Form A (690-9-77)

Application No. G-9406

NOTICE OF BEGINNING OF CONSTRUCTION

I, Betty Doan, the holder of Permit No. G-8878to appropriate the public waters of the state of Oregon, began the actual construction of the works described therein on the 30th day of April, 1980Remarks: 3 wells actually vertical infiltration galleries with concrete rings set in a basin

The appropriator must state the manner of beginning of construction, the amount of work completed and the type of equipment

used for the water system up to the date of this statement, and any additional information which shows a substantial beginning of construction as

authorized by your permit.

IN WITNESS WHEREOF, I have hereunto set my hand this 25th day of Oct, 1982Betty Doan (Signature of Applicant)P.O. Box 1044, Brookings, OR 97415 (Address)

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when construction work is begun.

SP-32567-690

this copy mailed 5-4-84

Shallow infiltration wells. Probable hydraulic connection with stream. Should be distributed as surface water. PBA 10/2/77

Form B (690-9-77)

Application No. G-9406

NOTICE OF COMPLETION OF CONSTRUCTION

I, Betty Doan & Allen Doan, the holder of Permit No. G-8878to appropriate the public waters of the state of Oregon, completed the construction of the works described therein on the 28th day of Sept, 1981.

Remarks: _____

If the works have less capacity than described in the permit, or you have definitely abandoned part of the proposed development, you should so state in order that our records may not be unnecessarily encumbered.

IN WITNESS WHEREOF, I have hereunto set my hand this 25th day of Oct, 1982Betty Doan (Signature of Applicant)P.O. Box 1044, Brookings, OR 97415 (Address)

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when construction work is completed.

Form C (690-9-77)

IMPORTANT—This form is a notice to the Water Resources Director that permittee is ready to make final proof to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the final proof inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the Water Resources Department until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated.

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when all of the water has been applied.

Application No. G-9406

NOTICE OF COMPLETE APPLICATION OF WATER TO A BENEFICIAL USE

ALLAN R. DOAN and BETTY DOAN, the holder of Permit No. G-8878to appropriate the public waters of the state of Oregon, completely applied the waters to a beneficial use in accordance with the terms of said permit, on the 1st day of October, 1982.

Remarks: _____

IN WITNESS WHEREOF, I have hereunto set my hand this 25th day of October, 1982Allen R. Doan - Betty Doan (Signature of Applicant)P.O. Box 1044, Brookings, OR 97415 (Address)

Application No. G-9406

Permit No. G 8878

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same, **SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING MINIMUM FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD** and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 0.02..... cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from 3 wells.....

The use to which this water is to be applied is.....supplemental...irrigation.....

If for irrigation, this appropriation shall be limited to 1/80th..... of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 2½..... acre feet per acre for each acre irrigated during the irrigation season of each year; provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein.....

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

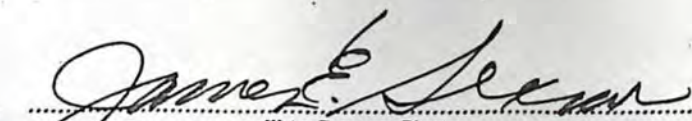

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is September 19, 1979.....

Actual construction work shall begin on or before July 14, 1981..... and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1981.....

Complete application of the water to the proposed use shall be made on or before October 1, 1982.....

WITNESS my hand this 14th.... day of.....July....., 19..80.....

Water Resources Director

PROPOSED CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

ALLAN R. AND BETTY DOAN
P.O. BOX 1044
BROOKINGS, OR 97415

confirms the right to use the waters of THREE WELLS in the DULEY CREEK BASIN for the purpose of the SUPPLEMENTAL IRRIGATION OF 1.7 ACRES.

The right has been perfected under Permit G-8878. The date of priority is SEPTEMBER 19, 1979. The right is limited to not more than 0.02 CUBIC FOOT PER SECOND or its equivalent in case of rotation, measured at the well.

The wells are located as follows:

NE 1/4 NE 1/4, SECTION 13, T 40 S, R 14 W, W.M.; WELL 1- 300 FEET NORTH AND 410 FEET WEST; WELL 2 - 140 FEET NORTH AND 460 FEET WEST; WELL 3 - 300 FEET NORTH AND 540 FEET WEST; ALL FROM THE SE CORNER OF THE NE 1/4 NE 1/4 OF SECTION 13.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 2.5 acre-feet per acre for each acre irrigated during the irrigation season of each year. The right shall be limited to any deficiency in the available supply of any prior right for the same land and shall not exceed the limitation allowed herein.

The right shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

NE 1/4 NE 1/4 1.7 ACRES
SECTION 13
TOWNSHIP 40 SOUTH, RANGE 14 WEST, W.M.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

Re: Doan Permit G-8878

Dear Mr. Shook:

I am in receipt of your letter of April 24, 1984. I have now had an opportunity to discuss this matter with the Doans.

It is my understanding that the Doans have taken all reasonable steps to comply with your Department's requirements; however, it would appear that some "paperwork" is in confusion. I enclose herein a copy of Form A (Notice of Beginning of Construction) which was signed by Mrs. Doan on October 25, 1982 and received by your office on January 21, 1983. I note you had sent me a blank of Form A, which I am giving to the Doans for them to reexecute and send in with further information you requested.

The Doans assure me that the wells were completed on before October 1, 1981 and I have no doubt to disbelieve them.

Perhaps the best course of action from this point on would be to have Mr. Drolet stop by the Doan residence and the parties can go over any last remaining paperwork to put this matter in good order.

Very truly yours,

COUTRAKON & BABIN, P.C.'s

Form A (690-9-77)

Application No. G-9406

NOTICE OF BEGINNING OF CONSTRUCTION

I, Betty Doan & Cedar Doan, the holder of Permit No. G-8878
to appropriate the public waters of the state of Oregon, began the actual construction of the works described
therein on the 30th day of April, 1980.

Remarks: _____
The appropriator must state the manner of beginning of construction, the amount of work completed and the type of equipment
required for the water system up to the date of this statement, and any additional information which shows a substantial beginning of construction
authorized by your permit.

IN WITNESS WHEREOF, I have hereunto set my hand this 25th day of Oct, 1980.

REFERENCE: Doan Permit G-8878

Allan R. and Betty Doan suggested we contact you for information regarding their ground water Permit G-8878.

The Doan's submitted an application for a permit to us in 1979. Based on their request, we issued Permit G-8878 to them on July 14, 1980, but with the understanding that we be apprised as to the progress of their project.

Under the terms of their permit, actual construction of the wells was to have been started on or before July 14, 1981. The wells were to be completed and adequate irrigation equipment on hand by October 1, 1981. Finally, water was to have been used to the fullest extent intended on or before October 1, 1982.

Although they have submitted Notice of Completion of Construction and Notice of Complete Application of Water to a Beneficial Use, which by the way, tell us the last two requirements were met, to date, we have not been advised as to whether or not actual construction of the wells took place on or before July 14, 1981. We also received unsigned and undated water well reports for three wells.

If the Doan's started constructing the wells before July 14, 1981, the enclosed Notice of Beginning of Construction should be completed by them and sent to us as soon as possible. Under remarks, the diameter, depth and number of wells developed should be shown.

Our Watermaster, John Drolet, will also be asked to inspect the wells and report on whether or not they have been constructed within statutory limits.

Sincerely,

Thomas E. Shook
Senior Water Rights Examiner

Under the terms of their permit, actual construction of the wells was to have been started on or before July 14, 1981. The wells were to be completed and adequate irrigation equipment on hand by October 1, 1981. Finally, water was to have been used to the fullest extent intended on or before October 1, 1982.

Although they have submitted Notice of Completion of Construction and Notice of Complete Application of Water to a Beneficial Use, which by the way, tell us the last two requirements were met, to date, we have not been advised as to whether or not actual construction of the wells took place on or before July 14, 1981. We also received unsigned and undated water well reports for three wells.

If the Doan's started constructing the wells before July 14, 1981, the enclosed Notice of Beginning of Construction should be completed by them and sent to us as soon as possible. Under remarks, the diameter, depth and number of wells developed should be shown.

Our Watermaster, John Drolet, will also be asked to inspect the wells and report on whether or not they have been constructed within statutory limits.

Sincerely,

Thomas E. Shook
Senior Water Rights Examiner

According to the terms of your Permit G-8878 which was for 0.02 cubic foot per second of water from 3 wells for supplemental irrigation in Curry County.

complete application of water was to have been made by October 1, 1982

Complete application of water means the application of water to a beneficial use under the permit to the full extent intended. In the case of irrigation, it means beneficial irrigation of all the lands the permittee intends to cover under the terms of the permit. If the water has been used, you should promptly submit notice describing the extent of completion as set forth in the letter accompanying your permit and also in our postal card of October 11, 1982

ORS 537.260 provides that: "Whenever the time within which any appropriation under a permit should have been perfected has expired and the owner of the permit fails or refuses within three months thereafter to submit to the Water Resources Director proof of completion of the appropriation as required by ORS 537.230 and 537.250, the Water Resources Director may, after 60 days notice by registered mail, order the cancellation of the permit..."

In accordance with the provisions of ORS 537.260, you are hereby notified that unless proof of beneficial use is received within 60 days from the date of this letter, the permit(s) may be canceled without further notice.

If for any reason, you are no longer interested in the project described by the permit, we would appreciate it if you would so advise. If the property involved has changed hands and any part of the project has been completed, you should immediately assign the permit to the new owner and advise us of his name and address. An assignment form will be furnished upon request.

Sincerely,

Dear Mr. and Mrs. Doan:

Thank you for sending us the notices of Beginning and Completion of Construction for the project described in your Permit Number G-8878.

We will have to be advised of actual construction of the wells, so you will have to include the diameter and depth of the wells and when they were constructed. I am returning the notice of beginning of construction for this reason.

Also, I have enclosed water well reports for your use. Use one form for each well and list the diameter and depth of the well along with the depth to the static water level, method of construction, and whether or not the wells are concrete lined. The forms should be submitted to us at your earliest convenience.

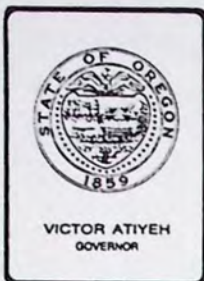

Just as soon as we receive your notice of beginning of construction, we will set your file up for survey and the next time our field representative is in the area, our usual inspection will be made of your project.

Sincerely,

Thomas E. Shook
Senior Water Rights Examiner

Dear Mr. and Mrs. Doan:

Your notices of Complete Application of Water to a Beneficial Use for the projects described in your Permits Numbered 44917 and G-8878 have been received.

Under the terms of your ground water Permit G-8878, actual construction of the well was to have been started by July 14, 1981. Adequate irrigation equipment as well as plumbing for two residences was to have been completed by October 1, 1981 and water used to the fullest extent intended on or before October 1, 1982.

Under the terms of your Permit 44917, the water system was to have been started by July 14, 1981. Again, the plumbing for the two families was to have been completed and adequate irrigation equipment on hand by October 1, 1982.

Several notices bringing this to your attention were sent you.

The statements we have received are not adequate to enable us to place your permits in good standing. You will have to complete the enclosed notices and return them at your earliest convenience.

Sincerely,

Thomas E. Shook
Senior Water Rights Examiner

Brookings, OR 97415

Reference: Files No. 59341 & G-9406

Dear Mr. and Mrs. Doan:

I have had an opportunity to again review your applications in preparation for issuing permits, which will be done with our next group.

Your application from the spring did not specifically say, but I presume that the quantity of water indicated (4.0 g.p.m.) is the total flow available from the spring, and it would appear that you wish to augment this supply by the use of the water from the three wells so as to make up a sufficient quantity to satisfy your needs.

If this is the case, then it would be appropriate to indicate the use of water from the wells as "supplemental" to water derived from the spring. This is the way the use will be described in your ground water permit, unless there are objections.

Under the Oregon Statutes related to the use of ground water, certain uses are exempted from the necessity of filing for a water right and in fact we are not allowed to issue a permit for these uses. These include the use of water for single or group domestic purposes not exceeding 5,000 gallons of water per day. The use of water for these purposes constitutes a right equal to that acquired by securing a water right permit. Therefore, the use of water within the residences for domestic purposes will not be included in your permit.

I am enclosing Water Resources Department receipts No. 17507 and 17508 for the \$35.00 in permit recording fees which you submitted.

Your permits will be issued with our next group, within the next ten days or so.

Sincerely,

RALPH H. JACKSON
Supervisor
Application/Permit Section

File 59341
G-9406

January 18, 1980

Allan R. & Betty Doan
P.O. Box 1044
Brookings, OR 97415

Dear Mr. and Mrs. Doan:

Your applications proposing the appropriation of 0.009 cubic foot of water per second from a spring for domestic use and the irrigation of 1.7 acres of commercial garden and 0.036 cubic foot of water per second, along with the application map, have been examined. Both applications appear to be in proper form, with one exception. Certain uses of water are exempted from the requirements for filing a water right under the provisions of ORS 537.545. These exemptions include the use of ground water for stock watering purposes, for watering any lawn or non-commercial garden not exceeding $\frac{1}{2}$ acre in area, for single or group domestic purposes in an amount not exceeding 15,000 gallons of water per day, and for certain industrial or commercial uses. We therefore cannot issue a permit for use of water from your ground water source for domestic purposes; a right to this use of water is acquired by having established that use, and no permit is necessary.

The irrigation of 1.7 acres of commercial garden is another matter, however, and this use clearly requires a permit. Therefore, when the permit is issued, it will specify the use of water solely for the irrigation of 1.7 acres of commercial garden.

Twenty dollars was submitted with each application; this amount covers the statutory examination fee required for filing. In addition, every application requires a permit recording fee before the permit can be issued. This is based on use; for the surface water filing, the permit recording fee is \$15.00 for the domestic use and \$10.00 for the irrigation. For the ground water application, the required permit recording fee is \$10.00 for irrigation. Therefore, an additional \$35.00 will be required before the permits can be issued.

Allan R. & Betty Doan
January 18, 1980
Page Two

Upon receipt of the required fees, the applications will be in proper form for the issuance of permits.

Sincerely,

RALPH H. JACKSON
Supervisor
