Emergency Use Permit Application Processing OWRD

Oregon Revised Statute (ORS) 536.700-780 and Oregon Administrative Rule (OAR) 690-019-0040(1) authorize the Director, after the Governor declares that a severe, continuing drought exists, to issue emergency-use permits to replace water not available under an existing right because of the drought. Each application must be for use in a designated drought area.

PLEASE NOTE: Due to widespread drought and decreasing groundwater levels, if a drought emergency is declared in Klamath County, it is unlikely that the Oregon Water Resources Department (Department) will issue Drought Emergency Use Permits for groundwater.

A portion of the application fees for Drought Emergency Use Permits is non-refundable. If the Department evaluates a drought permit application and determines that a permit cannot be issued, the recording fee is refunded, and the Department will retain the exam fee.

1. Completeness Determination

The Department evaluates whether the application and accompanying map contain all of the information required under OAR 690-019-0040, OAR 690-019-0050, and OAR 690-019-0100 (www.oregon.gov/owrd/law). When an application does not contain all the information and supporting material required by the application form and these rules, the application will be declared incomplete, and the applicant notified. Additionally, the application may be returned with a request for additional information, and the applicant will have 30 days to complete the application. If the applicant fails to complete the application within 30 days, it will be rejected.

2. Public Notice

Public notice of receipt of emergency use applications and approval of such applications will be included in the Department's regular public notice of applications.

3. Final Order Issued

The Director shall approve an application for emergency water use upon findings that the proposed use will not cause injury to existing water rights and will not impair or be detrimental to the public interest. In evaluating whether the proposed use will impair or be detrimental to the public interest, the Director shall consider the factors described in OAR 690-310-0120 and OAR 690-310-0130.

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application.
- I cannot use water legally until the Water Resources Department issues a permit.
- Oregon law requires that a permit be issued before beginning construction of any proposed well. Acceptance of this application neither guarantees an emergency use permit will be issued nor indicates that a permanent water right may be obtained.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be cancelled.
- The water use must be compatible with local comprehensive land-use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water-right holders to get water to which they are entitled.

I (we) affirm that the information contained in this application is true and accurate.

There are no encumbrances.

This land is encumbered by easements, rights of way, roads or other encumbrances.

No

I have a recorded easement or written authorization permitting access.

I do not currently have written authorization or easement permitting access.

Written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigation and/or domestic use only (ORS 274.040).

Water is to be diverted, conveyed, and/or used only on federal lands.

List the names and mailing addresses of all affected landowners (*attach additional sheets if necessary*).

* Licensed drillers are required to attach a Department-supplied Well Tag, with a unique Well ID or Well Tag Number to all new or newly altered wells. Landowners can request a Well ID for existing wells that do not have one. The Well ID is intended to serve as a unique identification number for each well.
 ** A well log ID (e.g. MARI 1234) is assigned by the Department to each log in the agency's well log database. A separate well log is required for each subsequent alteration of the well.

Rights affected by drought:
 County in which use will occur: Jackson
(if the right is located in Klamath Basin/County you must complete Section 8)
 Please indicate the total number of acres to be irrigated (must match map): 5 acres
 List the Permit or Certificate number(s) of the water right(s) affected by drought: Permit 30464
 Indicate the maximum total number of acre-feet you expect to use in an irrigation season: 4.5

SECTION 5: WATER MANAGEMENT

A. Diversion and Conveyance

What equipment will you use to pump water from your well(s)?

- Pump (give horsepower and type): 3/4 hp submersible pump
- Other means (describe): _____

Provide a description of the proposed means of diversion, construction, and operation of the diversion works and conveyance of water.

Water will be delivered from well house via pipe and distributed to field via drip tape

B. Conservation

Please describe why the amount of water requested is needed and measures you propose to: prevent waste; measure the amount of water diverted; and prevent the discharge of contaminated water to a surface stream.

Use of well is proposed to mitigate affects of drought on Pleasant Creek. Water is needed to produce 1 acre commercial cannabis crop. Water will be applied via drip tape directly to plants, thereby minimizing any waste. Water applied by drip tape is directly absorbed by the plants/soil therefore no contaminated discharge will reach Pleasant Creek.

SECTION 6: WITHIN A DISTRICT

Check here if any of the water rights affected by drought are located within or served by an irrigation or other water district.

Irrigation District Name	Address	
City	State	Zip

Yes No Has the irrigation district transferred the primary irrigation water right to another place of use for this irrigation season?

Projected irrigation season allotment, if known: _____

SECTION 7: DROUGHT INFORMATION

Explain how drought conditions have created an inability to obtain water under your existing right(s), and any other remarks to clarify any other information (*attach additional sheets as necessary*).

This request is for a temporary emergency change in source from surface water to groundwater due to drought conditions. The request does not increase the authorized acreage, does not expand the place of use, and does not exceed the authorized quantity of water under Permit #30464. The place of use remains within the existing approved map. The flow of Pleasant Creek at existing intake point is insufficient to fully utilize water rights granted by Permit 30464. The temporary emergency use of existing ground water JACK 57572 will help mitigate low flow in Pleasant Creek while replacing the needed water for commercial agriculture operations.

SECTION 8: KLAMATH BASIN/COUNTY WELL INFORMATION

PLEASE NOTE: Due to the pervasive drought and rapidly declining groundwater levels in the Klamath Basin, the Oregon Water Resources Department is unlikely to issue Drought Emergency Use Permits for groundwater in the Klamath Basin.

A functioning, totalizing flowmeter will be required for any drought permits issued. Is there currently a flowmeter installed on each of the PODs listed in the table in Section 3 of this application? Yes No*

*Please note that watermaster staff will visit the well to confirm flowmeter presence prior to issuance of an emergency drought groundwater permit. Where possible, watermaster staff will take a static water level measurement. Alterations to the well head may be required in order to make the water level measurements and these may be conditions of the permit.

For each well, please provide a description of the flowmeter location, the serial number, the current flowmeter reading and the date the reading was taken in the table below.

a tributary of Evans Creek (Rogue River) for the purpose of irrigation of 5.0 acres

under Permit No. 30464 of the State Engineer, and that said right to the use of said waters has been perfected in accordance with the laws of Oregon; that the priority of the right hereby confirmed dates from May 10, 1965

that the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to an amount actually beneficially used for said purposes, and shall not exceed 0.06 cubic foot per second

or its equivalent in case of rotation, measured at the point of diversion from the stream. The point of diversion is located in the SE 1/4 NW 1/4, Section 15, T. 34 S., R. 4 W., W. M. Diversion point located 690 feet North and 1380 feet West from SE Corner, SW 1/4 NE 1/4, Section 15.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to one-eightieth of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 4 1/2 acre feet per acre for each acre irrigated during the irrigation season of each year;

and shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right hereby confirmed, and to which such right is appurtenant, is as follows:

5.0 acres SW 1/4 NE 1/4
Section 15
T. 34 S., R. 4 W., W. M.

The right to the use of the water for the purposes aforesaid is restricted to the lands or place of use herein described.
