 - (b) Maps shall clearly designate the place of use and point of diversion or appropriation for each source and use.
 - (c) The map shall indicate by description, in relation to the point of diversion or appropriation, the location of any fish screens, by-pass devices, and measuring devices required by the permit or transfer final order.
 - (d) The following statement shall be placed on the map: "This map is not intended to provide legal dimensions or locations of property ownership lines."
- (2) A CWRE may make a written request to the Director for a waiver of one or more mapping standards. The Director will determine whether the waiver shall be allowed and will respond to such requests in writing.

OAR 690-305-0010 General Map Criteria

Each map submitted to the Department shall meet the following general criteria in addition to any specific criteria identified in the rules for the relevant water right transaction:

RE: Permit S-55214

To whom it may concern,

This letter addresses the fish screening and fish passage requirements established by the Oregon Water Resources Department (OWRD) for Permit S-55214. The diversion source is water from the Willamette Basin Project Reservoirs, a tributary of the Willamette River.

There are two points of diversion (POD) associated with this water right. POD 1 (44.11311, -123.0473) is operated by the Muddy Creeks Irrigation Project. Their current screen was previously approved by ODFW on 3/15/1995 and inspected again on 6/20/2025 and found to be operating as previously approved.

The Perrot Farms POD (44.12215, -123.05532) diverts water through a vertical wet-well, constructed with perforated holes. The well is surrounded first by large rock, then by smaller rock, allowing water to infiltrate into the wet well before being pumped to the place of use. This configuration meets ODFW screening requirements; therefore, no additional screening or bypass is needed provided that the water user continues to operate the diversion using this wet well infiltration system.

Fish passage is provided at both sites. There are no artificial obstructions at either POD 1 or the Perrot Farms POD. The permittee shall always maintain adequate passage of native migratory fish (ORS 509.610) at the points of diversion and shall not construct, operate, or maintain a dam or artificial obstruction to fish passage across any waters of the state that are inhabited, or were historically inhabited, by native migratory fish (ORS 509.585).

Please contact me at 541-296-8026 if you need any additional information or have further questions.
Sincerely,

Toby Schuyler
