

Form C (690-9-77)

IMPORTANT—This form is a notice to the Water Resources Director that permittee is ready to make final proof to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the final proof inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the Water Resources Department until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated.

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when all of the water has been applied.

Application No. 59689

NOTICE OF COMPLETE APPLICATION OF WATER TO A BENEFICIAL USE

I, WILLAMINA LUMBER Co., the holder of Permit No. 44808

to appropriate the public waters of the state of Oregon, completely applied the waters to a beneficial use in accordance with the terms of said permit, on the 27 day of OCT, 1980

Remarks:

IN WITNESS WHEREOF, I have hereunto set my hand this 27 day of OCT, 1980

FC Stamp project Engineer 9400 SW BARNES Rd. PORTLAND OR. 97225

Form B (690-9-77)

Application No. 59689

NOTICE OF COMPLETION OF CONSTRUCTION

I, WILLAMINA LUMBER Co., the holder of Permit No. 44808

to appropriate the public waters of the state of Oregon, completed the construction of the works described therein on the 22 day of OCT, 1980

Remarks:

If the works have less capacity than described in the permit, or you have definitely abandoned part of the proposed development, you should so state in order that our records may not be unnecessarily encumbered.

SUBJECT: Specific to General Industrial Notification – Certificates 64321 and 47568

Dear Hampton Lumber Mills Inc,

We have received your letter of March 19, 2026, notifying the Department that Hampton Lumber Mills Inc. is changing from the specific industrial uses of Surface water under Certificates 64321 and 47568 to general industrial uses.

Any general use (new use) of water will continue to occur within the property of the original water right, and the quantity of water used for general industrial purposes will not be greater than the rates and volumes allowed under the original water rights.

The requirements for making the change are established under ORS 540.520(9) and OAR 690-380-2340. Your letter appears to include all of the information required under the statutes and rules. We will file your notifications in our water right records.

Current statutes and rules do not include a process for Department review and approval of notifications of specific to general industrial changes. Any issues associated with eligibility and compliance will be addressed by the Watermaster during normal distribution and regulation activities.

Please do not hesitate to contact me at 503-986-0892 or Joan.M.Smith@water.oregon.gov if I may be of assistance.

Sincerely,

Joan M. Smith

TRANSFER No. 3147
Application No. Permit No.
IN NAME OF

..... WILLAMINA LUMBER CO.

Surveyed OCT. 13. 1976., by L. H. NUNN.....

STATE OF OREGON
COUNTY OF YAMHILL
PROPOSED CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

WILLAMINA LUMBER COMPANY
9400 SW BARNES ROAD, SUITE 400
PORTLAND, OREGON 97225

confirms the right to use the waters of WILLAMINA CREEK, a tributary of SOUTH YAMHILL RIVER, for the purpose of MANUFACTURING AND FIRE PROTECTION.

The right has been perfected under Permit 44808. The date of priority is JANUARY 7, 1980. The right is limited to not more than 0.2 CUBIC FOOT PER SECOND, BEING 0.19 CFS FOR MANUFACTURING AND 0.01 CFS FOR FIRE PROTECTION, or its equivalent in case of rotation, measured at the point of diversion from the source.

The point of diversion is located as follows:

NW 1/4 NW 1/4, AS PROJECTED WITHIN DLC 38, SECTION 1,
T 6 S, R 7 W, W.M.; 988 FEET SOUTH AND 1252 FEET EAST FROM NW CORNER
SECTION 1.

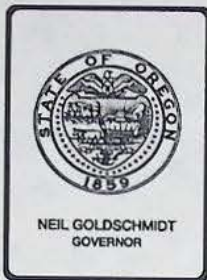

The right shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

LOT 1 (NE 1/4 NW 1/4)
SECTION 1
TOWNSHIP 6 SOUTH, RANGE 7 WEST, W.M.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described. The right is subject to minimum flows established by the Water Resources Commission with an effective date prior to this right.

Permit No. 44808

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 0.19 cubic feet per second measured at the point of diversion from the stream, or its equivalent in case of rotation with other water users, from Willamina Creek

The use to which this water is to be applied is manufacturing at veneer and log mills and maintenance of fire protection equipment being 0.4 cfs for manufacturing and 0.01 cfs for maintenance of fire protection equipment

If for irrigation, this appropriation shall be limited to of one cubic foot per second or its equivalent for each acre irrigated

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The priority date of this permit is January 7, 1980

Actual construction work shall begin on or before May 21, 1981 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1982

Complete application of the water to the proposed use shall be made on or before October 1, 1983

ATTENTION: Tom Schmit, V.P.

REFERENCE: File Number 59689

Your application number 59689 describing a proposed use of 0.41 cubic foot of water per second from Willamina Creek, being 0.4 cubic foot per second for manufacturing and 0.01 cubic foot per second for maintenance of fire equipment; together with the map; has been reviewed.

It will be necessary for you to complete item number 6 on the application by giving a brief description of the proposed water system.

Items 7, 8, and 9 must be completed by stating the dates of the intended progress of the project.

If the mill site illustrated in government lot 1 of Section 1 illustrated on your map will be the location of both the new veneer mill and small log mill, this should be further noted on the map.

We will need additional information on your uses of water for the manufacturing purposes to justify the amount of 0.4 cubic foot per second requested. This information may be supplied under item number 6 or on a separate sheet.

I am returning the application and map for completion. The application is endorsed so that it must be received in this office on or before June 17, 1980 to retain the priority date.

Sincerely,

Wayne J. Overcash
Water Rights Engineer

Report

February 22, 1980

To: Larry Jebousek, Water Resources Department and
Lincoln Pearson, Fish and Wildlife Department

From: Michael Ladd, Watermaster

Subject: Water right application file # 59689 Willamina
Lumber Company

Water Resources: The water right application file # 59689 in the name of Willamina Lumber Company proposes to appropriate water from Willamina Creek for manufacturing (0.40 C.F.S.) and maintenance of fire protection equipment (0.01 C.F.S.). According to Ralph Jackson, Supervisor of applications and permits, there is a need of further clarification from Willamina Lumber Company on the amount of water needed for manufacturing. The amount of water needs to be justified depending on the extent of use in the manufacturing process. It may be possible that this amount of water cannot be justified, but on the otherhand it could be possible that this amount of water could be increased if there is justification for this. The point of diversion is located 988' South and 1,252' East from the Northwest corner of section 1 T.6S., R.7W.W.M. being within the NW $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 1 T.6S., R.7W.W.M. The average flow for Willamina Creek at U.S.G.S. Gage 14-1930 located in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 13 T.5S., R.7W.W.M. river mile 6.2, for the months of July, August and September are 29.45 C.F.S., 20.5 C.F.S., and 105.8 C.F.S. respectively. This information was obtained from the U.S.G.S. publication of Water Data for the water years 1977 and 1978. There are three named creeks that flow into Willamina Creek below U.S.G.S. Gage 14-1930 and they are Wilson, Tindle and Ash Point Creek. The flows from these three creeks would not be monitored by the U.S.G.S. Gaging Station as their confluence is downstream from the station. The amount of water required to fullfill the water rights the full length of Willamina Creek is 25 C.F.S. There are several large appropriations of water for Municipal use. The City Of Sheridan has a water right for 8.0 C.F.S. and the City Of Willamina has several water rights totaling 2.80 C.F.S.

Minimum Flow Policy: There is a Minimum Flow on Willamina Creek and its tributaries for 20.0 C.F.S. located at U.S.G.S. Gage 14-1930 in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 13 T.6S., R.7 W.W.M. river mile 6.2. There is also a minimum flow on the South Yamhill River and its tributaries for 15 C.F.S. located in the NW $\frac{1}{4}$ Section 5 T.5S., R.4W.W.M. near Whiteson, Oregon. The Yamhill River and its tributaries has a minimum flow of 15 C.F.S. located in Section 7 T.4S., R.3W.W.M.

at Lafayette, Oregon. Willamina Creek is a tributary of the South Yamhill River and the South Yamhill River is a tributary of the Yamhill River. If the flow of water drops below the minimum flow specified, water rights will be shut off upstream from the point specified starting with the most recent water right filed.

Conclusion: If a permit is issued to application # 59689 it will be subject to the minimum flow policy as well all prior water rights.

Sincerely,

Michael F. Ladd
