Form C

IMPORTANT—This form is a notice to the State Engineer that permittee is ready to make final proof to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the final proof inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the State Engineer until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated.

Fill out, detach and mail to the State Engineer, Salem, Oregon 97310, when all of the water has been applied.

Application No. *67145*

G-7643

STATE OF OREGON  
COUNTY OF UMATILLA  
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

MICHAEL D. & JANE E. MCCARTY  
26943 MCCARTY RANCH LN  
ECHO OR 97826

confirms the right to use the waters of A DRAIN TILE, tributary to BUTTER CREEK for SUPPLEMENTAL IRRIGATION of 8.2 ACRES.

This right was perfected under Permit G-7145. The date of priority is NOVEMBER 15, 1976. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 0.06 CUBIC FOOT PER SECOND, or its equivalent in case of rotation, measured at the well.

The well is located as follows:

Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Measured Distances
2 N	27 E	WM	15	NE SE			1380 FEET NORTH & 210 FEET WEST FROM THE SE CORNER, SECTION 15

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use is as follows:

Twp	Rng	Mer	Sec	Q-Q	Acres
2 N	27 E	WM	14	SW SE	3.6
2 N	27 E	WM	14	SE SE	4.6

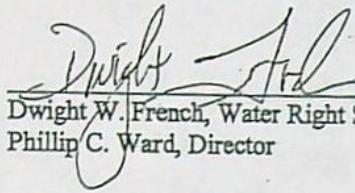

This certificate is issued to confirm a change in USE AND PLACE OF USE approved by an order of the Water Resources Director entered October 12, 1992, at Special Order Volume 46, Page 461, approving Transfer Application 6433, and together with Certificate 67878, supersedes Certificate 56072, State record of Water Right Certificates.

**NOTICE OF RIGHT TO RECONSIDERATION OR JUDICIAL REVIEW**

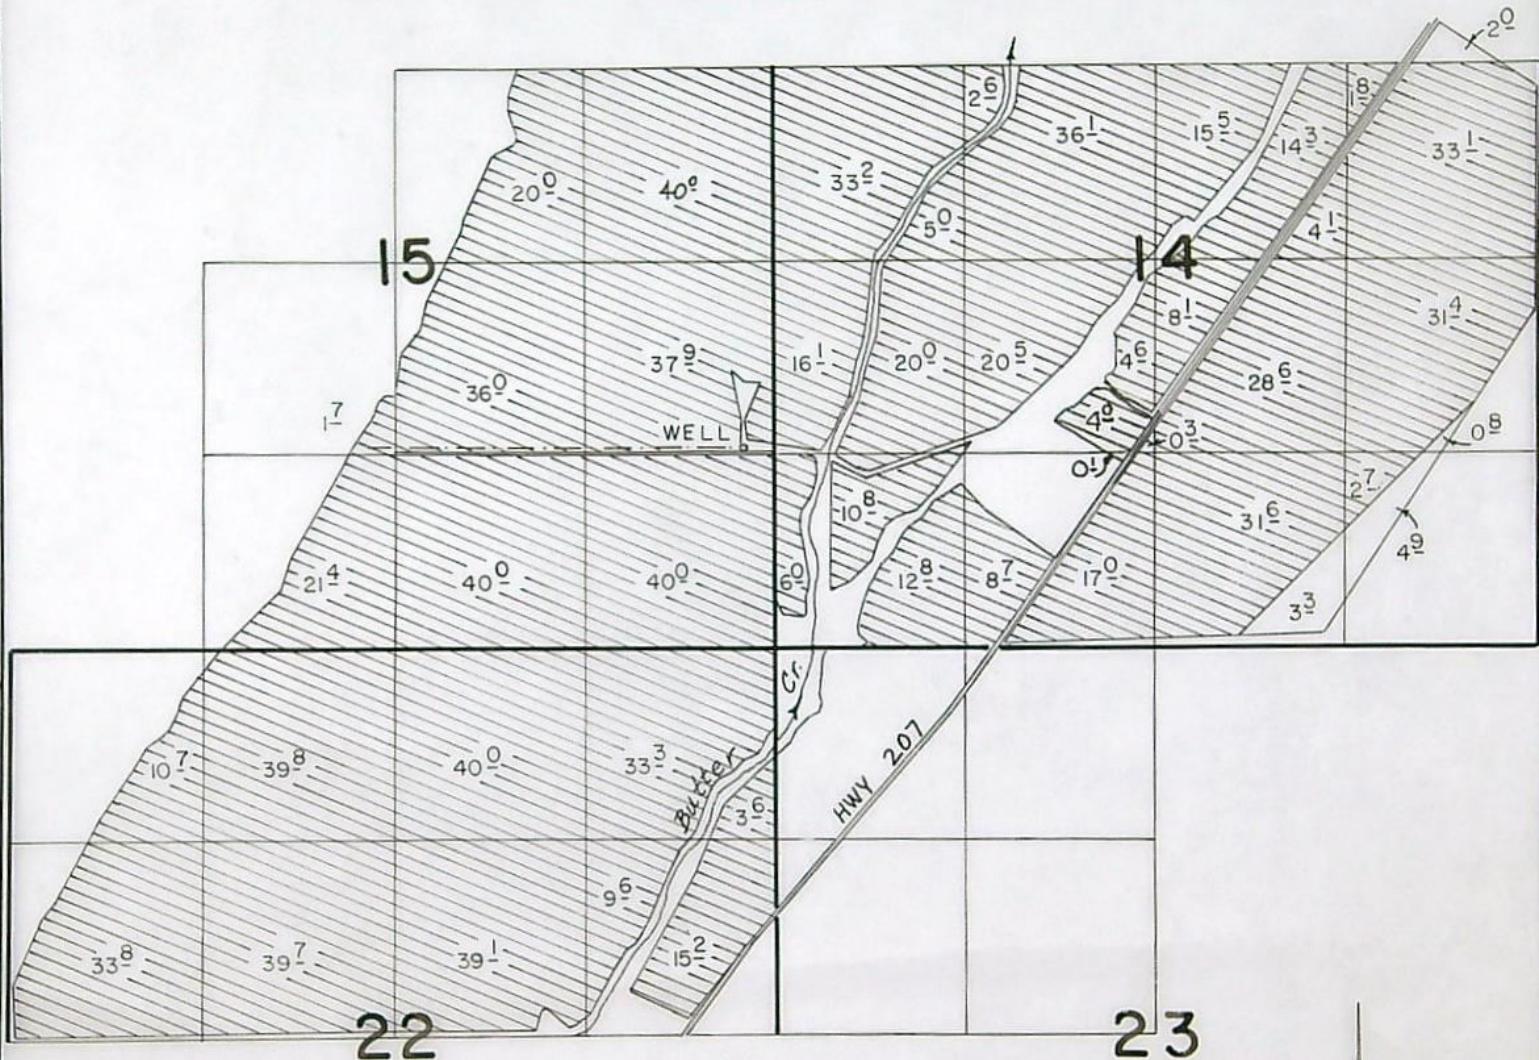

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

Issued JUL 15 2011

  
Dwight W. French, Water Right Services Administrator, for  
Phillip C. Ward, Director

**NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW**

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2).

Pursuant to ORS 536.075 and OAR 137-004-080 and OAR 690-01-005, you may either petition for judicial review or petition the Director for reconsideration of this order.

## STATE OF OREGON

## COUNTY OF UMATILLA

ORDER APPROVING TEMPORARY CHANGES IN PLACE OF USE,  
AND POINTS OF DIVERSION

Pursuant to ORS 540.523, after notice was given and no objections were filed, and finding that no injury to existing water rights would result, this order approves, as conditioned or limited herein, TRANSFER 8177 submitted by

MICHAEL D. McCARTY  
23946 McCARTY RANCH LANE  
ECHO, OREGON 97826.

The first right to be modified was confirmed by decree of the Circuit Court of the State of Oregon for UMATILLA County as evidenced by a PORTION of Certificate 2676. The decree is recorded in the Order Record of the Water Resources Director in Volume 3, at Page 250. The date of priority is 1878.

The right allows the use of BUTTER CREEK, a tributary of the UMATILLA RIVER, for IRRIGATION of 1.9 ACRES. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.03 cubic foot per second, if available at the authorized points of diversion: McCARTY AND THOMSON DITCHES, or its equivalent in case of rotation, measured at the point of diversion from the source.

The amount of water used for irrigation, together with the amount secured under any other right for the same lands, is limited to a diversion of not to exceed 4.0 acre-feet for each acre irrigated during the irrigation season, January 1 to September 1, of each year.

The authorized place of use is located as follows:

SW $\frac{1}{4}$	NW $\frac{1}{4}$	0.4 ACRE
NE $\frac{1}{4}$	SW $\frac{1}{4}$	0.7 ACRE
NW $\frac{1}{4}$	SW $\frac{1}{4}$	0.8 ACRE

SECTION 14  
TOWNSHIP 2 NORTH, RANGE 27 EAST, W.M.

The second right to be modified was confirmed by decree of the Circuit Court of the State of Oregon for UMATILLA County as evidenced by a PORTION of Certificate 67877. The decree is recorded in the Order Record of the Water Resources Director in Volume 3, at Page 250. The date of priority is 1903.

The right allows the use of BUTTER CREEK, a tributary of the UMATILLA RIVER, for IRRIGATION of 6.9 ACRES. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.13 cubic foot per second, if available at the authorized points of diversion: MIDDLE, LOWER, AND UPPER DITCHES, or its equivalent in case of rotation, measured at the point of diversion from the source.

The amount of water used for irrigation, together with the amount secured under any other right for the same lands, is limited to a diversion of not to exceed 4.0 acre-feet for each acre irrigated during the irrigation season of each year.

The authorized place of use is located as follows:

SE $\frac{1}{4}$	SE $\frac{1}{4}$	1.2 ACRES
------------------	------------------	-----------

SECTION 15

NE $\frac{1}{4}$	NE $\frac{1}{4}$	1.0 ACRE
SW $\frac{1}{4}$	NE $\frac{1}{4}$	0.5 ACRE
SE $\frac{1}{4}$	NE $\frac{1}{4}$	2.4 ACRES
SW $\frac{1}{4}$	NW $\frac{1}{4}$	0.6 ACRE
SE $\frac{1}{4}$	NW $\frac{1}{4}$	0.8 ACRES
NW $\frac{1}{4}$	SE $\frac{1}{4}$	0.4 ACRE

SECTION 22  
TOWNSHIP 2 NORTH, RANGE 27 EAST, W.M.

The right to use water for the above purpose is restricted to beneficial use on the lands or place of use described and is subject to all other conditions and limitations contained in the decree.

The third right to be modified was confirmed by decree of the Circuit Court of the State of Oregon for UMATILLA County as evidenced by a PORTION of Certificate 2675. The decree is recorded in the Order Record of the Water Resources Director in Volume 3, at Page 250. The date of priority is 1903.

The right allows the use of BUTTER CREEK, a tributary of the UMATILLA RIVER, for IRRIGATION of 1.8 ACRES. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.04 cubic foot per second, if available at the authorized point of diversion, or its equivalent in case of rotation, measured at the point of diversion from the source.

The amount of water used for irrigation, together with the amount secured under any other right for the same lands, is limited to a diversion of not to exceed 4.0 acre-feet for each acre irrigated during the irrigation season of each year.

The authorized place of use is located as follows:

SE $\frac{1}{4}$	NE $\frac{1}{4}$	0.1 ACRE
NE $\frac{1}{4}$	SE $\frac{1}{4}$	0.9 ACRE
NW $\frac{1}{4}$	SE $\frac{1}{4}$	0.8 ACRE

SECTION 15

TOWNSHIP 22 NORTH, RANGE 27 EAST, W.M.

The right to use water for the above purpose is restricted to beneficial use on the lands or place of use described and is subject to all other conditions and limitations contained in the decree.

The fourth right to be modified was confirmed by decree of the Circuit Court of the State of Oregon for UMATILLA County as evidenced by a PORTION of Certificate 74795. The decree is recorded in the Order Record of the Water Resources Director in Volume 3, at Page 250. The date of priority is 1904.

The right allows the use of BUTTER CREEK and SPRINGS, a tributary of the UMATILLA RIVER, for IRRIGATION of 0.2 ACRE. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.004 cubic foot per second, if available at the authorized point of diversion: SW $\frac{1}{4}$  NW $\frac{1}{4}$ , SECTION 27, T 2 N, R 27 E, WM; POD 1 - 340 FEET NORTH AND 170 FEET EAST FROM THE NW $\frac{1}{4}$  CORNER, SECTION 27, or its equivalent in case of rotation, measured at the point of diversion from the source.

The amount of water used for irrigation, together with the amount secured under any other right for the same lands, is limited to a diversion of not to exceed 4.0 acre-feet for each acre irrigated during the irrigation season of each year.

The authorized place of use is located as follows:

NE $\frac{1}{4}$  SW $\frac{1}{4}$             0.2 ACRE  
                          SECTION 15  
TOWNSHIP 2 NORTH, RANGE 27 EAST, W.M.

The right to use water for the above purpose is restricted to beneficial use on the lands or place of use described and is subject to all other conditions and limitations contained in the decree.

The fifth right to be modified, as evidenced by a PORTION of Certificate 68349, was perfected under Permit U-425 with a date of priority of MARCH 4, 1952. The right allows the use of a WELL, in the BUTTER CREEK BASIN, for SUPPLEMENTAL IRRIGATION of 3.7 ACRES. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.04 cubic foot per second, if available at the original well; SW $\frac{1}{4}$  SW $\frac{1}{4}$ , SECTION 14, T 2 N, R 27 E, WM, or its equivalent in case of rotation, measured at the well.

The amount of water used for irrigation, together with the amount secured under any other right existing on the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The use shall conform to any reasonable rotation system ordered by the proper state officer.

The authorized place of use is as follows:

SW $\frac{1}{4}$ NW $\frac{1}{4}$	0.4 ACRE
NE $\frac{1}{4}$ SW $\frac{1}{4}$	0.7 ACRE
NW $\frac{1}{4}$ SW $\frac{1}{4}$	0.8 ACRE

SECTION 14

SE $\frac{1}{4}$ NE $\frac{1}{4}$	0.1 ACRE
NE $\frac{1}{4}$ SE $\frac{1}{4}$	0.9 ACRE
NW $\frac{1}{4}$ SE $\frac{1}{4}$	0.8 ACRE

SECTION 15

TOWNSHIP 2 NORTH, RANGE 27 EAST, W.M.

The right to use water for the above purpose is restricted to beneficial use on the lands or place of use described.

The sixth right to be modified, as evidenced by a PORTION of Certificate 38847, was perfected under Permit G-3558 with a date of priority of JANUARY 13, 1967. The right allows the use of a WELL, in the BUTTER CREEK BASIN, for IRRIGATION of 5.0 ACRES. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.04 cubic foot per second, if available at the original well; NW $\frac{1}{4}$  NW $\frac{1}{4}$ , SECTION 22, T 2 N, R 27 E, WM; 730 FEET SOUTH AND 930 FEET EAST FROM THE NW CORNER, SECTION 27, or its equivalent in case of rotation, measured at the well.

The amount of water used for irrigation, together with the amount secured under any other right existing on the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year, provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein and the right allowed herein shall not authorize appropriation from the aquifer supplying those well described in the State Engineer's Ground Water Report No. 11 as "Deep Wells in Basalt" unless appropriation are permitted in the final order of the State Engineer declaring that aquifer a critical ground water area.

The use shall conform to any reasonable rotation system ordered by the proper state officer.

The authorized place of use is as follows:

SE $\frac{1}{4}$  SE $\frac{1}{4}$  1.2 ACRES  
SECTION 15

NE $\frac{1}{4}$ NE $\frac{1}{4}$	1.0 ACRES
SW $\frac{1}{4}$ NE $\frac{1}{4}$	0.4 ACRE
SE $\frac{1}{4}$ NE $\frac{1}{4}$	0.8 ACRE
SW $\frac{1}{4}$ NW $\frac{1}{4}$	0.6 ACRE
SE $\frac{1}{4}$ NW $\frac{1}{4}$	0.8 ACRE
NW $\frac{1}{4}$ SE $\frac{1}{4}$	0.2 ACRE

SECTION 22

TOWNSHIP 2 NORTH, RANGE 27 EAST, W.M.

The right to use water for the above purpose is restricted to beneficial use on the lands or place of use described.

The seventh right to be modified, as evidenced by a portion of Certificate 38876, was perfected under Permit 34247 with a date of priority of MARCH 21, 1969. The right allows the use of WASTE WATER, a tributary of BUTTER CREEK, for SUPPLEMENTAL IRRIGATION of 1.8 ACRES. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.04 ACRES cubic foot per second, if available at the authorized point of diversion: NW $\frac{1}{4}$  SE $\frac{1}{4}$ , NE $\frac{1}{4}$  SE $\frac{1}{4}$ , SECTION 15; SW $\frac{1}{4}$  SW $\frac{1}{4}$ , SECTION 14, T 2 N, R 27 E, WM; 1 - 1330 FEET NORTH AND 2610 FEET WEST; 2 - 1350 FEET NORTH AND 30 FEET WEST; 3 - 10 FEET NORTH AND 10 FEET EAST; ALL FROM THE SE CORNER, SECTION 15, or its equivalent in case of rotation, measured at the point of diversion from the source.

The amount of water used for irrigation, together with the amount secured under an other right existing for the same lands, is limited to ONE-FIFTIETH of one cubic foot per second per acre or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 4.0 acre-feet for each acre irrigated during the irrigation season of each year, provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing from the same land and shall not exceed the limitation allowed herein and shall also be limited to the water available at the proposed point of diversion, and shall not carry with it the right to compel the continuance of the waste water.

The use shall conform to any reasonable rotation system ordered by the proper state officer.

The authorized place of use is located as follows:

SE $\frac{1}{4}$	NE $\frac{1}{4}$	0.1 ACRE
NE $\frac{1}{4}$	SE $\frac{1}{4}$	0.9 ACRE
NW $\frac{1}{4}$	SE $\frac{1}{4}$	0.8 ACRE

SECTION 15

TOWNSHIP 2 NORTH, RANGE 27 EAST, W.M.

The right to use the water for the above purpose is restricted to beneficial use on the lands or place of use described

The eighth right to be modified, as evidenced by a PORTION of Certificate 67878, was perfected under Permit G-7145 with a date of priority of NOVEMBER 15, 1976. The right allows the use of a WELL, in the BUTTER CREEK BASIN, for SUPPLEMENTAL IRRIGATION of 8.5 ACRES. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.06 cubic foot per second, if available at the original well; NE $\frac{1}{4}$  SE $\frac{1}{4}$ , SECTION 15, T 2 N, R 27 E, WM; 1380 FEET NORTH AND 210 FEET WEST FROM THE SE CORNER, SECTION 15, or its equivalent in case of rotation, measured at the well.

The amount of water used for irrigation, together with the amount secured under any other right existing on the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The use shall conform to any reasonable rotation system ordered by the proper state officer.

The authorized place of use is as follows:

SW $\frac{1}{4}$	NW $\frac{1}{4}$	0.4 ACRE
NE $\frac{1}{4}$	SW $\frac{1}{4}$	0.7 ACRE
NW $\frac{1}{4}$	SW $\frac{1}{4}$	0.8 ACRE

SECTION 14

SE $\frac{1}{4}$	NE $\frac{1}{4}$	0.1 ACRE
NE $\frac{1}{4}$	SW $\frac{1}{4}$	0.2 ACRE
NE $\frac{1}{4}$	SE $\frac{1}{4}$	0.9 ACRE
NW $\frac{1}{4}$	SE $\frac{1}{4}$	0.8 ACRE
SE $\frac{1}{4}$	SE $\frac{1}{4}$	1.2 ACRES

SECTION 15

NE $\frac{1}{4}$	NE $\frac{1}{4}$	1.0 ACRE
SE $\frac{1}{4}$	NE $\frac{1}{4}$	2.4 ACRES

SECTION 22

TOWNSHIP 2 NORTH, RANGE 27 EAST, W.M.

The right to use water for the above purpose is restricted to beneficial use on the lands or place of use described.

The ninth right to be modified, as evidenced by Permit 46499 with a date of priority of OCTOBER 16, 1968. The right allows the use of BUTTER CREEK, a tributary of the UMATILLA RIVER, for SUPPLEMENTAL IRRIGATION of 10.8 ACRES. The use allowed herein may be made at any time between September 2 and December 30 of each year that water can be put to beneficial use by irrigation, either for immediate crop growth or for forecast requirements to raise soil moisture to field capacity in the soil profile to be utilized by plant growth in the subsequent growing season. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.21 cubic foot per second, if available at the authorized point of diversion: SW $\frac{1}{4}$  NW $\frac{1}{4}$ , SECTION 27, and SE $\frac{1}{4}$  NE $\frac{1}{4}$ , SECTION 28, T 2 N, R 27 E, WM; DIVERSION O - 340 FEET NORTH AND 170 FEET EAST FROM THE NW $\frac{1}{4}$  CORNER, SECTION 27; DIVERSION P - 20 FEET NORTH AND 40 FEET WEST FROM THE NW $\frac{1}{4}$  CORNER, SECTION 27, or its equivalent in case of rotation, measured at the point of diversion from the source.

The amount of water used for irrigation, together with the amount secured under an other right existing for the same lands, is limited to ONE-FIFTIETH of one cubic foot per second per acre, from direct flow, and shall be further limited to a diversion of not to exceed 1.0 acre-foot per acre for each acre irrigated during the period from September 2 to December 30, provided further that the right allowed herein, together with the amount secured under any other right existing for the same lands shall not exceed 4.0 acre-feet for each acre irrigated in any one year. The use of water authorized herein shall not establish priority of right as against future appropriations of surface water for beneficial uses or for storage for such beneficial uses, other than similar right for irrigation from September 2 to December 30.

The use shall conform to any reasonable rotation system ordered by the proper state officer.

The authorized place of use is located as follows:

STATE OF OREGON

INTEROFFICE MEMO

TO: Memo to Files G-7643, U-587, & U-468      DATE: June 23, 1986

FROM: LARRY W. JEBOUSEK *LWJ*

SUBJECT:

The basalt well, as the described source of water under Certificates 24271 and 24273, appears not to have been used since prior to 1976 for irrigation purposes. Those rights are the primary source for all of the lands east of the highway and adjacent to the highway on the west side in Section 14.

The well log (1952) and field report for Permit Number U-425 on May 28, 1957 list the depth of the well at 280 feet and the static water level at 75 feet below land surface. The well was deepened to 785 feet and had a static level of 200 feet on October 1, 1968. Representatives of the Water Resources Department measured the static level at 402.19 feet below land surface on February 13, 1986. It appears that attempts have been made to continue to utilize the water from the basalt aquifer, but that these attempts have been thwarted by the continuing decline of the water table in the area.

For the purposes of perfecting the right for supplemental use from the pit well under Permit Number G-7145, we will consider that the primary rights under Certificates 24271 and 24273 are nearly 100% deficient at this time, and that the use of the supplemental rights under Permit Number 26080 (Butter Creek) and Permit Number G-7145 are to make up this deficiency.

RELEIVED  
FEB 6-1986  
WATER RESOURCES DEPT  
SALEM, OREGON

Info: Mike McCarty Star Lt. Echo Mr McCarty claims he use two dam, one he shares with John E. Correa. This dam is located right behind John E. trailer house. This dam is tied to a bridge over Butter. They just poured a concrete bottom for the dam. We are 14' across and approx 8' high. There is only one div pt from this dam and it goes to the west. The ditch has a 6' screwgate and is 6'x6' ditch before it splits about 900' down the ditch. The two ditches run side by side, the upper one belongs to Mike and the lower is John E. It goes to the SW corner of Mike property then splits again one going due east the other in a NE direction. We have laterals running off of them. This ditch would irrigate to the creek and  $\frac{3}{4}$  mile north of where it enters the property. The dam is about  $\frac{1}{2}$  mile downstream from the south property line. This dam is about 14' across. We have a ditch going each side of the creek. the east ditch is  $\text{W} \frac{1}{2}$  with a 5' screwgate this ditch follows the hill to the north property line. It would flood  $\frac{1}{2}$  mile back to the creek? The west div. pt. has a 5' screwgate. This ditch flood it also dumps water into a sump well by way of a rotating screen about 1800' down the ditch. The ditch would go on down the ditch flooding back toward the creek then it would go onto Jerry Myers place where they would start flooding. Back to the sump the ditch would pass within 5' of it. We have 12" jump pipe from the ditch. Sump 5" casing  $D = 20-25'$  with 3000' of tile going east-west dumping at 18' down 300' going east the rest going west. Mr McCarty is claiming 1800 gpm or  $7\frac{1}{4}$  wheel-in's max at this time he is going to put another 100HP or pretty soon. 1000'-18", 1000'-15, 500'-12', and 500' 8" tile line. This sump would irrigate all the flood land in the bottom, the beach area, and 175 acre east of the highway. On the well we have Westinghouse 100HP @ 1775 Byron-Jackson 8" discharge Yaskawa GOMPER 1771 CPM Byron-Jackson 6" discharge the west mainline flowmeter 78-12-364 1309.28 ac-ft, east 78-12-341 5025.99 ac-ft both H' Crammer Mainline we have 5940'-8" Alum portable, 1320'-12", 3960'-10", 1000'-8", 1000'-6" 15840'-5" & 4" wheel-line, 6600'-3" & 4" headline We have  $\frac{5}{32}$  and  $\frac{3}{16}$  R8 30° Mr McCarty claims 40'-1-mile drop in the land on the flood area.

TIN: C22, C1R

CROT Alfalfa

11-18-85

Frank & Chuck

Note: Mike McCarty & John E Correa brought Johnson out about 3 yrs ago.  
Mike McCarty got all of the well.

In retalking to Mike McCarty, Mr McCarty that his mainline from the well goes east-west one going each way. Each of from these can handle 1700 gpm (according to his engineer he says.) Mr McCarty stated he does run both lines at the same time. Mr McCarty says he flood with the east line, not with the west. And when he does he can pump 2600-2800 gpm - Mr McCarty would not ASCS - 879.9 give me max head only max water and psi according to him. 100 psi and hill land 2000 gpm - 60 psi on bottom at 2300 gpm. The pump are the same so is the system as report in 1985. Oct 9, 1986 OVER.

Mr McCarty claimed his effi. was 94% I ask him to send it to me and I would use. I have not received anything. Therefore I'm still using 80%.

Q.

Steve Since Mr McCarty give me number of head this time. And the rest does not comp't. I went with the old report using number of heads at the biggest nozzle and the most pressure. Now I went with big heads on the hill. The small head in the bottom land.

$$Q_{\text{Head hill}} = 231 \times 9.0 = 2079$$

$$Q_{\text{Head bottom}} = 231 \times 6.3 = 1455$$

$$Q_{\text{Pump hill}} = \frac{160 \times 7.04}{110 + 80(2.3)(1.1)} = 3.6$$

$$Q_{\text{Pump bottom}} = \frac{160 \times 7.04}{20 + 80(2)(1.1)} = 5.04$$

$$Q_{\text{Pump open discharge}} = \frac{160(6.7)(550)}{(62.4)(20)} = \underline{\underline{160(66)}}$$

2800 cfs = 6.2 cfs open discharge according to Mike McCarty.

6.7 asked for. Now we can do 6.2 or maybe portion the ownership water because there has always been two ownership. McCarty brought part of Johnson land the rest with to Correa.

Now Mr Correa doesn't use any water from here. Now do we go with 6.2 because it is still less than 6.7 or portion between ownership even if the rest of Johnson is not involved.

Re: File G-7643  
Mike McCarty

Dear Steve:

Mike asked me to take a look at the final proof survey on Permit G-7145. There are two questions. Apparently there is a tract of approximately four acres which is being irrigated within the homestead area in the Southwest Quarter of Section 14. Mike was wondering why that is not shown as being irrigated.

A second question has to do with the proposed authorized rate of 4.0 cfs. Mike says that they have regularly withdrawn more than that amount of water from the well. What is the 4.0 cfs based on? Thanks.

KOTTKAMP & O'ROURKE

By:

REO:vl

10-6-86 -  
Vern will  
contact McCarty  
re these questions  
- the 4 acres is  
probably where the  
stackyard is now.

## PROOF OF APPROPRIATION OF WATER

J & M WATER WORKS  
c/o MIKE D. MCCARTY

of Route 1, Echo  
has applied beneficially the waters of  
a drain tile

, State of OR 97862 ,

a tributary of Butter Creek  
supplemental irrigation of 870.8 acres

for the purpose of

under Permit No. G-7145 and that the use of said waters has been completed under the terms of said  
permit; that the priority of the right dates from  
November 15, 1976  
that the amount of water for the purposes aforesaid, has been actually beneficially used in the amount of  
6.2 cubic feet per second

or its equivalent in case of rotation, measured at the point of diversion from the well. The well is  
located in the NE 1/4 SE 1/4, Section 15, T2N, R27E, WM;  
1380 feet North and 210 feet West from SE corner Section 15.

The amount of water used for irrigation, together with the amount secured under any other right  
existing for the same lands, shall be limited to one-eighthieth of one cubic foot per second  
per acre, or its equivalent for each acre irrigated and shall be  
further limited to a diversion of not to exceed 3.0 acre-feet per acre for  
each acre irrigated during the irrigation season of each year,

and shall  
conform to such reasonable rotation system as may be ordered by the proper state officer.  
A description of the place of use under the right, and to which such right is appurtenant, is as follows:

SEE NEXT PAGE

I have read the above and foregoing proof of appropriation of water; I know the contents thereof, and that  
the facts therein stated are true.

IN WITNESS WHEREOF, I have hereunto set my hand this 16 day of February 19 87

Dear Bob:

REFERENCE: File G-7643/McCarty

In response to your letter of January 13, 1987, I must assume you did not receive a copy of the latest revision of the final proof map for Permit G-7145. The map was revised November 7, 1986, and a copy is enclosed.

The map agrees with the total listing of 29.4 acres on the revised proof. This includes the 0.3 acre on the east side of Highway 207.

We apologize for the inconvenience.

Sincerely,

STEVEN P. APPLEGATE

Dear Mr. Mc Carty:

REFERENCE: File G-7643

Enclosed is the Proof of Appropriation of Water under your Water Right Permit G-7145.

The data contained in the proof is based on an inspection and survey of your project made by a representative of this office. It defines the extent to which use of water has been completed within the terms of your permit. The proof should be carefully examined, dated and signed, then returned to this office.

Upon receipt of the signed proof, a Certificate of Water Right will be issued confirming the right. This will be forwarded to you after our records are brought up to date.

You may keep the map print for your records.

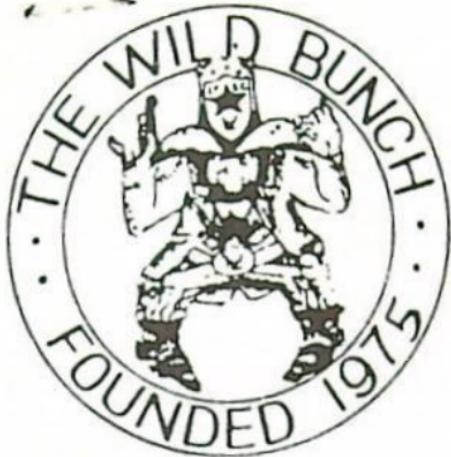

Our survey found a total of 38.8 acres being irrigated from this source for which no primary right of record can be found. These lands are shown on the map copy as unhatched areas. Since the unappropriated waters of the Umatilla River and its tributaries were withdrawn by the Water Resources Commission effective December 2, 1985, it will not be possible at this time to obtain a new permit to irrigate these lands.

Sincerely,

STEVEN P. APRLEGATE  
Senior Water Rights Examiner

INSPECTION REPORT

Michael McCarty 1979 B-11

September 20, 1983 Ves Garner

On September 20, 1983 I made the annual inspection of Mike McCarty's project near Echo. Mike was hauling hay but I spoke with ranch hands who were irrigating hay.

The project is buried pvc mainline and four one-quarter mile wheel lines used with existing pumps and wheel lines and flood irrigation of alfalfa and wheat.

The helpers said that McCarty has purchased the Johnson Ranch to the south and plans to grow all alfalfa on the home place and some grain on the Johnson place.

McCarty has purchased a hay hauling truck and now has many large hay stacks on the farm. Crops appear excellent.

All equipment was in use and appeared in good repair.

ANNUAL INSPECTION

Mike McCarty 1979 B-11

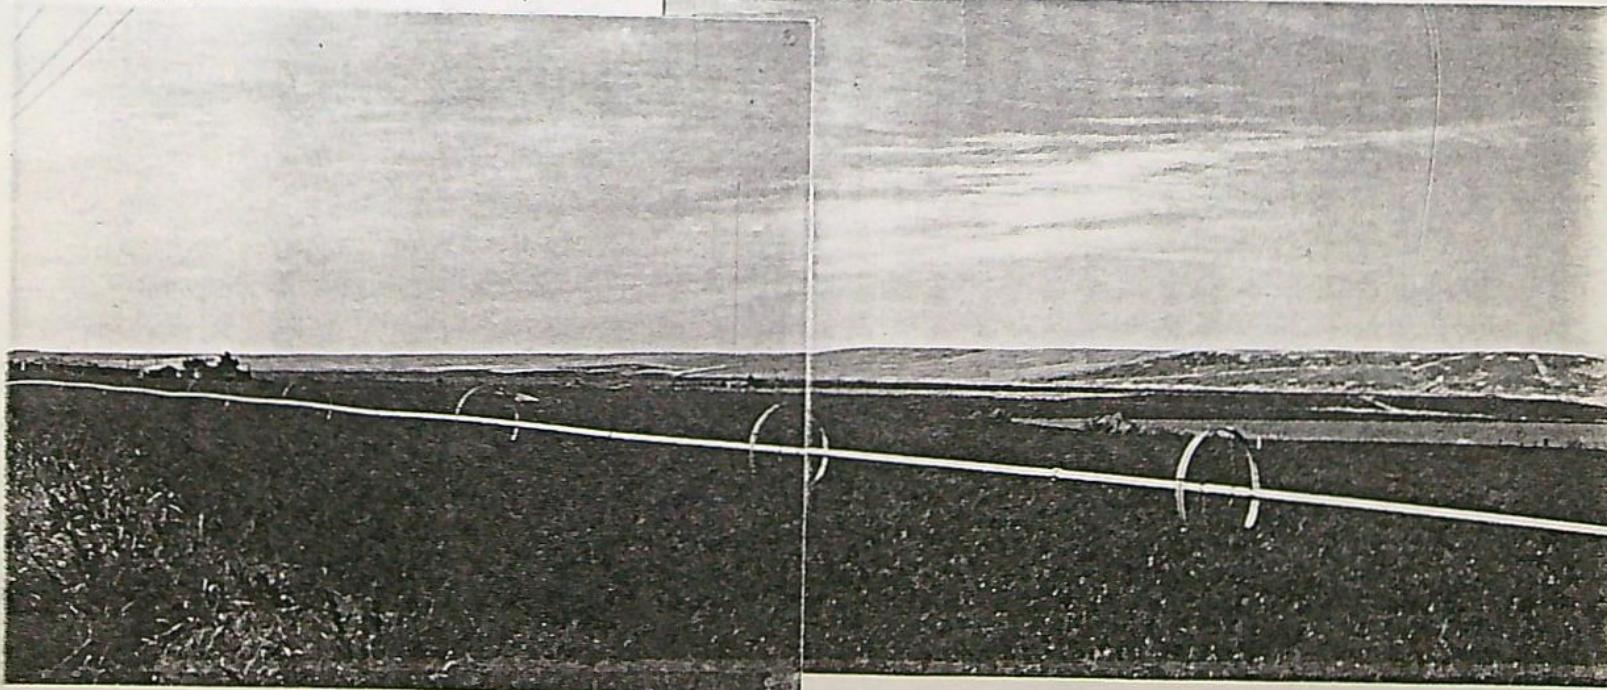

On October 12, 1982 I made the annual inspection of Mike McCarty's irrigation project near Echo. No one was available at the time of my inspection.

The project consists of about 12,680 feet of buried PVC pipeline and four 1/4 mile wheel lines. The irrigation system provides irrigation for about 550 acres of alfalfa and wheat.

At the time of my inspection, the system was as previously inspected. Equipment appeared to be well maintained. Crops of alfalfa and wheat appeared to have been good.

Engineer: Gary Williams  
Date: October 12, 1982

PROJECT LAND FROM HIGHWAY LOOKING S.W.

INSPECTION REPORT  
Mike McCarty 1979 B-11  
4/9/81 Ves Garner

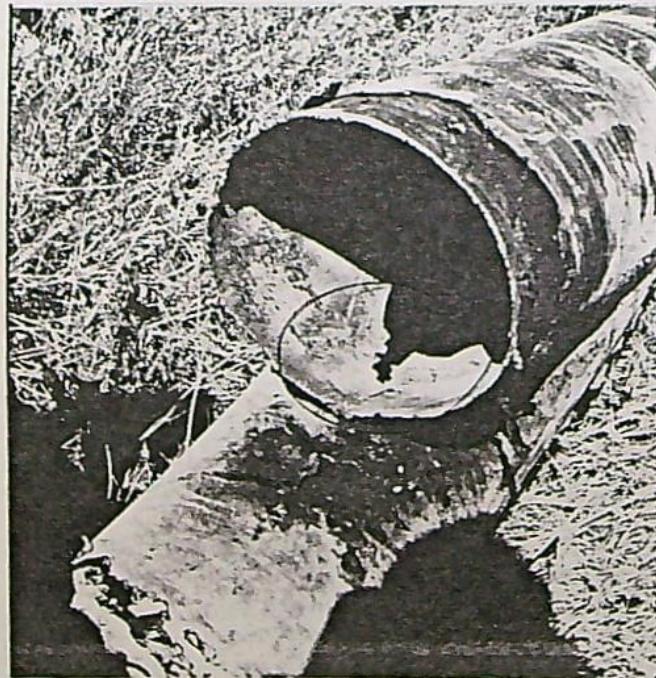

On April 9, 1981 I met with Mike McCarty to make the annual inspection of his project near Echo.

Some additional work has been done since my last inspection. The two main lines which serve the land east of Highway 207 have been extended with five inch PVC about 400 feet each. This allows a total of about 200 acres east of the highway to be irrigated.

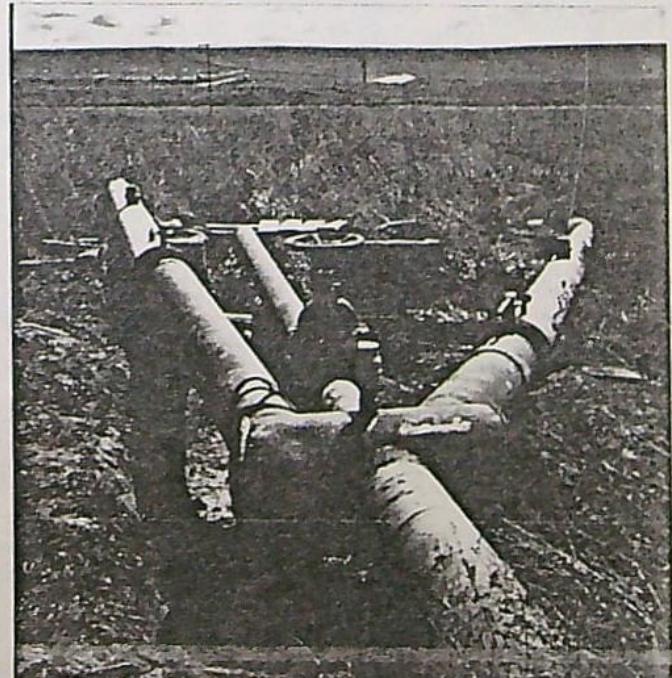

Some additional work had to be done on the creek crossing and tee on the east side of Butler Creek. The original 10 gauge steel Y kept splitting so was replaced with a barrel type of four-way manifold.

The rest of the system appears to be in excellent condition. No additional lands are being served by the project.

Manifold "Y" that failed

Replacement Manifold

INSPECTION REPORT  
Michael D. McCarty #58

On April 24, 1980 I met with Mike McCarty to inspect his project near Echo.

The project is now complete and in use. Mr. McCarty stated he might extend the 2 easterly mainline and additional 400' each (east of highway) and also purchase 2 additional wheel lines. Any additional work or purchases would occur next spring after having used the present system for one season.

General Description

The project includes one existing horizontal drainage collection well, a pump sump and 2 turbine pumps of 60 hp and 100 hp. The project adds to the existing development a complete network of buried pvc mainline and 2 wheel lines.

Summary:

Trenching -

13,500+ by rotary trencher and back-hoe

Pipe -

12"	P.V.C.	1350+
10"	P.V.C.	4200+
8"	P.V.C.	5340+
6"	P.V.C.	2600+

Miscellaneous - steel pipe of 12" and 10" was used to form manifolds and creek crossing. Also some P.V.C. was used to form off-sets from the mainline to place riser along the meandering field line while maintaining a relatively straight mainline.

Note: Because of the many lines and locations, several valves, gates, tees, and other miscellaneous parts were needed.

At each riser a steel fence post has been placed then covered with 4' tall 1½" pvc pipe with the top 18" painted red. This is to protect the risers from equipment.

Wheel lines -

Two - Crown American

5" pipe, levelers

(1) 1280'

(2) 1480'

Note: Mr. McCarty has other lines he uses with the 2 new ones.

This system is intended to be a supplemental supply for low lands irrigated by flood irrigation from Butter Creek. The land ~~above~~ the Valley ~~floor~~ is irrigated from the creek but little water is available so the tile collection system provides most of the water.

The system (project) is capable of delivering about 5 cfs at peak capacity.

## PROJECT INSPECTION REPORT

APPLICATION NO.: 58 LOAN NO.: B-11APPLICANT: Michael D. McCarty PHONE NO.: 376-8273ADDRESS: Star Route, Echo, OR 97826PROJECT LOCATION: Umatilla County, parts of Secs. 14 and 15, T. 2 N., R. 27 E., WMSTATUS OF PROJECT: Percentage Complete 50% On Schedule X No Progress       QUALITY OF CONSTRUCTION: Satisfactory X Modification Needed        Unacceptable       General Comments:

On October 18, 1979, I, together with Mike McCarty, inspected his project on Butter Creek in Umatilla County.

The source of water for the project is an existing underground water collection tile and pump sumps. Two turbine pumps are used and were also existing prior to the loan approval. Mike stated the tile line produces a little water at all times but really produces after the upstream fields are saturated by irrigation from Butter Creek.

All work on the project is being accomplished by the developer with much of his own equipment and labor. Additional equipment and labor is being hired, leased, or contracted by the developer.

The project consists of adding substantial underground piping to the existing irrigation system. All of the underground pipe for the project is in the project land this date. All pipe is PVC except manifolds and canal or creek crossings, which are steel.

A map of the pipeline lay-out was given to me that locates the various pipelines and sizes of pipe installed or to be installed. Some photos were taken.

Trenching is being accomplished with a rotary trencher with help of a back hoe for corners, crossings, and steep grades.

All PVC pipe is being installed with gasketed joints. PVC pipe is rated at 125 psi.

Project Inspection Report  
Page Two  
Michael D. McCarty

Summary of Pipelines:

10"	3,870'	12" - 1350'
8"	5,225'	
6"	2,220'	

The wheel lines have not been purchased yet and Mr. McCarty stated he was considering some hand lines since many of the areas to be irrigated are irregular in size and shape.

A final construction and inventory, along with engineering analysis will be prepared when the project is complete.

File No. G-7643

I am enclosing a form for use in making application for an extension of time limits under permit number G-7145.

The Water Resources Director is permitted by law to extend the time for completion of a project only upon a showing of reasonable diligence by the permittee. Therefore, you should fill out this application carefully and completely describing what has been accomplished.

The application must be executed before a notary public and submitted to this office with the statutory filing fee in the amount of \$10.00 for each permit.

Sincerely,

Bruce A. Estes, Supervisor  
Certificate-Survey Section

Sirs:

I have sent in end of construction forms and the final irrigation form, on application no. O-7643 permit no. O 7145, for J and M Waterworks. The final irrigation form, I thought, was to be sent in at the start of irrigation. The local watermaster told me it was to be sent in when all land under this permit was irrigated. This will not be possible because of the drought. Can you correct the final form in your office?

Mike D. McCarley

Tony Holcomb, Ass't Watermaster  
P.O. Box 1427  
Pendleton, Oregon 97801

Dear Tony:

We have received the map, acreage listing and application No. G-7643.

Application No. G-7643 is now satisfactory and a permit will be issued in 30 to 60 days.

Sincerely,

Vestal R. Garner  
Water Rights Engineer

File G-7643

Tony Holcomb, Deputy Watermaster  
P.O. Box 1427  
Pendleton, OR 97801

Dear Tony:

We were reviewing application No. G-7643 in the name of J & M Water Works when it was noted that in some instances the applicant was requesting supplemental irrigation in areas where no primary right exists.

According to our records, within Section 14, Township 2 North, Range 27 East, within the SW $\frac{1}{4}$  NE $\frac{1}{4}$  there is existing rights for 38.6 acres. The application is for 39.0. Within the SE $\frac{1}{4}$  SW $\frac{1}{4}$  there are existing rights for 37.6 acres. The application is again for 39.0.

In Section 22, within the SE $\frac{1}{4}$  NE $\frac{1}{4}$  there are existing rights for 35.0 acres; the application is for 40.0, and within Section 27, within the SE $\frac{1}{4}$  NW $\frac{1}{4}$  there are existing rights for 1.5 acres, whereas the application is for 5.0.

The application should be either amended to be in agreement with the rights of record or amended to request primary irrigation for lands to be irrigated where no right exists. The map should also be amended to be in agreement with the application.

I am returning the application, listing of lands, and the map to you for your assistance in correction. Application No. G-7643 is endorsed so that in order to retain its priority date, it must be received in this office on or before May 4, 1977.

Thank you for returning the application along with the additional information regarding the ground water development.

Sincerely,

Vestal R. Garner  
Water Rights Engineer

G-7643

19 January 1977

Tony Holcomb, Asst Watermaster  
P.O. Box 1427  
Pendleton, Oregon 97801

Dear Tony:

Thank you for returning the applications by J & M Water Works for use of water from a drain tile for irrigation. We have marked application No. 54956 as being misfiled and have assigned number G-7643 to the new ground water application.

Since it is imperative that the total ground water development be described by the application, I am returning it to you for a further description of the development.

From prior correspondence and phone discussions, it seems the development consists of not only the vertically placed pump sump, but also approximately  $\frac{1}{2}$  mile of drain tile. I believe the drain tile should be described as part of the ground water development as part of the application itself.

I am returning the application to you for the additional information. Application No. G-7643 is endorsed so that in order to retain its priority date, it must be received in this office on or before March 21, 1977.

Sincerely,

Vestal R. Garner  
Water Rights Engineer
