RE: Fish Screening and Passage Requirements for R-15413, R-14296, R-14297, and S-55244

Dear Mr. Maxson,

The Oregon Department of Fish and Wildlife (ODFW) is submitting this letter regarding the fish screening and passage conditions associated with permits R-15413, R-14296, R-14297, and S-55244, located at 8005 Dejong Road. The permits allow the water user to submit evidence in writing that ODFW has determined screens and/or passage devices are not necessary. After assessing the reservoir locations and water source, ODFW has determined that fish screening and passage devices are not necessary for permits R-15413, R-14296, R-14297, and S-55244.

Although ODFW has determined that fish screening and passage devices are not necessary, the permittee shall not stock fish in the associated reservoir without a fish transport permit approved by ODFW. Per ORS 498.222 and OAR 635-007-0600, all persons transporting fish in Oregon need to have a fish transport permit issued by ODFW. As part of the permitting process, the permittee may need to screen the outlet of the reservoir to ensure that fish cannot escape into public waters.

Please let me know if you need any additional information or have further questions.

Sincerely,

Kevin Stertz
