Dear Dwight:

I have reviewed the comments submitted by applicants regarding their exempt reservoir applications. Based on new information supplied by the applicant, I concur with the comments for the following exempt reservoir applications and have no objection to the removal of ODFW's previous mitigation requirements:

Jerry Vogt  
Oregon Department of Fish & Wildlife  
1495 East Gregory Rd.  
Central Point, Oregon 97502

Dear Mr. Vogt:

You submitted comments on ponds filed under ORS 537.407 (HB 2153) or under ORS 537.405 (HB 2376). These laws provided an opportunity for the Oregon Department of Fish and Wildlife to comment on how a specific reservoir(s) will cause significant detrimental impacts to an existing fishery resource and allowed members of the public to comment on how the reservoir(s) will cause an injury to an existing water right(s). Based upon review of your comments, the Department prepared notices of proposed mitigation conditions. A notice was mailed to each of the registrants along with a copy of your comments. The registrants were provided an opportunity to submit additional information to the Department explaining how your comments were in error.

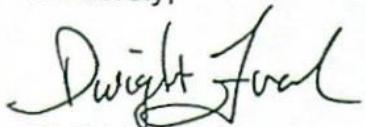

The Department received the attached rebuttals to your comments. If you do not agree with a rebuttal and believe that your comments are still valid, please send a written response to the Department identifying why you disagree with the rebuttal and affirming your position. However, if you agree with the rebuttal you need not respond, unless you determine that it is necessary. In order for us to issue a mitigation order within 180 days of receiving your comments, we need to have your response(s) received by the Department no later than January 7, 1998. If you need an additional day or two to look further at a couple of ponds, please send a request, attention to the appropriate file number.

If you choose to respond, the Department will determine whether a Mitigation Order is required based upon your response and the rebuttal submitted by the registrant. The Mitigation Order, if required, will identify any conditions that must be met in order to protect the fishery resource and/or existing water rights and for the reservoir to be authorized.

If no response to a rebuttal is received, the Department will conclude that you agree with the rebuttal and that a Mitigation Order is not necessary.

If you have any questions, please me at (503) 378-8455, extension 268, or toll free within Oregon at 1 (800) 624-3199.

Sincerely,

Dwight French  
Water Rights Manager

APPLEGATE, OR 97530

REFERENCE: FILE#: P 83082

Dear Mr. Calif,

I want to apologize for any confusion which may have resulted from the letter we sent to you about a week ago. I hope this follow-up letter will better explain our "ponds" program, and give you a clearer picture of what is happening with your pond.

In 1995, the legislature adopted a new law intended to help address a legal problem with many existing ponds throughout the state. These ponds had been developed over the years by land owners who were not aware that water rights may have been required. In order to make sure that all the ponds were "legal" the legislature approved HB 2376 in 1995, which set out a process for filing a notice of the pond with our department. Under the law, such notices could be filed until January 31, 1997. Our job was then to determine whether any of the ponds resulted in injury to other existing water rights, or created a detrimental impact on fish.

This simplified review process was intended to make it easier for the owners of existing ponds to receive final water right certificates. The 1995 law also required that we provide a comment period, which ended on August 1, 1997. During this time, we were required to accept comments as to whether a pond may in fact be resulting in injury to other water rights or creating a detrimental impact to fish. After the close of that comment period, our department was given 180 days in which to evaluate the comments, give notice to the pond owners, and identify whether mitigation measures would be required to alleviate the injury to other water rights or impacts to fish.

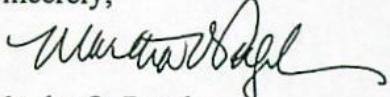

This is why you received a letter from us last week. For more than 16,000 ponds on which notices were filed under HB 2376, about 960 comments were received. From those comments, we determined that about half would appear to require mitigation measures. A total of 450 letters were sent out last week to pond owners like you.

The purpose of these letters was to advise you that the comments had been received, and to provide you with an opportunity to get back to us with any information you might have to show that the mitigation should not be required — either because you disagree with the comment that we received, or because you have a better idea of how to remedy the situation.

The letter you received included a copy of the comments we received about your pond, along with our proposed mitigation plan. We need to hear from you by December 10, 1997, as to whether you disagree with the underlying comment or with our proposed mitigation. We do encourage you to get back to us by the deadline, and we will make every effort to accommodate your suggestions.

Again, I offer my sincere apology for any confusion or irritation caused by our earlier letter. I hope this letter provides additional background information that will help you respond to the questions about your pond. If you have questions about this process, please let us know. I urge you to call our Water Rights Information staff at 1-800-624-3199 extension 499. In some circumstances they may also involve your local Watermaster for additional help. We will try our best to work through this with you.

Sincerely,

Martha O. Pagel  
Director

WATER RESOURCES DEPT.  
SALEM, OREGON

24 November 1997

Dear Sirs:

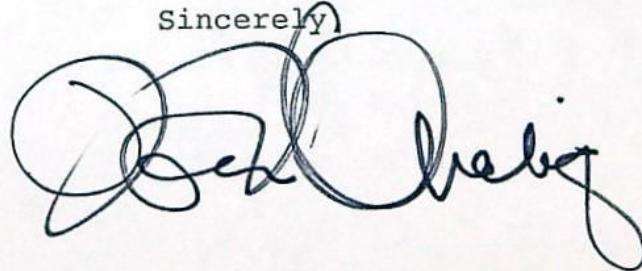

Responding to your letter dated November 12, 1997, file #: P 83082 to be answered no later than 10 December 1997. You have checked the single alleged violation, "The reservoir owner is required to by-pass flows from April 1 through October 31 (BPC)."

I have checked with the Water Master in Medford, Mr. Larry Menteer who knows my property and the ponds. He advised me that I have existing water rights going back to the 1860's. The pond is filled from a bulge in the irrigation ditch from existing water right and is used during the irrigation system. Consequently the notice of violation that you sent does not apply to my property.

Please advise me of the status of my status regarding this matter in view of the above with respect to your removing my name and property from any violation.

Thanking you in advance for your kind attention and early convenient reply.

Sincerely,

# Oregon

John A. Kitzhaber, M.D., Governor

DON CALIF  
6901 THOMPSON CREEK RD  
APPLEGATE, OR 97530

Dear Reservoir Owner,

You submitted a Notice of Exempt Reservoir under *ORS 537.405 (HB 2376)*. HB 2376 provided an opportunity for the Oregon Department of Fish and Wildlife to comment on how a specific reservoir(s) caused injury to an existing fishery resource. In addition the same law allowed members of the public to comment on how the storage or use of the water caused an injury to an existing water right. This comment period ended on August 1, 1997.

The Department received the attached injury allegation(s) related to your reservoir(s), as provided for in ORS 537.405. If you do not agree with the allegation of injury, please submit detailed information to the Department explaining why or how the allegation is in error. Your response must be postmarked no later than *December 10, 1997*.

The Department will review any submission you may make and determine if a Mitigation Order is required. If the Department finds that the allegation is factual and verifiable, the Department will issue a Mitigation Order requiring that the attached conditions, or other conditions that prove to be necessary after reviewing any information that is submitted, be met in order for the reservoir to maintain an exempt status.

If you receive a Mitigation Order, you may request a Contested Case Hearing to contest the findings of the Department and the allegation of injury. Information on how to request a Contested Case Hearing will be provided with the mitigation order, if issued.

If you have any questions, please call the Water Rights Information Group at (503) 378-3739 extension 499.

Water Right Section

## MITIGATION CONDITIONS

File # P- 83082  
Date 11-12-97  
LKS

### Oregon Department of Fish and Wildlife Conditions

- \_\_\_\_ In accordance with ORS 498.268 and ORS 509.605, install, maintain, and operate bypass devices as required by the Oregon Department of Fish and Wildlife that will provide adequate upstream passage for fish. (SMBS)
- \_\_\_\_ Install, maintain, and operate fish screening devices as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the diversion. (SMSS)
- The reservoir owner is required to by-pass flows from April 1 through October 31. (BPC)

### Water Right Related Conditions

- \_\_\_\_ The pond may be filled one time only per year. No diversion of water to storage can occur during times all water rights are not met on the John Day river System. (KR1)
- \_\_\_\_ If required by the Watermaster, the water user shall install and maintain a headgate, an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the headgate and measuring device must be approved by the Watermaster (Department). (KR2)
- \_\_\_\_ Live stream flow must be passed when required to satisfy existing water rights. In order to substantiate live flow is being passed, measuring devices may be required. (J)
- \_\_\_\_ Live flow must be by-passed all year. (BSD)
- \_\_\_\_ Any secondary use of stored water is limited each year to the capacity of the reservoir. (BSD2)
- \_\_\_\_ The water user shall install and maintain a headgate, an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the headgate and measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

## ODFW BIOLOGIST COMMENTS FOR HB 2153 CERTIFICATES HB 2376 NOTICES

Date: July 30, 1997  
Application # P-83082 Biologist's Name: Jerry Vogt  
Address: 1495 East Gregory Rd., Central Point  
Certificate # *(If applicable)* Phone: (541) 826-8774

\*\*Attach additional sheets if necessary

Please specify which reservoir(s)/ponds(s) the comments pertain to:  
*Describe by name, number or Township Range Section and 1/4 1/4 if necessary. If comments refer to all reservoir listed please specify. Please provide enough information to accurately describe which reservoir the comment(s) pertain to.*

Comments apply to all reservoirs in the application.

Does the reservoir/pond cause a detrimental impact to existing fishery resource. Specify which fishery resource and the evidence which supports that finding. *Please describe for each reservoir listed above. If the water right and the supporting evidence are the same please indicate.*

---

This reservoir negatively impacts populations of steelhead and resident trout in Thompson Creek. While ODFW has not documented the presence of fish at the POD, this reservoir is above ODFW's instream water right reach on Thompson Creek (Certificate 59825). Thompson Creek appears on DEQ's 303 (d) list of water quality limited streams due to high summer water temperatures; these high water temperatures reduce salmonid habitat in this stream. Withdrawals of water for this reservoir contribute to existing temperature problems in Thompson Creek and injure ODFW's instream water right on this stream.

\*\*\*\*\*BACK OF PAGE FOR LIST OF CONDITIONS TO MITIGATE INJURY\*\*\*\*\*

Which of the following conditions are required to mitigate the described injury?

The reservoir owner shall: (without ODFW approval)

- (a) install, maintain, and operate fish screening devices as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the proposed diversion. \*The required screen is to be in place and functional prior to any further diversion of water.
- (b) in accordance with ORS 498.268 and ORS 509.605, install, maintain, and operate by-pass devices as required by the Oregon Department of Fish and Wildlife that will provide adequate upstream and downstream passage for fish.
- (a & b) install, maintain, and operate fish screening and by-pass devices as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the proposed diversion. \*The required screen is to be in place and functional prior to any further diversion of water.

The reservoir owner shall: (with ODFW approval)

- (a) install, maintain, and operate fish screening device as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the proposed diversion. \*The required screen is to be in place, functional and approved by an ODFW representative prior to any further diversion of water.
- (b) in accordance with ORS 498.268 and ORS 509.605, install, maintain, and operate by-pass devices as required by the Oregon Department of Fish and Wildlife that will provide adequate upstream and downstream passage for fish. \*The required by-pass device is to be in place, functional and approved by an ODFW representative prior to any further diversion of water.
- (a & b) install, maintain, and operate fish screening and by-pass devices as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the proposed diversion. \*The required screens and by-pass devices are to be in place, functional and approved by an ODFW representative prior to any further diversion of water.

The reservoir owner shall by-pass flows during months when Instream Water Rights are not being met.

Other: (Please specify below)

Because the presence of fish at the POD is unknown, ODFW will not require the applicant to provide fish screens or fish passage. However, to prevent further degradation of stream temperature problems on Thompson Creek, and to avoid injury to ODFW's instream water right for that stream, the reservoir owner should be required to by-pass flows from April 1 through October 31.

## Oregon's major river basins:

1-North Coast	8-Grande Ronde	15-Rogue
2-Willamette	9-Powder	16-Umpqua
3-Sandy	10-Malheur	17-S. Coast
4-Hood	11-Owyhee	18-Mid Coast
5-Deschutes	12-Malheur L.	19-Columbia
6-John Day	13-Goose/Summer	20-Snake
7-Umatilla	14-Klamath	

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet—43,560 X 9.2.
