

SP-70900-119

Form C (690-9-77)

IMPORTANT—This form is a notice to the Water Resources Director that permittee is ready to make **final proof** to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the **final proof** inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the Water Resources Department until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated.

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when all of the water has been applied.

Application No. 68527

NOTICE OF COMPLETE APPLICATION OF WATER TO A BENEFICIAL USE

Roy Goldsborough, the holder of Permit No. 49557, appropriate the public waters of the state of Oregon, completely applied the waters to a beneficial use in accordance with the terms of said permit, on the 15th day of Sept., 19 88.

Remarks: Due to theft an system has been replaced (3) times. - the reason for delay.

IN WITNESS WHEREOF, I have hereunto set my hand this 10th day of May, 19 89

Roy Goldsborough

Form B (690-9-77)

Application No. 68527

NOTICE OF COMPLETION OF CONSTRUCTION

Roy Goldsborough, the holder of Permit No. 49557, to appropriate the public waters of the state of Oregon, completed the construction of the works described therein on the 10 day of Aug., 19 86.

Remarks: At This Time Were Using Less Than Capacity.

Note: We Will Be Using Are Or 5 cfs, On Completion of Mill.
If the works have less capacity than described in the permit, or you have definitely abandoned part of the proposed development, you should so state in order that our records may not be unnecessarily encumbered.

IN WITNESS WHEREOF, I have hereunto set my hand this 26 day of Oct., 19 87

Roy Goldsborough
(Signature of Applicant)

6162 Monument Dr. Grants Pass, Or.
(Address)

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when construction work is completed.

We have received your notice that complete application of water has been made under permit 49557

At a later date, a representative of this office will make an inspection and survey of your project.

You will be mailed a proposed certificate of water right covering the actual use of water as found by our Inspector. Any use described in the permit that was not made will not be included in the certificate.

In the meantime, the permit you hold is valid evidence of your right so long as you continue to use the water.

If you have any questions, please contact the Survey/Mapping Section at 378-3739.

Grants Pass, Oregon 97526

Reference File: 68527

According to the terms of your Permit 49557 complete application of water was to have been made by October 1, 1988.

Complete application of water means the application of water to beneficial use under the permit to the full extent intended. In the case of irrigation, it means beneficial irrigation of all the lands the permittee intends to cover under the terms of the permit. If the water has been used, you should promptly submit notice describing the extent of completion as set forth in the letter accompanying your permit and also in our postal card of October 25, 1988.

ORS 537.260 provides that: "Whenever the time within which any appropriation under a permit should have been perfected has expired and the owner of the permit fails or refuses within three months thereafter to submit to the Water Resources Director proof of completion of the appropriation as required by ORS 537.230 and 537.250, the Water Resources Director may, after 60 days notice by registered mail, order the cancellation of the permit."

In accordance with the provision of ORS 537.260, you are hereby notified that unless proof of beneficial use is received within 60 days from the date of this letter, the permit may be canceled without further notice.

If you are no longer interested in the project described by the permit, we would appreciate being advised. If the property involved has been sold and any part of the project was completed, you should assign the permit to the new owner. An assignment form will be furnished upon request.

If additional information is needed, please contact the Survey/Mapping Section.

6162 Monument Drive
Grants Pass, OR 97526

Dear Mr. Goldborough:

REFERENCE: File 68527

Your notice of completion of construction under the terms of Permit 49557 has been received.

The time limit for complete use of water is October 1, 1988, so you have more time to make full use of the water. Since you state that less than the 0.5 cubic foot per second of water has been used, we will consider the Form C submitted to have been in error.

I am enclosing another Form C for reporting when full use has been made.

Sincerely,

STEVEN P. APPLGATE
Water Right Specialist

WJO:kh

COPY

September 25, 1985

Roy Goldbourogh and Ken Staples
6162 Monument Drive
Grants Pass, OR 97526

REFERENCE: File 68527

Your Application 68527 describing the proposed use of 1.0 cubic foot of water per second from Snail Back Creek for mining of Forgotten Copper #1 and Silver Slip #1, together with the copies of the two Notice of Mining Location Claims and two copies of the map, has been reviewed.

It will be necessary for you to supply additional information and make certain amendments on the application before it can be considered for approval.

The bearings you have used in locating the points of diversion do not appear to be proper. According to the information illustrated on the maps you submitted, the northerly diversion appears to be on a bearing of South 70 degrees West from the reference corner and the southerly diversion appears to be on the bearing of South 66.5 degrees West from the reference corner instead of the 148 degrees and 150 degrees southwest presently noted in the first part of Item 2 of your application. Also, according to the information illustrated on the map, both points of diversion would be located within the NE 1/4 NE 1/4 of Section 6 instead of the NE 1/4 SW 1/4 presently noted in the latter part of Item 6. Whichever is in error will need to be corrected.

We will need a little more information on the location of the place of use of water. You have noted in Item 3 that the mining claim is located in the SE 1/4 NE 1/4 of Section 6. However, according to your map, the claims are located in several quarter-quarter sections. If it is your intention to haul your mining material to the one area in the SE 1/4 NE 1/4 of the section and utilize water only at this point, this should be clearly indicated on your supporting map and the fifth column of Item 3 should only list the use: "mining" instead of listing the mining claim.

The water system you have described in Item 6 of the application appears only to have a capacity of about 15 gallons of water per minute which is considerably less than the 1.0 cfs (450 gpm) requested in Item 4 of the application. Since the Water Resources Director should only issue a permit for the amount of water that may be beneficially used, we will need additional information to justify the amount of water you have requested or the permit will be issued for considerably less than the 1.0 cfs requested.

Roy Goldbourogh and Ken Staples
September 25, 1985
Page 2

The dimensions of the sections on the maps you submitted do not agree with the scale of one inch equals 500 feet noted. According to our records, the east line of Section 6 of Township 38 South, Range 8 West is 82.64 chains long. This line on the large map you submitted measures only about 74 chains. The map to support the application will need to be prepared to a standard even scale of not less than four inches equal to the mile. In addition to the information supplied on the maps submitted, the distances and bearings to each point of diversion will need to be noted and you will need to clearly indicate the area where water will be used for the mining purpose. Also, the location of the settling tanks or ponds should be noted. The dimensions of these tanks or ponds should also be included in Item 6 of the application.

If you haven't already, you need to contact the Department of Environmental Quality to determine the requirements they may have for your project.

I am returning your application along with the two maps you submitted for correction and completion. The application is endorsed so that in order to retain its priority date it must be received in this office on or before November 25, 1985.

Sincerely,

WAYNE J. OVERCASH
Senior Water Rights Examiner

DESCRIPTION OF CLAIM.

Notice of Mining Location

VEIN OR LODE CLAIM

STATE OF OREGON,

County of

Josephine

RIDER ATTACHED

Application No. 68527

Permit No. 49557

Waldo Mining District

NOTICE HEREBY IS GIVEN that the undersigned locators, each a citizen of the United States or one who has declared his intention to become such, have discovered a vein or lode of locatable mineral bearing rock in place upon the public domain of the United States which is open to mineral entry and location within the above state, county and mining district; and, in accordance with the laws of the United States and of the State of Oregon, have located and do hereby locate a claim upon such vein or lode by posting this notice of such discovery and location on a substantial post or monument at the point of discovery, marked Post No. 1. The name of the claim is:

Forgotton Copper #1

Claim, further described as follows:

Commencing at a post marked No. 1 (Discovery Post), thence

600

feet in a NW

direction to an end post marked No. 2, thence

300

feet in a NE

direction to a corner post marked No. 3, thence

1500

feet in a SE

direction to a corner post marked No. 4, thence

300

feet in a SW

direction to an end post marked No. 5, thence

300

feet in a SW

direction to a corner post marked No. 6, thence

1500

feet in a NW

direction to a corner post marked No. 7, thence

300

feet in a NE

direction to said end post marked No. 2.

The locators claim

600

feet in a NW

direction from point of discovery to the

North

end line and

900

feet in the opposite direction from point of discovery to the

South

end line and

300

feet on each side of the middle of said vein or lode, further claiming all the surface rights, privileges and minerals, with all dips, spurs, angles and variations, and other rights granted by existing laws and customs. This claim is further described as being

feet from a natural object or permanent monument in the vicinity,

to-wit:

the Discovery Point is 2960' SW 20° west of the NE corner of Sec 6

The general course or strike of the vein or lode as nearly as may be determined is

SW to NE

with reference to the natural object or permanent monument described above.

No claim shall extend more than three hundred feet on each side of the middle of the vein at the surface ***. The end lines of each claim shall be parallel to each other."

Sec. 28—"... The location must be distinctly marked on the ground so

that its boundaries can be readily traced. All records of mining claims *** shall contain the name or names of the locators, the date of the location, and such a description of the claim or claims located by reference to some natural object or permanent monument as will identify the claim.***"

Sec. 34—"The description of vein or lode claims upon surveyed lands shall designate the location of the claims with reference to the lines of the public survey, but need not conform therewith ***."

Excerpts from Chapter 517, Oregon Revised Statutes Re: Location—Vein and Lode Claims

517.010. Location of mining claims upon veins or lodes. (1) Any person, a citizen of the United States, or one who has declared his intention to become such, who discovers a vein or lode of mineral-bearing rock in place upon the unappropriated public domain of the United States within this state, may locate a claim upon such vein or lode by posting thereon a notice of such discovery and location. The notice shall contain:

- The name of the lode or claim.
- The names of the locators.
- The date of the location.
- The number of linear feet claimed along the vein or lode each way from the point of discovery, with the width on each side of the lode or vein.
- The general course or strike of the vein or lode as nearly as may be, with reference to some natural object or permanent monument in the vicinity, and by defining the boundaries upon the surface of each claim so that the same may be readily traced.

(2) Such boundaries shall be marked within 30 days after posting of such notice by six substantial posts, projecting not less than three feet above the surface of the ground, and not less than four inches square or in diameter, or by substantial mounds of stone, or earth and stone, at least two feet in height, to-wit: one such post or mound of rock at each corner and at the center ends of such claims.

CAUTION: The laws of nearly all western states contain special requirements for location notices. These requirements differ from state to state. The Oregon requirements are used for this form. If the claim for which this form is used is situated outside of Oregon, change the name of the state on the reverse side and, before locating the claim, carefully check this location notice with the laws of the state and the regulations of the mining district in which the claim is situated to ensure that the notice contains all things required.

CLAIM INFORMATION

Necessary steps in locating a vein or lode claim.

- Make a discovery of a valuable mineral deposit on federal land that is open to mineral entry and location.
- Post a completed notice of location at the point of discovery on a post or monument.
- Stake claim within 30 days of date of posting notice.
- File copy of notice of location with county clerk for the county in which the claim is located. Filing fee is as set by ordinance of the county governing body. Notice may be mailed in for recording. Notice must be recorded within 60 days from the posting of the notice on the claim.
- Record the claim with the BLM state office within 90 days after the date of location of the claim. If record by mail, obtain a return receipt.

Area and shape of a vein or lode claim.

A vein or lode claim can be not more than 1500 feet in length and can extend not more than 300 feet on either side of the vein or lode (Fig. 1-A). A full sized vein or lode claim embraces an area of slightly more than 20½ acres. Although most claims are rectangular they may have a variety of shapes, the only requirement being that the end-lines be parallel. In the case of non-rectangular claims it should be noted that the end-lines need not be limited to 600 feet in length (Fig. 1-B).

Requirements of a vein or lode claim (Fig. 1-C).

- Location notice posted at or near point of discovery.
- At a minimum, four claim corner posts, or mounds of stone, and two center end posts, or mounds of stone. All posts must be at least 4 inches square or in diameter, and must project at least 3 feet above the ground. Mounds of stone, or earth and stone, must be at least 2 feet in height.

IMPORTANT NOTICE: A mining claim is deemed abandoned under 43 U.S. Code Sec. 1744 unless a copy of the official record of the notice of location is filed with the state office of the Bureau of Land Management in Portland within 90 days after the date of location of the claim. Because BLM recordation regulations change periodically, you should obtain recordation regulations from your local BLM office to determine effective requirements for recordation of notices of location, affidavits of annual assessment work, and notices of intention to hold a mining claim. Additional regulations of the BLM and the Forest Service may apply to the conducting of mining operations on national forest and BLM administered lands.

Vein or lode or placer location.

A placer discovery will not sustain a lode location, nor will a lode discovery sustain a placer location. Vein or lode claims are generally located where minerals occur in place in veins or lodes. For a lode claim there must be "... veins or lodes of quartz or other rock in place bearing gold, silver, cinnabar, lead, tin, copper or other valuable deposits ***." 30 U.S. Code Sec. 23.

Placer claims are generally located where minerals have been derived from rocks or veins to form deposits such as stream gravels and gold-bearing alluvium.

VEIN OR LODE CLAIM

STATE OF OREGON,

Application No. 6827

County of

Josephine

Permit No.

Waldo

Mining District

THIS DIAGRAM EXPLAINS METHOD OF DESCRIPTION OF CLAIM.

NOTICE HEREBY IS GIVEN that the undersigned locators, each a citizen of the United States or one who has declared his intention to become such, have discovered a vein or lode of locatable mineral bearing rock in place upon the public domain of the United States which is open to mineral entry and location within the above state, county and mining district; and, in accordance with the laws of the United States and of the State of Oregon, have located and do hereby locate a claim upon such vein or lode by posting this notice of such discovery and location on a substantial post or monument at the point of discovery, marked Post No. 1. The name of the claim is:

SILVER SLIP #1

Claim, further described as follows:

Commencing at a post marked No. 1 (Discovery Post), thence

400	feet in a	South	direction to an end post marked No. 2, thence
300	feet in a	West	direction to a corner post marked No. 3, thence
1500	feet in a	NORTH	direction to a corner post marked No. 4, thence
300	feet in a	East	direction to an end post marked No. 5, thence
300	feet in a	East	direction to a corner post marked No. 6, thence
1500	feet in a	South	direction to a corner post marked No. 7, thence
300	feet in a	West	direction to said end post marked No. 2.

The locators claim 400 feet in a South direction from point of discovery to the end line and

300 feet in the opposite direction from point of discovery to the North end line and

300 feet on each side of the middle of said vein or lode, further claiming all the surface rights, privileges and minerals, with all dips, spurs, angles and variations, and other rights granted by existing laws and customs. This claim is further described as being 10 feet from a natural object or permanent monument in the vicinity,

to-wit: SNAIL BACK FALLS

The general course or strike of the vein or lode as nearly as may be determined is South to North with reference to the natural object or permanent monument described above,

Notice of Mining Location ~~UNDER ATTACHEE~~

VEIN OR LODE CLAIM

Application No. 48627

STATE OF OREGON,

Permit No.

County of

Josephine

Waldo

Mining District

NO. 4	NO. 3
NO. 5	NO. 2
LOCATION DISCOVERY POST NO. 1	
NO. 6	NO. 7

THIS DIAGRAM EXPLAINS METHOD OF
DESCRIPTION OF CLAIM.

NOTICE HEREBY IS GIVEN that the undersigned locators, each a citizen of the United States or one who has declared his intention to become such, have discovered a vein or lode of locatable mineral bearing rock in place upon the public domain of the United States which is open to mineral entry and location within the above state, county and mining district; and, in accordance with the laws of the United States and of the State of Oregon, have located and do hereby locate a claim upon such vein or lode by posting this notice of such discovery and location on a substantial post or monument at the point of discovery, marked Post No. 1. The name of the claim is:

SILVER SLIP #1

Claim, further described as follows:

Commencing at a post marked No. 1 (Discovery Post), thence

400	feet in a	South	direction to an end post marked No. 2, thence
300	feet in a	West	direction to a corner post marked No. 3, thence
1500	feet in a	North	direction to a corner post marked No. 4, thence
300	feet in a	East	direction to an end post marked No. 5, thence
300	feet in a	East	direction to a corner post marked No. 6, thence
1500	feet in a	South	direction to a corner post marked No. 7, thence
300	feet in a	West	direction to said end post marked No. 2.

The locators claim 400 feet in a South direction from point of discovery to the South end line and 300 feet in the opposite direction from point of discovery to the North end line and 300 feet on each side of the middle of said vein or lode, further claiming all the surface rights, privileges and minerals, with all dips, spurs, angles and variations, and other rights granted by existing laws and customs. This claim is further described as being 10 feet from a natural object or permanent monument in the vicinity, to-wit: SNAIL BACK FALLS

The general course or strike of the vein or lode as nearly as may be determined is South to North with reference to the natural object or permanent monument described above.

This claim is situated in the NE (designate quarter section) of Section 6, Township 38 S, Range 8 W, of the Willamette Meridian, as surveyed by the U.S. Government or protracted if the land is unsurveyed

The end lines of the claim are parallel to each other. The adjoining claims are None

This notice is placed conspicuously at discovery post No. 1; posts are placed at each corner and both center ends. The location of this claim is distinctly marked on the ground so that the boundaries of the claim may be readily traced. In construing this location notice, the singular includes the plural and vice versa, where the context so requires.

Located 2-15, 1985.

Excerpts from the mining laws of the United States, 30 U.S. Code Annotated

Sec. 23—"*** A mining claim *** may equal, but shall not exceed, one thousand five hundred feet in length along the vein or lode; but no location of a mining claim shall be made until the discovery of the vein or lode within the limits of the claim located. No claim shall extend more than three hundred feet on each side of the middle of the vein at the surface ***. The end lines of each claim shall be parallel to each other."

Sec. 28—"*** The location must be distinctly marked on the ground so

that its boundaries can be readily traced. All records of mining claims *** shall contain the name or names of the locators, the date of the location, and such a description of the claim or claims located by reference to some natural object or permanent monument as will identify the claim.***"

Sec. 34—"The description of vein or lode claims upon surveyed lands shall designate the location of the claims with reference to the lines of the public survey, but need not conform therewith ***."

Excerpts from Chapter 517, Oregon Revised Statutes Re: Location—Vein and Lode Claims

517.010. Location of mining claims upon veins or lodes. (1) Any person, a citizen of the United States, or one who has declared his intention to become such, who discovers a vein or lode of mineral-bearing rock in place upon the unappropriated public domain of the United States within this state, may locate a claim upon such vein or lode by posting thereon a notice of such discovery and location. The notice shall contain:

- The name of the lode or claim.
- The names of the locators.
- The date of the location.
- The number of linear feet claimed along the vein or lode each way from the point of discovery, with the width on each side of the lode or vein.
- The general course or strike of the vein or lode as nearly as may be, with reference to some natural object or permanent monument in the vicinity, and by defining the boundaries upon the surface of each claim so that the same may be readily traced.

(2) Such boundaries shall be marked within 30 days after posting of such notice by six substantial posts, projecting not less than three feet above the surface of the ground, and not less than four inches square or in diameter, or by substantial mounds of stone, or earth and stone, at least two feet in height, to-wit: one such post or mound of rock at each corner and at the center ends of such claims.

CAUTION: The laws of nearly all western states contain special requirements for location notices. These requirements differ from state to state. The Oregon requirements are used for this form. If the claim for which this form is used is situated outside of Oregon, change the name of the state on the reverse side and, before locating the claim, carefully check this location notice with the laws of the state and the regulations of the mining district in which the claim is situated to ensure that the notice contains all things required.

CLAIM INFORMATION

Necessary steps in locating a vein or lode claim.

- Make a discovery of a valuable mineral deposit on federal land that is open to mineral entry and location.
- Post a completed notice of location at the point of discovery on a post or monument.
- Stake claim within 30 days of date of posting notice.
- File copy of notice of location with county clerk for the county in which the claim is located. Filing fee is as set by ordinance of the county governing body. Notice may be mailed in for recording. Notice must be recorded within 60 days from the posting of the notice on the claim.
- Record the claim with the BLM state office within 90 days after the date of location of the claim. If record by mail, obtain a return receipt.

Area and shape of a vein or lode claim.

A vein or lode claim can be not more than 1500 feet in length and can extend not more than 300 feet on either side of the vein or lode (Fig. 1-A). A full sized vein or lode claim embraces an area of slightly more than 20½ acres. Although most claims are rectangular they may have a variety of shapes, the only requirement being that the end-lines be parallel. In the case of non-rectangular claims it should be noted that the end-lines need not be limited to 600 feet in length (Fig. 1-B).

Requirements of a vein or lode claim (Fig. 1-C).

- Location notice posted at or near point of discovery.
- At a minimum, four claim corner posts, or mounds of stone, and two center end posts, or mounds of stone. All posts must be at least 4 inches square or in diameter, and must project at least 3 feet above the ground. Mounds of stone, or earth and stone, must be at least 2 feet in height.

IMPORTANT NOTICE: A mining claim is deemed abandoned under 43 U.S. Code Sec. 1744 unless a copy of the official record of the notice of location is filed with the state office of the Bureau of Land Management in Portland within 90 days after the date of location of the claim. Because BLM recordation regulations change periodically, you should obtain recordation regulations from your local BLM office to determine effective requirements for recordation of notices of location, affidavits of annual assessment work, and notices of intention to hold a mining claim. Additional regulations of the BLM and the Forest Service may apply to the conducting of mining operations on national forest and BLM administered lands.

Vein or lode or placer location.

A placer discovery will not sustain a lode location, nor will a lode discovery sustain a placer location. Vein or lode claims are generally located where minerals occur in place in veins or lodes. For a lode claim there must be "*** veins or lodes of quartz or other rock in place bearing gold, silver, cinnabar, lead, tin, copper or other valuable deposits ***." 30 U.S. Code Sec. 23.

Placer claims are generally located where minerals have been derived from rocks or veins to form deposits such as stream gravels and gold-bearing alluvium.

Application No. 68527

Permit No.

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 0.5 cubic feet per second measured at the point of diversion from the stream, or its equivalent in case of rotation with other water users, from Snailbuck Creek trib. Illinois River

The use to which this water is to be applied is mining

If for irrigation, this appropriation shall be limited to of one cubic foot per second or its equivalent for each acre irrigated.

GR(R) Sediment Removal Clause

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The priority date of this permit is August 26, 1985

Actual construction work shall begin on or before and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 19.

Complete application of the water to the proposed use shall be made on or before October 1, 19.

WITNESS my hand this day of , 19.

IMPORTANT—This form is a notice to the Water Resources Director that permittee is ready to make **final proof** to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the **final proof** inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the Water Resources Department until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated.

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when all of the water has been applied.
