

**IMPORTANT**—This form is a notice to the Water Resources Director that permittee is ready to make **final proof** to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the **final proof** inspection and survey which will be made in response to the filing of this Form C.

**NOTE** In the case of an irrigation permit, this Form C should not be mailed to the Water Resources Department until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated.

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when all of the water has been applied.

Dear Sir,

Water from 3" pipeline used for pressure washing gravel for recovery of precious metals. Pipeline flows through 3 claims, making it possible to alternately use the water on different mining claims at different times. The water is then ditched to settling ponds - 1-2-3 then to Democrat Gulch.

Dear Mr. Trefethen:

REFERENCE: File 64796

Your Application 64796 describing the proposed use of 2.0 cubic feet per second of water from a spring area for mining purposes, together with the maps and spring description sheet, has been reviewed.

In Item 3 of the application, SW 1/4 SW 1/4 of Section 3 is listed twice. Please amend Item 3 of the application to correctly state the quarter-quarter section location of the place of use. The only quarter-quarter sections which should be listed here are the quarter-quarter sections where the water will actually be used.

Please describe your mining operation and the water system in detail in Item 6 of the application. Include in your description information on the settling ponds and enough information on the water system to justify the amount of water asked for in Item 4.

A legal description of the property where the water is to be used is needed to verify the place of use. This can be copied from your deed, title insurance policy, or sales contract.

There is a water right of record for mining appurtenant to a portion of the land described in your application. Enclosed is a copy of the map showing the location of this old water right.

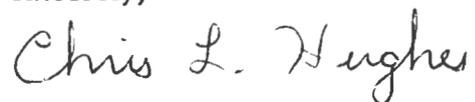

Since a permit in approval of your application cannot be issued until all conflicts with prior rights are resolved, you must do one of the following:

1. If this old right has not been used for a period of five consecutive years, it is invalid and should be cancelled. In this case, an affidavit must be prepared which will cancel the old right. Please let me know who the legal owner of the land is so that an affidavit can be prepared.
2. If this right is valid and you intend to use it, please delete this area of use from your new application and map.
