GW

The Department has reviewed the status of your pump test and any requests for extension(s) or exemption(s) for the following permitted well(s). The results are summarized in the table below:

Application	Water Right	Permitted Well	Pumped Well	Test Date	Request Status	Problems	Exemption	Well Name
G 15196	Permit: G 14018 *	KLAM0052912	KLAM0052912	09/27/2001	APPROVED	4		

The following problems were noted on at least one of the pump tests listed above:

- Water levels were not measured and reported with sufficient accuracy and precision.
- Pre-test static water levels or shut in pressures were not measured at the specified intervals.
- Water levels or shut in pressures were not measured at the specified time intervals during the test.
- Test data and the supporting documentation were not reported on the Department's forms.

Although at least one test was approved despite problems, please note that those problems may be grounds for rejecting a test submitted in the future.

Pump tests are intended to provide aquifer and well information for ground water resource characterization and to help solve well problems (OAR 690-217-0015(9)). A review of the test results indicates that there are one or more deficiencies (listed below) related to the requirements for pump tests outlined in OAR 690-217, however; it is likely that any re-testing would constitute an unreasonable burden on the permittee and would provide data of only marginal value in satisfying the intent of the rules.

Although this test is being approved for this well on the above listed permit(s), it is unlikely that the approval will carry forward onto any new permits or multiple-well exemption requests. If a new permit is issued for this particular well that requires a pump test or if you wish to request a multiple-well exemption on any other wells using this approved test, you may be denied and will need to perform a new test.

Approved pump test letters will be digitally posted to the water right in WRIS; all other pump test letters will be mailed to permit holder.

Please contact me if you have any questions.

Sincerely,

Grayson Fish
