Dear Mr. Galvin:

This will acknowledge return of your corrected application No. 49662 along with your map.

If you will now submit the legal description of the property upon which the water will be used, the application will be complete for approval. The description can be copied from your deed, title insurance policy, or sales contract.

Very truly yours,

WAYNE J. OVERCASH
Assistant

Dear Mr. Overcash:

Thank you for your February letter explaining your department's clerical mixup. It made my day.

The discrepancy to which you refer, Item No. 4, is the result of my not reading out my map designation as precisely as I should have. The map is correct, and I have corrected my application to reflect the accurate location. In doing so I simply copied your description. I hope that that will suffice.

I am temporarily in Los Angeles. All correspondence should still be sent to my home address in Davis. Thank you for your help.

Sincerely,
Bruce H. Golvin

Bruce H. Calvin
602 East 11th St.
Davis, CA 95616

Dear Mr. Calvin:

This will acknowledge return of your application No. 49662 and map along with your letter giving additional information on your distribution system. Your application was received February 9, 1973, prior to the endorsement date of February 12, 1973. Therefore, your application has retained its priority date of August 31, 1972, when it was filed. Our letter of February 13, 1973, was sent in error.

I have apparently overlooked a discrepancy between your map and application in the past. Item No. 4 on your application indicates that the point of diversion is located 203 feet south and 670 feet east from the north quarter corner of Section 11. However, your map shows the point of diversion 203 feet south and 670 feet west from the east 1/16 corner of the north line of Section 11. Either the map or the information in item No. 4 should be corrected so that they are in agreement. I apologize for not bringing this to your attention in my earlier correspondence.

I am returning your application and map for correction and completion. Your application is endorsed so that in order to retain its priority date, it must be received in this office on or before April 23, 1973.

Very truly yours,

WAYNE J. OVERCASH
Assistant

Attention: Mr. Wayne J. Overcash

Dear Mr. Overcash:

Thank you for your letter of December 12, 1972. The location of the pressure pump in No. 6 (C) is the same as that of the spring. The use of the pump is only that of providing the force necessary to move a given volume of water from the point of the spring, through the illustrated pipe line, to the point of the tank. The pump serves no other secondary, additional, or auxilliary purpose. Between the spring and the tank there is no part under gravity flow. All water between these two points has a vertical travel. Between the tank and trailer site clearing there is a subterranean pipe line that provides gravity flow of water for domestic purposes. I have drawn in the approximate lying of the pipe. It is of one-inch iron pipe and extends from the tank to the trailer site and beyond to the former homesite of Mr. Ray Denton. I have completed Item No. 14 concerning the date of use and the copy of the spring description sheet.

It is a good thing that I am not in a hurry about obtaining this permit. However, it is very important to me. I await your next set of instructions.

Thanks,

Bruce H. Galvin per Mrs. Bruce H. Galvin

Dear Mr. Galvin:

Your application numbered 49662, which was returned to you for completion, endorsed so that in order to retain its date of priority should have been received in this office on or before February 12, 1973, has not been received.

It has, therefore, lost its priority, but may be reinstated and given a new priority date as of the day it is again received.

Very truly yours,

THOMAS E. SHOOK
Assistant

Davis, CA 95616

Dear Mr. Calvin:

This will acknowledge return of your application numbered 49662 and map.

We will need additional information on your water system in order to arrive at an amount of water that your system may deliver. The location of the pressure pump described in item No. 6 (c) and the uses to be made of the pump should be given and we will also need to know what part of the system will be under gravity flow.

Item No. 14 on your application must be completed to state the date that you intend to have the system operating and using the water for the intended purposes for the first time.

The enclosed spring description sheet must be completed and submitted to support your application.

I am returning your application and map for completion. The application is endorsed so that in order to retain its priority date, it must be received in this office on or before February 12, 1973.

Very truly yours,

WAYNE J. OVERCASH
Assistant

Mr. Wayne J. Overcash
Office of the State Engineer
Water Resources Department
1178 Chemeketa Street N.E.
Salem, Oregon 97310

Dear Mr. Overcash:

I have enclosed my application for a permit complete with the requested changes and additional information.

If it appears that I would not have facilities capable of utilizing one cubic foot of water per second for milling purposes, would you please advise me of the amount that the existing equipment is capable of using. This application process is sort of like putting the cart before the horse. The application is simply one of changing the name. The mill and pumping equipment were already established and used under permit, so I must fit my request to whatever the facilities can maximally use. I do not intend to incorporate new or larger-capacity equipment.

This application will be in the mails on the morning of Saturday, November 4. It is late, perhaps, but I surely hope that it will be in your office by the close of the day November 6, 1972.

Thank you kindly,

Bruce H. Galvin

Mr. Bruce H. Galvin
602 East 11th Street
Davis, CA 95616

Dear Mr. Galvin:

This will acknowledge your application for a permit to appropriate 1.01 cubic foot of water per second from a spring for domestic supplies for one family and for milling purposes, being 0.01 cubic foot of water per second for domestic use and one cubic foot of water per second for milling purposes. A map prepared on tracing paper and fees of \$35 were also received. Our receipt number 30469 is enclosed. Your application has been filed and numbered 49662.

We need additional information on your proposed use of water for milling. Information on the type of equipment used for milling and what you wish to produce may be given in the remarks section of the application.

According to the information given in Item Number 6(c) and Item Number 7(c), it would not appear that you would have facilities capable of utilizing one cubic foot of water per second for milling purposes. Therefore, if additional facilities are to be incorporated in your project, this information should be supplied.

Will you please clearly indicate on your application map the place of use for domestic purposes.

Items Number 13 and 14 on your application must be completed and the application must be signed in the space provided following Item Number 14.

I am returning your application and map for completion. The application is endorsed so that in order to retain its date of priority, it must be received in this office on or before November 6, 1972.

Very truly yours,

Application No. 49662

DESCRIPTION OF SPRING

1. Is spring on property of applicant? No
2. If not, give name and address of legal owner. Bureau of Land Management, Government of the United States of America
3. Have you secured consent of owner to appropriate water from this spring and for construction of pipeline or other works? No
4. If you do not have such consent, do you expect to secure right of way through condemnation? No
5. What is the maximum flow from spring? Maximum flow not known
(Gallons per minute or
cubic feet per second)
What is the minimum flow? One gallon per minute
Is flow measured or estimated? Estimated
6. Does the stream flowing from spring form a well defined natural channel? Yes
7. Does the water flow off the lands on which it first arises? Yes
8. Give the name of the stream or other body of water into which water from the spring flows. Tarter Gulch Creek, Althouse Creek
9. If the water from the spring sinks or evaporates before reaching other water, give distance water flows from spring before vanishing.
Not applicable

PROCEDURE FOR FILING AN APPLICATION FOR A PERMIT
To Appropriate Surface Water

Complete and return the application together with the following:

1. A map of the proposed project prepared in accordance with the requirements stated on pages 7 and 8 of the Rules and Regulations.
2. A copy of the legal description of the property upon which the water is to be used. The description may be copied word for word from the deed abstract, title insurance policy, or sales contract.
3. Payment of the statutory fees which can be determined from the schedule on pages 11 and 12 of the Rules and Regulations.

The normal flow in most streams in this state is now required to satisfy existing rights. Any permit that may be issued would grant a right to appropriate water only when there is a surplus in the source over and above that required to satisfy prior rights.

Any correspondence regarding water rights should be addressed to:
