

State Printing Dept. 49368

August 6, 1958

Mr. Henry C. Schattenkerk
Brockway
Oregon

Dear Mr. Schattenkerk:

This will acknowledge receipt of your authorization to cancel your Permit No. R-1387. Accompanying this authorization was a certificate recording fee of \$1 in connection with Permit No. 21545 for which our receipt No. 18455 is enclosed.

If you will submit the proof of appropriation of water form properly signed which was sent to you July 22, 1958, we will be able to issue the certificate confirming Permit No. 21545.

Very truly yours,

LEWIS A. STANLEY
State Engineer

July 22, 1958

Mr. Henry C. Schattenkerk
Brockway
Oregon

Dear Mr. Schattenkerk:

Enclosed is the proof of appropriation of water form defining the extent of use of water under the terms of your Permit No. 21545. This form need only be dated and signed and returned to this office together with the certificate recording fee of \$1.

According to the report of our field engineer the diversion points are on Brockway Creek and no water has been stored in the reservoir described in Permit No. R-1387. Permit No. R-1387 describes both the construction of the reservoir and storage of water for irrigation. Since the reservoir was not used within the time limits, October 1, 1954, proof cannot be made and the secondary permit is restricted to direct flow of the creek.

So we may clear our records we would appreciate it if you would sign and return the enclosed authorization cancellation of permit. The right to the use of the direct flow of Brockway Creek and irrigation of 2 acres is described in the enclosed proof form and the confirming certificate can be issued to this extent. You may retain the blueprint for your records.

Very truly yours,

LEWIS A. STANLEY
State Engineer

October 22, 1954

Mr. H. C. Schattenkerk
Brockway
Oregon

Dear Mr. Schattenkerk:

This will acknowledge receipt of your notice to the effect that complete application of water has been made under Permit No. R-1387 and 21545.

Pursuant to your notice and in line with the general practice of this office, a survey will be made at a later date for the purpose of checking the acreage actually irrigated. After this survey, proof may be made and certificate issued covering the lands which the survey shows to have been irrigated, and any lands described in the permit that have not been irrigated will be automatically eliminated from the water right.

In the meantime, the permit which you hold will be valid evidence of the water right.

Very truly yours,

Chas. E. Stricklin

CHAS. E. STRICKLIN
State Engineer

September 29, 1954

Mr. Henry C. Schattenkerk
Brockway, Oregon

Dear Mr. Schattenkerk:

This will acknowledge receipt of forms B and C, reporting on completion of construction and complete application of water to its proposed use under Permit No. 21545.

It would appear that maybe the form C may have been prematurely submitted since we have received no report upon the completion of construction of the reservoir evidenced by Permit No. R-1387.

If the reservoir has been completed, you should so report by completing the enclosed form B, which is a duplicate of that attached to the back of your reservoir permit.

Very truly yours,

CHAS. E. STRICKLIN
State Engineer

Oregon

Dear Mr. Schattenkerk:

This is to notify you that your applications, No. R-27366 for a permit to construct a reservoir and store therein 4 acre feet of water, and No. 27367 to appropriate water from Brockway Creek for irrigation, now appear to be in satisfactory form.

Very truly yours,

CHAS. E. STRICKLIN
State Engineer

EKH:mb

June 25, 1952

Mr. Henry C. Schattenkerk
Broclaway, Oregon

Dear Mr. Schattenkerk:

This will acknowledge receipt of your application for a permit to construct a reservoir and store therein about one acre foot of the waters of Broclaway Creek and your application for a permit to appropriate water from Broclaway Creek for the irrigation of two acres, together with your check in the amount of \$15.00 for which our receipt No. 14873 is enclosed.

The fees submitted are sufficient to cover your reservoir application which has been filed and given No. R-27366. Your secondary application for a permit to appropriate the water in question for irrigation can be filed as required by law, upon receipt of the statutory fees in the amount of \$15.00.

Your applications have been checked & some discrepancies are noted.

Item 3 of the reservoir application should be filled in, keeping in mind that one acre foot of water is the quantity of water that would cover one acre to a depth of one foot.

Item 10 should be filled in showing the maximum and mean depth of the water in the proposed reservoir when the reservoir is full. The description of the slope on the back of the proposed dam under item 6 appears to be wrong.

The method of constructing the proposed reservoir and impounding water as contemplated should be described under remarks.

In the secondary application, the location of the point of diversion as described under Item 4 does not agree with this location as shown on the accompanying map. As I interpret your map, Item 8

Henry C. Schattenkerk

- 2 -

Ed K. Humphrey

should be filled in as pencilled and if you agree with this, you should verify it by inking in the pencilled matter.

The acreage described under Item 8 should be the maximum acreage which you intend to irrigate.

For your convenience in completing your applications as suggested, I am enclosing them, together with a map print. The reservoir application is endorsed so that to retain its priority, it must be returned to this office on or before July 25, 1952.

Yours very truly

CHAS. E. STRICKLIN
State Engineer

May 14, 1952

Mr. Henry C. Schattenkerk
Brockway, Oregon

Dear Sir:

This will acknowledge receipt of your letter of May 9, transmitting your incomplete application for a permit to appropriate water from Brockway Creek for irrigation.

For your convenience in completing your application as explained in the Rules and Regulations of the State Engineer, a copy of which is enclosed, I am returning the application herewith.

If you intend to make a reservoir to store water, you should also file a reservoir application using the enclosed blank.

It is essential that the map to accompany your application be drawn as explained on pages 6 to 9 of the Rules and Regulations and regardless of the size of your proposed appropriation, this map should be prepared by someone who has had some experience in surveying and the preparation of maps. It is possible that whoever makes your map can assist you in making out your applications.

On receipt of your applications in proper form, as explained above, accompanied by the required map and the statutory fees as set out in the Rules and Regulations, the applications can be filed as provided by law.

Very truly yours,

CHAS. E. STRICKLIN
State Engineer

Brockway, Ore.

Dear Sirs:

we find it pretty difficult to fill in all the required information as the small ditch or creek by us only a short distance beyond our farm and is dry through the late summer months. we have a natural hollow that is fed by a spring that we should like to dam up to try to secure water for irrigation, perhaps this would come under the heading of storing water. since the nature of the project is not certain as to the amount of water we will have we can not supply this information or if the project will prove successful. do we necessarily need a permit then?

Yours Truly
H.C. Schattenbach
