\ Head)} = Q = \frac{(25)(6.61)}{(4+66+76.2)} = Q = \frac{165.25}{146.2} = Q = 1.13 \text{ - 2 Pumps}$$

$$Q = \frac{(HP)(Pump\ Efficiency)}{(Total\ Head)} = Q = \frac{(48)(7.04)}{(70+76.2)} = Q = \frac{337.92}{146.2} = Q = 2.31 \text{ - 2 Pumps}$$

6. Measured Pump Capacity (using meter if meter was present and system was operating)

INITIAL METER READING	ENDING METER READING	DURATION OF TIME OBSERVED	TOTAL PUMP OUTPUT (IN CFS)

Reminder: For pump calculations use the reference information at the end of this document.

7. Is the distribution system piped?

YES

If "NO" items 8 through item 11 may be deleted.

8. Mainline Information

MAINLINE SIZE	LENGTH	TYPE OF PIPE	BURIED OR ABOVE GROUND
18 inch to 2 inch	272 miles	Iron and PVC	Buried

9. Lateral or Handline Information

LATERAL OR HANDLINE SIZE	LENGTH	TYPE OF PIPE	BURIED OR ABOVE GROUND
NA			

10. Sprinkler Information

SIZE	OPERATING PSI	SPRINKLER OUTPUT (GPM)	TOTAL NUMBER OF SPRINKLERS	MAXIMUM NUMBER USED	TOTAL SPRINKLER OUTPUT (CFS)
NA					

Reminder: For sprinkler output determination use the reference information at the end of this document.

RECEIVED BY WRD
FEB 26 2013

11. Pivot Information

MANUFACTURER	MAXIMUM WETTED RADIUS	OPERATING PSI	TOTAL PIVOT OUTPUT (GPM)	TOTAL PIVOT OUTPUT (CFS)
NA				

12. Additional notes or comments related to the system:**D. Groundwater Source Information (Well and Sump)**

1. Is the appropriation from ground water (well or sump)?

NO

If "NO", items 2 through 8 relating to this section may be deleted.

E. Storage

1. Does the distribution system include in-system storage (i.e. storage tank, bulge in system / reservoir)

YES

If "NO", item 2 and 3 relating to this section may be deleted.

If "YES" is it a: Storage Tank

YES

 Bulge in System / Reservoir

YES

Complete appropriate table(s), unused table may be deleted.

2. Storage Tank:

MATERIAL (CONCRETE, FIBERGLASS, METAL, ETC.)	CAPACITY (IN GALLONS)	ABOVE GROUND OR BURIED
Various (22 reservoirs)	4.685 million gallons	Above

3. Bulge in System / Reservoir:

RESERVOIR NAME OR NUMBER (CORRESPOND TO MAP)	APPROXIMATE DAM HEIGHT	APPROXIMATE CAPACITY (IN ACRE FEET)
See #2		

F. Gravity Flow Pipe

(THE DEPARTMENT TYPICALLY USES THE HAZEN-WILLIAMS FORMULA FOR A GRAVITY FLOW PIPE SYSTEM)

1. Does the system involve a gravity flow pipe?

YES

If "NO", items 2 through 4 relating to this section may be deleted.

2. Complete the table:

PIPE SIZE	PIPE TYPE	"C" FACTOR	AMOUNT OF FALL	LENGTH OF PIPE	SLOPE	COMPUTED RATE OF WATER FLOW (IN CFS)
**						

RECEIVED BY OWRD
FEB 26 2013

SALEM, OR

3. Provide calculations:

**Water is delivered through a long established quasi-municipal water system. See system description Section 2 item 4. Waiver on calculations

4. If an actual measurement was taken, provide the following:

DATE OF MEASUREMENT	WHO MADE THE MEASUREMENT	MEASUREMENT METHOD	MEASURED QUANTITY OF WATER (IN CFS)
NA			

Attach measurement notes.

G. Gravity Flow Canal or Ditch

(THE DEPARTMENT TYPICALLY USES MANNING'S FORMULA FOR CANALS AND DITCHES)

1. Is a gravity flow canal or ditch used to convey the water as part of the distribution system? **NO**

If "NO", items 2 through 4 relating to this section may be deleted.

H. Reservoir

1. Does the claim involve a reservoir modified through a transfer? **NO**

Reminder: Complete this section if the reservoir right has been modified through the transfer process. If the claim is for a permitted reservoir use the Claim of Beneficial Use form for reservoirs.

If "NO", items 2 through 9 relating to this section may be deleted.

RECEIVED BY OWRD

FEB 26 2013

SALEM, OR

SECTION 3

CONDITIONS

All conditions contained in the permit, permit amendment, transfer final order, or any extension final order shall be addressed. Reports that do not address all performance related conditions will be returned.

1. Time Limits:

Permits, transfer final orders, and any extension final orders contain any or all of the following dates: the date when the actual construction work was to begin, the date when the construction was to be completed, and the date when the complete application of water to the proposed use was to be completed. These dates may be referred to as ABC dates. Describe how the water user has complied with each of the development timelines established in the permit, extension or transfer final order:

	DATE FROM PERMIT OR TRANSFER	DATE ACCOMPLISHED*	DESCRIPTION OF ACTIONS TAKEN BY WATER USER TO COMPLY WITH THE TIME LIMITS
ISSUANCE DATE	8/18/2008		
BEGIN CONSTRUCTION (A)	NA		
COMPLETE CONSTRUCTION (B)	8/18/2014	8/18/2008	System complete when permit issued
COMPLETE APPLICATION OF WATER (C)	8/18/2014	5/7/2012	Application of water verified using spreadsheet of current commercial – industrial customers

* MUST BE WITHIN PERIOD BETWEEN PERMIT, TRANSFER FINAL ORDER, OR ANY EXTENSION FINAL ORDER ISSUANCE AND THE DATE TO COMPLETELY APPLY WATER

2. Is there an extension final order(s)?

NO

If "NO", you may delete item 3 in this section.

4. Initial Water Level Measurements:

a. Was the water user required to submit an initial static water level measurement?

NO

If "NO", items 4b through 4d relating to this section may be deleted.

5. Annual Static Water Level Measurements:

a. Was the water user required to submit annual static water level measurements?

NO

If "NO", items 5b through 5e relating to this section may be deleted.

6. Pump Test (Required for most ground water permits prior to issuance of a certificate)

a. Did the permit require the submittal of a pump test?

NO

If "NO", items 6b through 6e relating to this section may be deleted.

7. Measurement Conditions:

a. Does the permit, permit amendment, transfer final order, or any extension final order require the installation of a meter or approved measuring device?

YES

If "NO", items 7b through 7f relating to this section may be deleted.

Reminder: If a meter or approved measuring device was required, the COBU map must indicate the location of the device in relation to the point of diversion or appropriation.

b. Has a meter been installed?

YES

c. Meter Information

POD/POA NAME OR #	MANUFACTURER	SERIAL #	CONDITION (WORKING OR NOT)	CURRENT METER READING	DATE INSTALLED
POD	Ultra Mag	UM2006 0282	Working	2461809K	2006
	UM06-18				

If a meter has been installed, items 7d through 7f relating to this section may be deleted.

8. Recording and reporting conditions

a. Is the water user required to report the water use to the Department?

If "NO", item 8b relating to this section may be deleted.

b. Have the reports been submitted?

METHOD OF SUBMITTING REPORT (PAPER OR ELECTRONIC)	WATER USER REPORTING ID
Report attached (attachment-3)	30442

If the reports have not been submitted, attach a copy of the reports if available.

RECEIVED BY OWRD
FEB 26 2013

YES

SALEM, OR NO

9. Fish Screening

a. Are any points of diversion required to be screened to prevent fish from entering the point of diversion? **YES**

If "NO", items 9b through 9e relating to this section may be deleted.

Reminder: If fish screening devices were required, the COBU map must indicate their location in relation to the point of diversion.

b. Has the fish screening been installed? **YES**

c. When was the fish screening installed?

DATE	BY WHOM
8/11/2006	Salyden Construction, Stayton, OR

Reminder: If the permit or transfer final order was issued on or after February 1, 2011, the fish screen is required to be approved by the Oregon Department of Fish and Wildlife regardless of the rate of diversion.

d. If the diversion **involves a pump *and* the total diversion rate of all rights at the point of diversion is less than 225 gpm (0.5 cfs) and the permit was issued prior to February 1, 2011:**

- Has the self-certification form previously been submitted to the Department? **NA**
- If not, go to <http://www.wrd.state.or.us/OWRD/PUBS/forms.shtml>, complete and attach a copy of the self-certification form to this claim, and send a copy of it to the Oregon Department of Fish and Wildlife (ODFW).

Reminder: Failure to submit evidence of a timely installed fish screen may result in an unfavorable determination. The ODFW self certification form needs to have been previously submitted or be attached to this form.

e. If the diversion **does not involve a pump *or* the total diversion rate of all rights at the point of diversion is 225 gpm (0.5 cfs) or greater:**

- Has the ODFW approval been previously submitted?
- If not, contact and work with ODFW to ensure compliance. To demonstrate compliance, provide signed documentation from ODFW. A form is available at <http://www.wrd.state.or.us/OWRD/PUBS/forms.shtml>

Reminder: Failure to submit evidence of a timely installed fish screen may result in an unfavorable determination. In order to receive a favorable approval, the ODFW/WRD "Fish Screen Inspection" form needs to have been previously submitted or be attached to this form.

10. By-pass Devices

a. Are any points of diversion required to have a by-pass device to prevent fish from entering the point of diversion? **YES**

If "NO", items 10b and 10c relating to this section may be deleted.

Reminder: If by-pass devices were required, the COBU map must indicate their location in relation to the point of diversion.

b. Have by-pass devices been installed? **NO**

c. Describe the diversion works as related to whether a by-pass device is installed or unnecessary:
(Provide a letter from ODFW indicating the device is approved or is unnecessary. If there is no letter from ODFW, explain whether or not a by-pass device is necessary.)

RECEIVED BY OWRD

FEB 26 2013

SALEM, OR

WR

DESCRIPTION (E.G. "ODFW HAS APPROVED THE BY-PASS DEVICE" OR "NO BY-PASS DEVICE IS NECESSARY BECAUSE THERE IS A DIRECT DIVERSION FROM THE STREAM VIA A PUMP ON RIVER LEFT STREAM BANK WITH FOOT VALVE DESCENDING DIRECTLY INTO NATURAL POOL.") IN ADDITION, YOU MAY ATTACH PHOTOS TO THIS CLAIM.	IF INSTALLED (DATE)	IF INSTALLED, BY WHOM
See letter from ODF&W		

11. Other conditions required by permit, permit amendment final order, extension final order, or transfer final order:

- a. Were there special well construction standards? NO
- b. Was submittal of a ground water monitoring plan required? NO
- c. Was the water user required to restore the riparian area if it was disturbed? YES
- d. Was a fishway required? YES
- e. Was submittal of a letter from an engineer required prior to storage of water? NO
- f. Was submittal of a water management and conservation plan required? NO
- g. Other conditions? NO

If "YES" to any of the above, identify the condition and describe the water user's actions to comply with the condition(s):

- c. Diversion was existing – no disturbance to riparian area
- d. No dam or obstruction in stream so no fish-way required

SECTION 4 VARIATIONS

Include a description of variations from the permit, permit amendment final order, extension final order, or transfer final order. (i.e. *"The permit allowed three points of diversion. The water user only developed one of the points."* or *"The permit allowed 40.0 acres of irrigation. The water user only developed 10.0 acres."*)

Place of use modified slightly due to change in customer base

SECTION 5 ATTACHMENTS

Provide a list of any additional documents you are attaching to this report:

ATTACHMENT NAME	DESCRIPTION
Attachment 1	Letter from ODF&W – fish screens, by-pass
Attachment 2	E-mail from Department waiving calculations for gravity flow portion of delivery system
Attachment 3	Water use reporting
Attachment 4	Listing of place of use by township, range, section ¼ ¼

SECTION 6 CLAIM SUMMARY

POD / POA NAME OR #	MAXIMUM RATE AUTHORIZED	CALCULATED THEORETICAL RATE BASED ON SYSTEM	AMOUNT OF WATER MEASURED	USE	# OF ACRES ALLOWED	# OF ACRES DEVELOPED
POD	1.41	6.88		Commercial Industrial		

SECTION 7 CLAIM OF BENEFICIAL USE MAP

The Claim of Beneficial Use Map must be submitted with this claim. Claims submitted without the Claim of Beneficial Use map will be returned. The map shall be submitted on poly film at a scale of 1" = 1320 feet, 1" = 400 feet, or the original full-size scale of the county assessor map for the location.

Provide a general description of the survey method used to prepare the map. Examples of possible methods include, but are not limited to, a traverse survey, GPS, or the use of aerial photos. If the basis of the survey is an aerial photo, provide the source, date, series and the aerial photo identification number.

Dear Sirs,

Regarding OWRD water right permit S-54592 (application S-87299), ODFW inspected the intake site on December 19, 2006 and found that the condition for fish screening at the point-of-diversion had been met, and also determined that a bypass device and fishway were not required.

Sincerely,

RK

Subject: Permit S-54592 - Cal waiver of gravity

Gerry,
Norm and I are preparing the Claim of Beneficial Use Report for permit S-54592 (application S-87299) for commercial/industrial use.

The water is delivered through a long existing quasi-municipal system that consists of 272 miles of main water lines ranging from 18 inch to 2 inch. The system contains 22 reservoirs (4.685 million gallons).

Water is delivered to users by various sized gravity pipe from the reservoirs. This system of pipes and reservoirs is quite extensive and complex and it would be a monumental task to try to compute the gravity flow to each individual user.

Therefore, we are asking for a waiver from providing calculations for the gravity flow portion of their delivery system (section 2 item F COBU Report).

Thank you for your consideration to our request.

Clay Jordan

October through September
Water Use Recording and Reporting Form

2011

Consult the water right (permit, certificate, order) to determine applicable reporting conditions; the measurement, recording, and reporting conditions identified in a permitted or certified water right typically follow the place of use description. Use the columns below to document measurements for each authorized point of diversion/appropriation or reservoir. We ask that zeros be reported for any given month when water is not being used. Keep a copy of all measurement reports for your records. We encourage you to submit your water use data via our online utility when available, and to use the Monthly Water Use Forms for record keeping purposes. To lookup water rights, access the water use reporting webpage/online utility, or to obtain additional forms visit our web site: <http://www.wrd.state.or.us>

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the meter(s) in good working order. The permittee shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter(s); provided however, where any meter is located within a private structure, the watermaster shall request access upon reasonable notice.

The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW prior to diversion of any water. The permittee may submit evidence in writing that ODFW has determined screens and/or by-pass devices are not necessary.

The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the permittee has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The permittee is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

STANDARD CONDITIONS

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of

any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

The use may be restricted if the quality of the source stream or downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

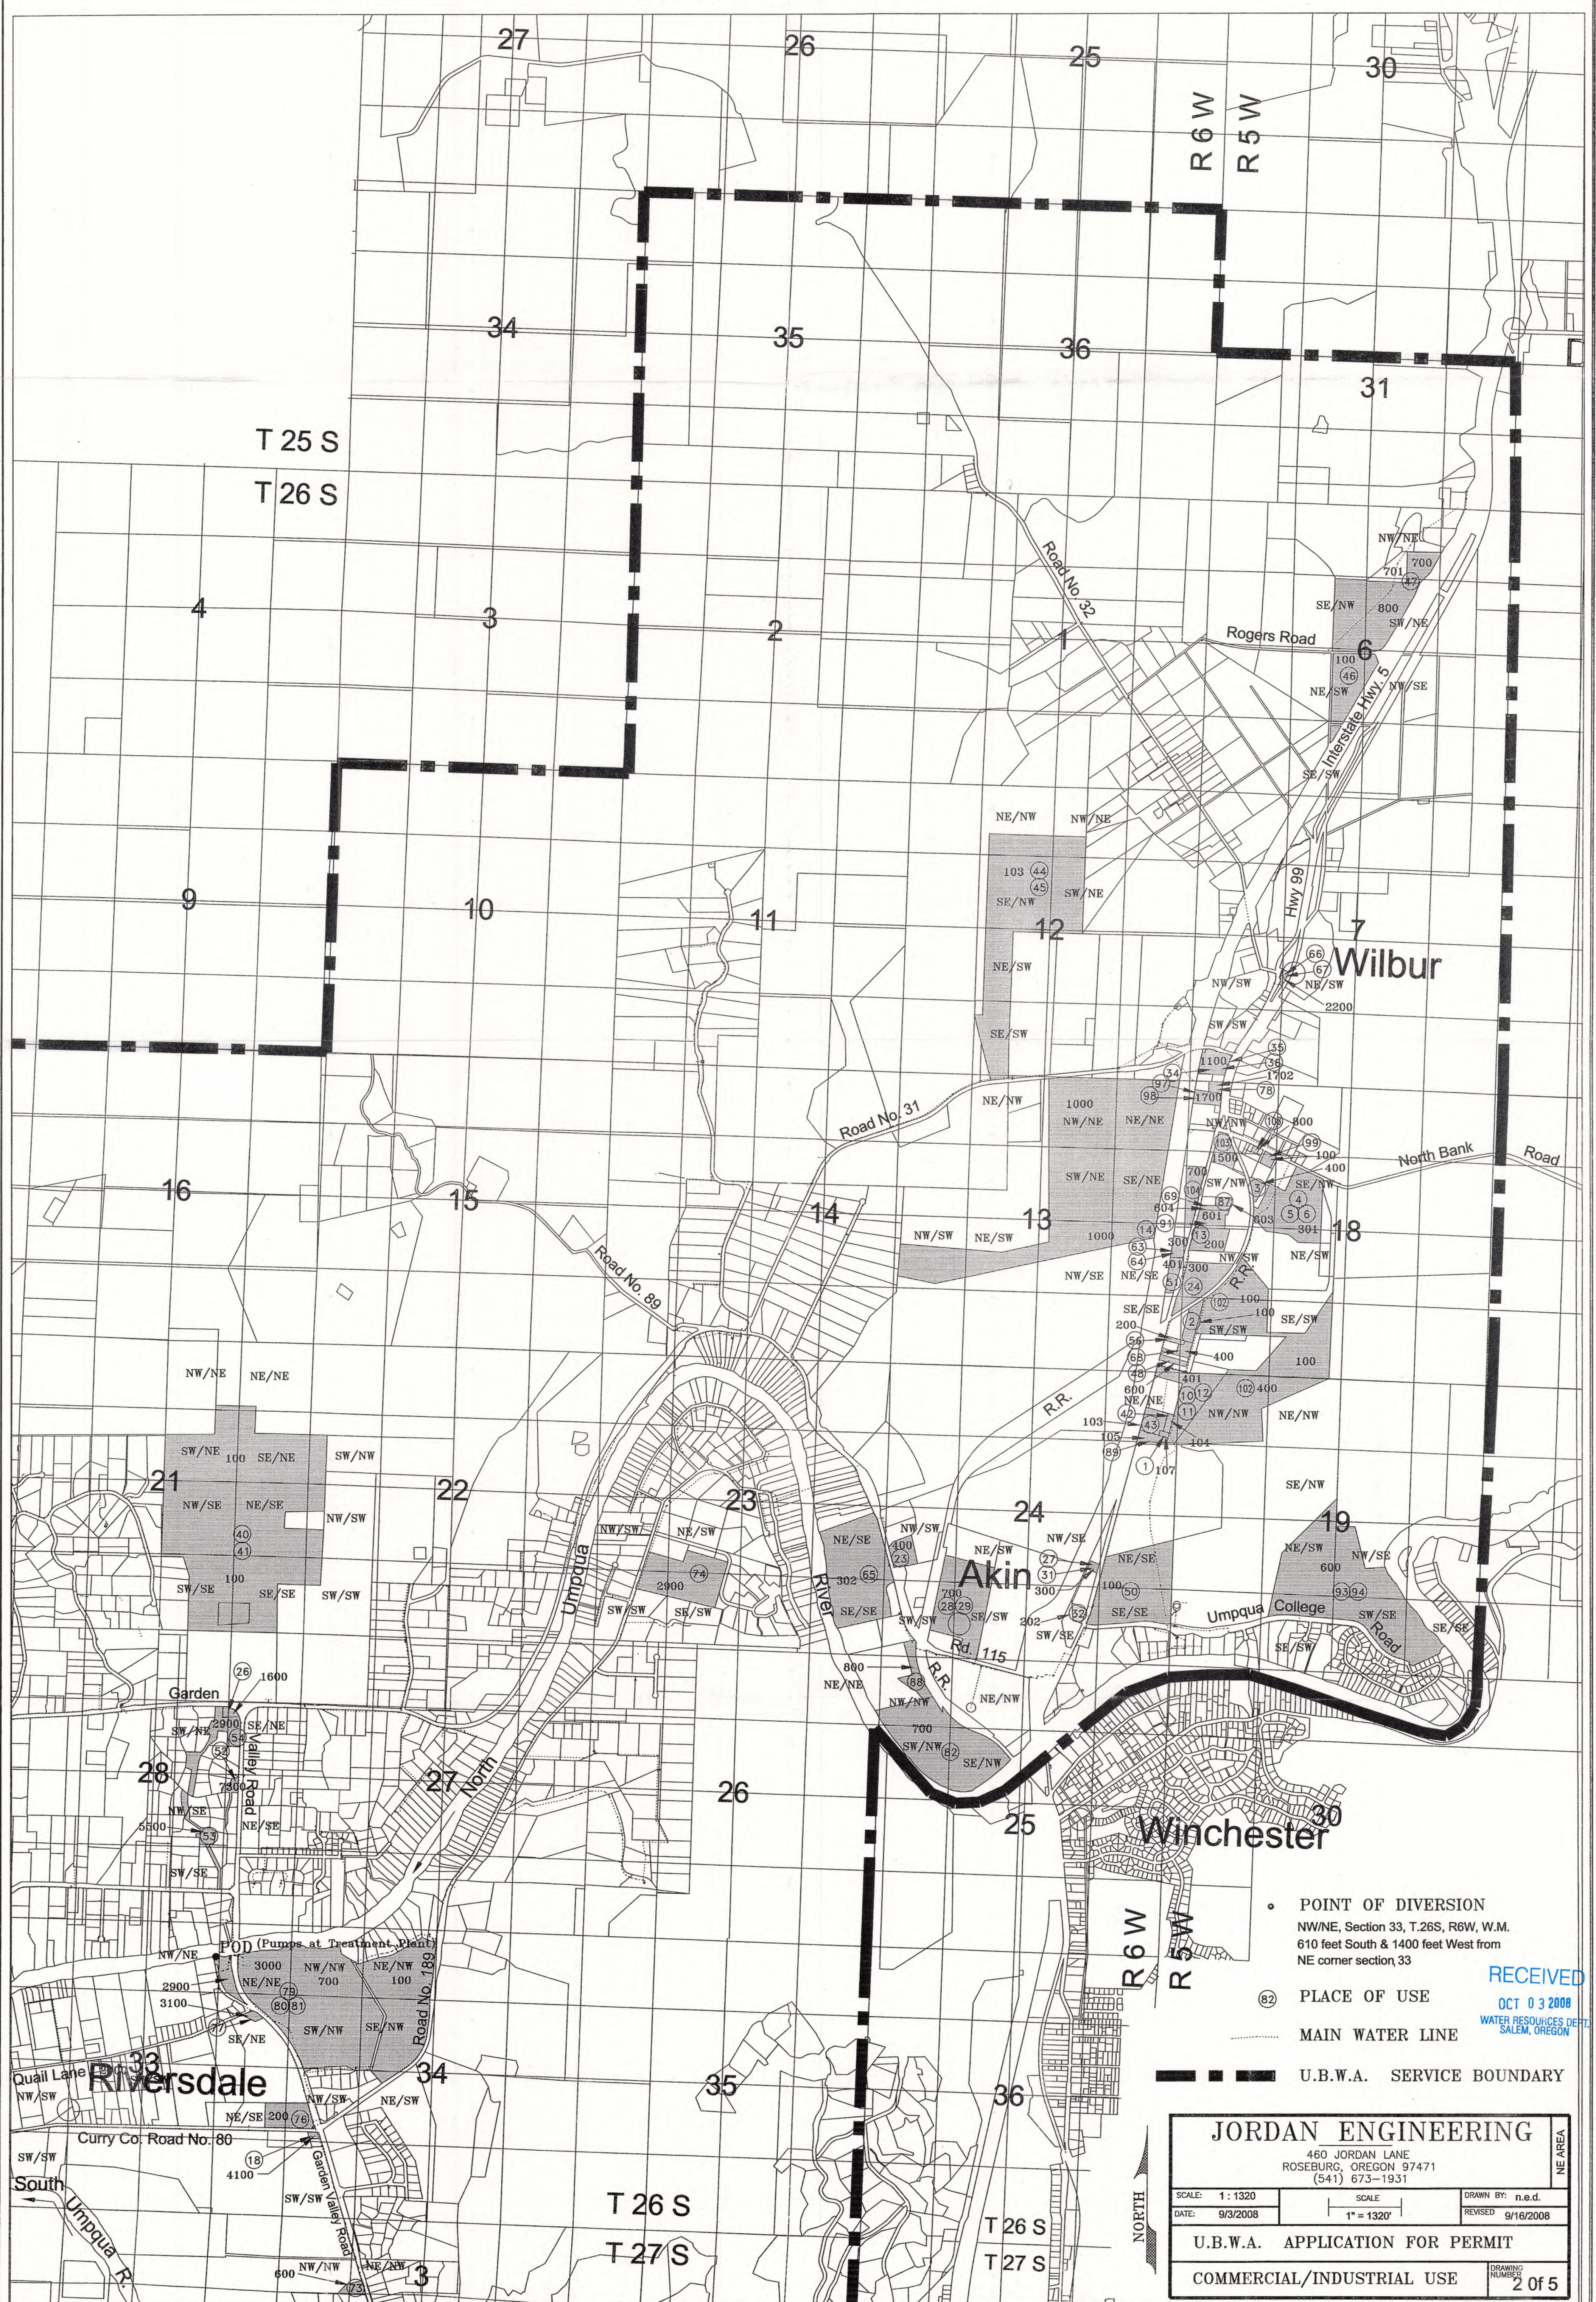

Completion of construction and application of the water shall be made within five years of the date of permit issuance. If beneficial use of permitted water has not been made before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after making beneficial use of water, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner.

Final Order

Appeal Rights

This is a Final Order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

This statement of judicial review rights does not create a right to judicial review of this order, if judicial review is otherwise precluded by law. Where no changes have been made to a Proposed Final Order on a water right application and no protests have been filed during the protest period, the Final Order is not subject to judicial review.

Application History

On September 29, 2008, Umpqua Basin Water Association Inc. submitted an application to the Department for a water use permit. The Department issued a Proposed Final Order on June 9, 2009. The protest period closed July 24, 2009, and no protest was filed.

The proposed use would not impair or be detrimental to the public interest.

Order

Application S-87299 therefore is approved as proposed by the Proposed Final Order, and Permit S-54592 is issued as limited by the conditions proposed by the Proposed Final Order.

DATED August 18, 2009

E. Timothy Ward
for Phillip C. Ward, Director
Water Resources Department

This document was prepared by Joel Plahn. If you have any questions about any of the statements contained in this document I am most likely the best person to answer your questions. You can reach me at 503-986-0815.

If you have previously filed a protest and want to know its status, please contact Patricia McCarty at 503-986-0820.

If you have other questions about the Department or any of its programs please contact our Customer Service Group at 503-986-0801.

Address all other correspondence to: Water Rights Section, Oregon Water Resources Department, 725 Summer St NE Ste A, Salem OR 97301-1266, Fax: 503-986-0901.

ODFW DIVISION 33 APPLICATION REVIEW SHEET

Recommendations for Water Right Applications that may affect the
Habitat of Sensitive, Threatened or Endangered Fish Species, OAR 690-33-310 through 340.

Application #: 5-87299 Applicant's Name: UMPAWA BASIN H2O ASSOCIATION

1) Will the proposed use occur in an area that may affect the essential habitat of sensitive, threatened, or endangered fish species?
[690-33-330(1)]

NO YES Species: Coho, Spawning & Winter Sockeye Salmon Status: Sensitive Threatened Endangered

If YES, continue to question (2). If NO, you may comment by completing the public interest review sheet on the back of this page.

2) Stage or value at risk (check all that apply): Spawning, Incubation, Rearing, Passage, Habitat Value

3) Will the proposed use result in a LOSS in the essential habitat of THREATENED OR ENDANGERED SPECIES or a NET LOSS in the essential habitat of a SENSITIVE SPECIES? NO YES

A) Standard of NET LOSS applies to sensitive species statewide. [690-33-330(2)(b)]

B) Standard of LOSS applies to T or E species outside the Columbia Basin. [690-33-330(2)(a)]

4) Can conditions be applied to mitigate the impact to the essential habitat of a S, T or E species?

NO; skip to question 6. YES

Which conditions are recommended? (select from Menu of Conditions) Fish Div 33, b52, b57, w9

5) If conditions cannot be identified to offset impacts to the essential habitat of S, T or E species, would the proposed use harm the species? NO YES [690-33-330(4)]

If YES, please explain:

6) If WRD determines that it is in the public's interest to approve a permit even if the impact cannot be mitigated what conditions do you recommend? (select from Menu of Conditions)

7) Your recommendation under OAR 690-033-0330 (2):

Approval with conditions
 Approval without conditions
 Denial

WATERMASTER DIVISION 33 APPLICATION WORK SHEET

Recommendations for Water Right Applications that may affect the
Habitat of Sensitive, Threatened or Endangered Fish Species, OAR 690-33-310 through 340.

Application #: S-87299 Applicant's Name: Umpqua Basin Water Association

1) Does the affected surface water source flow above ground in a defined channel into another water body?

YES

NO SOMETIMES; between _____ and _____.

2) Does the affected surface water source ever go dry in the area of the proposed diversion? YES NO

3) To your knowledge, has the affected surface water source of water been regulated because of insufficient flow to satisfy existing water rights including instream water rights? YES NO

If YES, please explain: THE NORTH UMPQUA RIVER IS REGULATED INFREQUENTLY FOR ISWR'S.

4) Do you agree with the specified water availability, and the recommended period of use? YES NO I DON'T KNOW

If NO, please explain: _____

5) Did you discuss this application with staff from another agency? YES NO

Who: _____ Agency: _____ Date: _____

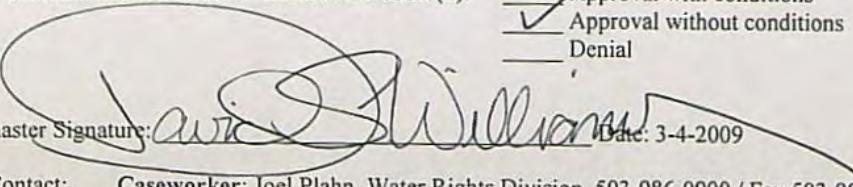

6) If the Initial Review is unfavorable, is mitigation an option? YES NO

If YES, please explain: NA

7) What conditions do you recommend? _____

8) Your recommendation under OAR 690-033-0330 (2):

Approval with conditions
 Approval without conditions
 Denial

Watermaster Signature: 

Date: 3-4-2009

UMPQUA BASIN PROGRAM

[NOTE: The Umpqua River Basin is delineated on State Water Resources Board Map 16.6, dated 1969, available from the agency.]

690-516-0005

Classifications

(1) The maximum economic development of this state, the attainment of the highest and best use of the waters of the Umpqua River Basin, and the attainment of an integrated and coordinated program for the benefit of the state as a whole will be furthered through utilization of the aforementioned waters only for domestic, livestock, municipal, irrigation, temperature control, power development, industrial, mining, recreation, wildlife, fish life uses, and pollution abatement; and the waters of the Umpqua River Basin are hereby so classified with the following exceptions:

(a) Preference shall be given to human consumption, livestock consumption and irrigation of non-commercial gardens not to exceed one-half acre in area for all the waters of the Umpqua River Basin over any other beneficial uses;

(b) The waters of the natural lakes of the Umpqua River Basin are classified only for the utilization of water for domestic, livestock, power development not to exceed 7-1/2 theoretical horsepower, and in-lake uses for recreation, wildlife, and fish life purposes;

(c) The waters of Roberts Creek and its tributaries were withdrawn by Water Resources Commission's Order of Withdrawal on October 4, 1991;

(d) The unappropriated waters of Lookingglass Creek and tributaries are withdrawn from further appropriation except for domestic and livestock watering uses under 5,000 gallons per day per appropriation and water legally stored and released from storage from June 1 through September 30 of each year, by the Water Policy Review Board's Order of Withdrawal dated April 3, 1983.

(e) The unappropriated waters of the South Umpqua River and tributaries, excluding Lookingglass and Roberts Creeks, are withdrawn from further appropriation except for human consumption, livestock consumption, irrigation of up to 1/2-acre non-commercial garden and water legally released from storage from July 15 through September 30 of each year, by the Water Policy Review Board's Order of Withdrawal dated April 29, 1985. This limitation shall

not affect the withdrawals previously enacted by the Board for the waters of Roberts and Lookingglass Creeks.

(2) Applications for the use of the waters of the Umpqua River Basin shall not be accepted by any state agency for any purposes contrary to the classifications herein specified, and the granting of applications for such other purposes is declared to be prejudicial to the public interest, and the granting of applications for such other use would be contrary to this water-use program.

(3) Structures or works for utilization of the waters in accordance with the aforementioned classifications are also declared to be prejudicial to the public interest unless planned, constructed and operated in conformity with the applicable provisions of ORS 536.310; and any such structures or works which do not give cognizance to the multiple-purpose concept are further declared to be prejudicial to the public interest.

North Umpqua River (from Rock Creek to Little River)

Use the attached table to assess water availability for applications for domestic uses (including domestic expanded and human consumption), irrigation and agriculture uses, and commercial and industrial uses within the specified reach of the North Umpqua River (main stem only). A copy of the attached table should be placed in the file to document our assessment of water availability.

In this table, the flows protected by the new instream water right have been added back to the equation. (The WAB also includes an upstream scenic waterway that does not apply to this reach; the SWW flows have been removed because they do not become applicable unless the POD is above Rock Creek.) The net result is that water is available in the entire reach, up to the rates and for the uses allowed by the instream water right certificates. Use the tracking spreadsheets in the Resource Center to determine whether the limits allowed by the certificates have been reached. Once the limit has been reached in the spreadsheet for the use applied for, begin using the standard water availability printout.

*** North Umpqua River (from Little River to the mouth)**

Applicant/Organization Name, Mailing Address and Telephone Number.

Source of water. If stored water, is the stored water component filed out, including a non-expired agreement for stored water must be included. (ORS 537.400) *NOTE: A surface water application cannot be filled at the same time as a Reservoir or Alt Reservoir if it will be for the use of the stored water under the PROPOSED Reservoir application (E2).*

The proposed source is is or is not (circle one) withdrawn from further appropriation, or Division 538. If it is, return application and fees.

Property ownership indicated. SPARTS NO!

If applicant does not own all the land, the affected landowner's name and mailing address must be listed. 25 PROPERTIES

If applicant does not own all the land, a statement declaring the existence of either written authorization or an easement permitting access to land crossed by the proposed ditch canal or other work must be submitted.

Groundwater development section (Page 3 and 4, Section B) or a well log report.

Proposed use of water. If supplemental, list primary water right acreage if applicable.

Enclosed Supplemental Form for each proposed use.

Form I (Irrigation)

Form M (Municipal or Quasi-Municipal)

Form R (Mining)

Form Q (Commercial or Industrial)

Spring Description Sheet

Amount of water from *each* source in gallons per minute (GPM), cubic feet per second (CFS), or acre feet (AF)

Period of use

Water management section (Please estimate if the water system has not been designed).

Resource Protection Section (Page 6, Section 5).

Project schedule (If system is already completed, indicate "existing").

For reservoir applications storing more than 9.2 acre feet, and a dam height of more than 10 feet, preliminary plans and specifications for dam and impoundment are required.

If the above statement is checked, the map must be prepared by a CWRE.

All applicants (or the authorized agent with title or authority if for an organization or corporation), must sign the application in ink. Signature must be an original "wet" signature.

You must include a Legal description of the property involved that includes a metes and bounds, or other government survey description. A copy of the deed, land sales contract or title insurance policy can provide this information, or you may submit a lot book report prepared by a title company. The Department will not accept a copy of the tax bill. *ASSOCIATION*.

A completed Land-Use Form or receipt signed and dated by the appropriate planning department officials. Date of signature must be within the past 12 months. Signature must be an original "wet" signature.

The map must meet all the minimum requirements of OAR 690-310-0050.

BEFORE THE OREGON WATER RESOURCES DEPARTMENT

In the Matter of Water Right Application S-87299) PROPOSED FINAL
in the Name of Umpqua Basin Water Association Inc.) ORDER

Background

On September 29, 2008, Umpqua Basin Water Association Inc. submitted application S-87299 to the Oregon Water Resources Department (OWRD) for 1.5 cubic feet per second (cfs) of water from the North Umpqua River for commercial and industrial use in Douglas County.

On November 7, 2008, the Department mailed the applicant notice of its Initial Review. The applicant did not notify the Department to stop processing the application within 14 days of that date. A 30-day public comment period followed. No written comments were received within 30 days.

In reviewing applications, the Department may consider any relevant sources of information, including the following:

- comments by or consultation with another state agency
- any applicable basin program
- any applicable comprehensive plan or zoning ordinance
- the amount of water available
- the rate and duty for the proposed use
- pending senior applications and existing water rights of record
- the Scenic Waterway requirements of ORS 390.835
- applicable statutes, administrative rules, and case law
- any comments received

Findings of Fact

1. The proposed use is for commercial and industrial use year-round.
2. A water availability determination has been completed for this application. The results of this determination are in the file. The Department's analysis has concluded that water is not available for the proposed use from July 1 through November 30 of each year.
3. Commercial and industrial are allowable uses in the Umpqua Basin Program (OAR 690-516-0005).
4. A settlement agreement regarding instream water right application IS 71174 was entered into by the Oregon Water Resources Department (OWRD), the Oregon Department of Fish & Wildlife (ODFW), and Douglas County. The settlement agreement, which is incorporated herein by reference, was based on unique circumstances as follows:

Douglas County agreed to purchase a pump for ODFW such that ODFW could more easily utilize its hatchery right from the North Umpqua River and thereby forego using Rock Creek water for its hatchery during critical low flow periods in Rock Creek. Rock Creek is an important spawning and rearing ground for winter steelhead, cutthroat trout and coho and spring Chinook salmon. Restoring Rock Creek flows during low flow periods by pumping North Umpqua water to the Rock Creek Hatchery will enhance wild fish populations in Rock Creek and in the North Umpqua River.

In exchange for Douglas County purchasing the pump for ODFW, ODFW agreed to transfer seven (7) cfs of its Rock Creek hatchery right instream into the North Umpqua River. ODFW agreed that this transfer, along with the benefits to Rock Creek and resulting enhancement to fish populations in Rock Creek and the North Umpqua River gained through the settlement agreement, would completely mitigate any injury that may otherwise be caused by OWRD issuing up to seven (7) cfs of additional water rights that could not otherwise be issued because no water was available due in part to the certification of ODFW's instream water rights. Thus, pursuant to the OWRD, ODFW, and Douglas County Agreement, OWRD could issue up to 7 cfs of additional water rights without harming the public interest in protecting senior instream water rights and without harming the public interest in protecting flows for sensitive, threatened or endangered fish species. (Settlement Agreement Applications 71172, 71173, 71174, 71181, 71182, 71183, 71184, 71185, 71190, 71192, and 73350.)

The 7 cfs of additional water rights sets aside 4 cfs for human consumption, domestic or domestic expanded; 1.5 cfs for industrial use or commercial use; and 1.5 cfs for irrigation use or agricultural use.

The above-referenced transfer was completed per transfer application T-9770 and approved per final order issued on January 21, 2005.

5. As of the date of this application, 0.09 cfs of the total 1.5 cfs for commercial and industrial use has been appropriated.
6. The conditions that would best protect the public interest, per comments by ODFW are as follows:

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR Chapter 635, Division 415.

The use may be restricted if the quality of the source stream or downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW prior to diversion of any water. The permittee may submit evidence in writing that ODFW has determined screens and/or by-pass devices are not necessary.

Water may be diverted only when Department of Environmental Quality sediment standards are being met.

Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the meter(s) in good working order. The permittee shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.

The permittee shall allow the watermaster access to the meter(s); provided however, where any meter is located within a private structure, the watermaster shall request access upon reasonable notice.

7. If a permit is issued, it will require reasonable use of the water and include water-use measurement and reporting conditions commensurate with the amount of water use allowed.
8. The proposed use and diversion point is covered in the settlement agreement mentioned above and is downstream of the North Umpqua Scenic Waterway.

Discussion

1. Consideration of the Public Interest

In reviewing applications to appropriate surface water, the OWRD will presume that a proposed use will not impair or be detrimental to the public interest if the proposed use is allowed in the applicable basin program established pursuant to ORS 536.300 and 536.340 or given a preference under ORS 536.310(12), if water is available, if the proposed use will not injure other

water rights and if the proposed use complies with rules of the Water Resources Commission. ORS 537.153(2); OAR 690-310-0120.

If the Department determines that the public interest presumption is not established, the Department shall determine whether the proposed use will impair or be detrimental to the public interest considering the factors listed in ORS 537.170(8) and may make specific findings to demonstrate that even though the presumption is not established, the proposed use will not impair or be detrimental to the public interest and propose approval of the application with appropriate modifications or conditions. ORS 537.170(8); OAR 690-310-0120(2).

Pursuant to OAR 690-310-0120(2), in determining whether a proposed use is in the public interest, OWRD must consider the following as provided in ORS 537.170(8):

- (a) Conserving the highest use of water for all purposes, including irrigation, domestic use, municipal water supply, power development, public recreation, protection of commercial and game fishing and wildlife, fire protection, mining, industrial purposes, navigation, scenic attraction or any other beneficial use to which the water may be applied for which it may have a special value for the public.
- (b) The maximum economic development of the waters involved.
- (c) The control of the waters of this state for all beneficial purposes, including drainage, sanitation and flood control.
- (d) The amount of waters available for appropriation for beneficial use.
- (e) The prevention of wasteful, uneconomic, impracticable or unreasonable use of the waters involved.
- (f) All vested and inchoate rights to the waters of this state or to the use of waters of this state, and the means necessary to protect such rights.
- (g) The state water resources policy formulated under ORS 536.295 to 536.350 and 537.505 to 537.534.

Water is not available from the North Umpqua River from July 1 through November 30 of each year. As such the OWRD cannot establish the public interest presumption for this application and instead considers the factors provided in ORS 537.170(8) to determine whether the proposed use will impair or be detrimental to the public interest. ORS 537.170(8); OAR 690-310-0120(2).

2. Analysis of Factors

Conserving the highest use of water for all purposes, including irrigation, domestic use, municipal water supply, power development, public recreation, protection of commercial and game fishing and wildlife, fire protection, mining, industrial purposes, navigation, scenic attraction or any other beneficial use to which the water may be applied for which it may have a special value for the public:

In determining the "highest use of the water for all purposes" the OWRD has examined the importance of water for the proposed use, has considered the importance of protecting senior water rights including instream water rights on the North Umpqua River, and the importance of restoring flows to Rock Creek during months it has historically suffered from critical low flows. A decision to allow the proposed use is at once ancillary to and central to implementing the settlement agreement entered into by ODFW, OWRD and Douglas County. This agreement assures that new uses will not injure senior instream water rights and assures that critical flows will be restored to Rock Creek. Accordingly, issuing this water right conserves the highest use of water for all purposes.

The maximum economic development of the waters involved:

Industrial use involves the use of water associated with the processing or manufacture of a product. The uses include construction, operation and maintenance of an industrial site, facilities and buildings. Examples of the uses include agricultural or forest product processing.

The control of the waters of this state for all beneficial purposes, including drainage, sanitation and flood control:

The proposed use is commercial and industrial, which is a beneficial use, and pursuant to the settlement agreement does not injure other beneficial uses of water including instream water rights.

The amount of waters available for appropriation for beneficial use:

Water is not available at an 80% exceedance level from July 1 through November 30 of each year.

Pursuant to the settlement agreement entered into by the OWRD, ODFW and Douglas County, ODFW agreed that the settlement agreement and transfer referenced in Findings of Fact #4 mitigates any potential for injury that could be caused by issuing this water right. Thus only pursuant to the settlement agreement and transfer, this water right may be issued without harming instream

water right Certificates 81500 and 81501 and without harming the public interest in protecting flows for fish.

The prevention of wasteful, uneconomic, impracticable or unreasonable use of the waters involved:

If a permit is issued, it will require reasonable use of the water and include water use measurement and reporting conditions commensurate with the amount of water use allowed.

All vested and inchoate rights to the waters of this state or to the use of waters of this state, and the means necessary to protect such rights:

Pursuant to the settlement agreement entered into by the OWRD, ODFW and Douglas County, ODFW agreed that the settlement agreement and transfer referenced in Findings of Fact #4 mitigates any potential for injury that could be caused by issuing this water right. Thus only pursuant to the settlement agreement and transfer, this water right may be issued without harming instream water right Certificates 81500 and 81501 and without harming the public interest in protecting flows for fish.

The state water resources policy formulated under ORS 536.295 to 536.350 and 537.505 to 537.534:

The proposed use is consistent with the Water Resource Commission's basin program for this proposed use.

3. Resolution

The criteria for establishing the public interest presumption under ORS 537.153(2) are not satisfied. Nonetheless, after considering the factors of ORS 537.170(8) and conditioning the water right as specified in the draft permit, the proposed use will not impair or be detrimental to the public interest.

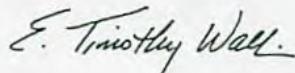

Conclusions of Law

1. Considering the factors set forth in ORS 537.170(8), the use, as conditioned in the draft permit, will not impair or be detrimental to the public interest. ORS 537.170(8); OAR 690-310-0120.

Recommendation

OWRD recommends that the attached draft permit be issued with conditions consistent with this Proposed Final Order.

DATED June 9, 2009

for Phillip C. Ward, Director
Water Resources Department

*If you have any questions,
please check the information
box on the last page for the
appropriate names and
phone numbers.*

Protests

Under the provisions of ORS 537.153(7) (for surface water) or ORS 537.621(8) (for ground water), you can protest this proposed final order. Protests must be received in the Water Resources Department no later than **July 24, 2009**. Protests must be in writing, and must include the following:

- Your name, address, and telephone number;
- A description of your interest in the proposed final order, and, if you claim to represent the public interest, a precise statement of the public interest represented;
- A detailed description of how the action proposed in this proposed final order would impair or be detrimental to your interest;
- A detailed description of how the proposed final order is in error or deficient, and how to correct the alleged error or deficiency;
- Any citation of legal authority to support your protest, if known; and
- If you are not the applicant, the protest fee of \$350 required by ORS 536.050 and proof of service of the protest upon the applicant.
- If you are the applicant, a statement of whether or not you are requesting a contested case hearing. If you do not request a hearing, the Department will presume that you do not wish to contest the findings of the proposed final order.
- *If you do not protest this Proposed Final Order and if no substantive changes are made in the final order, you will not have an opportunity for judicial review, protest or appeal of the final order when it is issued.*

Requests for Standing

Under the provisions of ORS 537.153(7) (for surface water) or ORS 537.621(8) (for ground water), persons other than the applicant who support a proposed final order can request standing for purposes of participating in any contested case proceeding on the proposed final order or for judicial review of a final order.

Requests for standing must be received in the Water Resources Department no later than July 24, 2009. Requests for standing must be in writing, and must include the following:

- The requester's name, mailing address and telephone number;
- If the requester is representing a group, association or other organization, the name, address and telephone number of the represented group;
- A statement that the requester supports the proposed final order as issued;
- A detailed statement of how the requester would be harmed if the proposed final order is modified; and
- A standing fee of \$100.00. If a hearing is scheduled, an additional fee of \$250.00 must be submitted along with a request for intervention.

After the protest period has ended, the Director will either issue a final order or schedule a contested case hearing. The contested case hearing will be scheduled only if a protest has been submitted and either:

- upon review of the issues, the director finds that there are significant disputes related to the proposed use of water, or
- the applicant requests a contested case hearing within 30 days after the close of the protest period.

If you do not request a hearing within 30 days after the close of the protest period, or if you withdraw a request for a hearing, notify the Department or the administrative law judge that you will not appear or fail to appear at a scheduled hearing, the Director may issue a Final Order by default. If the Director issues a Final Order by default, the Department designates the relevant portions of its files on this matter, including all materials that you have submitted relating to this matter, as the record for purpose of proving a *prima facie* case upon default.

This document was prepared by Joel Plahn. If you have any questions about any of the statements contained in this document I am most likely the best person to answer your questions. You can reach me at 503-986-0815.

If you have questions about how to file a protest or a request for standing, please refer to the respective sections in this Proposed Final Order entitled "Protests" and "Requests for Standing". If you have previously filed a protest and want to know its status, please contact Patricia McCarty at 503-986-0820.

If you have other questions about the Department or any of its programs please contact our Customer Service Group at 503-986-0801.

Address all other correspondence to: Water Rights Section, Oregon Water Resources Department, 725 Summer St NE Ste A, Salem OR 97301-1266, Fax: 503-986-0901.

TOWNSHIP 27 SOUTH, RANGE 7 WEST, W.M.		

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the meter(s) in good working order. The permittee shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter(s); provided however, where any meter is located within a private structure, the watermaster shall request access upon reasonable notice.

The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW prior to diversion of any water. The permittee may submit evidence in writing that ODFW has determined screens and/or by-pass devices are not necessary.

The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the permittee has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The permittee is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

Water may be diverted only when Department of Environmental Quality sediment standards are being met.

STANDARD CONDITIONS

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

The use may be restricted if the quality of the source stream or downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

Completion of construction and application of the water shall be made within five years of the date of permit issuance. If beneficial use of permitted water has not been made before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.

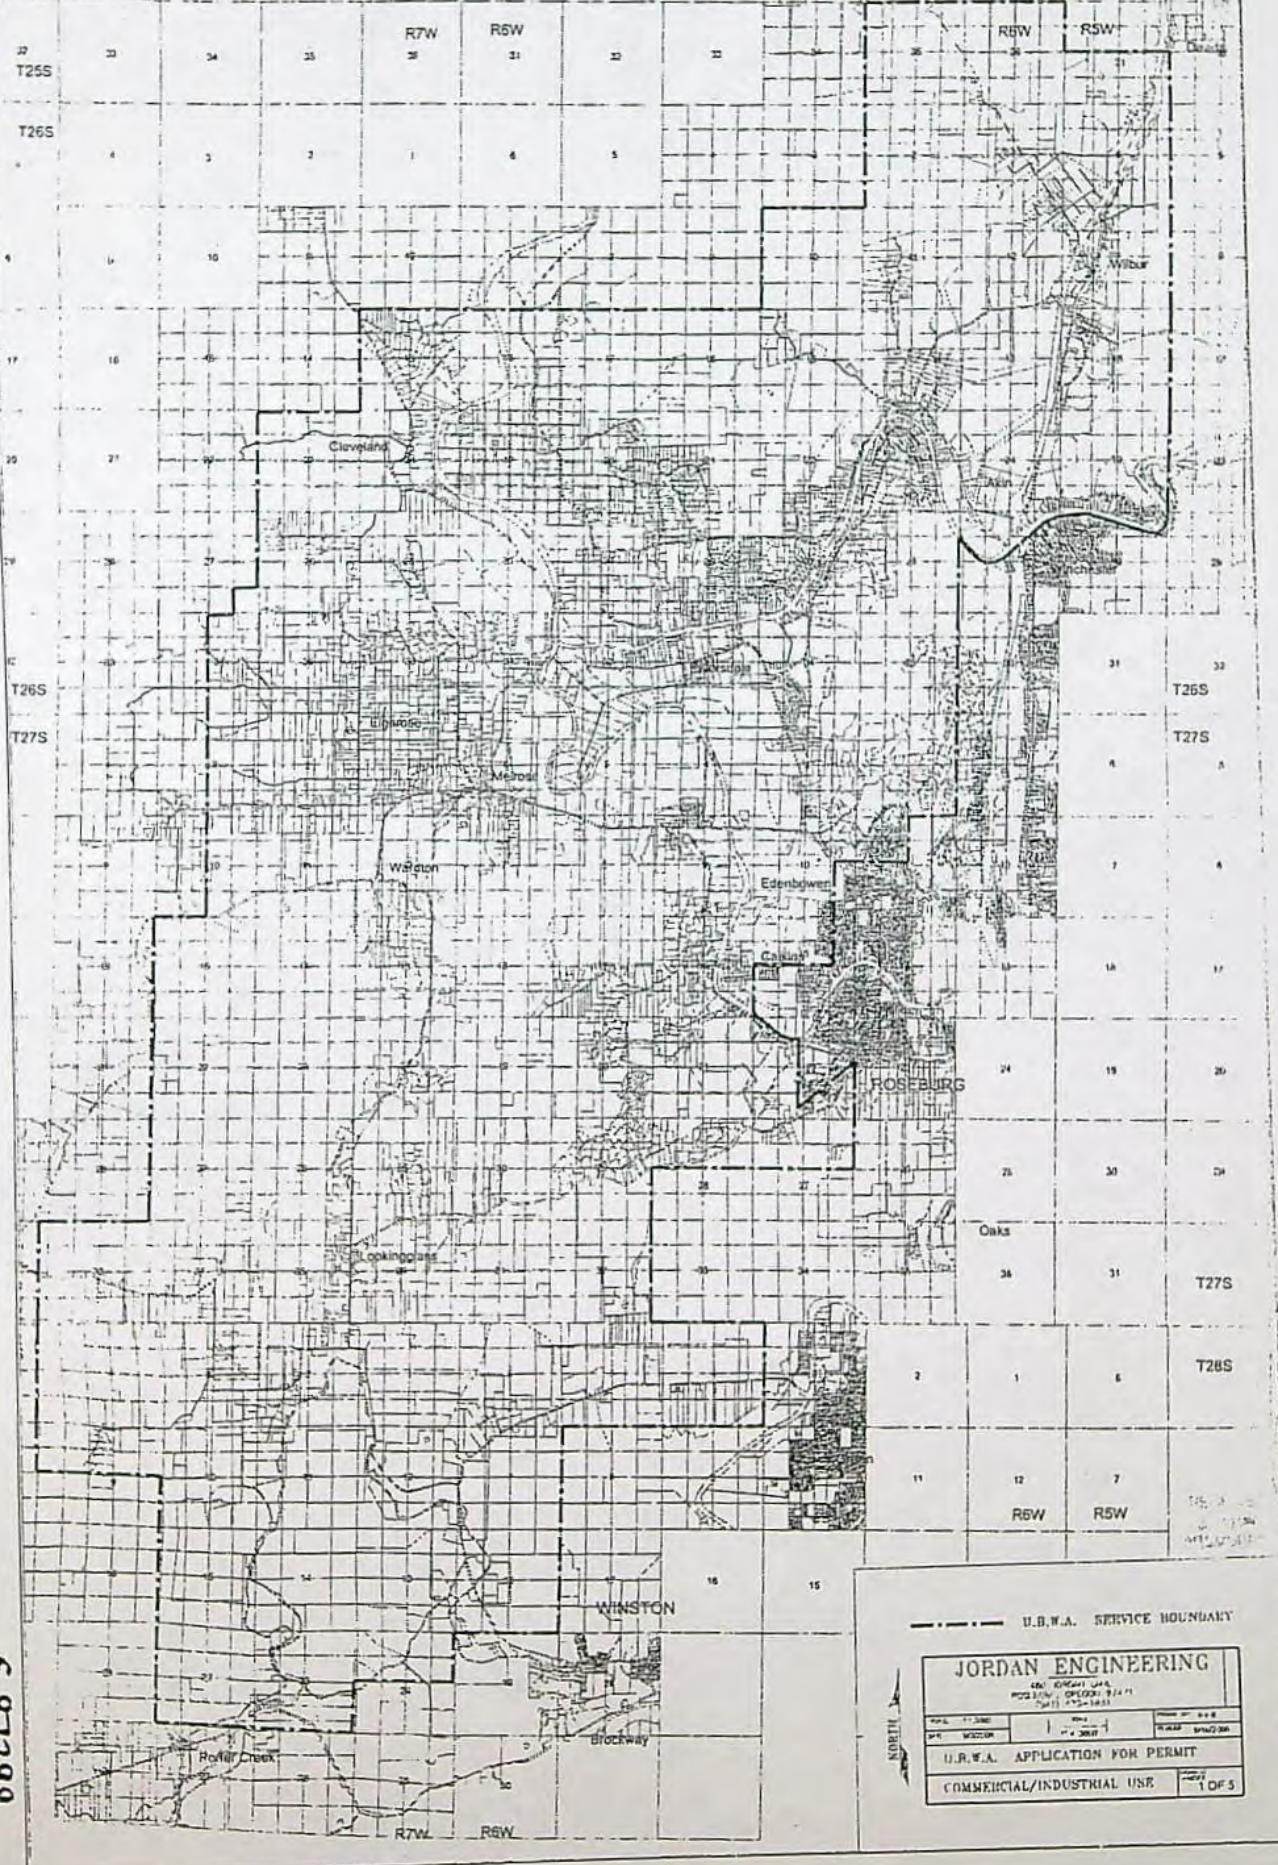

Within one year after making beneficial use of water, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner.

Reference: File S-87299

Dear Applicant:

You indicated on the application form that you do not own all the land where you propose to divert, transport, and use water. OAR 690-310-0020(1) requires the Department to provide notice to all affected landowners prior to issuing a permit. OAR 690-310-0020(2) specifies that if there are more than 25 landowners involved in the proposed use, the notice may be satisfied by publishing a notice of the application for three consecutive weeks in a publication which meets the statutory definition of "newspaper" under ORS 193 for the purpose of public notice. The cost of the publication is to be paid by the applicant. The Department requests that you have the required notice published. The language to be used in the notice is attached. A copy of the affidavit of publication must be submitted to the Department following completion of the notice period. If the three weekly notices have not been published within 45 days from the date of this letter, please submit a receipt demonstrating that this process has been initiated.

If we do not receive the items requested above or a request for an administrative hold by July 29, 2009, the Department will likely proceed with a Proposed Final Order recommending denial of the application.

Please reference the application number when sending any correspondence regarding this application.

If you have any questions, please feel free to call me at 503-986-0815.

Sincerely,

Joel Plahn
Water Rights Caseworker

November 7, 2008

Reference: File S-87299

Dear Applicant:

**THIS IS NOT A PERMIT AND IS
SUBJECT TO CHANGE AT THE NEXT PHASE OF PROCESSING.**

This letter is to inform you of the preliminary analysis of your water use permit application and to describe your options. In determining whether a water use permit application may be approved, the Department must consider the factors listed below, all of which must be favorable to the proposed use if it is to be allowed. Based on the information you have supplied, the Water Resources Department has made the following preliminary determinations:

Initial Review Determinations:

1. The application proposed to use 1.5 cubic feet per second (CFS) from North Umpqua River, a tributary of Umpqua River, for commercial and industrial use year-round.
2. The proposed use is not prohibited by law or rule except where otherwise noted below.
3. The use of water from North Umpqua River, a tributary of Umpqua River, for commercial and industrial use is allowable under the Umpqua Basin Program.
4. An assessment of water availability has been completed, a copy of which is in the file. This assessment compared a calculation of natural streamflow minus the consumptive portion of all relevant rights of record. The assessment determined water is not available for further appropriation (at 80 percent exceedance probability) because water has been fully appropriated by senior water rights. However, pursuant to a settlement agreement entered into by the Oregon Water Resources Department, Oregon Department of Fish and Wildlife, and Douglas County, seven (7) CFS of additional water is available for human consumption, domestic, domestic expanded, industrial, commercial, irrigation, and agricultural use. As of the date of this application, 0.09 CFS of the total 1.5 CFS for commercial and industrial has been appropriated. Your application requested 1.5 CFS. If the application is approved, the rate allowed will be limited to 1.41 CFS.

Summary of Initial Determinations

The use of 1.41 CFS from North Umpqua River, a tributary of Umpqua River, for commercial and industrial use may be allowed during the full period requested, year-round.

Because of the Department's determination, your application can be moved to the next phase of the water rights application review process where public interest factors will be evaluated. However, due to #4 above, your application will likely be limited accordingly.

Please reference the application number when sending any correspondence regarding the conclusions of this initial review. Comments received within the comment period will be evaluated at the next phase of the process.

At this time, you must decide whether to proceed or to withdraw your application as described below.

Withdrawal Refunds:

If you choose not to proceed, you may withdraw your application and receive a refund (minus a \$150 processing charge per application.) To accomplish this you must notify the Department in writing by **Friday, November 21, 2008**. For your convenience you may use the enclosed "STOP PROCESSING" form.

To Proceed With Your Application:

If you choose to proceed with your application, you do not have to notify the Department. Your application will automatically be placed on the Department's Public Notice to allow others the opportunity to comment. After the comment period the Department will complete a public interest review and issue a Proposed Final Order.

If A Permit Is Issued It Will Likely Include The Following Conditions:

1. Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the meter(s) in good working order. The permittee shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.

- B. The permittee shall allow the watermaster access to the meter(s); provided however, where any meter is located within a private structure, the watermaster shall request access upon reasonable notice.
2. You may be required to install fish screens at the point of diversion to meet Oregon Department of Fish and Wildlife specifications for adequate protection of aquatic life.

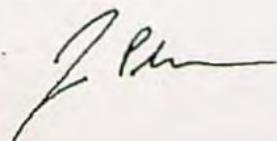

This initial review does not attempt to address various public interest issues such as sensitive, threatened, or endangered fish species. These issues will be addressed as the Department reviews comments from the public and other agencies, and prepares a Proposed Final Order. You should be aware that, if significant public interest issues are found to exist, such a finding could have an impact on the eventual outcome of your application.

The water source identified in your application may be affected by an Agricultural Water Quality Management Area Plan. These plans are developed by the Oregon Department of Agriculture (ODA) with the cooperation of local landowners and other interested stakeholders, and help to ensure that current and new appropriations of water are done in a way that does not adversely harm the environment. You are encouraged to explore ODA's Water Quality Program web site at http://www.oregon.gov/ODA/NRD/water_agplans.shtml to learn more about the plans and how they may affect your proposed water use.

If you have any questions:

Feel free to call me at 503-986-0815 if you have any questions regarding the contents of this letter or your application. Please have your application number available if you call. General questions about water rights and water use permits should be directed to our customer service staff at 503-986-0801. When corresponding by mail, please use this address: Joel Plahn, Oregon Water Resources Department, 725 Summer St NE Ste A, Salem OR 97301-1266. Our fax number is 503-986-0901.

Sincerely,

Joel Plahn

Water Resources Department
Mr Dwight French
725 Summer St. NE
Suite A
Salem, OR 97301

Umpqua Basin Water Association, INC.
Water Right Application regarding combined
total between certificated applications IS 71174
and IS 73350 of up 1.5 cfs for industrial or
commercial use.

October 2, 2008

Mr. French:

Please find inclosed five 2'x3' drawings (four each), the application for surface water, the five page chart (UBWA-PLACE OF USE) listing the places of use, the three page Excel spread sheet listing per map number including customer's type, name, Tax Lot and legal description per property ID "R" number, the Form Q for commercial and industrial water uses and the Land Use Information Form. Also, due to inadvertent mailings, it is understood that Mr. Herbert Mosgar (with the department) has the check from Umpqua Basin Water Association in the sum of \$1,400 made out to the Department.

The check is to cover the summation of:

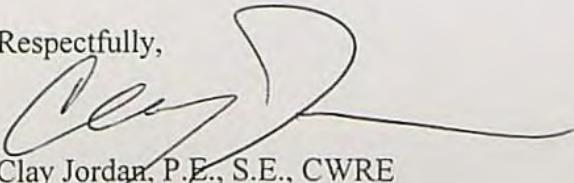

\$500 base
\$200 1st cfs
\$200 2nd cfs or fraction thereof
\$300 Permit recording fee
\$200 For each additional use (commercial - industrial)
\$1,400 Total

It is our understanding, as opposed to Tax Lot numbers, the individuality exclusive allocation of R numbers to property ownership is a legal path of description to the individual property's legal description. It is further understood that this satisfies in intent and spirit the requirements for the legal descriptions of ownership already on file with the State of Oregon, County of Douglas for each place of use as needed.

The infrastructure work for transportation from the POD to each of the proposed places of use are within the County right-of-ways and/or private property easements agreements on file with the Umpqua Basin Water Association. Each one of the proposed places of use has and is in current historical use of this pre-existing infrastructures for delivery through said right-of-ways and/or easement agreements with the Association.

If there are any questions please contact me or my assistant, Mr. Norm Daft.

Respectfully,

Clay Jordan, P.E., S.E., CWRE

Application for a Permit to Use Surface Water

Please type or print in dark ink. If your application is found to be incomplete or inaccurate, we will return it to you. If any requested information does not apply to your application, insert "n/a." Please read and refer to the instructions when completing your application. A summary of review criteria and procedures that are generally applicable to these applications is available at www.wrd.state.or.us/OWRD/PUBS/forms.shtml.

2. SOURCE AND PROPERTY OWNERSHIP

A. The Proposed Source of Water

Provide the commonly used name of the water body from which water will be diverted, and the name of the stream or lake it flows into. If unnamed, say so:

Source 1: North Umpqua River Tributary to: Umpqua River
Source 2: _____ Tributary to: _____
Source 3: _____ Tributary to: _____
Source 4: _____ Tributary to: _____

If any source listed above is stored water that is authorized under a water right permit, certificate, or decree, attach a copy of the document or list the document number (for decrees, list the volume, page and/or decree name).

NA

B. Applications to Use Stored Water

Complete this section if any source listed in item 2A above is stored water.

Do you, or will you, own the reservoir(s) described in item 2A above?

Yes

No. (Please enclose a copy of your written notification to the operator of the reservoir of your intent to file this application, which you should have already mailed or delivered to the operator.)

If *all* sources listed in item 2A are stored water, the Department will review your application using the expedited process provided in ORS 537.147, unless you check the box below. Please see the instruction booklet for more information.

By checking this box, you are requesting that the Department process your application under the standard process outlined in ORS 537.150 and 537.153, rather than the expedited process provided by ORS 537.147. To file an application under the standard process, you must enclose the following:

- A copy of a signed non-expired contract or other agreement with the owner of the reservoir (if not you) to impound the volume of water you propose to use in this application.
- A copy of your written agreement with the party (if any) delivering the water from the reservoir to you.

RECEIVED

OCT 03 2008

WATER RESOURCES DEPT
SALEM, OREGON

C. Property Ownership

Do you own all the land where you propose to divert, transport, and use water?

Yes (Please check appropriate box below then skip to section 3 'Water Use')

There are no encumbrances

This land is encumbered by easements, rights of way, roads or other encumbrances
(please provide a copy of the recorded deed(s))

No (Please check the appropriate box below)

I have a recorded easement or written authorization permitting access.

I do not currently have written authorization or easement permitting access.

Written authorization or an easement is not necessary, because the only affected

lands I do not own are state-owned submersible lands, and this application is for
irrigated and/or domestic use only (ORS 274.040).

You must provide the legal description of: (1) the property from which the water is to be diverted, (2) any property crossed by the proposed ditch, canal or other work, and (3) any property on which the water is to be used as depicted on the map.

List the names and mailing addresses of all affected landowners.

More than 25 properties

3. WATER USE

Please read the instruction booklet for more details on "type of use" definitions, how to express how much water you need and how to identify the water source you propose to use. You must fill out a supplemental form for some uses as they require specific information for that type of use.

A. Type(s) of Use(s)

See list of beneficial uses provided in the instructions.

• If your proposed use is **domestic**, indicate the number of households to be supplied with water: _____

• If your proposed use is **irrigation**, please attach Form I

• If your proposed use is **mining**, attach Form R

• If your proposed use is **municipal or quasi-municipal**, attach Form M

• If your proposed use is **commercial/industrial**, attach Form Q

RECEIVED
OCT 03 2008
WATER RESOURCES DEPT
SALEM, OREGON

B. Amount of Water

Provide the amount of water you propose to use from each source, for each use, in cubic feet-per-second (cfs) or gallons-per-minute (gpm). If the proposed use is from storage, provide the amount in acre-feet (af):

(1 cfs equals 448.8 gpm. 1 acre-foot equals 325,851 gallons or 43,560 cubic feet)

Source	Type of use	Amount		
North Umpqua River	Commercial/Industrial	1.5	<input checked="" type="checkbox"/> cfs	<input type="checkbox"/> gpm <input type="checkbox"/> af
			<input type="checkbox"/> cfs	<input type="checkbox"/> gpm <input type="checkbox"/> af
			<input type="checkbox"/> cfs	<input type="checkbox"/> gpm <input type="checkbox"/> af
			<input type="checkbox"/> cfs	<input type="checkbox"/> gpm <input type="checkbox"/> af

C. Period of Use

Indicate the time of year you propose to use the water: Year Round

(For seasonal uses like irrigation give dates when water use would begin and end, e.g. March 1-October 31.)

If you will be applying water to land, indicate the total number of acres where water will be applied or used: NA

(This number should be consistent with your application map.)

4. WATER MANAGEMENT

A. Diversion

What method will you use to divert water from the source?

Pump (give horsepower and pump type): 2-25 hp centrifugal and 2-48 hp submersible

Head-gate (give dimensions): _____

other means (describe): _____

B. Monitoring

How will you monitor your diversion to be sure you are within the limits of your water right (allowed rate and duty) and you are not wasting water?

Weir

Meter

Periodic Sampling

other means (describe): _____

RECEIVED

OCT 03 2008
WATER RESOURCES DEPT
SALEM, OREGON

C. Transport

How will you transport water to your place of use?

Ditch or canal (give average width and depth):

Width _____ Depth _____

Is the ditch or canal to be lined? Yes No

Pipe (give diameter and total length):

Diameter 2 inch to 18 inch Length 275 miles

other, describe: _____

D. Application/Distribution Method

What equipment will you use to apply water to your place of use?

Water service connection to commercial/industrial user

Irrigation or land application method (check all that apply):

<input type="checkbox"/> Flood	<input type="checkbox"/> High pressure sprinkler	<input type="checkbox"/> Low pressure sprinkler
<input type="checkbox"/> Drip	<input type="checkbox"/> Water Cannons	<input type="checkbox"/> Center pivot system
<input type="checkbox"/> Hand Lines	<input type="checkbox"/> Wheel Lines	
<input type="checkbox"/> Siphon tubes or gated pipe with furrows		

other, describe: NA

Distribution method

Direct pipe from source In-line storage (tank or pond) Open Canal

E. Conservation

What methods will you use to conserve water? Why did you choose this distribution or application method? Have you considered other methods to transport, apply, distribute or use water? For example, if you are using sprinkler irrigation rather than drip irrigation, explain. If you need additional space, attach a separate sheet.

Fully closed and metered system with system of storage reservoirs to meet peak demand

RECEIVED

SALEM, OREGON

5. RESOURCE PROTECTION

A. Protection Practices

In granting permission to use water from a stream or lake, the state encourages, and in some instances requires, careful control of activities that may affect the waterway or streamside area. See instruction guide for a list of possible permit requirements from other agencies. Please indicate any of the practices you plan to undertake to protect water resources.

Diversion will be screened to prevent uptake of fish and other aquatic life. Describe planned actions:

Using existing diversion with approved fish screens

Excavation or clearing of banks will be kept to a minimum to protect riparian or streamside areas. Describe planned actions:

NA. Using existing system

Operating equipment in a water body will be managed and timed to prevent damage to aquatic life. Describe:

NA. Using existing system

Water quality will be protected by preventing erosion and run-off of waste or chemical products. Describe:

No runoff

6. PROJECT SCHEDULE

Indicate the anticipated dates that the following construction tasks should begin. If construction has already begun, or is completed, please indicate that date.

Proposed date construction will begin: Completed

Proposed date construction will be completed: Completed

Proposed date beneficial water use will begin: As soon as permit issued

7. REMARKS

If you would like to clarify any information you have provided in the application, please do so here and reference the specific application question you are addressing.

8. MAP REQUIREMENTS

The Department cannot process your application without accurate information showing the source of water and location of water use. You must include a map with this application form that clearly indicates the township, range, section, and quarter/quarter section of the proposed points of diversion and place of use. The map must provide tax lot numbers. See the map guidelines sheet for detailed map specifications.

RECEIVED

OCT 03 2008

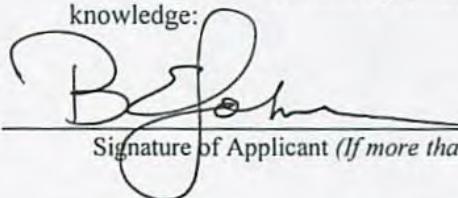

WATER RESOURCES DEPT
SALEM, OREGON

9. SIGNATURE

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application packet.
- I cannot legally use water until the Water Resources Department issues a permit to me.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be canceled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water right holders to get water to which they are entitled.

I swear that all information provided in this application is true and correct to the best of my knowledge:

Signature of Applicant (If more than one applicant, all must sign.)

9-23-08

Date

Before you submit your application be sure you have:

- Answered each question completely.
- Attached a legible map which includes township, range, section, quarter/quarter and tax lot number.
- Included a Land Use Information Form or receipt stub signed by a local official.
- Included the legal description of all the property involved with this application. You may supply a copy of the deed, land sales contract, or title insurance policy, to meet this requirement.
- Included a check payable to the Oregon Water Resources Department for the appropriate amount. The Department's fee schedule can be found at www.wrd.state.or.us or call (503) 986-0900.

FORM Q
FOR COMMERCIAL AND INDUSTRIAL WATER USES

1. Describe the goods and services you plan to provide:

We will supply potable water to a wide variety of commercial and industrial users

2. How will the water be used?

Water will be used according to the need of each commercial industrial user.

3. What is the maximum amount of water that will be used on any given day:

1.5 cfs gpm

4. Are there periods of the day, week, month, or year that the water will not be used?
(e.g. no use December–March)

No Yes If so, when? _____

5. Is there a particular time or period of day, week, month, or year when the use of water is absolutely essential for the project to continue? (e.g. vegetable processing, Oct. 15–Nov. 15)

No Yes If so, when? Year round _____

6. Are there periods of the day week, month, or year where the amount of water used will be less than at peak times?

No Yes If so, when? We have a system of reservoirs to accomodate peak use.

Oregon Water Resources Department Land Use Information Form

THIS FORM IS NOT REQUIRED IF: 1) water is to be diverted, conveyed, and/or used only on federal lands; or 2) the application is for a water-right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and all of the following apply: a) only the place of use is proposed for change, b) there are no structural changes, c) the use of water is for irrigation, and d) the use is located in an irrigation district or exclusive farm-use zone.

Applicant Name: Umpqua Basin Water Association, Inc

Mailing Address: 4972 Garden Valley Road

City: Roseburg State: OR Zip: 97470 Day Phone: (541) 672-5559

This application is related to a Measure 37 claim. Yes No

A. Land and Location

Please include the following information for all tax lots where water will be diverted (taken from its source), conveyed (transported), or used. Applicants for municipal use, or irrigation uses within irrigation districts may substitute existing and proposed service-area boundaries for the tax-lot information requested below.

Township	Range	Section	1/4 1/4	Tax Lot #	Plan Designation (e.g. Rural Residential/RR-5)	Water to be:	Proposed Land Use:
26S	6W	33	NW/NE	2900	ZONED PR	<input checked="" type="checkbox"/> Diverted <input checked="" type="checkbox"/> Conveyed <input type="checkbox"/> Used	Treatment Plant
Within	the	boundary	of	UBWA	Commercial or Industrial	<input type="checkbox"/> Diverted <input checked="" type="checkbox"/> Conveyed <input checked="" type="checkbox"/> Used	Commercial Industrial
						<input type="checkbox"/> Diverted <input type="checkbox"/> Conveyed <input type="checkbox"/> Used	
						<input type="checkbox"/> Diverted <input type="checkbox"/> Conveyed <input type="checkbox"/> Used	

List all counties and cities where water is proposed to be diverted, conveyed, or used. Douglas

B. Description of Proposed Use

Type of application to be filed with the Water Resources Department:

Permit to Use or Store Water Water-Right Transfer Exchange of Water
 Allocation of Conserved Water Limited Water Use License
 Permit Amendment or Ground Water Registration Modification

Source of water: Reservoir/Pond Ground Water Surface Water (name) North Umpqua River

Estimated quantity of water needed: 1.5 cubic feet per second gallons per minute acre-feet

Intended use of water: Irrigation Commercial Industrial Domestic for household(s)
 Municipal Quasi-municipal Instream Other

Briefly describe: Water will be diverted treated and delivered to properties that are appropriately zoned for either commercial or industrial use within the service boundary of UBWA.

Note to applicant: If the Land Use Information Form cannot be completed while you wait, please have a local government representative sign the receipt below and include it with the application filed with the Water Resources Department.

For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form.

This deals only with the local land-use plan. Do not include approval for activities such as building or grading permits.

Please check the appropriate box below and provide the requested information

Land uses to be served by proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): 3.7.050c.2.

Land uses to be served by proposed water uses (including proposed construction) involve discretionary land-use approvals as listed in the table below. (Please attach documentation of applicable land-use approvals which have already been obtained. Record of Action/land-use decision and accompanying findings are sufficient.)
If approvals have been obtained but all appeal periods have not ended, check "Being pursued".

Type of Land-Use Approval Needed (e.g. plan amendments, rezones, conditional-use permits, etc.)	Cite Most Significant, Applicable Plan Policies & Ordinance Section References	Land-Use Approval:

2. SOURCE AND PROPERTY OWNERSHIP

A. The Proposed Source of Water

Provide the commonly used name of the water body from which water will be diverted, and the name of the stream or lake it flows into. If unnamed, say so:

Source 1: <u>North Umpqua River</u>	Tributary to: <u>Umpqua River</u>
Source 2: _____	Tributary to: _____
Source 3: _____	Tributary to: _____
Source 4: _____	Tributary to: _____

If any source listed above is stored water that is authorized under a water right permit, certificate, or decree, attach a copy of the document or list the document number (for decrees, list the volume, page and/or decree name).

NA

B. Applications to Use Stored Water

Complete this section if any source listed in item 2A above is stored water.

Do you, or will you, own the reservoir(s) described in item 2A above?

Yes

No. (Please enclose a copy of your written notification to the operator of the reservoir of your intent to file this application, which you should have already mailed or delivered to the operator.)

If *all* sources listed in item 2A are stored water, the Department will review your application using the expedited process provided in ORS 537.147, unless you check the box below. Please see the instruction booklet for more information.

By checking this box, you are requesting that the Department process your application under the standard process outlined in ORS 537.150 and 537.153, rather than the expedited process provided by ORS 537.147. To file an application under the standard process, you must enclose the following:

- A copy of a signed non-expired contract or other agreement with the owner of the reservoir (if not you) to impound the volume of water you propose to use in this application.
- A copy of your written agreement with the party (if any) delivering the water from the reservoir to you.

C. Property Ownership

Do you own all the land where you propose to divert, transport, and use water?

Yes (Please check appropriate box below then skip to section 3 'Water Use')

There are no encumbrances

This land is encumbered by easements, rights of way, roads or other encumbrances
(please provide a copy of the recorded deed(s))

No (Please check the appropriate box below)

I have a recorded easement or written authorization permitting access.

I do not currently have written authorization or easement permitting access.

Written authorization or an easement is not necessary, because the only affected

lands I do not own are state-owned submersible lands, and this application is for
irrigated and/or domestic use only (ORS 274.040).

You must provide the legal description of: (1) the property from which the water is to be diverted, (2) any property crossed by the proposed ditch, canal or other work, and (3) any property on which the water is to be used as depicted on the map.

List the names and mailing addresses of all affected landowners.

More than 25 properties

3. WATER USE

Please read the instruction booklet for more details on "type of use" definitions, how to express how much water you need and how to identify the water source you propose to use. You must fill out a supplemental form for some uses as they require specific information for that type of use.

A. Type(s) of Use(s)

See list of beneficial uses provided in the instructions.

- If your proposed use is **domestic**, indicate the number of households to be supplied with water: _____
- If your proposed use is **irrigation**, please attach Form I
- If your proposed use is **mining**, attach Form R
- If your proposed use is **municipal or quasi-municipal**, attach Form M
- If your proposed use is **commercial/industrial**, attach Form Q

WATER RESOURCES DEPT
SALEM, OREGON

S-87299

B. Amount of Water

Provide the amount of water you propose to use from each source, for each use, in cubic feet-per-second (cfs) or gallons-per-minute (gpm). If the proposed use is from storage, provide the amount in acre-feet (af):

(1 cfs equals 448.8 gpm. 1 acre-foot equals 325,851 gallons or 43,560 cubic feet)

Source	Type of use	Amount		
North Umpqua River	Commercial/Industrial	1.5	<input checked="" type="checkbox"/> cfs	<input type="checkbox"/> gpm
			<input type="checkbox"/> cfs	<input type="checkbox"/> gpm
			<input type="checkbox"/> cfs	<input type="checkbox"/> gpm
			<input type="checkbox"/> cfs	<input type="checkbox"/> gpm

C. Period of Use

Indicate the time of year you propose to use the water: Year Round

(For seasonal uses like irrigation give dates when water use would begin and end, e.g. March 1-October 31.)

If you will be applying water to land, indicate the total number of acres where water will be applied or used: NA
(This number should be consistent with your application map.)

4. WATER MANAGEMENT

A. Diversion

What method will you use to divert water from the source?

Pump (give horsepower and pump type): 2-25 hp centrifugal and 2-48 hp submersible

Head-gate (give dimensions): _____

other means (describe): _____

B. Monitoring

How will you monitor your diversion to be sure you are within the limits of your water right (allowed rate and duty) and you are not wasting water?

Weir

Meter

Periodic Sampling

other means (describe): _____

RECEIVED

Surface Water/4

SEP 29 2008

WATER RESOURCES DEPT
SALEM, OREGON

C. Transport

How will you transport water to your place of use?

Ditch or canal (give average width and depth):

Width _____ Depth _____

Is the ditch or canal to be lined? Yes No

Pipe (give diameter and total length):

Diameter 2 inch to 18 inch Length 275 miles

other, describe: _____

D. Application/Distribution Method

What equipment will you use to apply water to your place of use?

Water service connection to commercial/industrial user

Irrigation or land application method (check all that apply):

<input type="checkbox"/> Flood	<input type="checkbox"/> High pressure sprinkler	<input type="checkbox"/> Low pressure sprinkler
<input type="checkbox"/> Drip	<input type="checkbox"/> Water Cannons	<input type="checkbox"/> Center pivot system
<input type="checkbox"/> Hand Lines	<input type="checkbox"/> Wheel Lines	
<input type="checkbox"/> Siphon tubes or gated pipe with furrows		
<input type="checkbox"/> other, describe: NA		

Distribution method

Direct pipe from source In-line storage (tank or pond) Open Canal

E. Conservation

What methods will you use to conserve water? Why did you choose this distribution or application method? Have you considered other methods to transport, apply, distribute or use water? For example, if you are using sprinkler irrigation rather than drip irrigation, explain. If you need additional space, attach a separate sheet.

Fully closed and metered system with system of storage reservoirs to meet peak demand

5. RESOURCE PROTECTION

A. Protection Practices

In granting permission to use water from a stream or lake, the state encourages, and in some instances requires, careful control of activities that may affect the waterway or streamside area. See instruction guide for a list of possible permit requirements from other agencies. Please indicate any of the practices you plan to undertake to protect water resources.

Diversion will be screened to prevent uptake of fish and other aquatic life. Describe planned actions:

Using existing diversion with approved fish screens

Excavation or clearing of banks will be kept to a minimum to protect riparian or streamside areas. Describe planned actions:

NA. Using existing system

Operating equipment in a water body will be managed and timed to prevent damage to aquatic life. Describe:

NA. Using existing system

Water quality will be protected by preventing erosion and run-off of waste or chemical products. Describe:

No runoff

6. PROJECT SCHEDULE

Indicate the anticipated dates that the following construction tasks should begin. If construction has already begun, or is completed, please indicate that date.

Proposed date construction will begin: Completed

Proposed date construction will be completed: Completed

Proposed date beneficial water use will begin: As soon as permit issued

7. REMARKS

If you would like to clarify any information you have provided in the application, please do so here and reference the specific application question you are addressing.

8. MAP REQUIREMENTS

The Department cannot process your application without accurate information showing the source of water and location of water use. You must include a map with this application form that clearly indicates the township, range, section, and quarter/quarter section of the proposed points of diversion and place of use. The map must provide tax lot numbers. See the map guidelines sheet for detailed map specifications.

9. SIGNATURE

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application packet.
- I cannot legally use water until the Water Resources Department issues a permit to me.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be canceled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water right holders to get water to which they are entitled.

I swear that all information provided in this application is true and correct to the best of my knowledge:

 9-23-08

Signature of Applicant (If more than one applicant, all must sign.)

Date

Before you submit your application be sure you have:

- Answered each question completely.
- Attached a legible map which includes township, range, section, quarter/quarter and tax lot number.
- Included a Land Use Information Form or receipt stub signed by a local official.
- Included the legal description of all the property involved with this application. You may supply a copy of the deed, land sales contract, or title insurance policy, to meet this requirement.
- Included a check payable to the Oregon Water Resources Department for the appropriate amount. The Department's fee schedule can be found at www.wrd.state.or.us or call (503) 986-0900.
