WATER RESOURCES DEPT.
SALEM, OREGON

June 30, 1997

To: Dwight French, Oregon Water Resource Dept.

From: Curt E. Rose

Subject: Pond Exemption

Mr. French,

During the month of January 1997 we read an article on the state wanting to register as many ponds or reservoirs as possible under an exemption process.

We contacted the Dept. requesting all the forms we needed. I received what I thought were all the proper forms, but after submitting them and being received by your department on Jan. 24, 1997, they were sent back with a checklist of items that were either needed or changed.

Upon receiving the returned package of forms, I called the 800 number to get clarification on all the requirements. After several tries of leaving and returning messages, I was able to finally make contact with Cory. After conversing with Cory, it was noticed that the original form that was sent, was the wrong one for the exemption process and that the checklist of items needing correction was also not needed for the exemption until a later date. The form sent to us was a gray in color form titled, "Application For A Permit To Store Water". From what Cory advised me of was that we were supposed to have been sent a green form for the exemption.

Our pond is less than one acre foot and is for only aesthetic value and not used for irrigating or any other use. We did not know it would be such a long drawn out process to register such a small pond.

In conclusion after talking to Cory we feel that since we were sent the wrong form in the first place and that our completed forms that were sent in prior to the exemption cutoff date that it maybe possible to be sent the proper forms and start the process over again with your approval.

Sincerely,

Curt E. Rose

Oregon Water Resources Department
Application for a Permit to Store Water
Expedited Review Process

For reservoirs that:

- Store less than 9.2 acre-feet of water, or
- Have a dam less than 10 feet high.

Oregon's major river basins:

- | | | |
|---------------|-----------------|--------------|
| 1-North Coast | 8-Grande Ronde | 15-Rogue |
| 2-Willamette | 9-Powder | 16. Umpqua |
| 3-Sandy | 10-Malheur | 17-S. Coast |
| 4-Hood | 11-Owyhee | 18-Mid Coast |
| 5-Deschutes | 12-Malheur L. | 19-Columbia |
| 6-John Day | 13-Goose/Summer | 20-Snake |
| 7-Umatilla | 14-Klamath | |

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. To be eligible to apply under the expedited review process (HB 2376, 1995), your pond must store less than 400,752 cubic feet (43,560 X 9.2).

What do you use water for?

Agriculture, Land Management

General Agriculture	Cranberry
Irrigation	Nursery Operations
Stockwater	Temperature Control
