DATE MAILED: NOV 04 2025

NOTICE

Reference: Application G-15516 Permit G-15304

Enclosed is a proposed order of certification. The order proposes to cancel the permit.

If you do not agree with the proposed order, Oregon Administrative Rule 690-330-010 (2) allows the permittee or landowner 60 days from the mailing date of this notice to request the Department to reconsider the contents of the proposed order.

If you agree with the proposed order, no response to this notice is required. Sometime after comment period, the recorded order will be mailed to the permit holder of record.

If you have any questions please contact Codi Holmes via email at codi.n.holmes@water.oregon.gov. For quick assistance, via email is the best.

Sincerely,

Katherine Ratcliffe
Administrator Water Right Services

BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON

Order of Certification in the Matter of
Cancellation of Permit G-15304

)
)

FINAL ORDER

Findings of Fact

1. Application G-15516, in the name of Daniel Chin, was received on May 29, 2001. Permit G-15304 was issued on January 7, 2003, approving the application. The permit was assigned to Staunton Farms Limited Partnership and Northwest Farm Credit Services, FLCA on June 8, 2022.
2. Permit G-15304 allowed the use of 2.94 cubic foot per second of water from a Well, in Lost River Basin for Supplemental Irrigation of 235.0 Acres.
3. The date for the complete application of water (C-Date) was to be made on or before October 1, 2007.
4. The Department received a Claim of Beneficial Use on December 12, 2018.
5. The permit contained the below listed condition that was not complied with:

Measurement, recording, and reporting conditions:

A. ...The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report... to the Department annually....
6. A review of the Department records found the first year of water use reported was water year 2008 (being Oct. 1 2007- Sept 30 2008).
7. The permit holders did not submit any water use reporting for a water year between when the permit was issued (January 7, 2003) and the c-date (October 1, 2007).

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is a Final Order in other than contested case. This order is subject to judicial review under ORS 536.075 and ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to OAR 137-004-0080, you may petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

PROPOSED

8. Under the provisions of ORS 537.250, after the Water Resources Department has received a request for issuance of a water right certificate accompanied by the survey required under ORS 537.230(5) that shows, to the satisfaction of the Department, that an appropriation has been perfected in accordance with the provisions of the Water Rights Act, the Department shall issue to the applicant a certificate of the same character as that described in ORS 539.140.

Conclusions of Law

The permit holder demonstrated to the satisfaction of the Department that no beneficial use was accomplished under the permit. The use allowed by Permit G-15304 is lost.

Now, therefore, it is ORDERED:

Permit G-15304 is cancelled and is of no further force or effect.

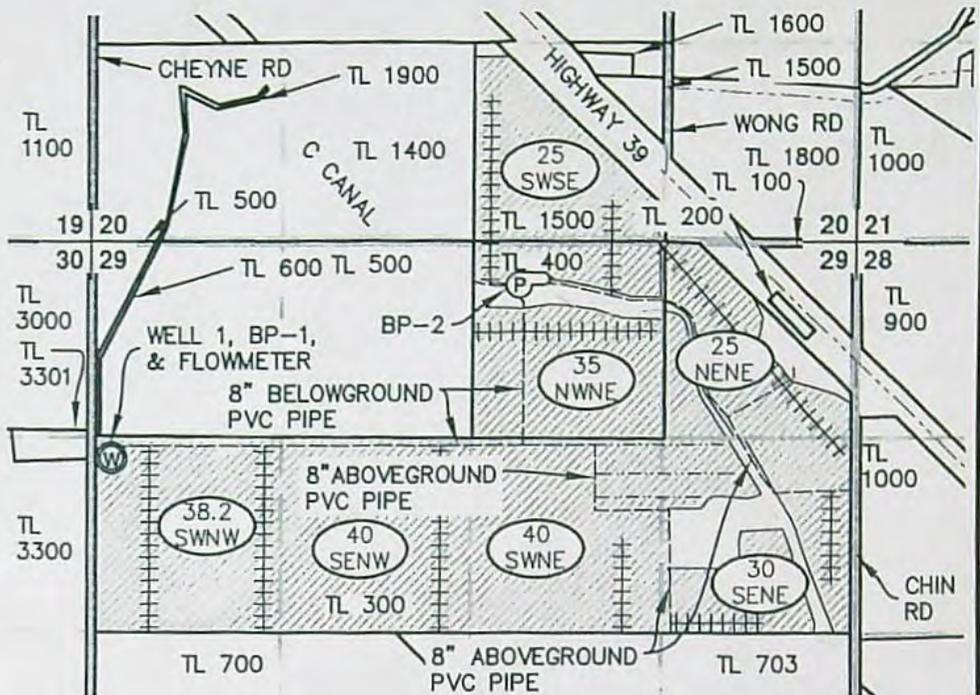

Issued _____.

CLAIM OF BENEFICIAL USE for Groundwater Permits claiming more than 0.1 cfs

Oregon Water Resources Department
725 Summer Street NE, Suite A
Salem, Oregon 97301-1266
(503) 986-0900
www.wrd.state.or.us

**A fee of \$200 must accompany this form for permits
with priority dates of July 9, 1987, or later.**

A separate form shall be completed for each permit.

In cases where a permit has been amended through the permit amendment process, a separate claim for the permit amendment is not required. Incorporate the permit amendment into the claim for the permit.

This form is subject to revision. **Begin each new claim** by checking for a new version of this form at:
http://www.oregon.gov/owrd/pages/wr/cwre_info.aspx

The completion of this form is required by OAR 690-014-0100(1) and 690-014-0110(4).

Please type or print in dark ink. If this form is found to contain errors or omissions, it may be returned to you. **Every item must have a response.** If any requested information does not apply to the claim, insert "NA." **Do not delete or alter any section of this form unless directed by the form.** The Department may require the submittal of additional information from any water user or authorized agent.

"Section 8" of this form is intended to aid in the completion of this form and should not be submitted.

A claim of beneficial use includes both this report and a map. If the map is being mailed separately from this form, please include a note with this form indicating such.

If you have questions regarding the completion of this form, please call 503-986-0900 and ask for the Certificate Section.

The Department has a program that allows it to enter into a voluntary agreement with an applicant for expedited services. Under such an agreement, the applicant pays the cost to hire additional staff that would not otherwise be available. This program means a certificate may be issued in about a month. For more information on this program see
http://www.oregon.gov/owrd/pages/mgmt_reimbursement_authority.aspx

SIGNATURE	PRINT OR TYPE NAME	TITLE	DATE
	Daniel Chin	Owner	11/12/18

**RECEIVED
DEC 12 2018
OWRD**

**SECTION 3
CLAIM DESCRIPTION**

1. Point of appropriation name or number:

POINT OF APPROPRIATION (POA) NAME OR NUMBER (CORRESPOND TO MAP)	WELL LOG ID # FOR ALL WORK PERFORMED ON THE WELL (IF APPLICABLE)	WELL TAG # (IF APPLICABLE)
Well 1	KLAM 10518	N/A

Attach each well log available for the well (include the log for the original well and any subsequent alterations, reconstructions, or deepenings)

2. Point of appropriation source, if indicated on permit:

POA NAME OR NUMBER	SOURCE BASIN LOCATED WITHIN	TRIBUTARY
Well 1	Lost River Basin	N/A

3. Developed use(s), period of use, and rate for each use:

POA NAME OR NUMBER	USES	IF IRRIGATION, LIST CROP TYPE	SEASON OR MONTHS WHEN WATER WAS USED	ACTUAL RATE OR VOLUME USED (CFS, GPM, OR AF)
Well 1	Supplemental Irrigation	Potatoes	2015: May to August	249.2 AF
Total Quantity of Water Used				249.2 AF

4. Provide a general narrative description of the distribution works. This description must trace the water system from **each** point of appropriation to the place of use:

From Well 1, water is pumped by Pump 1 to Booster Pump-1 (BP-1) through the flowmeter and east through 8" belowground PVC pipe for ±2,951'. This pipe is connected to wheel lines that irrigates land in SW1/4 NW1/4 and SE1/4 NW1/4, Section 29. The pipe then splits into two directions: to the north and east.

NORTH

To the north, the 8" below ground PVC travels ±1,065' before connecting with BP-2. This pipe is connected to wheel line that irrigates land in the NW1/4 NE1/4. The pipe then passes over C Canal where it splits and travels west for ±317' and east for ±1,950'. The pipe then splits to the east for ±590', and to the south for ±1,130'. This pipe is connected to wheel lines that irrigate land in NE1/4 NE1/4, SE1/4 NE1/4, Section 29, and SW1/4 SE1/4, Section 20.

EAST

To the east, the pipe becomes 8" aboveground PVC and travels ±500' before turning south and traveling ±445'. The pipe then turns east and travels ±518' before turning south and traveling ±810' where it ends. This pipe is connected to wheel lines and solid set line that irrigates land in SW1/4 NE1/4 and SE1/4 NE1/4, Section 29.

Reminder: The map associated with this claim must identify the location of the point(s) of diversion, Donation Land Claims (DLC), Government Lots (GLot), and Quarter-Quarters (QQ).

RECEIVED

DEC 12 2018

OWRD

5. Variations:

Was the use developed differently from what was authorized by the permit, permit amendment final order, or extension final order? If yes, describe below. YES

(e.g. "The permit allowed three points of appropriation. The water user only developed one of the points." or "The permit allowed 40.0 acres of irrigation. The water user only developed 10.0 acres.")

The permit allowed 40.0 acres of supplemental irrigation in T40S, R10E, Sec. 29, SWNW. However, a house is developed on that land. The water user only developed 38.2 acres for supplemental irrigation.

6. Claim Summary:

POA NAME OR #	MAXIMUM RATE AUTHORIZED	CALCULATED THEORETICAL RATE BASED ON SYSTEM	AMOUNT OF WATER MEASURED	USE	# OF ACRES ALLOWED	# OF ACRES DEVELOPED
Well 1	2.94 CFS	3.19 CFS	4.35 CFS	Supplemental Irrigation	235.0	233.2

RECEIVED

DEC 12 2018

OWRD

**SECTION 4
SYSTEM DESCRIPTION**

Are there multiple POAs?

NO

A. Place of Use

1. Is the right for municipal use?

NO

TWP	RNG	MER	SEC	QQ	GLot	DLC	USE	IF IRRIGATION # PRIMARY ACRES	IF IRRIGATION, # SUPPLEMENTAL ACRES
40S	10E	WM	20	SWSE			Supplemental Irrigation		25.0
40S	10E	WM	29	NENE			Supplemental Irrigation		25.0
40S	10E	WM	29	NWNE			Supplemental Irrigation		35.0
40S	10E	WM	29	SWNE			Supplemental Irrigation		40.0
40S	10E	WM	29	SENE			Supplemental Irrigation		30.0
40S	10E	WM	29	SWNW			Supplemental Irrigation		38.2
40S	10E	WM	29	SENW			Supplemental Irrigation		40.0
Total Acres Irrigated									233.2

Reminder: The map associated with this claim must identify Donation Land Claims (DLC), Government Lots (GLot), Quarter Quarters (QQ), and if for irrigation, the number of acres irrigated within each projected DLC, GLot, and QQ.

B. Diversion and Delivery System Information

Provide the following information concerning the diversion and delivery system. Information provided must describe the equipment used to transport and apply the water from the point of appropriation to the place of use.

1. Is a pump used?

YES

2. Pump Information

MANUFACTURER	MODEL	SERIAL NUMBER	TYPE (CENTRIFUGAL, TURBINE OR SUBMERSIBLE)	INTAKE SIZE	DISCHARGE SIZE

12. Additional notes or comments related to the system:

N/A

C. Groundwater Source Information (Well and Sump)

1. Is the appropriation from ground water (well or sump)? YES

2. Describe the access port (type and location) or other means to measure the water level in the well:

Port pipe on south side of well

3. If well logs are not available, provide as much of the following information as possible:

CASING DIAMETER	CASING DEPTH	TOTAL DEPTH	COMPLETION DATE OF ORIGINAL WELL	COMPLETION DATES OF ALTERATIONS	WHO THE WELL WAS DRILLED FOR	WELL DRILLED BY
N/A						

4. In addition to the information requested in item "3" above, provide any other information which may help the Department locate any well logs associated with this appropriation.

N/A

5. Is the appropriation from a dug well (sump)? NO

D. Storage

1. Does the distribution system include in-system storage (e.g. storage tank, bulge in system / reservoir) NO

E. Gravity Flow Pipe

(THE DEPARTMENT TYPICALLY USES THE HAZEN-WILLIAM'S FORMULA FOR A GRAVITY FLOW PIPE SYSTEM)

1. Does the system involve a gravity flow pipe? NO

F. Gravity Flow Canal or Ditch

(THE DEPARTMENT TYPICALLY USES MANNING'S FORMULA FOR CANALS AND DITCHES)

1. Is a gravity flow canal or ditch used to convey the water as part of the distribution system? NO

SECTION 5 CONDITIONS

All conditions contained in the permit, permit amendment, or any extension final order shall be addressed. Reports that do not address all performance related conditions will be returned.

1. Time Limits:

Permits and extension final orders contain any or all of the following dates: the date when the actual construction work was to begin, the date when the construction was to be completed, and the date when the complete application of water to the proposed use was to be completed. These dates may be referred to as ABC dates. Describe how the water user has complied with each of the development timelines established in the permit or permit extension order:

	DATE FROM PERMIT	DATE ACCOMPLISHED*	DESCRIPTION OF ACTIONS TAKEN BY WATER USER TO COMPLY WITH THE TIME LIMITS
ISSUANCE DATE	1/7/2003		
BEGIN CONSTRUCTION (A)	N/A	N/A	N/A
COMPLETE CONSTRUCTION (B)	N/A	N/A	N/A
COMPLETE APPLICATION OF WATER (C)	10/1/2007	8/2005	Full beneficial use of water applied.

* MUST BE WITHIN PERIOD BETWEEN PERMIT, OR ANY EXTENSION FINAL ORDER ISSUANCE AND THE DATE TO COMPLETELY APPLY WATER

2. Is there an extension final order(s)? NO

3. Initial Water Level Measurements:

a. Was the water user required to submit an initial static water level measurement? YES

b. What month was the initial measurement to be taken in?

March

c. Was the measurement submitted to the Department? YES

d. If the initial measurement was not submitted, provide that measurement now, if available:

DATE OF MEASUREMENT	MEASUREMENT MADE BY	METHOD	MEASUREMENT
N/A			

4. Annual Static Water Level Measurements:

a. Was the water user required to submit annual static water level measurements? YES

b. Provide the month, or months, the static water level measurement(s) were to be made:

March

c. Were the static water level measurements taken in the month(s) required? YES

d. If "YES", were those measurements submitted to the Department? YES

RECEIVED

DEC 12 2018

OWRD

e. If the annual measurements were not submitted, provide the measurements now:

DATE OF MEASUREMENT	MEASUREMENT MADE BY	METHOD	MEASUREMENT
N/A			

5. Pump Test (Required for most ground water permits prior to issuance of a certificate)

- a. Did the permit require the submittal of a pump test? YES
- b. Has the pump test been previously submitted to the Department? NO
- c. Is the pump test attached to this claim? YES
- d. Has the pump test been approved by the Department? NO
- e. Has a pump test exemption been approved by the Department? NO

**** Claims will not be reviewed until a pump test or exemption has been approved by the Department**

6. Measurement Conditions:

- a. Does the permit, permit amendment, or any extension final order require the installation of a meter or approved measuring device? YES

Reminder: If a meter or approved measuring device was required, the COBU map must indicate the location of the device in relation to the point of diversion or appropriation.

- b. Has a meter been installed? YES
- c. Meter Information

POD/POA NAME OR #	MANUFACTURER	SERIAL #	CONDITION (WORKING OR NOT)	CURRENT METER READING	DATE INSTALLED
Well 1	McCrometer	03-01994-10	Working	709.210 AF	2003

7. Recording and reporting conditions

- a. Is the water user required to report the water use to the Department? YES
 - b. Have the reports been submitted? YES
- If the reports have not been submitted, attach a copy of the reports if available.

8. Other conditions required by permit, permit amendment final order, or extension final order:

- a. Were there special well construction standards? NO
- b. Was submittal of a ground water monitoring plan required? NO
- c. Was submittal of a water management and conservation plan required? NO
- d. Other conditions? NO

If "YES" to any of the above, identify the condition and describe the water user's actions to comply with the condition(s):

N/A

**SECTION 6
ATTACHMENTS**

Provide a list of any additional documents you are attaching to this report:

ATTACHMENT NAME	DESCRIPTION
Appendix A	Copy of Permit G-15304
Appendix B	Signed Mylar Map
Appendix C	Final Proof Map (paper copy)
Appendix D	Sprinkler & Pump Calculations
Appendix E	Pump Test Cover and Data Sheets
Appendix F	Well Log KLAM 10518
Appendix G	Copy of Klamath County Tax Assessors Maps 40 10 20 & 40 10 29

**SECTION 7
CLAIM OF BENEFICIAL USE MAP**

The Claim of Beneficial Use Map must be submitted with this claim. Claims submitted without the Claim of Beneficial Use map will be returned. The map shall be submitted on poly film at a scale of 1" = 1320 feet, 1" = 400 feet, or the original full-size scale of the county assessor map for the location.

Provide a general description of the survey method used to prepare the map. Examples of possible methods include, but are not limited to, a traverse survey, GPS, or the use of aerial photos. If the basis of the survey is an aerial photo, provide the source, date, series and the aerial photo identification number.

The survey methods used for the Claim of Beneficial Use Map include field measurements, NAIP 2018 aerial photography, and Klamath County Tax Assessors maps 40 10 20 & 40 10 29.

Map Checklist

Please be sure that the map you submit includes ALL the items listed below.

(Reminder: Incomplete maps and/or claims may be returned.)

- Map on polyester film
- Appropriate scale (1" = 400 feet, 1" = 1320 feet, or the original full-size scale of the county assessor map)
- Township, Range, Section, Donation Land Claims, and Government Lots
- If irrigation, number of acres irrigated within each projected Donation Land Claims, Government Lots, Quarter-Quarters
- Locations of fish screens and/or fish by-pass devices in relationship to point of diversion
- Locations of meters and/or measuring devices in relationship to point of diversion or appropriation
- Conveyance structures illustrated (pumps, reservoirs, pipelines, ditches, etc.)
- Point(s) of diversion or appropriation (illustrated and coordinates)
- Tax lot boundaries and numbers
- Source illustrated if surface water
- Disclaimer ("This map is not intended to provide legal dimensions or locations of property ownership lines")
- Application and permit number or transfer number
- North arrow
- Legend
- CWRE stamp and signature

STATE OF OREGON

COUNTY OF KLAMATH

PERMIT TO APPROPRIATE THE PUBLIC WATERS

RECEIVED

DEC 12 2018

OWRD

THIS PERMIT IS HEREBY ISSUED TO

DANIEL CHIN
17817 CHEYNE RD
KLAMATH FALLS, OREGON 97603

(541) 798-5038

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-15516

SOURCE OF WATER: A WELL IN LOST RIVER BASIN

PURPOSE OR USE: SUPPLEMENTAL IRRIGATION OF 235.0 ACRES

MAXIMUM RATE: 2.94 CUBIC FEET PER SECOND

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: MAY 29, 2001

WELL LOCATION: SW $\frac{1}{4}$ NW $\frac{1}{4}$, SECTION 29, T40S, R10E, W.M.; 1420 FEET SOUTH AND 20 FEET EAST FROM NW CORNER, SECTION 29

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

SW $\frac{1}{4}$ SE $\frac{1}{4}$ 25.0 ACRES
SECTION 20

NE $\frac{1}{4}$ NE $\frac{1}{4}$ 25.0 ACRES

NW $\frac{1}{4}$ NE $\frac{1}{4}$ 35.0 ACRES

SW $\frac{1}{4}$ NE $\frac{1}{4}$ 40.0 ACRES

SE $\frac{1}{4}$ NE $\frac{1}{4}$ 30.0 ACRES

SW $\frac{1}{4}$ NW $\frac{1}{4}$ 40.0 ACRES

SE $\frac{1}{4}$ NW $\frac{1}{4}$ 40.0 ACRES

SECTION 29

TOWNSHIP 40 SOUTH, RANGE 10 EAST, W.M.

Measurement, recording and reporting conditions:

OWRD

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

To monitor the effect of water use from the well(s) authorized under this permit, the Department requires the water user to make and report annual static water level measurements. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement.

Measurements must be made according to the following schedule:

Before Use of Water Takes Place

Initial and Annual Measurements

The Department requires the permittee to submit an initial water level measurement in the month specified above once well construction is complete and annually thereafter until use of water begins; and

After Use of Water has Begun

Reference Water Level Determination

Following the first year of water use, the user shall submit one static water level measurement in the month specified above which will establish the reference level against which future annual measurements will be compared. The water user is not required to measure additional water levels after the reference level has been determined unless required by the Director. The additional measurements may be required in a different month. If the measurement requirement is stopped, the Director may restart it at any time.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the

OWRD

Construction Contractors Board and be submitted to the Department on forms provided by the Department. The Department requires the individual performing the measurement to:

- (A) Identify each well with its associated measurement; and
- (B) Measure and report water levels to the nearest tenth of a foot as depth-to-water below ground surface; and
- (C) Specify the method used to obtain each well measurement; and
- (D) Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s) if annual water level measurements reveal any of the following events:

- (A) An average water level decline of three or more feet per year for five consecutive years; or
- (B) A water level decline of 15 or more feet in fewer than five consecutive years; or
- (C) A water level decline of 25 or more feet; or
- (D) Hydraulic interference leading to a decline of 25 or more feet in any neighboring well with senior priority.

The period of non or restricted use shall continue until the annual water level rises above the decline level which triggered the action or until the Department determines, based on the permittee's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

STANDARD CONDITIONS

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The wells shall be constructed in accordance with the General

Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Complete application of the water to the use shall be made on or before October 1, 2007. If the water is not completely applied before this date, and the permittee wishes to continue development under the permit, the permittee must submit an application for extension of time, which may be approved based upon the merit of the application.

SEE NEXT PAGE

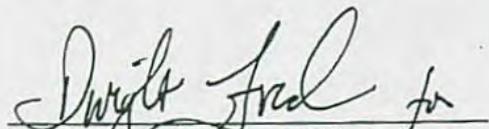

RECEIVED

DEC 12 2018

OWRD

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued January 7, 2003

 Paul R. Cleary, Director
 Water Resources Department

REAL ESTATE TRANSACTIONS: Pursuant to ORS 537.330, in any transaction for the conveyance of real estate that includes any portion of the lands described in this permit, the seller of the real estate shall, upon accepting an offer to purchase that real estate, also inform the purchaser in writing whether any permit, transfer approval order, or certificate evidencing the water right is available and that the seller will deliver any permit, transfer approval order or certificate to the purchaser at closing, if the permit, transfer approval order or certificate is available.

CULTURAL RESOURCES PROTECTION LAWS: Permittees involved in ground-disturbing activities should be aware of federal and state cultural resources protection laws. ORS 358.920 prohibits the excavation, injury, destruction or alteration of an archeological site or object, or removal of archeological objects from public and private lands without an archeological permit issued by the State Historic Preservation Office. 16 USC 470, Section 106, National Historic Preservation Act of 1966 requires a federal agency, prior to any undertaking to take into account the effect of the undertaking that is included on or eligible for inclusion in the National Register. For further information, contact the State Historic Preservation Office at 503-378-4168, extension 232.

Klamath Falls OR 97603

On December 12, 2018 the Water Resources Department received the Claim of Beneficial Use (COBU) for the following file(s):

Application G-15516 Permit G-15304

The COBU included a report and map. The Department hopes to review your submittal within approximately 2 - 4 years. At that time we will review these items and provide a final certificate, proposed certificate, or a request for additional information.

If you are interested in having your COBU reviewed sooner, you may pay to have your file processed immediately, using the Reimbursement Authority program, which is described at:

<https://www.oregon.gov/OWRD/programs/WaterRights/RA/Pages/Certificate.aspx>

Customer Service phone: (503) 986-0801

If you sell the property, please contact the Department, or have the new owners contact the Department about the need to file an assignment.

Acre-feet (AF) of Water Used

<u>Water Year*</u>	<u>Report ID</u>	<u>Facility</u>	<u>Oct</u>	<u>Nov</u>	<u>Dec</u>	<u>Jan</u>	<u>Feb</u>	<u>Mar</u>	<u>Apr</u>	<u>May</u>	<u>Jun</u>	<u>Jul</u>	<u>Aug</u>	<u>Sep</u>	<u>Total Water Used</u>	<u>Irrigated Acres</u>
2015	62440	WELL 2 (KLAM 10518)								40.90	57.64	71.22	79.44		249.20	
2008	62440	WELL 2 (KLAM 10518)	0.00	0.00	0.00	0.00	0.00	0.00	0.00	30.00	40.00	40.00	40.00	20.00	170.00	

*The water year is named for the calendar year in which it ends. Example: the 2018 water year begins Oct. 1, 2017 and ends Sep. 30, 2018.

- The Water Resources Department makes reasonable efforts to screen the data for quality control; however, the Department cannot accept responsibility for errors, omissions, or accuracy of the information. Notification of any errors is appreciated. Send notifications to wateruse@wr.state.or.us or call (503) 986-0905.
- Water use is reported by point of diversion (POD), rather than by water right.
- If a POD is shared with multiple water rights, it is not feasible to separate out the amount used under the water right being queried from water used by other rights using this same POD.
- Monthly amounts indicate:
 - For diverted rights, the total amount diverted during the month;
 - For storage rights, the amount generally stored in the reservoir/pond during the month, as represented by the volume of water impounded on approximately the same day each month.
- Water use amounts have all been converted to "acre-feet" (AF), regardless of the original measurement unit reported. One AF is the volume of water that will cover an acre of ground one foot deep = 325,850 gallons.
- Zeroes indicate that a report was received stating that no water was used during those months; if a year is not listed, no report of water use was received for that year.

Well Log	Test Type	Yield (gpm)	Drawdown	Flow Units	Duration (hr)	Calculated Specific Capacity (gpm/ft)
KLAM 10518	Pump	1800.0	57.0		4.0	31.58

Reference: Application G-16400, Permit G-18391

Reference: Application G-15516, Permit G-15304

Regarding Application G-16400, Permit G-18391, the partial assignment from Daniel Chin and Wong Potatoes to Staunton Farms Limited Partnership, and subsequent partial assignment from Staunton Farms Limited Partnership to Staunton Farms Limited Partnership and Northwest Farm Credit Services, FLCA has been recorded in the records of the Water Resources Department.

The Departments records will now show Staunton Farms Limited Partnership, Northwest Farm Credit Services, FLCA, Gregory Drew Heaton, and Scott Bedford as the permit holders of record for Application G-16400, Permit G-18391.

Regarding Application G-15516, Permit G-15304, the assignment from Daniel Chin to Staunton Farms Limited Partnership, and subsequent assignment from Staunton Farms Limited Partnership to Staunton Farms Limited Partnership and Northwest Farm Credit Services, FLCA has been recorded in the records of the Water Resources Department.

The Departments records will now show Staunton Farms Limited Partnership and Northwest Farm Credit Services, FLCA as the permit holders of record for Application G-15516, Permit G-15304.

Our records have been changed accordingly and the original requests are enclosed. Receipt numbers 138231 and 138232 covering the recording fees are also enclosed.

A permit is not a perfected water right, and has conditions and timelines that must be satisfied prior to a Certificate of Water Right being issued. Please review the permits to be familiar with the conditions and timelines contained in the permits.

Please note that Application G-16400, Permit G-18391 requires complete application of water to the proposed use by October 1, 2024, and within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Sincerely,

Mary F. Bjork
Water Rights Program Analyst
Water Right Services Division

One check is being returned to Northwest Farm Credit Services with the original submitted assignment documents. And one check is being returned to AmeriTitle with copies of the submitted assignment documents.

Regarding Application G-15653, Permit G-15305, this permit was cancelled by Special Order Volume 101, Page 493, on July 25, 2016.

Regarding Application G-16400, Permit G-16156, this permit was cancelled by the Split a Permit process under transfer T-13375 and resulted in two permits. Application G-16400, Permit G-18390, and Application G-16400, Permit G-18391, were issued April 7, 2021.

Regarding Application G-15516, Permit G-15304, the assignment request from Daniel Chin to Staunton Farms Limited Partnership, and subsequent assignment request from Staunton Farms Limited Partnership to Staunton Farms Limited Partnership and Northwest Farm Credit Services, FLCA, is in order but is being returned because of the fee submittals on two checks and difficulties of partial refund processing.

I am returning your requests and submitted fees. Should you have any questions, please do not hesitate to contact me at the address above or by telephone at 503-979-9895.

Sincerely,

Mary F. Bjork

MEMORANDUM

TO: JUSTIN IVERSON, GROUND WATER SECTION
FROM: CERTIFICATE SECTION – JONNINE SKAUG
SUBJECT: PUMP TEST FOR APPLICATION G-15516, PERMIT G-15304
DATE: DECEMBER 12, 2018

The attached pump test was recently received. We have retained the original for the application file.

Oregon Water Resources Department
PUMP TEST FORM COVER SHEET

Well Owner:
 Name: Daniel Chin
 Address: 17817 Cheyne Rd.
 County: Klamath
 City: Klamath Falls State: OR Zip: 97603
 Original owner (from well log): Sam Wong & Son

Well Location:
 Township: 40 S Range: 10 E
 Section: 29 ¼: NW 1/16: SW 1/64: NW
 Well depth: 913.0 Date drilled: 7/10/1992
 Owners well no. (if any): Well 1
 POD ID: _____

Water Right Information:
 Application: G-15516 Permit: G-15304 Certificate: N/A
 Is this well listed on more than one water right? Yes If yes, list additional water rights below:
 Application: _____ Permit: _____ Certificate: _____
 Application: _____ Permit: _____ Certificate: _____

Pump Test:
 Test Conducted by: Daniel B. Scalas, C.W.R.E. Well Owner? Yes
 Company: Adkins Consulting Engineering, LLP
 Address: 1435 Esplanade Ave. Date of Test: 08/07/2018
 City: Klamath Falls State: OR Zip: 97601
 Daytime phone: 541-884-4666

Method of discharge measurement (see our brochure for more information): Flow meter
 Method of water-level measurement (pick one or enter other method used): Electric tape
 Length of air line (if used): _____

Pump type (pick one or enter other method used): Turbine
 Was the pump test conducted during normal use of the well? Yes Note: _____

Are you aware of any wells, other than domestic or stock wells, pumping within 1000 feet of the tested well during the test or within 24 hours prior to the test? Yes Note: _____
 If yes, give approximate distances to each and approximate pumping rate of each. If possible, indicate if they were turned on or off during the test: _____

Is there a lake, stream or other surface water body within ¼ mile of the tested well? Yes If yes, give approximate distance from the well and approximate elevation difference between the surface water and the well head. Approx. distance: _____ ft Approx. elevation difference: _____ ft

Well elevation is above surface water body.

Description of measuring point (e.g. top port of 1 inch port pipe, west side) Port pipe on south side of well

Measuring point distance above land surface 1.00 feet.

Static water level measurements: (A minimum of three measurements are required in the hour before pumping begins at no less than 20 minutes apart):

Time	Depth to water below meas. point	Depth to water below land surface
<u>8:50 am</u>	<u>84.40</u>	<u>83.40</u>
<u>9:10 am</u>	<u>84.00</u>	<u>83.00</u>
<u>9:30 am</u>	<u>83.90</u>	<u>82.90</u>

Discharge measurements: (A discharge measurement is required at the start of pumping and at least once an hour during the test; additional measurements should be noted on the Pump Test Data Sheet):

Time	Discharge Rate	Discharge Units (e.g. gpm, cfs, etc)
<u>9:32 am</u>	<u>1,700.00</u>	<u>gpm (gallons per minute)</u>
<u>10:32 am</u>	<u>2,000.00</u>	<u>gpm (gallons per minute)</u>
<u>11:32 am</u>	<u>1,900.00</u>	<u>gpm (gallons per minute)</u>
<u>12:32 pm</u>	<u>2,000.00</u>	<u>gpm (gallons per minute)</u>
<u>1:32 pm</u>	<u>2,000.00</u>	<u>gpm (gallons per minute)</u>

Time pump turned on: Date 08/07/2018 Time 9:32 am
 Time pump turned off: Date 08/07/2018 Time 1:32 am
 Total pumping time: 4 hours 0 minutes

Note: Well must be idle for at least 16 hours prior to the test.

Subject: Daniel Chin, Permit G-15304

Good afternoon,

I'm performing a follow up on the Department compliance letter that was issued to the permit holder on June 15, 2015. The Department is ready to issue a cancellation of the permit. However, correspondence was received from you June 24, 2015, indicating you were retained by Daniel Chin to complete the Claim. Is a CBU being submitted, and if so, is there a time frame in mind? I would like to remove this from cancellation.

Thank you,

Corey A Courchane

Reference: Application G-15516, Permit G-15304

Dear Permit Holder:

This letter is in regard to your water use permit as referenced above. Your permit required you to complete the development of your water use by October 1, 2007.

In order for the Department to consider issuance of a certificate of water right, you are required by law to hire a certified water right examiner to prepare and submit a claim of beneficial use that includes a final proof survey map of the development. The map and claim of beneficial use were to have been submitted to our Department within one year of October 1, 2007. The fee for submitting a claim of beneficial use is \$175.00. Please see the enclosed 'Resource Sheet' for our current database of CWRE's.

If you are not finished with the development of your permit, you need to file an application for an extension of time to complete your development. The fee for filing an extension of time is \$575.00. Please see the enclosed 'Resource Sheet' to access the extension of time form.

In the event that you are no longer using water as allowed by this permit, you should cancel it so that we may clear our records. Please see the enclosed 'Resource Sheet' to access the cancellation form, if you are interested in this option.

If you have not submitted either a Claim of Beneficial Use or a request for an extension of time for your permit within 60 days of the date of this letter (August 14, 2015) the Department may issue a Final Order to cancel your permit without further notice. If the Department issues a Final Order to cancel your permit, and you request reconsideration of the final order and reinstatement of your permit, there is a \$450.00 reinstatement fee that is charged in addition to the claim of beneficial use or extension of time fee.

Should you have any questions, please contact Corey Courchane by telephone at 503-986-0825, Machelie Bamberger by telephone at 503-986-0802, or myself at the address above or by telephone at 503-986-0817.

Sincerely,

Jerry Sauter

STATE OF OREGON

COUNTY OF KLAMATH

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

DANIEL CHIN
17817 CHEYNE RD
KLAMATH FALLS, OREGON 97603

(541) 798-5038

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-15516

SOURCE OF WATER: A WELL IN LOST RIVER BASIN

PURPOSE OR USE: SUPPLEMENTAL IRRIGATION OF 235.0 ACRES

MAXIMUM RATE: 2.94 CUBIC FEET PER SECOND

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: MAY 29, 2001

WELL LOCATION: SW $\frac{1}{4}$ NW $\frac{1}{4}$, SECTION 29, T40S, R10E, W.M.; 1420 FEET SOUTH AND 20 FEET EAST FROM NW CORNER, SECTION 29

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

SW $\frac{1}{4}$ SE $\frac{1}{4}$ 25.0 ACRES
SECTION 20

NE $\frac{1}{4}$ NE $\frac{1}{4}$ 25.0 ACRES

NW $\frac{1}{4}$ NE $\frac{1}{4}$ 35.0 ACRES

SW $\frac{1}{4}$ NE $\frac{1}{4}$ 40.0 ACRES

SE $\frac{1}{4}$ NE $\frac{1}{4}$ 30.0 ACRES

SW $\frac{1}{4}$ NW $\frac{1}{4}$ 40.0 ACRES

SE $\frac{1}{4}$ NW $\frac{1}{4}$ 40.0 ACRES

SECTION 29

TOWNSHIP 40 SOUTH, RANGE 10 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

To monitor the effect of water use from the well(s) authorized under this permit, the Department requires the water user to make and report annual static water level measurements. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement.

Measurements must be made according to the following schedule:

Before Use of Water Takes PlaceInitial and Annual Measurements

The Department requires the permittee to submit an initial water level measurement in the month specified above once well construction is complete and annually thereafter until use of water begins; and

After Use of Water has BegunReference Water Level Determination

Following the first year of water use, the user shall submit one static water level measurement in the month specified above which will establish the reference level against which future annual measurements will be compared. The water user is not required to measure additional water levels after the reference level has been determined unless required by the Director. The additional measurements may be required in a different month. If the measurement requirement is stopped, the Director may restart it at any time.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the

Construction Contractors Board and be submitted to the Department on forms provided by the Department. The Department requires the individual performing the measurement to:

- (A) Identify each well with its associated measurement; and
- (B) Measure and report water levels to the nearest tenth of a foot as depth-to-water below ground surface; and
- (C) Specify the method used to obtain each well measurement; and
- (D) Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s) if annual water level measurements reveal any of the following events:

- (A) An average water level decline of three or more feet per year for five consecutive years; or
- (B) A water level decline of 15 or more feet in fewer than five consecutive years; or
- (C) A water level decline of 25 or more feet; or
- (D) Hydraulic interference leading to a decline of 25 or more feet in any neighboring well with senior priority.

The period of non or restricted use shall continue until the annual water level rises above the decline level which triggered the action or until the Department determines, based on the permittee's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

STANDARD CONDITIONS

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The wells shall be constructed in accordance with the General

Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

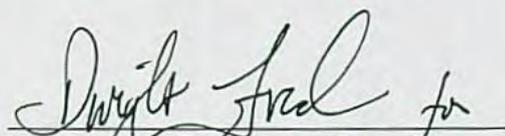

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Complete application of the water to the use shall be made on or before October 1, 2007. If the water is not completely applied before this date, and the permittee wishes to continue development under the permit, the permittee must submit an application for extension of time, which may be approved based upon the merit of the application.

SEE NEXT PAGE

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued January 7, 2003

Paul R. Cleary, Director
Water Resources Department

REAL ESTATE TRANSACTIONS: Pursuant to ORS 537.330, in any transaction for the conveyance of real estate that includes any portion of the lands described in this permit, the seller of the real estate shall, upon accepting an offer to purchase that real estate, also inform the purchaser in writing whether any permit, transfer approval order, or certificate evidencing the water right is available and that the seller will deliver any permit, transfer approval order or certificate to the purchaser at closing, if the permit, transfer approval order or certificate is available.

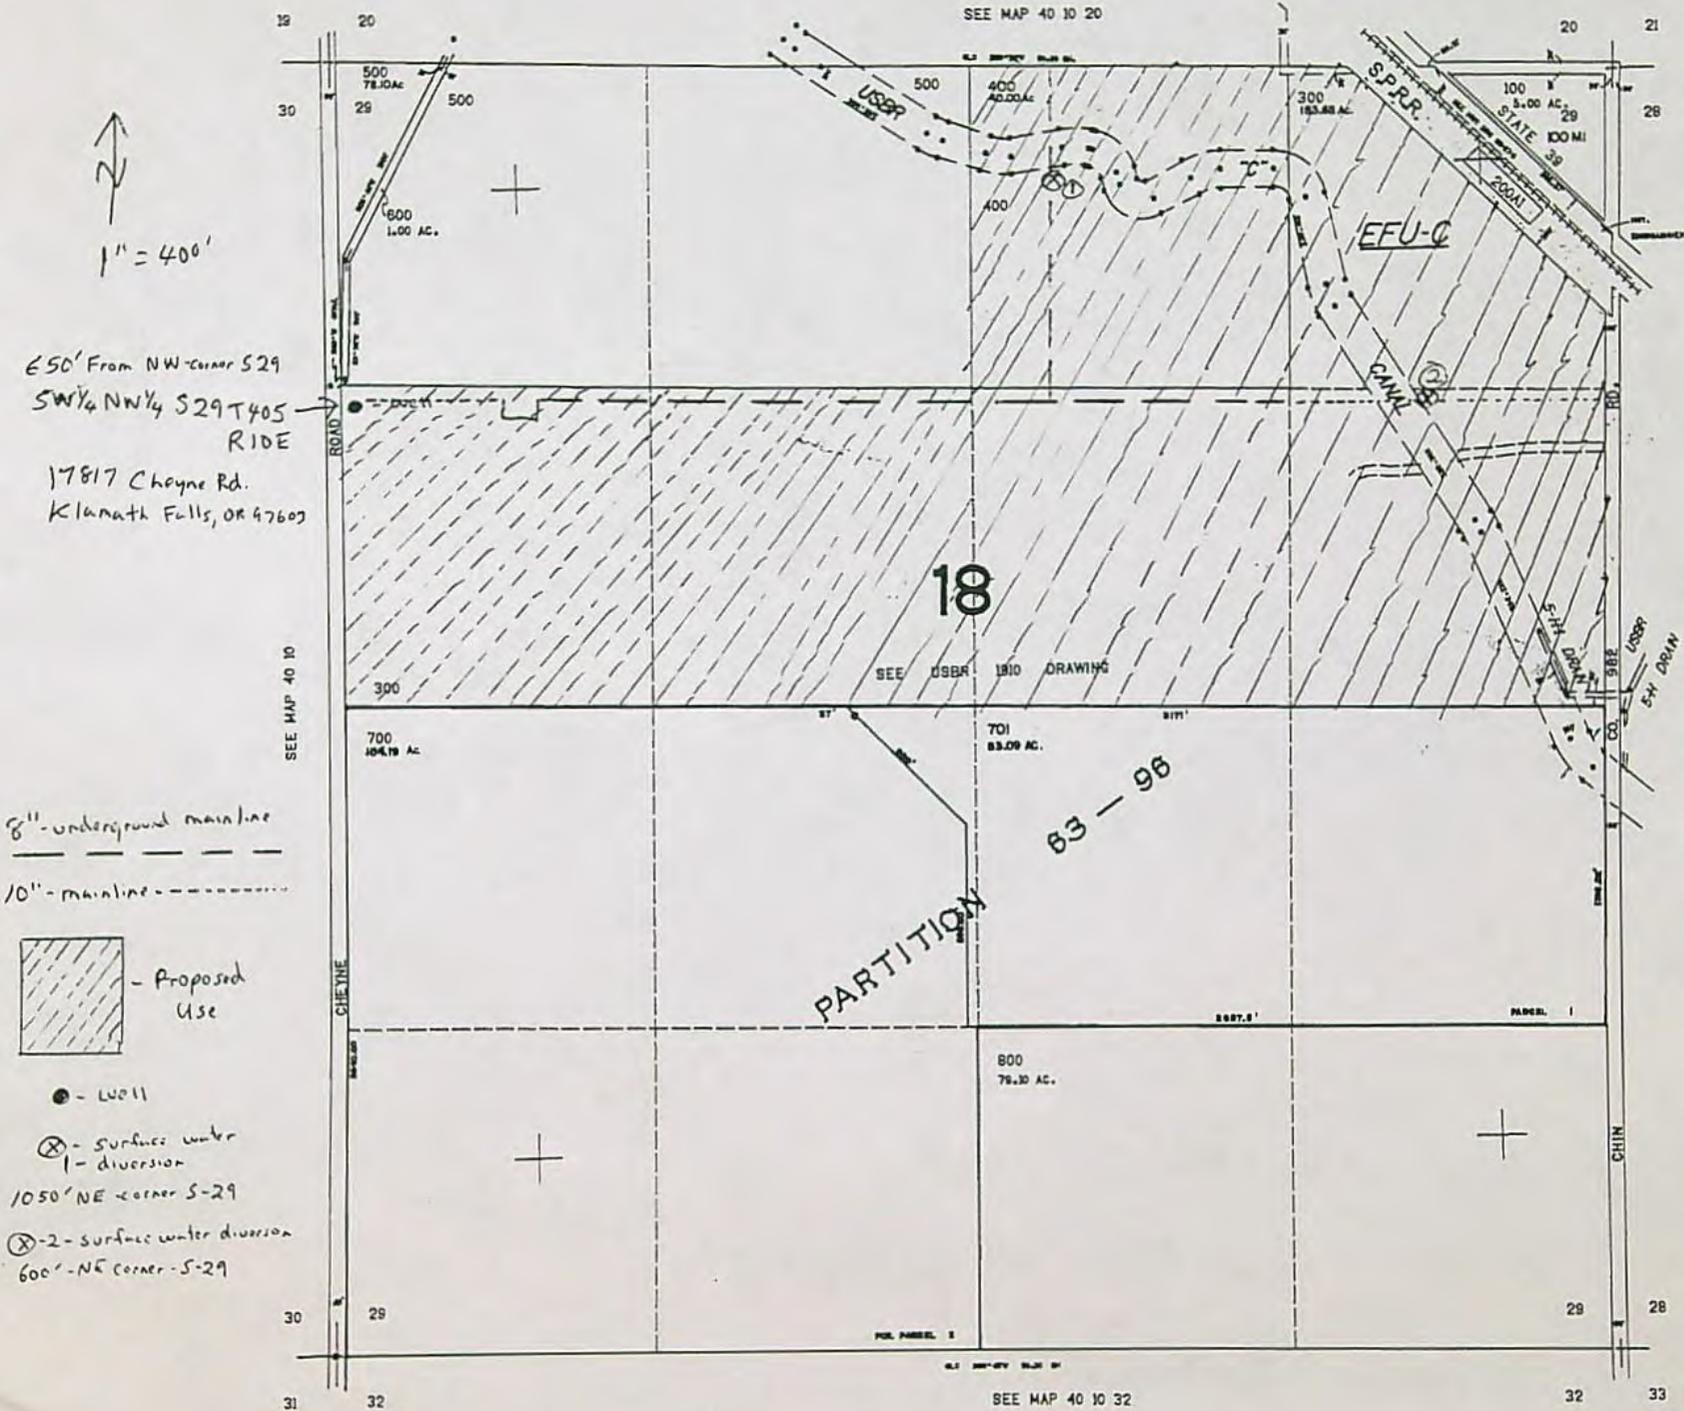

CULTURAL RESOURCES PROTECTION LAWS: Permittees involved in ground-disturbing activities should be aware of federal and state cultural resources protection laws. ORS 358.920 prohibits the excavation, injury, destruction or alteration of an archeological site or object, or removal of archeological objects from public and private lands without an archeological permit issued by the State Historic Preservation Office. 16 USC 470, Section 106, National Historic Preservation Act of 1966 requires a federal agency, prior to any undertaking to take into account the effect of the undertaking that is included on or eligible for inclusion in the National Register. For further information, contact the State Historic Preservation Office at 503-378-4168, extension 232.

Oregon Water Resources Department
Water Rights Division

Water Rights Application
Number G-15516

Final Order

Application History

On MAY 29, 2001, DANIEL CHIN submitted an application to the Department for a water use permit. The Department issued a Proposed Final Order on April 30, 2002. The protest period closed June 14, 2002, and no protest was filed.

The proposed use would not impair or be detrimental to the public interest.

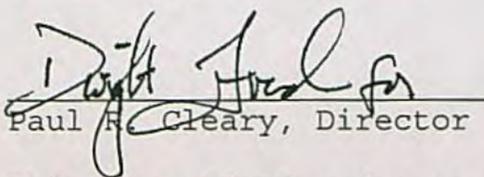

Order

Upon payment of outstanding permit recording fees, Application G-15516 shall be approved as proposed by the Proposed Final Order and as provided on the attached draft permit.

Permit recording fees are required in the amount of \$175.00. Said fees are due and payable no later than 60 days from the date of this Final Order. Failure to pay the required permit recording fees within 60 days from the date of this Final Order may result in the proposed rejection of Application G-15516.

If you need to request additional time to submit the required fees, the written request should be received in the Salem office of the Department by the deadline above. The Department will evaluate the request and determine whether or not the request may be granted.

DATED August 22, 2002

Paul R. Cleary, Director

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review of this order must be filed within the 60 day time period specified by ORS 183.484(2).

This statement of judicial review rights does not create a right to judicial review of this order, if judicial review is otherwise precluded by law. Where no changes have been made to a Proposed Final Order on a water right application and no protests have been filed during the protest period, the final order is not subject to judicial review.

This document was prepared by Jerry Gainey. If you have any questions about any of the statements contained in this document I am the most likely the best person to answer your questions. You can reach me at 1-503-378-8455 extension 458.

If you have questions about how to file a protest or if you have previously filed a protest and want to know the status, please contact Renee Moulun. Her extension number is 239.

If you have other questions about the Department or any of its programs please contact our Water Rights Information Group at extension 201. Address all other correspondence to: Water Rights Section, Oregon Water Resources Department, 158 12th ST. NE Salem, OR 97301-4172, Fax: (503)378-2496

- (C) Specify the method used to obtain each well measurement; and
- (D) Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s) if annual water level measurements reveal any of the following events:

- (A) An average water level decline of three or more feet per year for five consecutive years; or
- (B) A water level decline of 15 or more feet in fewer than five consecutive years; or
- (C) A water level decline of 25 or more feet; or
- (D) Hydraulic interference leading to a decline of 25 or more feet in any neighboring well with senior priority.

The period of non or restricted use shall continue until the annual water level rises above the decline level which triggered the action or until the Department determines, based on the permittee's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

STANDARD CONDITIONS

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works

shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Complete application of the water to the use shall be made on or before October 1, 2006. If the water is not completely applied before this date, and the permittee wishes to continue development under the permit, the permittee must submit an application for extension of time, which may be approved based upon the merit of the application.

SEE NEXT FILE

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued _____, 2002

DRAFT - THIS IS NOT A PERMIT

Paul R. Cleary, Director
Water Resources Department

REAL ESTATE TRANSACTIONS: Pursuant to ORS 537.330, in any transaction for the conveyance of real estate that includes any portion of the lands described in this permit, the seller of the real estate shall, upon accepting an offer to purchase that real estate, also inform the purchaser in writing whether any permit, transfer approval order, or certificate evidencing the water right is available and that the seller will deliver any permit, transfer approval order or certificate to the purchaser at closing, if the permit, transfer approval order or certificate is available.

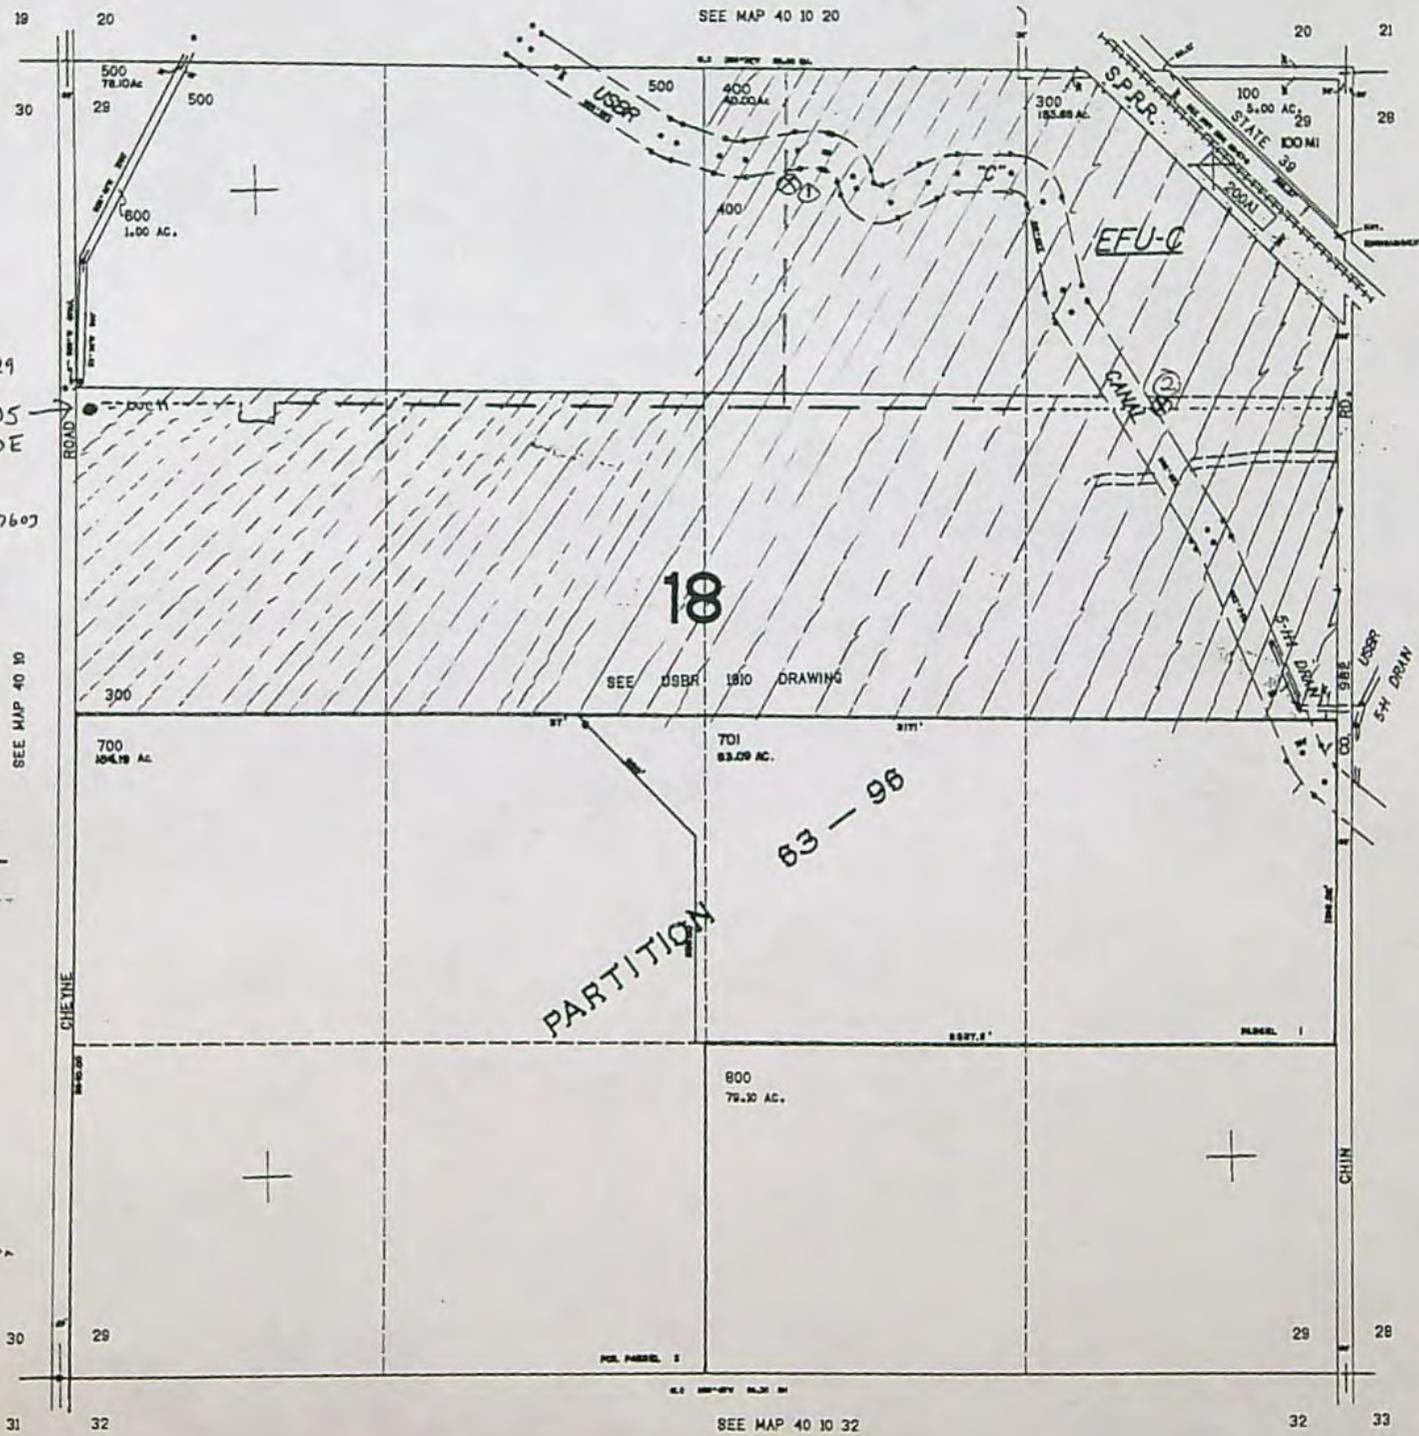

CULTURAL RESOURCES PROTECTION LAWS: Permittees involved in ground-disturbing activities should be aware of federal and state cultural resources protection laws. ORS 358.920 prohibits the excavation, injury, destruction or alteration of an archeological site or object, or removal of archeological objects from public and private lands without an archeological permit issued by the State Historic Preservation Office. 16 USC 470, Section 106, National Historic Preservation Act of 1966 requires a federal agency, prior to any undertaking to take into account the effect of the undertaking that is included on or eligible for inclusion in the National Register. For further information, contact the State Historic Preservation Office at 503-378-4168, extension 232.

 PFO WEEK # 353
 FO WEEK # 347

PFO TO FO CONVERSION

REVIEW DATE: 8/15/02
 INITIALS: JUG
 WM District: 17
 Region Mgr: —
 ODFW Bio: NA

Y/N Has applicant name and/or address changed; or has the file been assigned?

If new: _____

In preparing to create the FO, you should check the following:

1. Y/N Were comments received? If so, from whom and when? _____
 Respond to significant comments, issues, or disputes related to the proposed use of water (see notes, if any, listed above)
2. ok On the PFO CC list, verify names and mailing addresses of ALL commentors (regardless of comment date, affected landowners, and those who paid the \$10 fee.
3. Y/N/NA Have affected land owners been notified? If not, refer to #8.
4. Y/N/NA Has ODFW asked for self certification of screening condition? If yes, include fish screening form.
5. — Correct PFO errors (such as POD or POU location (verify from map)
6. yes Are requested GW conditions included in permit? If no, add condition(s): _____
7. — Verify Payment of recording fees (circle the appropriate option)

(1) Issue FO w/permit if fees are paid — Prepare refund request for excess fees, including standing fees if no protest is filed and no modifications are being made to the PFO.

(2) Issue FO w/o permit if fees are lacking. 1 st CFS/AF _____ Addnl. _____ TOTAL Q _____	Exam Fee Paid <u>250</u> Q fee <u>300</u> Subtotal <u>550</u> Recording Fee <u>175</u> Total <u>725</u> Amount Paid <u>550</u> Amount due/refund <u>175</u>
-------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

This article shall become effective upon its enactment by the States of Idaho, Montana, Oregon and Washington and upon ratification by Congress by virtue of the authority vested in it under section 10, Article I of the United States Constitution.

ARTICLE XI

This compact shall continue in force and remain binding upon each state until renounced by it. Renunciation of this compact must be preceded by sending six months' written notice of intention to withdraw from the compact to the other parties hereto.

ARTICLE XII

The State of Nevada or any state having rivers or streams tributary to the Columbia River may become a contracting state by enactment of the Columbia River Natural Resources Management Compact. Upon admission of any new state to the compact, the purposes of the compact and the duties of the commission shall extend to the development of joint programs for the use and governance of the Columbia River and its natural resources in which the contracting states share mutual concerns.

This article shall become effective upon its enactment by the States of Idaho, Montana, Oregon and Washington and upon ratification by Congress by virtue of the authority vested in it under section 10, Article I of the United States Constitution.

[1999 c.540 §1]

Note: 542.550 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 542 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

KLAMATH RIVER BASIN COMPACT

542.610 Klamath River Basin Compact ratified; when effective. (1) The Legislative Assembly of the State of Oregon hereby ratifies the Klamath River Basin Compact set forth in ORS 542.620, and the provisions of such compact hereby are declared to be the law of this state upon such compact becoming effective as provided in subsection (2) of this section.

(2) The compact shall become effective when it has been ratified by the legislatures of the States of California and Oregon, and has been consented to by the Congress of the United States as provided in Article XIII of the compact. [1957 c.142 §1]

Note: The Klamath River Basin Compact became effective on September 11, 1957. The compact was ratified by the State of California by chapter 113, California Statutes 1957 (signed by Governor on April 17, 1957, and effective on September 11, 1957). The Congress of the United States consented to the compact by Public Law

222, 85th Congress (signed by President on August 30, 1957).

542.620 Klamath River Basin Compact. The provisions of the Klamath River Basin Compact are as follows:

ARTICLE I PURPOSES

The major purposes of this compact are, with respect to the water resources of the Klamath River Basin:

A. To facilitate and promote the orderly, integrated and comprehensive development, use, conservation and control thereof for various purposes, including, among others: The use of water for domestic purposes; the development of lands by irrigation and other means; the protection and enhancement of fish, wildlife and recreational resources; the use of water for industrial purposes and hydroelectric power production; and the use and control of water for navigation and flood prevention.

B. To further intergovernmental cooperation and comity with respect to these resources and programs for their use and development and to remove causes of present and future controversies by providing (1) for equitable distribution and use of water among the two states and the Federal Government, (2) for preferential rights to the use of water after the effective date of this compact for the anticipated ultimate requirements for domestic and irrigation purposes in the Upper Klamath River Basin in Oregon and California, and (3) for prescribed relationships between beneficial uses of water as a practicable means of accomplishing such distribution and use.

ARTICLE II DEFINITION OF TERMS

As used in this compact:

A. "Klamath River Basin" shall mean the drainage area of the Klamath River and all its tributaries within the States of California and Oregon and all closed basins included in the Upper Klamath River Basin.

B. "Upper Klamath River Basin" shall mean the drainage area of the Klamath River and all its tributaries upstream from the boundary between the States of California and Oregon and the closed basins of Butte Valley, Red Rock Valley, Lost River Valley, Swan Lake Valley and Crater Lake, as delineated on the official map of the Upper Klamath River Basin approved on September 6, 1956, by the commissions negotiating this compact and filed with the Secretaries of State of the two states and the General Services Administration of the United States,

which map is incorporated by reference and made a part hereof.

C. "Commission" shall mean the Klamath River Compact Commission as created by Article IX of this compact.

D. "Klamath Project" of the Bureau of Reclamation of the Department of the Interior of the United States shall mean that area as delineated by appropriate legend on the official map incorporated by reference under subdivision B of this Article.

E. "Person" shall mean any individual or any other entity, public or private, including either state, but excluding the United States.

F. "Keno" shall mean a point on the Klamath River at the present needle dam, or any substitute control dam constructed in section 36, township 39 south, range 7 east, Willamette Base and Meridian.

G. "Water" or "waters" shall mean waters appearing on the surface of the ground in streams, lakes or otherwise, regardless of whether such waters at any time were or will become ground water, but shall not include water extracted from underground sources until after such water is used and becomes surface return flow or waste water.

H. "Domestic use" shall mean the use of water for human sustenance, sanitation and comfort; for municipal purposes; for livestock watering; for irrigation of family gardens; and for other like purposes.

I. "Industrial use" shall mean the use of water in manufacturing operations.

J. "Irrigation use" shall mean the use of water for production of agricultural crops, including grain grown for feeding wildfowl.

ARTICLE III

DISTRIBUTION AND USE OF WATER

A. There are hereby recognized vested rights to the use of waters originating in the Upper Klamath River Basin validly established and subsisting as of the effective date of this compact under the laws of the state in which the use or diversion is made, including rights to the use of waters for domestic and irrigation uses within the Klamath Project. There are also hereby recognized rights to the use of all waters reasonably required for domestic and irrigation uses which may hereafter be made within the Klamath Project.

B. Subject to the rights described in subdivision A of this Article and excepting the uses of water set forth in subdivision E of Article XI, rights to the use of unappropriated waters originating within the Upper Klamath River Basin for any beneficial use in the Upper Klamath River Basin, by direct diversion or by storage for later use, may be acquired by any person after the effective

date of this compact by appropriation under the laws of the state where the use is to be made, as modified by the following provisions of this subdivision B and subdivision C of this Article, and may not be acquired in any other way:

1. In granting permits to appropriate waters under this subdivision B, as among conflicting applications to appropriate when there is insufficient water to satisfy all such applications, each state shall give preference to applications for a higher use over applications for a lower use in accordance with the following order of uses:

- (a) Domestic use,
- (b) Irrigation use,
- (c) Recreational use, including use for fish and wildlife,
- (d) Industrial use,
- (e) Generation of hydroelectric power,
- (f) Such other uses as are recognized under the laws of the state involved.

These uses are referred to in this compact as uses (a), (b), (c), (d), (e) and (f), respectively. Except as to the superiority of rights to the use of water for use (a) or (b) over the rights to the use of water for use (c), (d), (e) or (f), as governed by subdivision C of this Article, upon a permit being granted and a right becoming vested and perfected by use, priority in right to the use of water shall be governed by priority in time within the entire Upper Klamath River Basin regardless of state boundaries. The date of priority of any right to the use of water appropriated for the purposes above enumerated shall be the date of the filing of the application therefor, but such priority shall be dependent on commencement and completion of construction of the necessary works and application of the water to beneficial use with due diligence and within the times specified under the laws of the state where the use is to be made. Each state shall promptly provide the commission and the appropriate official of the other state with complete information as to such applications and as to all actions taken thereon.

2. Conditions on the use of water under this subdivision B in Oregon shall be:

(a) That there shall be no diversion of waters from the Upper Klamath River Basin, but this limitation shall not apply to out-of-basin diversions of waters originating within the drainage area of Fourmile Lake.

(b) That water diverted from Upper Klamath Lake and the Klamath River and its tributaries upstream from Keno, Oregon, for use in Oregon and not consumed therein and appearing as surface return flow and waste water within the Upper Klamath River Basin

shall be returned to the Klamath River or its tributaries above Keno, Oregon.

3. Conditions on the use of water under this subdivision B in California shall be:

(a) That the waters diverted from the Klamath River within the Upper Klamath River Basin for use in California shall not be taken outside the Upper Klamath River Basin.

(b) That substantially all of the return flows and waste water finally resulting from such diversions and use appearing as surface waters in the Upper Klamath River Basin shall be made to drain so as to be eventually returned to the Klamath River upstream from Keno, Oregon.

C. 1. All rights, acquired by appropriation after the effective date of this compact, to use waters originating within the Upper Klamath River Basin for use (a) or (b) in the Upper Klamath River Basin in either state shall be superior to any rights, acquired after the effective date of this compact, to use such waters (i) for any purpose outside the Klamath River Basin by diversion in California or (ii) for use (c), (d), (e) or (f) anywhere in the Klamath River Basin. Such superior rights shall exist regardless of their priority in time and may be exercised with respect to inferior rights without the payment of compensation. But such superior rights to use water for use (b) in California shall be limited to the quantity of water necessary to irrigate 100,000 acres of land, and in Oregon shall be limited to the quantity of water necessary to irrigate 200,000 acres of land.

2. The provisions of paragraph 1 of this subdivision C shall not prohibit the acquisition and exercise after the effective date of this compact of rights to store waters originating within the Upper Klamath River Basin and to make later use of such stored water for any purpose, as long as the storing of waters for such later use, while being effected, does not interfere with the direct diversion or storage of such waters for use (a) or (b) in the Upper Klamath River Basin.

ARTICLE IV HYDROELECTRIC POWER

It shall be the objective of each state, in the formulation and the execution and the granting of authority for the formulation and execution of plans for the distribution and use of the water of the Klamath River Basin, to provide for the most efficient use of available power head and its economic integration with the distribution of water for other beneficial uses in order to secure the most economical distribution and use of water and lowest power rates which may be reasonable

for irrigation and drainage pumping, including pumping from wells.

ARTICLE V INTERSTATE DIVERSION AND STORAGE RIGHTS; MEASURING DEVICES

A. Each state hereby grants for the benefit of the other and its designees the right to construct and operate facilities for the measurement, diversion, storage and conveyance of water from the Upper Klamath River Basin in one state for use in the other insofar as the exercise of such right may be necessary to effectuate and comply with the terms of this compact. The location of such facilities shall be subject to approval by the commission.

B. Each state or its designee, exercising within the jurisdiction of the other a right granted under subdivision A of this Article, shall make provision for the establishment, operation and maintenance of permanent gaging stations at such points on streams or reservoir or conveyance facilities as may be required by the commission for the purpose of ascertaining and recording the volume of diversions by the streams or facilities involved. Said stations shall be equipped with suitable devices for determining the flow of water at all times. All information obtained from such stations shall be compiled in accordance with the standards of the United States Geological Survey, shall be filed with the commission, and shall be available to the public.

ARTICLE VI ACQUISITION OF PROPERTY FOR STORAGE AND DIVERSION; IN LIEU TAXES

A. Subject to approval of the commission, either state shall have the right (1) to acquire such property rights in the other state as are necessary for the diversion, storage, conveyance, measurement and use of water in conformity with this compact, by donation or purchase, or (2) to elect to have the other state acquire such property rights for it by purchase or through the exercise of the power of eminent domain. A state making the latter election shall make a written request therefor and the other state shall expeditiously acquire said property rights either by purchase at a price satisfactory to the requesting state, or, if such purchase cannot be made, then through the exercise of its power of eminent domain, and shall convey said property rights to the requesting state or its designee. All costs of such acquisition shall be paid by the requesting state. Neither state shall have any greater power to acquire property rights for the other state through the exercise of the power of eminent domain than it would have under its laws to acquire the same property rights for itself.

Proposed Use

Application No. 6-15516
Permit No.

TO: Water Rights Section July 6, 2001
 FROM: Groundwater/Hydrology Section Michael Zwart
 SUBJECT: Application G-15516 Reviewer's Name

GROUNDWATER/SURFACE WATER CONSIDERATIONS

1. PER THE _____ Basin rules, one or more of the proposed POA's is/is not within _____ feet/mile of a surface water source (_____) and taps a groundwater source hydraulically connected to the surface water.

2. BASED UPON OAR 690-09 currently in effect, I have determined that the proposed groundwater use
 - a. ___ will, or _____ have the potential for substantial interference with the nearest
 - b. ___ will not _____ surface water source, namely _____; or
 - c. will if properly conditioned, adequately protect the surface water from interference:
 - i. The permit should contain condition #(s) 7B;
 - ii. ___ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. ___ The permit should be conditioned as indicated in item 4 below; or
 - d. ___ will, with well reconstruction, adequately protect the surface from substantial interference.

GROUNDWATER AVAILABILITY CONSIDERATIONS

3. BASED UPON available data, I have determined that groundwater for the proposed use
 - a. ___ will, or _____ likely be available in the amounts requested without injury to prior rights
 - b. ___ will not _____ and/or within the capacity of the resource; or
 - c. will if properly conditioned, avoid injury to existing rights or to the groundwater resource:
 - i. The permit should contain condition #(s) 7E;
 - ii. ___ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. ___ The permit should be conditioned as indicated in item 4 below; or

4.
 - a. ___ THE PERMIT should allow groundwater production from no deeper than _____ ft. below land surface;
 - b. ___ The permit should allow groundwater production from no shallower than _____ ft. below land surface;
 - c. ___ The permit should allow groundwater production only from the _____ groundwater reservoir between approximately _____ ft. and _____ ft. below land surface;
 - d. ___ Well reconstruction is necessary to accomplish one or more of the above conditions.
 - e. ___ One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.

REMARKS: _____

(Well Construction Considerations on Reverse Side)

G-15516

WELL CONSTRUCTION (If more than one well doesn't meet standards, attach an additional sheet.)

5. THE WELL which is the point of appropriation for this application does not meet current well construction standards based upon:
- a. ___ review of the well log;
 - b. ___ field inspection by _____;
 - c. ___ report of CWRE _____;
 - d. ___ other: (specify) _____
6. THE WELL construction deficiency:
- a. ___ constitutes a health threat under Division 200 rules;
 - b. ___ commingles water from more than one groundwater reservoir;
 - c. ___ permits the loss of artesian head;
 - d. ___ permits the de-watering of one or more groundwater reservoirs;
 - e. ___ other: (specify) _____
7. THE WELL construction deficiency is described as follows: _____
8. THE WELL
- a. ___ was, or constructed according to the standards in effect at the time of
 - b. ___ was not original construction or most recent modification.
 - c. ___ I don't know if it met standards at the time of construction.

RECOMMENDATION:

- A. ___ I recommend including the following condition in the permit:
"No water may be appropriated under terms of this permit until the well(s) has been repaired to conform to current well construction standards and proof of such repair is filed with the Enforcement Section of the Water Resources Department."
- B. ___ I recommend withholding issuance of the permit until evidence of well reconstruction is filed with the Enforcement Section of the Water Resources Department.
- C. ___ REFER this review to Enforcement Section for concurrence.

THIS SECTION TO BE COMPLETED BY ENFORCEMENT PERSONNEL

I concur in G/H's recommendation A or B above relating to conditioning or withholding the permit

_____, 199__
(Signature)

I do not concur in G/H's recommendation A or B above relating to conditioning or withholding the permit for the following reasons: _____

_____, 199__
(Signature)

**OREGON WATER RESOURCES DEPARTMENT
INTEROFFICE MEMO**

To: Ground Water files Date: July 6, 2001
From: Michael J. Zwart
Subject: Application Review: G-15516, Daniel Chin

This application proposes to use up to about 3.1375 cfs (not specified in application) from one well (KLAM 10518, also see G-15368 and G-15409) for supplemental irrigation of 251.0 acres. The well is 913 feet deep and produces water from a confined to semiconfined aquifer developed in Tertiary basalt rocks below a depth of 669 feet, likely the Basalt of Basin and Range (Tb2) as mapped by Sherrod and Pickthorn (1992).

The well is about 2500 feet from the C Canal and over one mile from the Lost River. There is no potential for substantial interference with surface water, based on the confined to semiconfined nature of the aquifer and the distance.

I recommend permit conditions 7B and 7E.

Oregon Water Resources Department
Water Rights Division

Water Rights Application
Number G-15516

Proposed Final Order

Summary of Recommendation: The Department recommends that the attached draft permit be issued with conditions.

Prior to issuance of a permit, permit recording fees in the amount of \$175.00 must be submitted to the Department. In order to expedite the processing of the Final Order and permit, you may wish to submit \$175.00 prior to the protest deadline of June 14, 2002. Please include your application number on your check made out to the Oregon Water Resources Department. If this fee is not paid prior to June 14, 2002, issuance of your permit will be delayed until all fees are paid.

Application History

On MAY 29, 2001, DANIEL CHIN submitted an application to the Department for the following water use permit:

- Amount of Water: 2.99 CUBIC FEET PER SECOND
- Use of Water: IRRIGATION OF 251.0 ACRES
- Source of Water: A WELL IN LOST RIVER BASIN
- Area of Proposed Use: KLAMATH County within SECTION 20 AND SECTION 29, TOWNSHIP 40 SOUTH, RANGE 10 EAST, W.M.

On February 1, 2002, the Department mailed the applicant notice of its Initial Review, determining that "The use of 2.94 cfs from a well in Lost River Basin for Irrigation of 235.0 acres is allowable from March 1 through October 31 of each year." The applicant did not notify the Department to stop processing the application within 14 days of that date.

On February 19, 2002, the Department gave public notice of the application in its weekly notice. The public notice included a request for comments, and information for interested persons about both obtaining future notices and a copy of the proposed final order.

No written comments were received within 30 days.

In reviewing applications, the Department may consider any relevant sources of information, including the following:

- comments by or consultation with another state agency
- any applicable basin program
- any applicable comprehensive plan or zoning ordinance
- the amount of water available
- the rate and duty for the proposed use
- pending senior applications and existing water rights of record
- designations of any critical groundwater areas
- the Scenic Waterway requirements of ORS 390.835
- applicable statutes, administrative rules, and case law
- any general basin-wide standard for flow rate and duty of water allowed
- the need for a flow rate and duty higher than the general standard
- any comments received

Findings of Fact

The Klamath River Basin Compact allows the use of water for irrigation.

A WELL IN LOST RIVER BASIN is not within or above a State Scenic Waterway.

The Groundwater Section finds, per OAR 390.835(9), there is not a preponderance of evidence that the proposed use of groundwater will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife.

The Department determined, based upon OAR 690-09, that the proposed groundwater use will, if properly conditioned, adequately protect the surface water from interference.

An assessment of groundwater availability has been completed by the Department's Groundwater/Hydrology section. A copy of this assessment is in the file. The proposed use of groundwater will, if properly conditioned, avoid injury to existing rights and the resource.

The Department finds that no more than 2.94 CFS would be necessary for the proposed use. The amount of water allowed shall be restricted to 2.94 CFS.

The proposed well is not within a designated critical ground water area.

Conclusions of Law

Under the provisions of ORS 537.153, the Department must presume that a proposed use will not impair or be detrimental to the public interest if the proposed use is allowed in the applicable basin program established pursuant to ORS 536.300 and 536.340 or given a preference under ORS 536.310(12) (i.e. the use of water is human consumption or livestock), if water is available, if the proposed use will not injure other water rights and if the proposed use complies with rules of the Water Resources Commission.

The proposed use requested in this application is allowed in the Klamath River Basin Compact, or a preference for this use is granted under the provisions of ORS 536.310(12).

Water is available for the proposed use.

The proposed use will not injure other water rights.

The proposed use complies with other rules of the Water Resources Commission not otherwise described above.

The proposed use complies with the State Agency Agreement for land use.

No proposed flow rate and duty of water higher than the general basin-wide standard is needed.

For these reasons, the required presumption has been established.

Under the provisions of ORS 537.621, once the presumption has been established, it may be overcome by a preponderance of evidence that either:

- (a) One or more of the criteria for establishing the presumption are not satisfied; or
- (b) The proposed use would not ensure the preservation of the public welfare, safety and health as demonstrated in comments, in a protest . . . or in a finding of the department that shows:
 - (A) The specific aspect of the public welfare, safety and health under ORS 537.525 that would be impaired or detrimentally affected; and
 - (B) Specifically how the identified aspect of the public welfare, safety and health under ORS 537.525 would be impaired or be adversely affected.

In this application, all criteria for establishing the presumption have been satisfied, as noted above. The presumption has not been overcome by

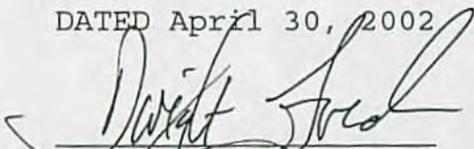

a preponderance of evidence that the proposed use would impair or be detrimental to the public interest.

The Department therefore concludes that water is available in the amount necessary for the proposed use; the proposed use will not result in injury to existing water rights; and the proposed use would ensure the preservation of the public welfare, safety and health as described in ORS 537.525.

Recommendation

The Department recommends that the attached draft permit be issued with conditions.

DATED April 30, 2002

Dwight French
Water Rights Section Manager

*If you have any questions,
please check the information
box on the last page for the
appropriate names and
phone numbers.*

Protest Rights and Standing

Under the provisions of 537.621(7), you have the right to protest this proposed final order. Your protest must be in writing, and must include the following:

- Your name, address, and telephone number;
- A description of your interest in the proposed final order, and, if you claim to represent the public interest, a precise statement of the public interest represented;
- A detailed description of how the action proposed in this proposed final order would impair or be detrimental to your interest;
- A detailed description of how the proposed final order is in error or deficient, and how to correct the alleged error or deficiency;
- Any citation of legal authority to support your protest, if known; and
- If you are not the applicant, the \$200 protest fee required by ORS 536.050 and proof of service of the protest upon the applicant.
- If you are the applicant, a statement of whether or not you are requesting a contested case hearing. If you do not request a hearing, the Department will presume that you do not wish to contest the findings of the proposed final order.

- If you do not protest this Proposed Final Order and if no substantive changes are made in the final order, you will not have an opportunity for judicial review, protest or appeal of the final order when it is issued.

Requests for Standing

Under the provisions of 537.621(6), persons other than the applicant who support a proposed final order may request standing for purposes of participating in any contested case proceeding on the proposed final order or for judicial review of a final order. A request for standing shall be in writing, include a statement that the requester supports the proposed final order, and a statement of how the requester would be harmed if the proposed final order is modified. The fee required at the time of submitting this request is \$50.00. If a hearing is scheduled, an additional fee of \$150.00 must be submitted along with a request for intervention. Forms to request standing are available from the Department.

Your protest or request for standing must be received in the Water Resources Department no later than **June 14, 2002**.

After the protest period has ended, the Director will either issue a final order or schedule a contested case hearing. The contested case hearing will be scheduled only if a protest has been submitted and if

- upon review of the issues, the director finds that there are significant disputes related to the proposed use of water, or
- the applicant requests a contested case hearing within 30 days after the close of the protest period.

This document was prepared by Jerry Gainey. If you have any questions about any of the statements contained in this document I am most likely the best person to answer your questions. You can reach me at 1-503-378-8455 extension 458.

If you have questions about how to file a protest or if you have previously filed a protest and want to know the status, please contact Renee Moulun. Her extension number is 239.

If you have other questions about the Department or any of its programs please contact our Water Rights Information Group at extension 201.

DRAFT

This is not a permit!!!
STATE OF OREGON

DRAFT

COUNTY OF KLAMATH

DRAFT PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS DRAFT PERMIT IS HEREBY ISSUED TO

DANIEL CHIN
17817 CHEYNE RD
KLAMATH FALLS, OREGON 97603

(541) 798-5038

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-15516

SOURCE OF WATER: A WELL IN LOST RIVER BASIN

PURPOSE OR USE: IRRIGATION OF 235.0 ACRES

MAXIMUM RATE: 2.94 CUBIC FEET PER SECOND

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: MAY 29, 2001

WELL LOCATION: SW $\frac{1}{4}$ NW $\frac{1}{4}$, SECTION 29, T40S, R10E, W.M.; 1420 FEET SOUTH
AND 20 FEET EAST FROM NW CORNER, SECTION 29

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

SW $\frac{1}{4}$ SE $\frac{1}{4}$ 25.0 ACRES
SECTION 20
NE $\frac{1}{4}$ NE $\frac{1}{4}$ 25.0 ACRES
NW $\frac{1}{4}$ NE $\frac{1}{4}$ 35.0 ACRES
SW $\frac{1}{4}$ NE $\frac{1}{4}$ 40.0 ACRES
SE $\frac{1}{4}$ NE $\frac{1}{4}$ 30.0 ACRES

SW ¼ NW ¼ 40.0 ACRES
SE ¼ NW ¼ 40.0 ACRES
SECTION 29
TOWNSHIP 40 SOUTH, RANGE 10 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

To monitor the effect of water use from the well(s) authorized under this permit, the Department requires the water user to make and report annual static water level measurements. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement.

Measurements must be made according to the following schedule:

Before Use of Water Takes Place

Initial and Annual Measurements

The Department requires the permittee to submit an initial water level measurement in the month specified above once well construction is complete and annually thereafter until use of water begins; and

After Use of Water has Begun

Reference Water Level Determination

Following the first year of water use, the user shall submit one static water level measurement in the month specified above which will establish the reference level against which future annual measurements will be compared. The water user is not required to measure additional water levels after the reference level has been determined unless required by the Director. The additional measurements may be required in

a different month. If the measurement requirement is stopped, the Director may restart it at any time.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board and be submitted to the Department on forms provided by the Department. The Department requires the individual performing the measurement to:

- (A) Identify each well with its associated measurement; and
- (B) Measure and report water levels to the nearest tenth of a foot as depth-to-water below ground surface; and
- (C) Specify the method used to obtain each well measurement; and
- (D) Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s) if annual water level measurements reveal any of the following events:

- (A) An average water level decline of three or more feet per year for five consecutive years; or
- (B) A water level decline of 15 or more feet in fewer than five consecutive years; or
- (C) A water level decline of 25 or more feet; or
- (D) Hydraulic interference leading to a decline of 25 or more feet in any neighboring well with senior priority.

The period of non or restricted use shall continue until the annual water level rises above the decline level which triggered the action or until the Department determines, based on the permittee's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

STANDARD CONDITIONS

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the

schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

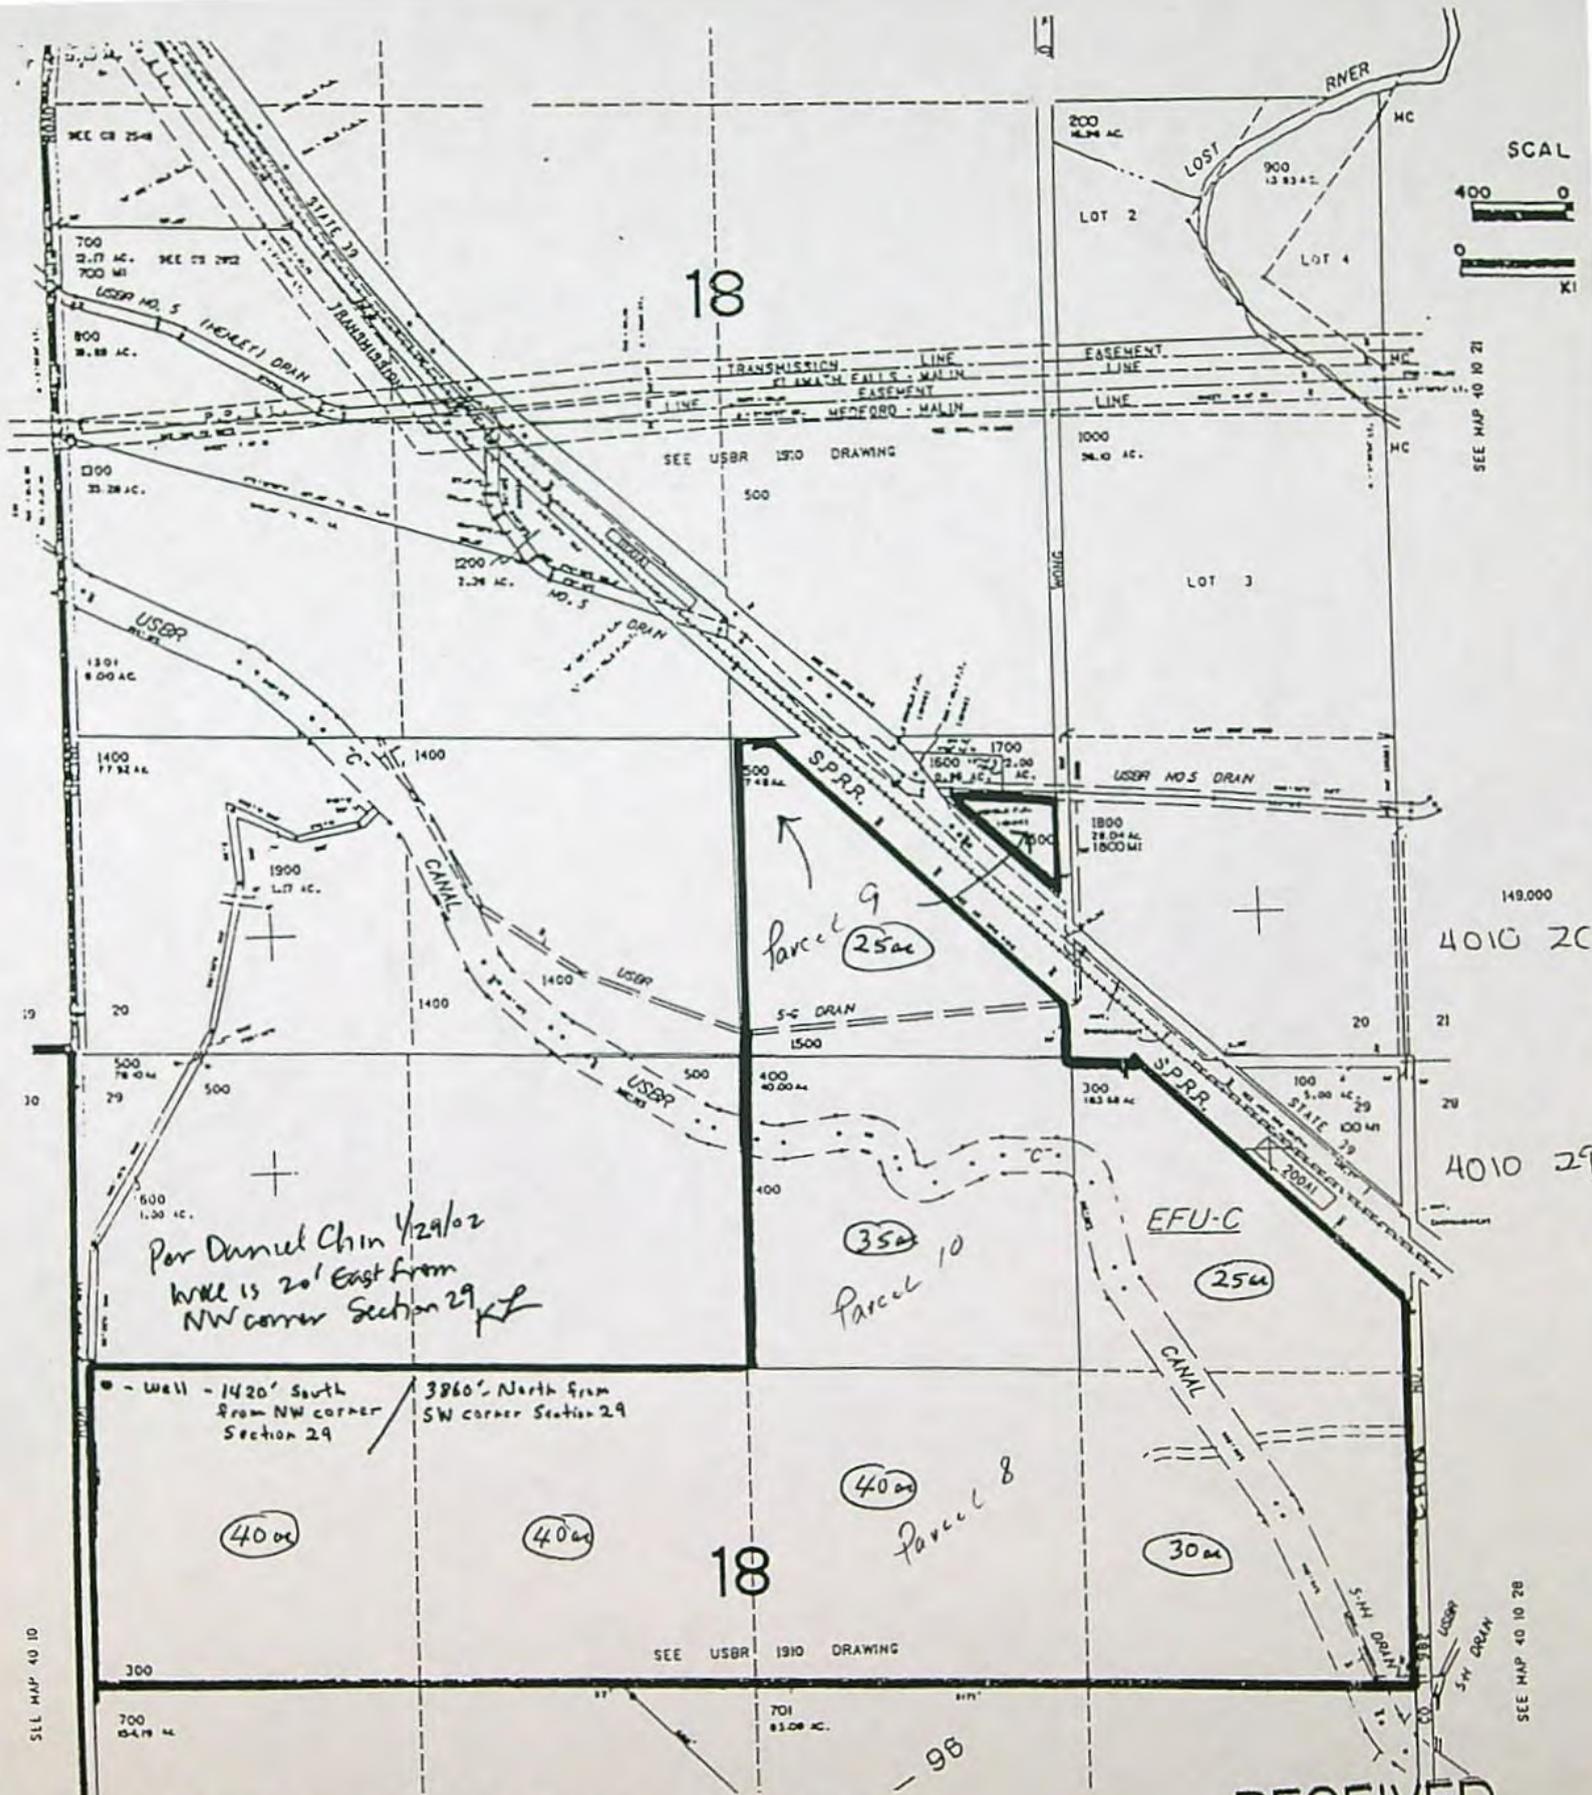

Complete application of the water to the use shall be made on or before October 1, 2006. If the water is not completely applied before this date, and the permittee wishes to continue development under the permit, the permittee must submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Dear Applicant:

**THIS IS NOT A PERMIT AND IS
SUBJECT TO CHANGE AT THE NEXT PHASE OF PROCESSING.**

This letter is to inform you of the favorable preliminary analysis of your water use permit application and to describe your options. In determining whether a water use permit application may be approved, the Department must consider the factors listed below, all of which must be favorable to the proposed use if it is to be allowed. Based on the information you have supplied, the Water Resources Department has made the following preliminary determinations:

Initial Review Determinations:

1. The proposed use is not prohibited by law or rule.
2. The maximum amount of water allowed at an instantaneous rate for the proposed use is calculated at 1/80th cubic feet per second (cfs) per acre. The amount of water requested, 2.99 cfs, exceeds this rate, therefore the maximum instantaneous rate allowed for this application shall be 2.94 cfs.
3. The use of water from a well in Lost River Basin for Irrigation of 235.0 acres is **allowable** under ORS 542.620, the Klamath River Basin Compact.
4. The Department has determined, based upon OAR 690-09, that the proposed groundwater use will, if properly conditioned, adequately protect the surface water from interference.

5. Based upon available data, the Department has also determined that the proposed use of groundwater **will, if properly conditioned, avoid injury** to existing rights or to the groundwater resource.

Summary of Initial Determinations

The use of 2.94 cfs from a well in Lost River Basin for Irrigation of 235.0 acres is allowable from March 1 through October 31 of each year.

Because of these favorable determinations, the Department can now move your application to the next phase of the water rights application review process. This phase is where public interest factors will be evaluated.

Please reference the application number when sending any correspondence regarding the conclusions of this initial review. Comments received within the comment period will be evaluated at the next phase of the process.

To Proceed With Your Application:

If you choose to proceed with your application, you do not have to notify the Department. Your application will automatically be placed on the Department's Public Notice to allow others the opportunity to comment. After the comment period the Department will complete a public interest review and issue a proposed final order.

Withdrawal Refunds:

If you choose not to proceed, you may withdraw your application and receive a refund (minus a \$50 processing charge per application.) To accomplish this you must notify the Department in writing by **Friday, February 15, 2002**. For your convenience you may use the enclosed "STOP PROCESSING" form.

If A Permit Is Issued It Will Likely Include The Following Conditions:

1. Measurement, recording and reporting conditions:
 - A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more

frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.

- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
2. If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.
 3. To monitor the effect of water use from the well(s) authorized under this permit, the Department requires the water user to make and report annual static water level measurements. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement.

Measurements must be made according to the following schedule:

Before Use of Water Takes Place

Initial and Annual Measurements

The Department requires the permittee to submit an initial water level measurement in the month specified above once well construction is complete and annually thereafter until use of water begins; and

After Use of Water has Begun

Reference Water Level Determination

Following the first year of water use, the user shall submit one static water level measurement in the month specified above which will establish the reference level against which future annual measurements will be compared. The water user is not required to measure additional water levels after the reference level has been determined unless required by the Director. The additional measurements may be required in a different month. If the measurement requirement is stopped, the Director may restart it at any time.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board and be submitted to the Department on forms provided by the Department. The Department requires the individual performing the measurement to:

- (A) Identify each well with its associated measurement; and
- (B) Measure and report water levels to the nearest tenth of a foot as depth-to-water below ground surface; and
- (C) Specify the method used to obtain each well measurement; and
- (D) Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s) if annual water level measurements reveal any of the following events:

- (A) An average water level decline of three or more feet per year for five consecutive years; or
- (B) A water level decline of 15 or more feet in fewer than five consecutive years; or
- (C) A water level decline of 25 or more feet; or
- (D) Hydraulic interference leading to a decline of 25 or more feet in any neighboring well with senior priority.

The period of non or restricted use shall continue until the annual water level rises above the decline level which triggered the action or until the Department determines, based on the permittee's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

4. The priority date for this application is MAY 29, 2001.

The water source identified in your application is in an area in which an Agricultural Water Quality Management Area Plan is being developed. These plans are developed by the Oregon Department of Agriculture (ODA) with the cooperation of local landowners and other interested stakeholders. These plans help make sure that current and new appropriations of water are done in a way that does not adversely harm the environment. You are encouraged to contact Mike Wolf, (503) 986-4711 at the ODA to learn more about the plan and how it may affect your proposed water use.

If you have any questions:

Questions about the status of your application, processing timelines, or your upcoming Proposed Final Order should be directed to our Water Right Information Group at (503) 378-8455 extension 201. Feel free to call me at (503) 378-8455 extension 276 if you have any questions regarding the contents of this letter. Please have your application number available if you call. Address all other correspondence to: Water Rights Section, Oregon Water Resources Department, 158 12th ST. NE Salem, OR 97301-4172, Fax: (503)378-6203.

Sincerely,

Kerry Lefever

MEMORANDUM

Date: January 29, 2002
To: File #G-15516 Daniel Chin
From: Kerry Lefever, Initial Review
Subject: clarification of proposed use

On January 22, 2002, the Department received additional information from the applicant as requested in the letter sent January 4, 2002 by Kerry Lefever.

In a telephone conversation today, Daniel Chin, the applicant clarified the total number of acres to be irrigated in Tax Lot 300 is 175 acres.

The well coordinates are 1420 feet south and 20 feet east from the NW corner of Section 29, T40S, R10E, WM.

January 17, 2002

Kerry:

1. The scale on this map is 1" = 960'
2. Well location 1420' South from NW corner of Section 29
3860' North from SW corner of Section 29
3. Well location is SW1/4NW1/4 S29T40SR10E
Address: 17817 Cheyne Rd.; Klamath Falls, Or 97603
Tax Lot 300—S29 T40S R10E---180 acres irrigated
Tax Lot 400---S29 T40S R10E---35 acres irrigated
Tax Lot 1500-S20 T40 R10E-----20 acres irrigated
Total irrigated acres= 235
4. Total Acre/Feet 705 or 2.99 cfs= Fee of \$550 paid
5. Copy of Deed shown will be parcels 8, 9, & 10= Use of water

I think we have answered all your questions, if not please call or e-mail.
I know you are very busy with requests like mine, but we would like to have a response
To this water right in case we need to use this water for the 2002 crop. As you might
know the federal government has not come out and provided us with a reliable water
source for 2002 crop, so to make plans we need to know if we have any water to raise
crops. Thank you for your attention to this matter.

Sincerely,

Daniel Chin

Dear Applicant:

The Department is in the process of reviewing your application for a permit to use water. Additional information is needed, however, to continue processing the application. Please provide the information listed below:

In order for the Department to continue processing your application, please clarify the following items and amend your application map accordingly:

- **Please indicate the actual scale to which the application map is drawn.** The map you submitted has been reduced in size, and subsequently, the scale indicated at the top of the map is no longer accurate.

If the application map has been enlarged or reduced from its original size, the scale also changes and becomes inaccurate. If the size of the map is modified, the map scale must be adjusted and clearly identified on the map.

In the event that your "amended" application map is larger than 11"X 17", **four copies** of that map must be submitted, *or* the map must be drawn on tracing linen, tracing velum or Mylar.

- The location of the well must be referenced to a recognized public land survey corner; do not measure from property lines unless they are part of the public land survey lines. The locations may be shown by distance and bearing or by coordinates (ie: "400 feet south and 350 feet west from the northeast corner of section 17"). **Please identify the location of the well on the application map and describe the location of the well referenced to a public land survey corner.**

Page 2

- **The location of the place where water is to be used for irrigation purposes must be identified on the map by tax lot, township, range, section and nearest quarter-quarter section. Please indicate the number of acres to be irrigated in each quarter-quarter section on the enclosed copy of your application map.**

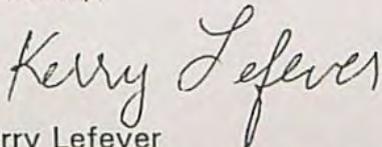

In addition to map items listed above, please submit the following items:

- The application form requested 750 acre-feet of water. Based on the general the standard allowable rate of water necessary for irrigation use of groundwater of 1/80 cubic feet per second (cfs) per acre and a duty of 3.0 acre-feet per year, 251.0 acres will be limited to 3.14 cfs. Based on the rate of 3.14 cfs, additional examination fees in the amount of \$75.00 must be submitted before the Department can issue an initial review of your application. **Please submit \$75.00 or clarify the quantity of water at a rate of less than 3.0 cfs before February 1, 2002.** The base examination fee for quantity up to 1.0 cfs is \$400 with an additional \$75 for each additional cfs or fraction thereof. You submitted \$550 examination fee which would cover a quantity of water up to 2.99 cfs.
- **A metes and bounds legal description of the property where you plan to use the water.** You may use a copy of your deed, land sales contract or title insurance policy. Do not send a copy of the tax assessor bill.

In order for the Department to continue processing of your application, please submit the requested information by **Friday, February 1, 2002**. If this information is not received by February 1, 2002, the Department *may* return the application and supporting documents, as well as, any fees paid for this application.

If you need additional time in which to submit this information, or if you have any other questions concerning your application, please feel free to contact me at (503) 378-8455, extension 276.

Sincerely,

Kerry Lefever
Senior Water Rights Technician

grant, convey, warrant, transfer and assign to AmeriTitle, a corporation, hereinafter called Trustee, whose address is 222 South Sixth Street, PO Box 5017, Klamath Falls, OR 97601, in trust with power of sale for the benefit of Northwest Farm Credit Services, FLCA, a corporation organized under the Farm Credit Act of 1971, as amended, hereinafter called Beneficiary, whose address is 1700 South Assembly Street, P.O. Box 2515, Spokane, Washington 99220-2515, property in Klamath County(ies), State of Oregon, more particularly described as follows:

PARCEL 1:

All that portion of the SW1/4SW1/4 and of Government Lot 11 of Section 11, Township 41 South, Range 11 East, Willamette Meridian, which lies Southwesterly of a line drawn parallel to and distant 200 feet Southwesterly of the center line of the railway of the Great Northern Railway Company as now located and constructed; said center line being more particularly described as follows:

Beginning at a point in the Westerly boundary of said Section 11 distant 977.00 feet Northerly from the Southwest corner thereof; thence Southeasterly along a straight line making a Southeasterly included angle of 61 degrees 46 1/2' with said Westerly boundary 531.9 feet; thence Southeasterly along the arc of a 1 degree 0' curve to the left, 2,830.00 feet; thence Easterly on tangent 2,141.00 feet, more or less, to an intersection with the Easterly boundary of said Section 11 at a point distant 36.8 feet, Northerly from the Southeast corner thereof. The said strip of land containing 12.35 acres, more or less, in the SW1/4SW1/4 and 0.22 of an acre, more or less, in Government Lot 11 of said Section 11, Township 41 South, Range 11 East, Willamette Meridian, exclusive of right of way previously granted for highway and for a Government irrigation and drainage canal, SAVING AND EXCEPTING a piece or parcel of land situated in the SW1/4SW1/4 of Section 11, Township 41 South, Range 11 East of the Willamette Meridian in Klamath County, Oregon, being more particularly described as follows: Beginning at a 5/8 inch iron pin in the East right of way boundary of the Adams Point County Road, as the same is presently located and constructed from which the monument marking the Southwest corner of Section 11 Township 41 South, Range 11 East of the Willamette Meridian, bears North 89 degrees 57' 10" West 30.0 feet and South 0 degrees 02' 50" West 251.75 feet distant; thence North 0 degrees 02' 50" East along the Easterly right of way boundary of said County Road 475.20 feet to an iron pin at its intersection with the Southwesterly right of way boundary of the Burlington Northern Railroad; thence along said Railroad; right of way South 61 degrees 34' 10" East 389.7 feet to a point; thence along a circular curve to the left (which has a central angle of 0 degrees 40' 40", a radius of 5,929.65 feet, and a long chord which bears South 61 degrees 54' 34" East 70.38 feet) a distance of 70.4 feet to a 5/8 inch iron pin; thence continuing along a circular curve to the left (which has a central angle of 5 degrees 55' 50", a radius of 5,929.65 feet, and a long chord which bears South 65 degrees 13' 00" East 613.75 feet) a distance of 613.80 feet to a 5/8 inch iron pin; thence, leaving said Railroad right of way, North 89 degrees 57' 10" West 962.4 feet, more or less, to the point of beginning.

PARCEL 2:

Also, an easement 20.0 feet in width which has its Northeasterly boundary parallel to and contiguous with the Southwesterly right of way boundary of the Burlington-Northern Railroad from the most Northwesterly corner to the most Southeasterly corner of the above described parcel of land; for the purpose of construction, reconstruction, operation, and maintenance of an irrigation ditch.

PARCEL 3:

Lots 3, 4 and N1/2N1/2N1/2 of Lot 5 and the N1/2N1/2N1/2 of Lot 6 of Section 14, Township 41 South, Range 11 East, Willamette Meridian, excepting right of way heretofore reserved by the United States for the "J" Canal.

RECEIVED
JAN 22 2002
WATER RESOURCES DEPT.
SALEM, OREGON

PARCEL 4:

A portion of Lot 5, Section 10, Township 41 South, Range 11 East of the Willamette Meridian, described as follows: Beginning at the one-quarter corner common to Section 9 and 10 of said Township and Range; thence South 89 degrees 58' East 3.51 chains, more or less, to the projection of the center line of the 9-E-2 Drain; thence South 34 degrees 26' East along the said center line 14.11 chains to its intersection with the North line of S1/2N1/2SW1/4 of said Section 10; thence West along said North line to the West line of said Section 10; thence North along said West line to the point of beginning.

PARCEL 5:

The SW1/4SE1/4 and that portion of Lot 7 (NW1/4SE1/4), Section 10, Township 41 South, Range 11 East of the Willamette Meridian lying Southerly of the Great Northern Railway Right of Way.

All that portion of Government Lot 1 in Section 15, Township 41 South, Range 11 East of the Willamette Meridian, lying West of the East line of the SW1/4 of the SE1/4 of Section 10, Township 41 South, Range 11 East of the Willamette Meridian, extended South to the South line of said Lot 1.

PARCEL 6:

A portion of Section 10, Township 41 South, Range 11 East of the Willamette Meridian, described as follows: Beginning at the one-quarter corner common to Section 9 and 10 of said Township and Range, thence South 89 degrees 58' East 3.51 chains, more or less, to the projection of the center line of the 9-E-2 drain; thence South 34 degrees 26' East along said center line 14.11 chains to its intersection with the North line of the S1/2N1/2SW1/4 of said Section 10; thence Easterly along said North line of S1/2N1/2SW1/4, 30.80 chains, more or less, to the East line of the SW1/4 of said Section 10; thence Northerly along the East line of the SW1/4 of said Section 10, 10 chains, more or less, to the Northeast corner of the NE1/4SW1/4 of said Section 10; thence Westerly along the Northerly line of said NE1/4SW1/4 to the intersection of the said Northerly line with the Southwesterly right of way line of the Great Northern Railway Company Railroad right of way; thence Northwesterly along said Southerly railroad right of way line to its intersection with the West line of said Section 10; thence Southerly along said West line of said Section 10 the place of beginning. EXCEPTING THEREFROM that portion described as follows: A triangular parcel of land located in the Northeast corner of the Northeast corner of the SW1/4 of Section 10, Township 41 South, Range 11 East of the Willamette Meridian, described as follows: Commencing at the Northeast corner of the SW1/4 of Section 10, Township 41 South, Range 11 East of the Willamette Meridian, extending thence West along the Northerly line of said SW1/4 366 feet, more or less, to the intersection of said line with the Northeastly right of way line of the Great Northern Railway; thence Southeasterly along the Northeastly right of way line of said Railway a distance of 399 feet more or less, to the North-South center line of said Section 10; thence North along said center line a distance of 162 feet, more or less, to the point of beginning.

PARCEL 7:

A tract of land situated in Sections 8 and 17, Township 40 South, Range 10 East of the Willamette Meridian, Klamath County, Oregon being more particularly described as follows: Beginning at a point on the North line of said Section 17 from which the Northwest corner of said Section 17 bears North 89 degrees 49' 21" West, 30.00 feet; thence South 00 degrees 05' 09" East parallel to the West line of said Section 17, 256.00 feet; thence South 89 degrees 49' 21" East parallel to the North line of said Section 17, 2,379 feet more or less to the Mean High Water Line of Lost River; thence Northerly on said Mean High Water Line the following courses and distances: North 15 degrees 12' 02" East, 324.30 feet; North 09 degrees 32' 48" East, 223.70 feet; North 16 degrees 32' 48" West, 370.44 feet; and North 25 degrees 02' 09" West, 424.66 feet; thence leaving said Mean High Water Line, North 89 degrees 49' 21" West, 2,211.42 feet to a point lying 30.00 feet East of the West line of said Section 8; thence South 00 degrees 16' 30" West, parallel to the West Line of said Section 8, 1,016.92 feet to the point of beginning.

PARCEL 8:

The S1/2 of the N1/2 and the NE1/4 of the NE1/4 in Section 29, Township 40 South, Range 10 East, Willamette Meridian, Klamath County, Oregon, EXCEPT those portions of the NE1/4NE1/4 lying North and East of the Dalles-California Highway lying within Chin Road, lying within the right of way of The Dalles-California Highway, and lying within the Southern Pacific Railroad right of way.

PARCEL 9:

The SW1/4 of the SE1/4 of Section 20, Township 40 South, Range 10 East, Willamette Meridian, Klamath County, Oregon, EXCEPT those portions thereof lying within the Southern Pacific Railroad right of way, The Dalles-California Highway right of way, and North of the USBR No. 5 Drain, and EXCEPT any portion lying within Wong Road.

PARCEL 10:

The NW1/4 of the NE1/4 of Section 29, Township 40 South, Range 10 East, Willamette Meridian, Klamath county, Oregon.

All irrigation equipment, now owned and used, in whole or in part, to irrigate the mortgaged property, together with all similar goods which may be acquired at any time, any additions, replacements, substitutions and accessions;

All now owned or hereafter acquired equipment, machinery, appliances, tools and parts which are a part of the potato storage facility, including without limitation all temperature control systems, all humidification systems, all refrigeration systems, and all air distribution control systems. Also, all property and goods similar to those described herein which at any time may be acquired by Mortgagors/Debtors, including all additions, replacements, substitutions, and accessions thereof, and all accounts, general intangibles and proceeds arising therefrom;

and including all rents, issues, profits, buildings and improvements thereon and in all tenements, hereditaments, rights, privileges, easements, rights of way and appurtenances, (including without limitation private roads, grazing privileges, water rights, ditches and conduits and rights of way therefor, all plumbing, lighting, heating, cooling, ventilating, elevating, and irrigating apparatus and other equipment and fixtures, now or hereafter belonging to or used in connection therewith), all of which is hereinafter called the "Property."

The following described Note(s), Membership Agreements, security documents and any other documents or instruments signed in connection with the note(s) and security documents and any amendments thereto are collectively called the "Loan Documents." "Advances" shall include any amounts provided to Grantors under the terms of the Loan Documents and any amounts expended by Beneficiary to protect the Property or enforce its rights under the Loan Documents. This conveyance is intended to secure performance of the covenants and agreements contained herein, and in any Loan Documents, and payment of the indebtedness under the terms of the Note(s) made by Grantors to the order of Beneficiary, with interest and charges as provided therein and in the Loan Documents, and any extensions, modifications or renewals thereof:

<u>DATE OF NOTE</u>	<u>PRINCIPAL AMOUNT</u>	<u>FINAL INSTALLMENT DATE</u>
December 20, 2000	\$ 426,900.00	January 1, 2021

The terms of the Note(s) and Loan Documents, described above, provide that the interest rate, payment terms or amounts due may be indexed, adjusted, renewed or renegotiated.

Grantors and each of them REPRESENT, WARRANT, COVENANT and AGREE:

1. That they have title to the Property free from encumbrances, except as described above, they have good right and lawful authority to convey and encumber the same; they will warrant and defend the same forever against the lawful claims and demands of all persons whomsoever; and they agree this covenant shall not be extinguished by foreclosure or other transfers.
2. That this deed of trust also constitutes a Security Agreement granting Beneficiary a security interest in any and all personal property described above.
3. To keep all buildings and other improvements, now or hereafter existing, in good repair; not to remove or demolish or permit the removal or demolition of any building or other improvement; to restore promptly in a good and workmanlike manner, any building or improvement, which may be damaged or destroyed; to maintain and cultivate the Property in a good and husbandlike manner; not to change or permit change in the use of the Property; and not to do anything which would reduce the value of the Property; and Beneficiary shall have the right to enter upon the Property to make full inspection of the Property.
4. To maintain casualty insurance, naming Beneficiary as loss payee, on all buildings and improvements, against loss or damage by fire or other risks; to maintain liability insurance; to obtain flood insurance at any time it is determined that any building or improvement is located, in whole or in part, within a special flood hazard area; to pay all premiums and charges on all such insurance when due; and to provide Beneficiary satisfactory evidence of such insurance upon

RECEIVED
JAN 22 2002
WATER RESOURCES DEPT.
SALEM, OREGON

request. All such insurance shall be in such form(s), with such company(ies) and in such amount(s) as shall be satisfactory to Beneficiary.

5. To pay all debts and money, secured hereby, when due; to pay, when due, all taxes, assessments, rents and other charges upon the Property and to suffer no other encumbrance, charge or lien on the Property, which would be superior to this deed of trust, except as stated above.
6. To specifically assign and deliver to Beneficiary all rents, royalties, damages and payments of every kind, including without limitation insurance reimbursements and condemnation awards, at any time accruing, for any transfer, loss or seizure of the Property, any portion thereof or any rights therein; Beneficiary may, at its option, apply such amounts in any proportion to any of the indebtedness hereby secured; and application or release of such amounts shall not cure or waive any default or notice of default or invalidate any act done pursuant to such notice.
7. To comply with all laws, ordinances, regulations, covenants, conditions and restrictions affecting the Property and its use, including without limitation all environmental laws; not to use or permit the use of the Property for any unlawful or objectionable purpose or for any purpose that poses an unreasonable risk of harm, or that impairs or may impair the value of the Property, or any part thereof; not to apply residue from waste water treatment facilities to the Property without prior written notice to Beneficiary; to remedy any environmental contamination or violation of environmental laws that may occur or be discovered in the future; to allow Beneficiary access to the Property to inspect its condition and to test and monitor for compliance with applicable laws (any inspections or tests made by Beneficiary shall be for Beneficiary's purposes only and shall not be construed to create any responsibility or liability on the part of Beneficiary to Grantors or to any other person); to forward copies of any notices received from any environmental agencies to Beneficiary; to provide Beneficiary copies of any independent test or inspection reports on the environmental status of the Property; and to indemnify and hold Beneficiary, its directors, employees, agents and its successors and assigns, harmless from and against any environmental claims of any kind, and all costs and expenses incurred in connection therewith, including, without limitation, attorney's fees.
8. That neither Grantors nor, to the best of Grantors' knowledge, any prior owner has created or permitted conditions on the Property, which may give rise to environmental liability; no enforcement actions are pending or threatened; no underground tanks are located on the Property except as already disclosed; any such underground tanks currently or previously located on the Property do not now and never have leaked and no contaminated soil is located on the Property; and Grantor's representations, warranties, covenants and indemnities herein and in the Loan Documents shall survive satisfaction of the Note(s) and Loan Documents, foreclosure of this deed of trust, acceptance of a deed in lieu of foreclosure or any transfer or abandonment of the Property.
9. To perform all terms and conditions of each water or other contract, described above, if any, and to promptly pay all sums due or to become due under each contract so that no delinquency or default will occur under such contract(s); not to apply or enter into any federal, state or local program which limits or restricts the use of the Property, in any way without prior written consent of Beneficiary; to perform all acts necessary to perfect and maintain any water permit, certificate, license or other water interest, however designated, described in or used in conjunction with the real property described above; any assignment of any such interest during the term of this deed of trust, naming Beneficiary as an assignee shall be for security purposes and shall not alter Grantors' obligations hereunder; and any failure of Grantors to perform any such obligation shall constitute an event of default.
10. That the term "Grazing Rights," as hereinafter used refers to that portion of the Property, if any, consisting of grazing leases, permits, licenses, privileges, and preferences, or any of them, which have or will be assigned, conveyed or waived to Trustee or Beneficiary, together with any additions, renewals, replacements or substitutions thereof; if any portion of the Grazing Rights is a leasehold interest in state lands, such leasehold shall be considered to be real property; such leasehold and all other real property portions of the Property constitute a single operating unit; and in the event of foreclosure, Beneficiary shall have the right to have such leasehold and the other real property sold as a unit and not in parcels; any statements and representations in any applications for Grazing Rights are true and correct; Grantors have received no notice that the Grazing Rights have or are to be terminated, cancelled or modified; and any termination or cancellation of any of the Grazing Rights shall constitute an event of default under this deed of trust.
11. To execute any instrument deemed necessary by the Beneficiary to assign, convey or waive such Grazing Rights to the Trustee; to pay all fees and charges, and to perform all acts and things necessary to preserve and keep in good standing the Grazing Rights; to take no action which would adversely affect the Grazing Rights; to procure renewals of the Grazing Rights upon or prior to their expiration date; to operate the lands covered by the Grazing Rights in conjunction with the other real estate portion of the Property and not to convey or attempt to convey either separately; to forward to Beneficiary copies of any notices received by Grantors regarding the Grazing Rights; and in the event of foreclosure of this deed of trust, to waive all claims for preference in the Grazing Rights upon demand from the purchaser of the Property at Trustee's or foreclosure sale, or from any successor to such purchaser.
12. That if the Property is within an irrigation block and/or subject to water service contract(s) governed by the provisions of "Federal reclamation law," and the regulations issued thereunder, Grantors shall comply with the terms and provisions of said laws, regulations and contracts; Grantors, and each of them, for themselves, their heirs, successors and assigns, hereby appoint Beneficiary their attorney-in-fact to select and designate the portion of the property to be subject to a recordable contract, in the event Grantors become subject to the excess land limitation; if Grantors fail to

RECEIVED
MAY 5 2005
SUNNYVALE BRANCH

comply with the terms of said law, regulations or contracts, or if the delivery of water for the irrigation of the Property is discontinued in whole or in part, Grantors shall be in default; in the event the Bureau of Reclamation determines that continued drainage maintenance on the Property is no longer feasible, and Grantors purchase other lands offered as a preference purchase right (as an adjustment for wetlands), Grantors shall execute a supplemental deed of trust on such lands in favor of the Beneficiary; and failure to execute such deed of trust on demand, shall constitute an event of default.

13. That in the event of default in any of the covenants or agreements herein, or in any of the Loan Documents, Beneficiary may, at its option, perform the same, in whole or in part; any advances, attorney fees or costs, paid or incurred by Beneficiary to protect or enforce its rights under the Loan Documents, in bankruptcy, appellate proceedings or otherwise, shall be payable on demand and shall become a part of the obligation secured by this deed of trust.
14. That the indebtedness and obligations secured by this deed of trust are personal to the Grantors and are not assignable by Grantors; Beneficiary relied upon the credit of Grantors, the interest of Grantors in the Property and the financial market conditions then existing when making this loan; if Grantors sell, transfer or convey or contract to sell, transfer or convey the Property, or any portion thereof, or if the ownership of any corporation or partnership, owning all or any portion of the Property shall be changed either by voluntary or involuntary sale or transfer or by operation of law, without prior written consent of Beneficiary, or if Grantors default in the payment of the indebtedness, or with respect to any warranty, covenant or agreement in the Loan Documents or if a receiver or trustee for any part of the Property is appointed, or if any proceedings under the bankruptcy or insolvency laws is commenced by or against Grantors, or if Grantors become insolvent, or if any action is commenced to foreclose or enforce a lien on any portion of the Property, then, Grantors shall be in default hereunder.
15. That time is of the essence and in the event of default, at Beneficiary's option, the entire indebtedness secured hereby shall forthwith become due and payable and bear interest at the rate set forth in the Loan Documents for delinquent payments; Beneficiary shall have the right to foreclose the lien of this deed of trust or to direct Trustee, in writing, to foreclose this deed of trust by notice and sale, to have a receiver appointed in any court proceeding, to collect any rents, issues and profits from the Property and to deliver them to Beneficiary to be applied as provided above and to exercise any rights and remedies available under the Uniform Commercial Code for the state in which the property is located; and reasonable notice if required by such Code shall be five (5) days.
16. That Beneficiary may from time to time, in writing and without further notice or consent, release any person from liability for payment of any of the indebtedness or extend the time or otherwise alter the terms of payment of any of the indebtedness; and Trustee may, with written consent of Beneficiary, at any time and from time to time, and without affecting the liability of any person:
 - a. Join in any subordination or other agreement affecting this deed of trust or lien or charge thereof.
 - b. Reconvey, without warranty, any or all of the Property.
17. That after all sums secured hereby have been paid, upon receipt of the deed of trust and note and payment of its fees, Trustee shall reconvey without warranty the Property, as provided by law. The grantee in such reconveyance may be described as "the person or persons legally entitled thereto."
18. That, in the event of foreclosure of this deed of trust by notice and sale, the power of sale shall be exercised by the Trustee according to and under the authority of the law pertaining to deeds of trust then in effect in the state in which the Property is situated; Trustee shall deliver to purchaser its deed, without warranty, containing recitals demonstrating compliance with the requirements of such law.
19. To surrender possession of such premises within the time period provided by law; in the event Beneficiary is purchaser of the Property and possession is not delivered, as provided by law, to pay Beneficiary the costs and the expenses, including reasonable attorney fees, incurred in any suit or action by Beneficiary to obtain possession of the premises.
20. That Trustee accepts this trust when this deed, duly executed and acknowledged is recorded as provided by law; any Trustee lawfully appointed by Beneficiary as a substitute or successor Trustee shall succeed to all the powers and duties of the Trustee named herein; Trustee is not obligated to notify any party hereto of the pending sale under any other deed of trust or any action or proceeding in which Grantors, Trustee, or Beneficiary shall be a party unless such action or proceeding is brought by Trustee.
21. That as used herein, the term "deed of trust" shall be synonymous with the terms "trust indenture" and "trust deed"; the term "Grantors" shall be synonymous with the term "Trustors" as used in any of the laws of the state in which the Property is situated; the term "Beneficiary" shall mean the holder and owner of any Note secured hereby, or if any Note(s) has been pledged, the pledgee thereof.
22. That the failure of Beneficiary to exercise any right or option provided herein, at any time shall not preclude Beneficiary from exercising any of such rights at any other time; the covenants and agreements contained herein shall be binding on and inure to the benefit of the parties and their respective heirs, successors and assigns; all rights conferred on Beneficiary or on Trustee are cumulative and additional to any rights conferred by law; and if any

WATER RESOURCES DEPT.
SALEM, OREGON

provision is found to be invalid or unenforceable, such invalidity or unenforceability shall not affect any other provision hereof and the deed of trust shall be construed as though such provision had been omitted.

23. That Grantors and each of them join in this instrument for the purpose of subjecting each of their right, title and interest, if any, in the Property, whether of record or otherwise and including any right to possession, to the lien of this deed of trust.

Dear Applicant:

The Department is in the process of reviewing your application for a permit to use water. Additional information is needed, however, to continue processing the application. Please provide the information listed below:

In order for the Department to continue processing your application, please clarify the following items and amend your application map accordingly:

- **Please indicate the actual scale to which the application map is drawn.** The map you submitted has been reduced in size, and subsequently, the scale indicated at the top of the map is no longer accurate.

If the application map has been enlarged or reduced from its original size, the scale also changes and becomes inaccurate. If the size of the map is modified, the map scale must be adjusted and clearly identified on the map.

In the event that your "amended" application map is larger than 11"X 17", **four copies** of that map must be submitted, **or** the map must be drawn on tracing linen, tracing velum or Mylar.

- The location of the well must be referenced to a recognized public land survey corner; do not measure from property lines unless they are part of the public land survey lines. The locations may be shown by distance and bearing or by coordinates (ie: "400 feet south and 350 feet west from the northeast corner of section 17"). **Please identify the location of the well on the application map and describe the location of the well referenced to a public land survey corner.**

Daniel Chin
January 4, 2002

G-15516
Page 2

- The location of the place where water is to be used for irrigation purposes must be identified on the map by tax lot, township, range, section and nearest quarter-quarter section. Please indicate the number of acres to be irrigated in each quarter-quarter section on the enclosed copy of your application map.

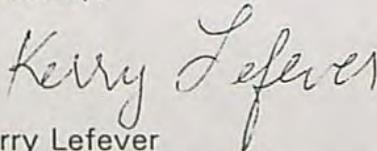

In addition to map items listed above, please submit the following items:

- The application form requested 750 acre-feet of water. Based on the general the standard allowable rate of water necessary for irrigation use of groundwater of 1/80 cubic feet per second (cfs) per acre and a duty of 3.0 acre-feet per year, 251.0 acres will be limited to 3.14 cfs. Based on the rate of 3.14 cfs, additional examination fees in the amount of \$75.00 must be submitted before the Department can issue an initial review of your application. Please submit \$75.00 or clarify the quantity of water at a rate of less than 3.0 cfs before February 1, 2002. The base examination fee for quantity up to 1.0 cfs is \$400 with an additional \$75 for each additional cfs or fraction thereof. You submitted \$550 examination fee which would cover a quantity of water up to 2.99 cfs.
- A metes and bounds legal description of the property where you plan to use the water. You may use a copy of your deed, land sales contract or title insurance policy. Do not send a copy of the tax assessor bill.

In order for the Department to continue processing of your application, please submit the requested information by **Friday, February 1, 2002**. If this information is not received by February 1, 2002, the Department *may* return the application and supporting documents, as well as, any fees paid for this application.

If you need additional time in which to submit this information, or if you have any other questions concerning your application, please feel free to contact me at (503) 378-8455, extension 276.

Sincerely,

Kerry Lefever
Senior Water Rights Technician

*Fax: _____ *E-Mail address: _____

*Optional information

For Department Use		
App. No. <u>6-15516</u>	Permit No. _____	Date <u>5/29/01</u>

2. PROPERTY OWNERSHIP

Do you own all the land where you propose to divert, transport, and use water?

- Yes (Skip to section 3 "Ground water Development.")
No Please check the appropriate box below.
I have a recorded easement or written authorization permitting access.
I do not currently have written authorization or easement permitting access.

List the names and mailing addresses of all affected landowners.*

Blank lines for listing landowners' names and addresses.

*If more than 25 landowners are involved, a list is not required. See instructions.

3. GROUND WATER DEVELOPMENT

A. Number of well(s): 1 B. Name of nearest surface water body: Lost River

C. Distance from well(s) to nearest stream or lake: 1) 2 mile

2) 3) 4)

D. If distance from surface water is less than one mile, indicate elevation difference between nearest surface water and well head. 1)

2) 3) 4)

E. Well Characteristics

Wells must be constructed according to standards set by the Department for the construction and maintenance of water wells. If the well is already constructed, please enclose a copy of the well constructor's log and the well ID number, if available, for each well with this application. Identify each well with a number corresponding to the wells designated on the map and proceed to question F in this section of the form. If the well has not been constructed, or if you do not have a well log, please complete the following:

Well(s) will be constructed by: Storey Well Drilling

Address: P.O. Box 98 Midland, OR 97634

Completion date: 7-12-92

Application No. 6-15516

Permit No.

2. Please provide a description of your well development. *(Attach additional sheets if needed.)*

Well No.	Diameter	Type and size of casing	No. of feet of casing	Intervals casing is perforated (in feet)	Seal depth	Est. depth to water	Est. depth to water bearing stratum	Type of access port or measuring device	Total well depth

F. Artesian Flows

If your water well is flowing artesian, describe your water control and conservation works:

4. WATER USE

Please read the instruction booklet for more details on "type of use" definitions, how to express how much water you need and how to identify the water source you propose to use. You must fill out a supplemental form for some uses as they require specific information for that type of use.

A. Type(s) of Use(s)

See list of beneficial uses provided in the instructions.

- If your proposed use is **domestic**, indicate the number of households to be supplied with water: _____
- If your proposed use is **irrigation**, please attach Form I
- If your proposed use is **mining**, attach Form R
- If your proposed use is **municipal or quasi-municipal**, attach Form M
- If your proposed use is **commercial/industrial**, attach Form Q

B. Amount of Water

Provide the production rate in gallons per minute (gpm) and the total annual amount of water you need from each well, from each source or aquifer, for each use. You do not need to provide source information if you are submitting a well log with your application.

Well No.	Source or aquifer	Type of use	Total rate of water requested (in gpm)	Total annual quantity (in gallons)	Production rate of well (in gpm)
Well	log Storey				

C. Maximum Rate of Use Requested

What is the maximum, instantaneous rate of water that will be used? 750 acre foot
 (The fees for your application will be based on this amount.)

D. Period of Use

Indicate the time of year you propose to use the water: March 1 - October 31
 (For seasonal uses like irrigation give dates when water use would begin and end, e.g. March 1-October 31.)

E. Acreage

If you will be applying water to land, please give the total number of acres where water will be applied or used: 25 ac.
 (This number should be consistent with you application map.)

5. WATER MANAGEMENT

A. Diversion

What equipment will you use to pump water from your well(s)?

- Pump (give horsepower and pump type) 75 HP - 45-Turbine
- Other means (describe) _____

B. Transport

How will you transport water to your place of use?

- Ditch or canal (give average width and depth)
 Width _____ Depth _____
 Is the ditch or canal to be lined? Yes No
- Pipe (give diameter and total length)
 Diameter 10" Length 3000'
- Other (describe) _____

Application No. 6-5516
Permit No.

C. Application/Distribution Method

What equipment will you use to apply water to your place of use? _____

Irrigation or land application method (check all that apply):

- | | | |
|------------------------------------------------------------------|-------------------------------------------------------------|-------------------------------------------------|
| <input type="checkbox"/> Flood | <input checked="" type="checkbox"/> High-pressure sprinkler | <input type="checkbox"/> Low pressure sprinkler |
| <input type="checkbox"/> Drip | <input type="checkbox"/> Water cannons | <input type="checkbox"/> Center pivot system |
| <input type="checkbox"/> Hand lines | <input checked="" type="checkbox"/> Wheel lines | |
| <input type="checkbox"/> Siphon tubes or gated pipe with furrows | | |
| <input type="checkbox"/> Other, describe _____ | | |

Distribution method

- Direct pipe from source In-line storage (tank or pond) Open canal

D. Conservation

What methods will you use to conserve water? Why did you choose this distribution or application method? For example, if you are using sprinkler irrigation rather than drip irrigation, explain. If you need additional space, attach a separate sheet.

Potatoes need protection from frost with sprinkler irrigation

6. PROJECT SCHEDULE

Indicate the anticipated dates that the following construction tasks should begin. If construction has already begun, or is completed, please indicate that date.

Proposed date construction will begin _____

Proposed date construction will be completed _____

Proposed date beneficial water use will begin _____

7. REMARKS

If you would like to clarify any information you have provided in the application, please do so here and reference the specific application question you are addressing.

8. MAP REQUIREMENTS

The Department cannot process your application without accurate information showing the source of water and location of water use. You must include a map with this application form that clearly indicates the township, range, section, and quarter/quarter section of the proposed well location and place of use. The map must provide tax lot numbers. See the map guidelines sheet for detailed map specifications.

9. SIGNATURE

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application packet.
- I cannot legally use water until the Water Resources Department issues a permit to me.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be canceled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit to me, I may have to stop using water to allow senior water right holders to get water they are entitled to, and

I swear that all information provided in this application is true and correct to the best of my knowledge:

Signature of Applicant

5-24-01

Date

Signature of Co-applicant

Date

Before you submit your application be sure you have:

- Answered each question completely.
- Attached a legible map which includes township, range, section, quarter/quarter and tax lot number.
- Included a Land Use Information Form or receipt stub signed by a local official.
- Included the legal description of all the property involved with this application. You may supply a copy of the deed, land sales contract, or title insurance policy, to meet this requirement.
- Included a check payable to the Oregon Water Resources Department for the appropriate amount.

REMARKS OR FURTHER INSTRUCTIONS:

Reviewer:  Michael Zwart

**OREGON WATER RESOURCES DEPARTMENT
INTEROFFICE MEMO**

To: Ground Water files Date: July 6, 2001
From: Michael J. Zwart
Subject: Application Review: G-15516, Daniel Chin

This application proposes to use up to about 3.1375 cfs (not specified in application) from one well (KLAM 10518, also see G-15368 and G-15409) for supplemental irrigation of 251.0 acres. The well is 913 feet deep and produces water from a confined to semiconfined aquifer developed in Tertiary basalt rocks below a depth of 669 feet, likely the Basalt of Basin and Range (Tb2) as mapped by Sherrod and Pickthorn (1992).

The well is about 2500 feet from the C Canal and over one mile from the Lost River. There is no potential for substantial interference with surface water, based on the confined to semiconfined nature of the aquifer and the distance.

I recommend permit conditions 7B and 7E.

TO: Water Rights Section July 6, 2001
FROM: Groundwater/Hydrology Section Michael Zwart
SUBJECT: Application G-15516
Reviewer's Name

GROUNDWATER/SURFACE WATER CONSIDERATIONS

- 1. PER THE _____ Basin rules, one or more of the proposed POA's is/is not within _____ feet/mile of a surface water source (_____) and taps a groundwater source hydraulically connected to the surface water.

- 2. BASED UPON OAR 690-09 currently in effect, I have determined that the proposed groundwater use
 - a. ___ will, or _____ have the potential for substantial interference with the nearest
 - b. ___ will not _____ surface water source, namely _____; or
 - c. will if properly conditioned, adequately protect the surface water from interference:
 - i. The permit should contain condition #(s) 7B;
 - ii. ___ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. ___ The permit should be conditioned as indicated in item 4 below; or
 - d. ___ will, with well reconstruction, adequately protect the surface from substantial interference.

GROUNDWATER AVAILABILITY CONSIDERATIONS

- 3. BASED UPON available data, I have determined that groundwater for the proposed use
 - a. ___ will, or _____ likely be available in the amounts requested without injury to prior rights
 - b. ___ will not _____ and/or within the capacity of the resource; or
 - c. will if properly conditioned, avoid injury to existing rights or to the groundwater resource:
 - i. The permit should contain condition #(s) 7E;
 - ii. ___ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. ___ The permit should be conditioned as indicated in item 4 below; or

- 4.
 - a. ___ THE PERMIT should allow groundwater production from no deeper than _____ ft. below land surface;
 - b. ___ The permit should allow groundwater production from no shallower than _____ ft. below land surface;
 - c. ___ The permit should allow groundwater production only from the _____ groundwater reservoir between approximately _____ ft. and _____ ft. below land surface;
 - d. ___ Well reconstruction is necessary to accomplish one or more of the above conditions.
 - e. ___ One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.

Oregon Water Resources Department
Land Use Information Form

This information is needed to determine compatibility with local comprehensive plans as required by ORS 197.180. The Water Resources Department will use this and other information to evaluate the water use application. DO NOT fill out this form if water is to be diverted, conveyed, or used only on federal lands.

To Be Completed By Applicant

The following section includes information about proposed water use. This section must be completed by the individual or group that is filing an application for a water right with the Water Resources Department.

A. Applicant

Name: Daniel Chin

Address: 17817 Cheyenne Rd.

City: Klamath Falls State: OR Zip: 97603 Day Phone: 541-798-5038

B. Land and Location

Please provide information as requested below for all tax lots on or through which water will be diverted, conveyed, or used. Check "diverted" if water is diverted (taken) from its source on tax lot, "conveyed" if water is conveyed (transported) on tax lot, and "used" if water will be put to beneficial use on tax lot. More than one box may be checked. (Attach extra sheets as necessary.) Applicants for municipal use, or irrigation uses within irrigation districts, may substitute existing and proposed service area boundaries for the tax lot information requested below.

Tax Lot I.D.	Plan Designation (e.g. Rural Residential/RR-5)	Water to be: (check all that apply)		
40-10-20-1500		<input type="checkbox"/> Diverted	<input type="checkbox"/> Conveyed	<input checked="" type="checkbox"/> Used
40-10-29-300		<input type="checkbox"/> Diverted	<input type="checkbox"/> Conveyed	<input checked="" type="checkbox"/> Used
40-10-29-400		<input type="checkbox"/> Diverted	<input type="checkbox"/> Conveyed	<input checked="" type="checkbox"/> Used

List counties and cities where water is proposed to be diverted, conveyed, or used. Klamath

C. Description of Water Use

Indicate what the water will be used for. Include the beneficial use (found in the instruction booklet for your water right application) and use the space below to describe the key characteristics of the project.

Beneficial Use(s): Irrigation of Ag Commodities

Briefly describe: _____

D. Source

Indicate the source for the proposed water use:

Reservoir/Pond Ground Water Surface Water _____ (source)

E. Quantity

Indicate the estimated quantity of water the use will require:

750 CFS GPM Acre-Feet

Receipt for Request for Land Use Information

State of Oregon
Water Resources Department
Commerce Bldg.

Salem, OR 97310-0210
(503)378-8455

For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless your project will be located entirely within the city limits. In this case, only the city planning agency must complete this form. Please request additional forms as needed or feel free to copy.

A. Allowed Use

Check the appropriate box below and provide requested information.

- Land uses to be served by proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s); 54. Go to section B "Approval" below
- Land uses to be served by proposed water uses (including proposed construction) involve discretionary land use approvals as listed in the table below.

Type of Land Use Approval Needed (e.g. plan amendments, rezones, conditional use permits, etc.)	Cite Most Significant, Applicable Plan Policies & Ordinance Section References	Check the item that applies: Land Use Approval:	
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being pursued <input type="checkbox"/> Not being pursued
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being pursued <input type="checkbox"/> Not being pursued
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being pursued <input type="checkbox"/> Not being pursued
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being pursued <input type="checkbox"/> Not being pursued
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being pursued <input type="checkbox"/> Not being pursued

Note: Please attach documentation of applicable local land use approvals which have already been obtained. (Record of Action plus accompanying findings is sufficient.)

B. Approval

Please provide printed name and written signature.

Name: J.K. LUNDAHL Date: 5-24-01

Title: SENIOR PLANNER Phone: 541 883-4200

Signature: 

C. Additional Comments

Local governments are invited to express special land use concerns or make recommendations to the Department regarding this proposed use of water below, or on a separate sheet.

Note: If this form cannot be completed while the applicant waits, sign and detach the receipt stub as instructed below. You will have 30 days from the Water Resources Department's notice date to return the completed Land Use Information Form or WRD will presume the land use associated with the proposed water right is compatible with local comprehensive plans. (See attached letter.)

Receipt for Request for Land Use Information

Name of water right applicant: CHIN

This receipt must be signed by a local government representative and returned to the applicant at the time they present this form. This receipt must be included in the application for a water right permit if the local government cannot provide the requested land use information while the applicant waits.

City or County: KLAMATH COUNTY

FORM I

FOR IRRIGATION WATER USE

1. Please indicate whether you are requesting a primary or supplemental irrigation water right.

Primary Supplemental

If supplemental, please indicate the number of acres that will be irrigated for each type of use.

Primary: _____ Acres

Secondary: 251 Acres

List the permit or certificate number of the primary water right: no. _____

2. Please list the anticipated crops you will grow and whether you will be irrigating them for a full or partial season:

1. Potatoes Full season Partial season (from: April to Oct)
2. Onions Full season Partial season (from: April to Oct)
3. Alfalfa Hay Full season Partial season (from: April to Oct)
4. Grains Full season Partial season (from: April to July)

3. Indicate the maximum total number of acre-feet you expect to use in an irrigation season:

750 acre-feet

(1 acre-foot equals 12 inches of water spread over one acre, or 43,560 cubic feet, or 325,851 gallons.)

4. How will you schedule your applications of water? Will you be applying water in the evenings, twice a week, daily?

- Daily during daytime hours Daily during nighttime hours
- Two or three times weekly during daytime Two or three times weekly during nighttime
- Weekly, during daytime hours Weekly, during nighttime hours
- Other, explain: Weekly day and night
