Water Right Services Division**

Water Right Application G-19194 in the)	
name of ADAM ALBERTSON)	PROPOSED FINAL ORDER
)	TO DENY

Summary: The Department proposes to issue an order denying Application G-19194 because the proposed use: (1) will have the potential for substantial interference with surface water and surface water is not available for the proposed use; (2) will cause injury to existing surface water rights; and (3) does not comply with rules of the Commission at OAR 690-033.

This Proposed Final Order shall become a final order on the date that is 33 days after the close of the time period for submitting a protest with no further action required by the Department unless a timely protest is received or the Proposed Final Order is withdrawn by the Department. ORS 536.077(4) and (5).

Authority

The application is being processed in accordance with Oregon Revised Statute (ORS) 537.615 through 537.628, and 390.826, and Oregon Administrative Rule (OAR) Chapter 690, Divisions 5, 8, 9, 33, 300, 310, 400, 410, and the Goose and Summer Lakes Basin Program (OAR 690-513). These statutes and rules can be viewed on the following website: www.oregon.gov/OWRD/programs/policylawandrules

The Department’s main website can be found at: www.oregon.gov/OWRD

The Department shall presume that a proposed groundwater use will ensure the preservation of the public welfare, safety and health as described in ORS 537.525 if:

- a) The proposed use is allowed in the applicable basin program established pursuant to ORS 536.300 and 536.340 or given a preference under ORS 536.310(12);
- b) Water is available;
- c) The proposed use will not injure other water rights; and
- d) The proposed use complies with the rules of the Commission.

ORS 537.621(2); OAR 690-310-0130.

All four criteria must be met for a proposed use to be presumed to ensure the preservation of the public welfare, safety and health. This shall be a rebuttable presumption and may be overcome by a preponderance of evidence that either one or more of the criteria for establishing the presumption are not satisfied, or that the proposed use would not ensure the preservation of the public welfare, safety and health as demonstrated in any comments received, information available in the Department’s files or received from other interested agencies, and any other available information. ORS 537.621(2); OAR 690-310-0130(2).

If the Department determines that the presumption is not established, the Department shall determine whether the proposed use will impair or adversely affect the public welfare, safety and health under ORS 537.525 and may either:

- a) Propose denial of the application upon a finding that the use will impair or adversely affect the public welfare, safety and health; or
- b) Make specific findings to demonstrate that even though the presumption is not established, the proposed use will not impair or adversely affect the public welfare, safety and health and propose approval of the application with appropriate modifications or conditions.

OAR 690-310-0140(2).

FINDINGS OF FACT

Application History

1. On August 12, 2021, Adam Albertson filed a complete application for the following water use:

Source: WELL 1 (LAKE 52007) IN COTTONWOOD CREEK BASIN
Use: IRRIGATION OF 10.0 ACRES
Rate: 0.124 CUBIC FOOT PER SECOND (CFS), FURTHER LIMITED TO 30.0 ACRE-
FEET (AF) ANNUALLY
Period of Use: MARCH 1 THROUGH OCTOBER 31
County: LAKE COUNTY
Place of Use: SECTION 15, TOWNSHIP 39 SOUTH, RANGE 19 EAST, W.M.

2. On July 19, 2024, the Department mailed the applicant notice of its Initial Review, determining that the appropriation of 0.124 CFS, further limited to 30.0 AF annually, of water from Well 1 (LAKE 52007) in Cottonwood Creek Basin for irrigation of 10.0 acres from March 1 through October 31 of each year, is not allowable. The applicant did not notify the Department to stop processing the application within 14 days of that date.
3. On July 23, 2024, the Department provided notice of the application in its weekly public notice, requesting comments and providing information for interested persons about obtaining future notices and a copy of the Proposed Final Order.
4. On August 1, 2024, the applicant requested that the application be placed on a 180-day administrative hold. The administrative hold expired on January 28, 2025.

Presumption Criterion (a) - Consistency with Basin Program

5. Irrigation is allowed under the Goose and Summer Lakes Basin Program (OAR 690-513-0030(2)). ORS 537.621(3)(a)(B); OAR 690-310-0150(2)(b).
6. The proposed groundwater use is not within a designated critical groundwater area. ORS 537.621(3)(a)(B); OAR 690-310-0150(2)(b).

Presumption Criterion (b) - Water Availability

7. An assessment of groundwater availability has been completed by the Department. A copy of this assessment is in the file and can be viewed on the Department's website. Groundwater for the proposed use is not over-appropriated. ORS 537.621(3)(a)(C); OAR 690-310-0150(2)(c); OAR 690-300-0010(57).
8. The Department has determined that the proposed groundwater use will have the potential for substantial interference (PSI) with Cottonwood Creek and an unnamed stream. OAR 690-009-0040. Therefore, in accordance with OAR 690-300-0010(57)(a) and OAR 690-400-0010(11)(a)(B), surface water availability must be considered. During the period of use requested, surface water is not available (at an 80% exceedance probability). Therefore, water is **not** available for the proposed use. ORS 537.621(3)(a)(C); OAR 690-310-0150(2)(c); OAR 690-300-0010(57); OAR 690-410-0070.

Presumption Criterion (c) - Injury Determination

9. The proposed use of groundwater **will** injure other water rights (surface water rights). ORS 537.621(3)(a)(D); OAR 690-310-0150(2)(e).

Presumption Criterion (d) - Whether the Use Complies with Rules of the Commission

10. Documentation has been submitted from the relevant land-use planning jurisdiction that indicates the proposed use is allowed outright. ORS 537.621(3)(a)(B); OAR 690-310-0150(2)(b).
11. The proposed use is in an area of the state in which OAR 690-033-0310 through -0340 applies. These rules establish definitions, additional procedures, and standards to aid the Department in determining whether a proposed use will impair or be detrimental to the public interest with regard to sensitive, threatened, or endangered fish species.

OAR 690-033-0310 Statewide Rules

- A. The proposed use occurs in an area that may affect the habitat of sensitive, threatened or endangered fish species. OAR 690-033-0310(2).
- B. The applicant has been notified that based on a preliminary determination, the proposed use may affect the habitat of sensitive, threatened or endangered fish species and the application may be conditioned or denied. OAR 690-033-0330(1)(a).
- C. The interagency review team has been notified that an application has been received in an area that may affect the habitat of sensitive, threatened or endangered fish species. OAR 690-033-0330(1)(b).
- D. The interagency review team was convened to review the application and recommended conditions as necessary to achieve the standards listed in OAR 690-033-0330(2)(a) and (b). The interagency review team recommended mitigation to overcome the impact to sensitive, threatened or endangered fish species; however, as described in Findings of Fact #8 and #9 above, water is not available for the proposed use and the proposed use will injure other water rights.

12. The proposed use is not located within or above a state scenic waterway, as designated under ORS 390.826. OAR 690-310-0260.

Presumption that a Proposed Use will Ensure the Preservation of the Public Welfare, Safety and Health under ORS 537.525

13. Because water is not available, injury to surface water rights will occur, and the proposed use of water is not consistent with the rules of the Commission at OAR 690-033, criteria necessary to establish the presumption are not met and the presumption that the proposed groundwater use will ensure the preservation of the public, welfare, safety and health under ORS 537.525 is **not** established. OAR 690-310-0140(1); OAR 690-310-0150(2)(h).

14. Because the presumption is not established, the Department evaluated whether the proposed use will impair or adversely affect the public welfare, safety and health under ORS 537.525. OAR 690-310-0140(2).

15. Information available in Department files, received from other interested agencies, and other available information does not provide a preponderance of evidence that the proposed use would otherwise ensure the preservation of the public welfare, safety and health under ORS 537.525. ORS 537.625(2); OAR-690-310-0140(2).

Further Evaluation of the Proposed Use

16. No comments were received by the close of the comment period. OAR 690-310-0140(3)(a).

Other Criteria and Requirements

17. The amount of water requested, 0.124 CFS, further limited to 30.0 AF annually, is necessary for the proposed use. ORS 537.621(3)(a)(C); OAR 690-310-0150(2)(d).

18. The applicant proposed measures to prevent waste, measure the amount of water appropriated, prevent damage to aquatic life and riparian habitat, prevent discharge of contaminated water to a surface stream and to prevent damage to public uses of any affected surface waters. These measures are included in Sections 6 and 8 of the application. OAR 690-310-0150(2)(j).

19. The proposed use complies with rules of the Water Resources Commission not otherwise described above.

CONCLUSION OF LAW

1. The proposed use will not ensure the preservation of the public welfare, safety and health as described in ORS 537.525.
