RECEIVED
MAY - 3 1996
WATER RESOURCES DEPT.
SALEM, OREGON

STATE OF OREGON WATER RESOURCES DEPARTMENT
PUBLIC NOTICE OF WATER USER REQUESTS
Regarding Application S-69623

The Oregon Water Resources Department is evaluating the request by Tualatin Valley Irrigation District to use 36,465 gallons per minute of the waters of the Willamette River Basin for irrigation, agriculture and nursery operations purposes. The permit, if issued, would supplement Permit 35792 which authorizes water use for the Bureau of Reclamation, Tualatin Basin Project. This application does not request additional water. It adds lands to the project to allow rotation of water between fields and requests that water be allowed to be used for agricultural and nursery operations in addition to irrigation.

The proposed place of use is located within Washington County specifically in T1N, R2W; T1N, R3W; T1N R4W; T1S, R4W; T1S, R3W; T2N, R4W; T2S, R1W, T2S, R2W; T2S, R3W and T2S, R4W; W.M. This process is to determine if the request is in compliance with state water laws and regulations. Public participation and comments are encouraged.

ORS 537.130(3) requires notice to all affected landowners and ORS 537.130(4) allows the Department to make this notice through publication in a local newspaper if there are more than 25 landowners involved.

For further information contact the Water Resources Department *Water Rights Information Group at 1(800)624-3199 ext. 499. Written requests may be addressed to the Oregon Water Resources Department at 158 12th St. NE, Salem, Oregon 97310-0210.*

(Apr. 16, 23, 30, 1996)

Application for Extension of Time

In the Matter of the Application for an Extension of Time for Permit S-55199, Water Right Application S-69623 in the name of Tualatin Valley Irrigation District	)))	FINAL ORDER

Permit Information

Application:	S-69623
Permit:	S-55199
Basin:	Lower Willamette / Watermaster District 18
Date of Priority:	May 24, 1988,for 43.75 cfs and December 16, 1988 for 37.5 cfs
Source of Water:	Scoggins Reservoir, constructed under Permit R-5777 and Scoggins Creek, tributaries to the Tualitin River; and the Tualatin River, tributary to the Willamette River
Purpose or Use:	agricultural use on 34,258.78 acres; and primary irrigation of 17,179.98 acres, subject to the following limitation: no more than 17,000 acres shall be irrigated in any one irrigation season. The District must submit a list of all the acres to be irrigated to the Watermaster by June 1, of each year
Maximum Rate/Volume:	81.25 cubic feet per second (cfs), being up to 81.25 cfs from the Tualatin River and 23.6 cfs from Scoggins Creek, with any deficiency in live flow made up from stored water in Scoggins Reservoir, constructed under Permit R-5777

This Extension of Time request is being processed in accordance with Oregon Revised Statute 537.230 and 539.010(5), and Oregon Administrative Rule Chapter 690, Division 315.

Appeal Rights

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Application History

Permit S-55199 was issued by the Department on August 8, 2019. The permit specified complete

application of water to beneficial use by August 8, 2024. On June 5, 2024, Tualatin Valley Irrigation District submitted an Application for Extension of Time for Permit S-55199. In accordance with OAR 690-315-0050(2), on November 19, 2024, the Department issued a Proposed Final Order proposing to extend the time to apply water to full beneficial use from August 8, 2024, to October 1, 2049. The protest period closed January 3, 2025, in accordance with OAR 690-315-0060(1). No protest was filed.

FINDINGS OF FACT

The Department adopts and incorporates by reference the findings in the Proposed Final Order dated November 19, 2024.

At time of issuance of the Proposed Final Order the Department concluded that, based on the factors demonstrated by the applicant, the permit may be extended subject to the following condition:

LIMITATIONS AND CONDITIONS

1. **Checkpoint Condition**
   The permit holder must submit a completed Progress Report Form to the Department by **October 1, 2028, 2033, 2038, 2043, and 2048.** ***A form will be enclosed with your Final Order.***

   (a) At each checkpoint, the permit holder shall submit and the Department shall review evidence of the permit holder's diligence towards completion of the project and compliance with terms and conditions of the permit and extension. If, after this review, the Department determines the permit holder has not been diligent in developing and perfecting the water use permit, or complied with all terms and conditions, the Department shall modify or further condition the permit or extension to ensure future compliance, or begin cancellation proceedings on the undeveloped portion of the permit pursuant to ORS 537.260 or 537.410, or require submission of a final proof survey pursuant to ORS 537.250;

   (b) The Department shall provide notice of receipt of progress reports in its weekly notice and shall allow a 30 day comment period for each report. The Department shall provide notice of its determination to anyone who submitted comments.

CONCLUSION OF LAW

The applicant has demonstrated good cause for the permit extension pursuant to ORS 537.230, 539.010(5) and OAR 690-315-0040(2).

ORDER

The extension of time for Application S-69623, Permit S-55199, therefore, is approved subject to conditions contained herein. The deadline for applying water to full beneficial use within the terms and conditions of the permit is extended from August 8, 2024, to October 1, 2049.

DATED: January 17, 2025

Application for Extension of Time

In the Matter of the Application for an Extension of Time for Permit S-55199, Water Right Application S-69623 in the name of Tualatin Valley Irrigation District	) PROPOSED) FINAL) ORDER

Permit Information

Application:	S-69623
Permit:	S-55199
Basin:	Lower Willamette / Watermaster District 18
Date of Priority:	May 24, 1988,for 43.75 cfs and December 16, 1988 for 37.5 cfs
Source of Water:	Scoggins Reservoir, constructed under Permit R-5777 and Scoggins Creek, tributaries to the Tualitin River; and the Tualatin River, tributary to the Willamette River
Purpose or Use:	agricultural use on 34,258.78 acres; and primary irrigation of 17,179.98 acres, subject to the following limitation: no more than 17,000 acres shall be irrigated in any one irrigation season. The District must submit a list of all the acres to be irrigated to the Watermaster by June 1, of each year
Maximum Rate/Volume:	81.25 cubic feet per second (cfs), being up to 81.25 cfs from the Tualatin River and 23.6 cfs from Scoggins Creek, with any deficiency in live flow made up from stored water in Scoggins Reservoir, constructed under Permit R-5777

Please read this Proposed Final Order in its entirety as it contains additional conditions not included in the original permit.

In summary, the Department proposes to:

- Grant an extension of time to apply water to full beneficial use from August 8, 2024, to October 1, 2049.[1]
- Make the extension subject to certain conditions set forth below.

This Extension of Time request is being processed in accordance with Oregon Revised Statute 537.230 and 539.010(5), and Oregon Administrative Rule Chapter 690, Division 315

[1] Pursuant to ORS 537.230(5), upon the completion of beneficial use of water allowed under the permit, the permit holder shall hire a certified water rights examiner to survey the appropriation. Within one year after the complete application of water to a beneficial use (or by the date allowed for the complete application of water to a beneficial use), the permit holder shall submit a map of the survey and the claim of beneficial use.

PFO – Proposed Final Order
FOF – Finding of Fact
cfs - cubic feet per second

AUTHORITY

Generally, see ORS 537.230 and OAR Chapter 690 Division 315.

ORS 537.230(2) provides in pertinent part that the Oregon Water Resources Department (Department) may, for good cause shown, order an extension of time within which irrigation or other works shall be completed or the right perfected. In determining the extension, the Department shall give due weight to the considerations described under ORS 539.010(5) and to whether other governmental requirements relating to the project have significantly delayed completion of construction or perfection of the right.

ORS 539.010(5) instructs the Director to consider: the cost of the appropriation and application of the water to a beneficial purpose; the good faith of the appropriator; the market for water or power to be supplied; the present demands therefor; and the income or use that may be required to provide fair and reasonable returns upon the investment.

OAR 690-315-0040 provides that in order to approve an application for an extension of time to complete construction or apply water to full beneficial use, the Department shall make the findings in OAR 690-315-0040(1) including a finding that there is "good cause" to approve the extension. OAR 690-315-0040(2)-(4) contains the factors that the Department must consider to make findings that support a "good cause" determination.

OAR 690-315-0050(6) requires the Department, for extensions exceeding five years, to establish checkpoints to determine if diligence is being exercised in the development and perfection of the water use permit. Intervals between checkpoints will not exceed five year periods.

FINDINGS OF FACT

1. On August 8, 2019, Permit S-55199 was issued by the Department. The permit authorizes the use of up to 81.25 cfs of water being up to 81.25 cfs from the Tualatin River, and 23.6 cfs from Scoggins Creek, with any deficiency in live flow made up from stored water in Scoggins Reservoir, constructed for agricultural use on 34,258.78 acres; and primary irrigation of 17,179.98 acres, subject to the following limitation: no more than 17,000 acres shall be irrigated in any one irrigation season. The District must submit a list of all the acres to be irrigated to the watermaster by June 1 of each year. The permit specified construction was to begin by and complete application of water was to be made within five years from the date of permit issuance, being August 8, 2024.

2. On June 5, 2024, Bobby Nuvolini, District Manager for Tualatin Valley Irrigation District, submitted an "Application for Extension of Time" (Application) to the Department, requesting the time to apply water to full beneficial use under the terms and conditions of Permit S-55199 be extended from August 8, 2024, to October 1, 2049. This is the first permit extension requested for Permit S-55199.

3. On June 18, 2024, notification of the Application for Permit S-55199 was published in the Department's Public Notice. No public comments were received.

Review Criteria [OAR 690-315-0040]

In order to approve an Application for an Extension of Time to complete construction and/or apply water to full beneficial use pursuant to ORS 537.230 or 537.630, or to begin construction, pursuant to ORS 537.248, the Department must make the findings in OAR 690-315-0040(1)(a) – (d).

Complete Extension of Time Application [OAR 690-315-0040(1)(a)]

4. On June 5, 2024, the Department received a completed Application and the fee specified in ORS 536.050 from the permit holder.

Start of Construction [OAR 690-315-0040(1)(b) and 690-315-0040(5)]

5. Construction of the water system and reservoir began prior to permit issuance.

6. According to the Application construction began in 1950 under work accomplished in the development for Certificate 88122.

Based on Findings of Fact (FOF) 5, and 6, the Department has determined the permit holder began construction prior to August 8, 2024.

Good Cause [OAR 690-315-0040(1)(d)]

The Department must find that there is "good cause" to approve the extension. In making a "good cause" finding, the Department shall consider the requirements set forth under OAR 690-315-0040(2).

Reasonable Diligence of the Appropriator [OAR 690-315-0040(2)(a)]

In order to make a finding of "good cause" to approve the extension, the Department shall consider whether the applicant has demonstrated "reasonable diligence" in previous performance under the permit. OAR 690-315-0040(2)(a). In determining "reasonable diligence", the Department shall consider, but is not limited to, the following factors: a) The amount of construction completed within the time allowed in the permit or previous extension; b) The amount of beneficial use made of the water during the permit or previous extension time limits; c) Water right holder conformance with the permit or previous extension conditions; and d) Financial investments made toward developing the beneficial use of water.

Amount of Construction [OAR 690-315-0040(3)(a)]
The amount of construction completed within the time allowed in the permit or previous extension.[2]

7. Construction of the water system and reservoir began prior to August 8, 2024.

8. Work accomplished during the original development time frame under Permit S-55199 consists of extending the water conveyance system to additional properties.

The Application provides evidence that progress of physical work, enough to qualify as the minimum necessary, has been made towards completion of the water system for the Department to find good cause and reasonable diligence towards complete application of water to a beneficial use.

Compliance with Conditions [OAR 690-315-0040(3)(c)]
The water right permit holder's conformance with the permit or previous extension conditions.

9. The Department has considered the permit holder's compliance with conditions, and did not identify any concerns.

Based on FOF 9, the Department has determined that the permit holder has demonstrated compliance with permit conditions as required by Permit S-55199.

Beneficial Use of Water [OAR 690-315-0040(3)(b)]
The amount of beneficial use made of the water during the permit time limits or previous extension time limits.

10. A maximum combined rate of 13.3 cfs of water has been diverted from Scoggins Creek and Tualatin River; and a maximum volume of 2,707 acre feet has been estimated to have been diverted to irrigate a maximum of 2,707 acres. The maximum rate and volume have been identified as being diversion that exceed the maximum diversion under the District's other water right certificates.

Based on FOF 10, the Department has determined that beneficial use of water has been demonstrated under Permit S-55199.

Financial Investments to appropriate and Apply Water to a Beneficial Purpose [OAR 690-315-0040(2)(b),(3)(d),(4)(d)]

11. An investment of approximately $63,097 has been made, which is about 15 percent of the total projected cost for complete development of this project. The permit holder

[2] **"Actual Construction"** is defined in OAR 690-315-0020(3)(d)(A)and(B) as physical work performed toward completion of the water system which demonstrates the water right permit holder's good faith and intention to complete the project with reasonable diligence. Actual construction does not include planning a diversion system, formulating a business plan, securing financing, letting contracts, purchasing but not installing equipment, surveying, clearing land or planting crops.

anticipates an additional $350,000 investment is needed for the completion of this project. These costs do not include the investment made in the existing infrastructure developed under Certificate 88122.

The Department has determined that the permit holder had made an investment, which provides evidence of good cause and reasonable diligence towards the complete application of water to a beneficial use.

Reasonable Diligence of the Appropriator *[OAR 690-315-0040(2)(a)]*

The Application provides evidence that work has been accomplished towards completion of the water system; the permit holder has demonstrated compliance with permit conditions; a financial investment has been made, and; beneficial use of water has been demonstrated. The Department has determined the applicant has demonstrated reasonable diligence in previous performance under Permit S-55199.

The Market and Present Demands for Water *[OAR 690-315-0040(4)(a-f)]*

The Department's determinations of market and present demand for water or power to be supplied shall consider the requirements set forth under OAR 690-315-0040(4)(a-f). In accordance with OAR 690-315-0040(4), the Department shall consider, but is not limited to, the following factors when determining the market and the present demand for water or power to be supplied:

- *(a)The amount of water available to satisfy other affected water rights and scenic waterway flows;*
- *(b) Special water use designations established since permit issuance, including but not limited to state scenic waterways, federal wild and scenic rivers, serious water management problem areas or water quality limited sources established under 33 U.S.C. 1313(d);*
- *(c) The habitat needs of sensitive, threatened or endangered species, in consultation with the Oregon Department of Fish and Wildlife;*
- *(d) Economic investment in the project to date;*
- *(e) Other economic interests dependent on completion of the project; and*
- *(f) Other factors relevant to the determination of the market and present demands for water and power.*

OAR 690-315-0040(4)(a)

The amount of water available to satisfy other affected water rights and scenic waterway flows.

12. A review of the amount of water available to satisfy other affected water rights and scenic waterway flows was determined at the time of issuance of Permit S-55199; furthermore, water availability for other affected water rights and scenic waterway flows after the permit was issued is determined when an application for a new water right is submitted.

13. Current Water Availability Analysis for Scoggins Creek, (Tributary to Tualatin River) at the mouth (watershed ID 30201005) shows that no water is available at any time of the year.

14. Current Water Availability Analysis for Tualatin River (tributary to Willamette River) at the mouth (watershed ID 175) shows that water is available during the months of January, February, March, April, May, and December.

15. Current Water Availability Analysis has determined water is available from Scoggins Reservoir, constructed under R-5777, under contract 14-06-100-6956, between the District and the U.S. Bureau of Reclamation.

OAR 690-315-0040(4)(b)
Special water use designations established since permit issuance, including but not limited to state scenic waterways, federal wild and scenic rivers, serious water management problem areas or water quality limited sources established under 33 U.S.C. 1313(d).

16. The points of diversion are located on Scoggins Reservoir, Scoggins Creek, and the Tualatin River, and are not located within a Withdrawn Area.

17. The Scoggins Reservoir, Scoggins Creek, and the Tualatin River, tributary to the Willamette River are not located within or above a state or federal scenic waterway.

18. The points of diversion are not in a location listed by the Department of Environmental Quality as a water quality limited stream.

OAR 690-315-0040(4)(c)
The habitat needs of sensitive, threatened or endangered species, in consultation with the Oregon Department of Fish and Wildlife.

19. Scoggins Creek, tributaries to the Tualitin River; and the Tualatin River, tributary to the Willamette River are located within an area ranked "moderate" for stream flow restoration needs as determined by the Department in consultation with the Oregon Department of Fish and Wildlife, and are located within a Sensitive, Threatened or Endangered Fish Species Area as identified by the Department in consultation with Oregon Department of Fish and Wildlife.

OAR 690-315-0040(4)(d)
Economic interests dependent on completion of the project.

20. An approximate total of $63,097 has been invested in the project. This investment does not include the investment in the development of the water system perfected under Certificate 88122.

OAR 690-315-0040(4)(e)
Other economic interests dependent on completion of the project.

21. Economic interests dependent on the completion of the project include patrons who are served by the District.

OAR 690-315-0040(4)(f)
Other factors relevant to the determination of the market and present demand for water and power.

22. No other factors relevant to the determination of the market and present demand for water and power have been identified.

23. OAR 690-315-0050(6) requires the Department to place a checkpoint condition on this extension of time in order to ensure diligence is exercised in the development and perfection of the water use permit. A "Checkpoint Condition" is specified under Item 1 of the "Limitations and Conditions" section of this PFO to meet this condition.

Fair Return Upon Investment [OAR 690-315-0040(2)(f)]

24. The use and income from the permitted water development will likely result in reasonable returns upon the investment made to date.

Other Governmental Requirements [OAR 690-315-0042(2)(g)]

25. Delay in the development of this project that was caused by other governmental requirements have not been identified.

Unforeseen Events *[OAR 690-315-0040(2)(h)]*

26. The effects of the COVID-19 Pandemic have been identified as unforeseen events which caused delay in the complete development of the authorized use.

Denial of an Extension Would Result in Undue Hardship *[OAR 690-315-0040(2)(i)]*

27. A denial of the extension would result in undue hardship, and there are no other reasonable alternatives that exist for meeting water use needs.

Good Faith of the Appropriator [OAR 690-315-0040(2)(c)]

28. The Application provides evidence of good faith of the appropriator under Permit S-55199.

The Department has determined that the applicant has shown good faith and reasonable diligence.

Duration of Extension [OAR 690-315-0040(1)(c)]

Under OAR 690-315-0040(1)(c), in order to approve an extension of time for water use permits the Department must find that the time requested is reasonable and the applicant can complete the project within the time requested.

29. As of June 5, 2024, the permit holder states the remaining work to be completed consists of completing construction of the water system and applying water to full beneficial use.

Given the amount of development left to occur, the Department has determined that the permit holder's request to have until October 1, 2049, to accomplish the application of water to beneficial use under the terms and conditions of Permit S-55199 is both reasonable and necessary.

Good Cause *[OAR 690-315-0040(1)(d)]*

The Department must find that there is "good cause" to approve the extension. In making a "good cause" finding, the Department shall consider the requirements set forth under OAR 690-315-0040(2).

The Department has considered the reasonable diligence and good faith of the appropriator, the cost to appropriate and apply water to a beneficial purpose, the market and present demands for water to be supplied, the financial investment made and fair and reasonable return upon the investment, the requirements of other governmental agencies, and unforeseen events over which the permit holder had no control, whether denial of the extension will result in undue hardship to the applicant and whether there are no other reasonable alternatives for meeting water use needs, any other factors relevant to a determination of good cause, and has determined that the applicant has shown that good cause exists for an extension of time to complete construction and apply water to full beneficial use pursuant to OAR 690-315-0040(1)(d).

LIMITATIONS AND CONDITIONS

1. OAR 690-315-0050(6) requires a checkpoint condition on this extension of time in order to ensure diligence is exercised in the development and perfection of the water use permit. A "Checkpoint Condition" is specified under Item 1 of the "Conditions" section of this PFO to meet this condition.

CONCLUSIONS OF LAW

1. The Applicant has submitted a complete extension application form and the fee specified in ORS 536.050, as required by OAR 690-315-0040(1)(a).

2. The Applicant complied with construction timeline requirements to begin construction as required by ORS 537.230, OAR 690-315-0040(1)(b) and OAR 690-315-0040(5).

3. Based on Finding of Facts 5, through 28, completion of construction and full application of water to beneficial use can be accomplished by October 1, 2049[3], as required by OAR

[3]Pursuant to ORS 537.230(5), upon the completion of beneficial use of water allowed under the permit, the

690-315-0040(1)(c).

4. The Applicant can complete the project within the time period requested for the extension on the project.

5. The Applicant has demonstrated good cause for the extension.

6. For extensions exceeding five years, the Department shall establish progress checkpoints to determine if diligence is being excised in the development and perfection of the water use permit. Intervals between progress check points will not exceed five years periods, as required by OAR 690-315-0050(6).

PROPOSED ORDER

Based upon the foregoing Findings of Fact and Conclusions of Law, the Department proposes to issue an order to:

Extend the time to apply water to beneficial use under Permit S-55199 from August 8, 2024, to October 1, 2049.

Subject to the following conditions:

LIMITATIONS AND CONDITIONS

1. **Checkpoint Condition**
The permit holder must submit a completed Progress Report Form to the Department by **October 1, 2028, 2033, 2038, 2043, and 2048.** ***A form will be enclosed with your Final Order.***

(a) At each checkpoint, the permit holder shall submit and the Department shall review evidence of the permit holder's diligence towards completion of the project and compliance with terms and conditions of the permit and extension. If, after this review, the Department determines the permit holder has not been diligent in developing and perfecting the water use permit, or complied with all terms and conditions, the Department shall modify or further condition the permit or extension to ensure future compliance, or begin cancellation proceedings on the undeveloped portion of the permit pursuant to ORS 537.260 or 537.410, or require submission of a final proof survey pursuant to ORS 537.250;

(b) The Department shall provide notice of receipt of progress reports in its weekly notice and shall allow a 30 day comment period for each report. The

---

permittee shall hire a certified water rights examiner to survey the appropriation. Within one year after the complete application of water to a beneficial use (or by the date allowed for the complete application of water to a beneficial use), the permittee shall submit a map of the survey and a new or revised claim of beneficial use as deemed appropriate by the Department.

Department shall provide notice of its determination to anyone who submitted comments.

DATED: November 19, 2024

Dwight French, Administrator
Water Right Services Division

If you have any questions, please check the information box on the last page for the appropriate names and phone numbers.

Protests

Pursuant to OAR 690-315-0060(1), the applicant or any other person adversely affected or aggrieved by the proposed final order may submit a written protest to the proposed final order. Protests must be received by the Water Resources Department no later than **January 3, 2025,** at this address: Oregon Water Resources Department, Water Right Services Division, 725 Summer St NE, Suite A, Salem, OR 97301-1266. Protests may not be submitted by electronic mail. OAR 690-002-0025(3).

Protests must be in writing and include all of the following:

- The name, address, and telephone number of the protestant
- A detailed description of the protestant's interest in the proposed final order, and, if the protestant claims to represent the public interest, a precise statement of the public interest represented
- A detailed description of how the action proposed in the proposed final order would impair or be detrimental to the protestant's interest
- A detailed description of how the proposed final order is in error or deficient, and how to correct the alleged error or deficiency
- If the applicant protests, a statement of whether a hearing is requested
- Citation of legal authority supporting the protestant, if known
- Proof of service of the protest on the water right permit holder, if protestant is other than the water right permit holder, and
- If you are the applicant, the protest fee of $480 required by ORS 536.050; and
- If you are not the applicant, the protest fee of $950 required by ORS 536.050.

Within 60 days after the close of the period for requesting a contested case hearing, the Director shall either issue a final order on the extension request, or schedule a contested case hearing if a

protest has been submitted, and, upon review of the issues, the Director finds there are significant disputes related to the proposed agency action; or, the applicant submits a written request for a contested case hearing within 30 days after the close of the period for submitting protests. The hearing will be conducted as provided in Oregon Revised Statutes (ORS) Chapter 183, and Oregon Administrative Rules (OAR) 137-003-0501 to 137-003-0700.

If the applicant does not request a hearing within 30 days after the close of the protest period, or if the request for a hearing is withdrawn, or the Department or the administrative law judge is notified that the protestant will not appear, or the protestant fails to appear, at a scheduled hearing, the Director may issue a Final Order by default. If the Director issues a Final Order by default, the Department designates the relevant portions of its files on this matter, including all materials submitted relating to this matter, as the record for purpose of proving a *prima facie* case upon default.

A party may be represented by an attorney at the hearing. Legal aid organizations may be able to assist a party with limited financial resources. Generally, partnerships, corporations, associations, governmental subdivisions or public or private organizations are represented by an attorney. However, consistent with OAR 690-002-0020 and OAR 137-003-0555, an agency representative may represent a partnership, corporation, association, governmental subdivision or public or private organization if the Department determines that appearance of a person by an authorized representative will not hinder the orderly and timely development of the record in this case.

Notice Regarding Servicemembers: Active-duty service members have a right to stay proceedings under the federal Servicemembers Civil Relief Act. For more information contact the Oregon State Bar at 800-452-8260, the Oregon Military Department at 800-452-8260, or the nearest United States Armed Forces Legal Assistance Office through http://legalassistance.law.af.mil.

REFERENCE: Application for Extension of Time

Dear Extension of Time Applicant:

The Water Right Services Division has received your application for an extension of time for **APPLICATION FILE #:** S-69623 **(Permit** S-55199**).** Your application will be reviewed in the future. Following the review, you will receive a Proposed Final Order either approving or rejecting the extension of time request. A 45-day protest period begins upon issuance of the Proposed Final Order. After the protest period closes, a Final Order is issued.

You may continue the use of water under your water right until the Water Resources Department formally takes action on your extension application. If your permit includes conditions, water use reporting, water level measurement reporting, etc., you are required to comply with the conditions.

Any additional development that occurs after the expired completion date, identified on the permit or an extension order, can only be claimed upon an approved extension application.

If you have questions concerning your extension of time application, please contact Jeffrey Pierceall at (503) 979-3213. For general information about the Water Resources Department, you may contact the Water Resources' Customer Service Group at (503) 986-0801 or you may access the Department's website at: **www.wrd.state.or.us**.

Application for

Extension of Time for a Water Right Permit (NON-Municipal/ NON-Quasi-Municipal)

OREGON WATER RESOURCES DEPARTMENT
Oregon Water Resources Department
725 Summer Street NE, Suite A
Salem, Oregon 97301-1266
(503) 986-0900
www.oregon.gov/OWRD

Criteria for a Permit Extension of Time

The Department can accept requests for an extension of time on permits to (1) complete construction, and/or to (2) apply water to beneficial use.

In order to approve a permit extension request the Department must be able to find:

1) **Construction has begun:**

   ~~**A. For Groundwater Permits**~~
   ~~Construction of the well(s), *authorized by the permit,* began within 5 years of the date the permit was issued or by the actual construction date specified in the permit.~~

   B. For Surface Water or Reservoir Permits
   Construction of the water system began within 5 years of the date the permit was issued or by the actual construction date specified in the permit.

The Department will also confirm that:

2) If required, a fish screen, fish passage or fish by-pass device was installed before or prior to diversion of any water. An exception to the need to confirm installation prior to diversion of any water would be a waiver submitted to the Department from ODFW stating that a fish screen, fish passage or fish by-pass device was not required, provided your permit allows for a waiver.

If you have questions, please call the Department at (503)-986-0900 and ask to speak with a permit extension specialist.

Before submitting your Application for Extension of Time, make sure the following items are included:

- This completed Application for Extension of Time.
- Statutory fee of $780
- Signature page (Second page of this Application for Extension of Time).
- ~~Letter granting an agent authority to act on behalf of the permit holder (*if applicable*)~~
- All supporting documentation and/or evidence referenced in the Application for Extension of Time. (ODFW Fish screen approval or waiver, contract for stored water, etc)

MAIL COMPLETED APPLICATION
along with the Supporting documents and/ or evidence and correct fee to:

Water Resources Department
Attn: Water Right Permit Extensions
725 Summer Street NE, Suite A
Salem, Oregon 97301

Received
JUN 05 2024
OWRD

GENERAL TIPS:

- Permit holders of **municipal or quasi-municipal water use permits DO NOT use this form**. The correct form is APPLICATION FOR EXTENSION OF TIME FOR MUNICIPAL AND QUASI-MUNICIPAL WATER USE PERMITS.

- Request the reasonable amount of time necessary to fully complete construction of the water project and/or to fully use the permitted quantity of water under the terms and conditions of your permit. Should this request be approved, it will be OWRD's expectation that you will complete your project within the new time period allowed. Future extensions may not be granted.

- A separate APPLICATION FOR EXTENSION OF TIME must be submitted for each permit. OAR 690-315-0020(2).

- Permit extensions are evaluated under OAR Chapter 690, Division 315. These rules may be viewed at the State of Oregon, Secretary of State Website. To be granted an extension of time, the Department must make four specific findings; 1) the application is complete, 2) construction of the water system began within the time specified in the permit and applicable statute, 3) there is good cause, and 4) the project can be completed within the time being requested. If the Department cannot make all four findings, the extension of time cannot be approved.

- You may provide OWRD with any additional information or evidence that will aid us in making our decision. Please note that OWRD may require other information that is necessary to evaluate the application. OAR 690-315-0020(3)(n).

- After careful review of the Application for Extension of Time, you may contact OWRD at (503) 986-0900, to ask questions and request assistance from a Permit Extensions Specialist in the Water Rights Services Division.

- An Application for an Extension of Time will be reviewed for completeness. A response is required for each item contained in the application. OWRD will return any incomplete or deficient applications to the applicant. OAR 690-315-0040(1)(a).

Reference Materials Needed to Complete this Application:

- **The water right permit**. If needed, a copy of the water right permit can be downloaded from the Department's Website, or, a copy of the permit may be requested by water right application number from the Water Rights Division at 503-986-0900 (copy fees will apply).

- **Previous Applications and Orders.** Copies of previous applications and orders that may inform the completion of the Application for Extension of Time, if available, may be downloaded from the Department's Website. **NOTE: If the document requested is not available on the Department's website, you may be required to submit a Public Record Request.**

- **Documentation which demonstrates compliance with permit conditions** (for example, well construction logs; static water level measurement reports; annual water use reports; ODFW fish screen certification; a plan to monitor the effect of water use on ground water aquifers utilized under the permit; etc.).

Questions to complete this application for an Extension of Time
Please see the instruction sheet to help you answer these items.

2a. Permits typically contain standard or special conditions that must be fully satisfied to lawfully develop and use permitted water. Review the permit subject to this extension to identify which of the conditions listed in the 2nd column are contained within it. Using the extra row labeled "other" to specify any other additional conditions included in the permit, or specified in a final order approving a permit amendment or prior extension of time. In the 1st column check the box for each condition (row) identified as relevant. In the 3rd column check "Yes" if you have completed or met the permit condition. Check "No" if the condition is not yet satisfied. In the 4th column, give the date when the condition was satisfied or will be satisfied. Attach any pertinent documentation. Note: a pump test condition does not need to be addressed here however; you must submit the results of the test to the Department for approval prior to certification.

OWRD

*** This is the *minimum* of the rate used to date and is calculated by subtracting the maximum rate allowed by certificate 88122 from Scogins Reservoir (being 118.7 CFS) from the maximum rate diverted at Scoggins Reservoir in the permit period (which is 132 CFS at Scoggins Reservoir). TVID does not currently have a way to determine which flows are for certificate 88122, and which are for permit S-55199; however, this clearly show that permit S-55199 has been used.

**** This is the maximum volume of stored water used *in a year*. This volume was computed as follows:

- TVID tracks "Interruptible" water. The TVID revenues per year for "Interruptible" water was divided by the rate TVID charges per AF to get the AF of Interruptible water per year.
- 95% of Interruptible water is estimated to be water that is used per this permit (the other 5% is used for cert. 88122 for special situations such as temporary transfers, etc.); therefore 95% was used to compute AF/yr for this permit.
- Based on past TVID records, approximately 1 AF of water is used per 1 acre of irrigated lands, so therefore the computed AF/year (above) is the same as the acres irrigated per year.

See the table below. The interruptible water revenue, $/AF, % permit S-55199, and average AF/ac are from TVID records.

Calculation of AF/yr and acres/yr					
Year	Interruptible Revenue, $	$/AF	AF/yr	AF/yr for permit S-55199 (=95%)	Ac/yr for permit S-54199
2020	217219	102	2,130	2,023	2,023
2021	313416	110	2,849	2,707	2,707
2022	204521	110	1,859	1,766	1,766
2023	287580	120	2,397	2,277	2,277

OWRD

[OAR 690-315-0020(3)(e)(C)]

9. For Irrigation and Nursery Use Permits Extensions

Provide the total number of acres irrigated to date under this permit.

a) Total acres irrigated to date: 2707

b) List by year, the number of acres irrigated each year since permit issuance.

Year	Acres	Year	Acres	Year	Acres
2019	Partial year, not used	2023	2277		
2020	2023	2024	Year not yet complete		
2021	2707				
2022	1766				

See Table in Section 6 above for documentation and calculations.

c) **Provide a copy of the application map identifying the acres irrigated.** Note: after searching, TVID found the application maps for this permit. TVID estimates around 300 individual maps for the permit and application. The maps are in a filing cabinet and have not been added to the computerized Geographical Information Systems (GIS) used by WRD or TVID. The work to get these maps into the GIS systems is significant in itself. Therefore, it is not practical to provide all of the application maps to show the acres irrigated for this permit.
Jeffery Pierceall of WRD was contacted about this situation via a phone call. Clearly water has been used on permitted lands, but it is a huge amount of work to know *exactly* where and for each year. Mr. Pierceall thought (at that time) that if TVID found and listed which tax lots had at least a portion of their area irrigated under this permit, that would be sufficient to show about where the location of the irrigation occurred. TVID has found the affected tax lots for one year as shown in Attachment "B".
The total acres irrigated for each year is listed in 9.b) above.

d) **Please specify the number of acres irrigated by each Point of Diversion/Point of Appropriation (POD/POA).**

(POD) # SHPP **Acres 2233*** **(POD) #PV Acres 0**

(POD) # Scoggins **Acres 474***

SHPP	= Spring Hill Pumping Plant POD
PV	= Patton Valley POD
Scoggins	= Scoggins Reservoir POD

***These numbers were computed from TVID data for the average acres provided by each POD for this permit. Bobby Nuvolini, of TVID did computations in GIS for one year and came up with a ratio of number of acres by POD for one year. The ratio of acres by POD is assumed to be consistent for most years. Therefore, the ratio of SHPP ac to Scoggins ac (2098.7/445.9 for the year analyzed) was used to compute the maximum acres by POD per year irrigated for the maximum year = 2707 (=2233 + 474). These acres are shown in the answer to "d)" above.**

OWRD

[OAR 690-315-0020(3)(i)(j)]

10. In the chart below provide a summary of your future plans and schedule to complete the construction of the water system, and/or apply water to full beneficial use under the terms and conditions of the permit.

CHART-E

APPROXIMATE DATE RANGE (projected)	WORK OR ACTION TO BE ACCOMPLISHED (projected)	ESTIMATED COST (projected)
2024-2049	Water Users will develop more acres for agricultural (AG) and Irrigation (IRR) uses over time. Some users will need to develop new Points of Diversion (POD's), conveyance systems, obtain easements, clear ground, install water use systems such as sprinklers, etc. Most new river POD's will need fish screens if fish are present and will get Oregon Department of Fish and Wildlife (ODFW) approvals and will need to install and maintain the fish screens.	$350,000
	Note: The above estimated cost was computed as follows: The average cost per new acre developed has been $65,610.18/2707 acres developed = $24/acre. The number of acres remaining to develop is 17179.98 new acres permitted – 2707 acres developed = 14473 acres. Remaining cost = remaining acres x average cost/acre – 14473 x 24 = $350,819.62. (The $66K costs on the TVID invoices was to access much less than 2707 acres because many of the 2707 new acres were accessed using the existing TVID system; however, it is expected that the future costs will be similar and that many of the future new acres will also be access by the existing TVID system.) Note: the 34,258.78 acres allowed for agriculture in S-55199 is a sum of the irrigation and supplemental acres allowed in 88122 (12156.3 + 49252.5=) [17078.8] acres plus new acres allowed by S-55199 [17179.98]; therefore, TVID knows that permit S-55199 added 17179.98 of new acres above and beyond those acres already allowed by certificate 88122.	
Year: 2049	**Date intend to apply water to full beneficial use under the terms and conditions of this permit.**	
	Total Cost	**$350,000**

[OAR 690-315-0020(3)(g)]

11. Estimated remaining cost to complete the project: $350,000

(The total cost from CHART-E)

Received
JUN 05 2024
OWRD

[OAR 690-315-0020(3)(j)]

12. Provide a summary of your plan to complete construction, meeting all permit conditions and apply the water to beneficial use: *(List all tasks or steps needed to complete the project, the date when each task will be completed, and the cost associated with each task; attach additional pages if necessary.)*

1. The construction and applying of water for beneficial use according to permit conditions will occur as future water users approach Tualatin Valley Irrigation District (TVID) for water. Each future user will need to coordinate with TVID and ODFW (and possibly other agencies) to construct a conveyance system. Some conveyance systems will need fish screens or updating of current fish screens to meet new flows. Future water users will need to install water meters, if required. Water users will then need to develop the new uses and use the water beneficially per the permit conditions.

2. The main tasks are dependent upon each individual situation for the future water users, and there are hundreds and potentially thousands of potential water users, each with a different situation. Some will need new Points of Diversion and fish screens and some will need very little if they happen to be next to a TVID pipeline with existing water pressure.
3. TVID may need to develop pump stations with increased capacity to keep up with the increases in future water use.

Received
JUN 05 2024
OWRD

[OAR 690-315-0020(3)(k)]

13. Justify the time requested to complete the project and/or apply the water to full beneficial use. *(Include any other information or evidence to establish that the requested amount of time is sufficient and that you will be able to complete the project within the amount of time requested.)*

We request 25 years to complete the construction of this system. This is for many reasons.

1. The permit is for 34,000 acres of agricultural use and 17,000 acres of irrigation use. Currently, some users have a few acres and the bigger users have a few hundred acres. Obviously, many, many new users will be needed, each with different needs and systems to develop. This permit in enables hundreds of separate projects. The permit size is enormous compared to most water rights where 5 years is typically assumed to be enough time to complete the project. The size of the right and need for so many various different projects alone indicates that a long period of time is needed and that the initial 5-year period was far too short.
2. In the initial five years of the permit, a global pandemic came and hurt most of the world's economies. Businesses closed and millions of people died. The demand for most products declined significantly. The effects of the pandemic are still being felt and the world economies have not fully recovered to pre-pandemic levels. The future economic and demand for agricultural and irrigation related products is unknown, but it is certain to increase as the human population grows worldwide. 25 years should be enough time to get through the various ups and downs of demand and economics as well as the creation of new products, and development by new users.
3. The completion of the system will greatly depend on economic conditions as well as the demand for products grown by agricultural and irrigation. Many of these products are for food for human and animal consumption, but new uses are being developed all the time. As new products are created or become popular, the economics for the projects will push for more development within the Tualatin Valley Irrigation District (TVID) area boundary.

[OAR 690-315--0020(3)(l)]

14a. Will a denial of the extension result in undue hardship? *(Describe the hardship and the effects.)* Denial of the extension will result in undue hardship to both TVID and future water users.

1. TVID collects revenue by the amount of water delivered. There is a significant part of this permit that has not been developed at this time. Denial of this extension will prohibit TVID from collecting many revenues in the future. These revenues have relatively little costs associated with them because much of the system has been paid for during the

development for certificate 88122. Therefore, the income from development for this permit will be very profitable compared to earlier portions of the entire project. Denial of this extension will cause TVID to not collect the most profitable portions of their project.

2. If the extension is denied, all future water users will have almost no possible way to develop their lands and create new uses and businesses. Hundreds of new businesses will be prevented from being developed without TVID water. Each new business comes along with an irrigation system and conveyance system, but also the manpower and equipment to work the business. These businesses will need vehicles and vehicle maintenance, fuel, tires and on and on. Denial of this extension will cause an undo hardship on the area due to a loss of future growth. The size of this huge loss of economic value is very large and beyond the scope of this extension request.
3. If this extension is denied many current water users will lose their ability to have any agricultural uses at all if using TVID water. Crops will have to be changed to dry farming crops and/or many lands will have significant lower crop production without a reliable source of water.

Received
JUN 05 2024
OWRD

14b. Are there any other reasonable alternatives that exist for meeting your water use needs? *(Explain in detail, consider other potential sources of water, and describe their feasibility)* No other reasonable alternatives exist for the water uses within the permit. To answer this, a brief history of the situation and area is provided. TVID boundary covers around 125 square miles the northwest Willamette Valley. The Willamette Valley is one of the best agricultural areas in the world due to very good soils and a moderate climate that allows long growing seasons. Because of this, the agriculture economy grew very fast in the area. In the 1950's and perhaps earlier, it was clear that the Tualatin River had more water rights than water; as the river would be pumped dry. The federal government was, at that time, conducive to resolving water problems in the western US by developing reservoirs that would store winter runoff for use in the summer drought years (among other uses). Scoggins Reservoir was constructed and a large segment of the water it stores is designated for resolving the needs of the current and future farmers in the area. The project has been a huge success and TVID water is sought after for irrigation and agricultural uses. Other sources such as live flow from the Tualatin River in the drought season are nearly impossible to obtain. Another source could be wells, via a groundwater application, but groundwater applications have been very difficult to obtain and usually take years to even get an answer from the WRD. Thus, TVID is the only reliable source of water for agricultural and irrigation uses in the area, and is usually currently often the only practical way to get water for new irrigation acres.

[OAR 690-315-0020(3)(h)

15. Was the delay in the timely completion of this water development project and/or timely application of water to full beneficial use caused by any additional government requirements, other than the conditions contained within the permit, which significantly delayed the completion and perfection of this right? *(Explain in detail, including how much time did this delay the project; list dates.)* We do not see that additional government regulations significantly

delayed the completion of this right. We do feel that the initial 5 years to complete the project was just far too short for this size of project, and was likely an oversight in the permit phase.

[OAR 690-315-0020(3)(h)

16. Describe any unforeseen events which contributed to the delay of completion of this project that you had no control over. *(Explain in detail what the unforeseen events were (i.e. health issues, natural disaster) and how much time was spent addressing the unforeseen events. Delays caused by business decisions are not considered unforeseen events)* The pandemic of the early 2020's was a worldwide disaster that certainly was unforeseen, delayed completion of the project, and we had no control over. The pandemic caused worldwide economic problems, millions died, and many businesses failed. Demand for many products decreased. Money for future development was not spent as the future was unknown. The pandemic was a huge issue directly in the middle of the period of permit development.

[OAR 690-315-0020(3)(h)]

17. Describe an additional reasons why the construction was not completed, and/or water was not beneficially used within permit time limits. *(Provide supporting information for the reason(s) that best fits your circumstances.)*
N/A

Received
JUN 05 2024
OWRD

[OAR 690-315-0020(3)(m)(n)]

18. Provide any other information you wish OWRD to consider while evaluating your Application for Extension of Time.

The application was submitted in 1988 and the permit was obtained in 2019. Water Resources Department took over 30 years to review the application and produce a permit. During these decades, the goals and thoughts of the initial applicant have been forgotten and we can only surmise what they were based on the final products, various records, discussions with people involved at the time, and the use of logic with review of the history of the area. For example, at this point we have no idea where all of the POD's and Places of Use came from. We have found the hundreds(?) of application maps, but they just show where the acres were intended to be at the time of the application. Past TVID employees state that the application maps were developed to encompass "all future irrigable land within the TVID boundary that was not already in cert. 88122".

When the permit came out, TVID was not ready for the implications of the permit; they had no way to expect what the permit would like or when it would come. Then the pandemic hit and many other issues were at the forefront. TVID needs more time to resolve how to apply and track this permit.

Right now, the potential use of this water right is spread by word of mouth. TVID and the area may need to market for the future uses that are possible by this permit. For this, a marketing plan may need to be developed and implemented. This would take planning, investment, and time to implement the plan. This is another reason for a longer time period being needed.

[OAR 690-315-0040(2)(f)]

19. Will the income or use of the water project provide a fair and reasonable return on your investment? *(Explain in detail)* Because much of the water system (being Scoggins Reservoir, and its conveyance systems) have been previously developed and paid for during development for certificate 88122, relatively little expenditures are needed for this permit. Furthermore, much of the development for this permit will be paid for by future users and not TVID. Therefore, the return on investment for TVID is very high for this permit.

[OAR 690-315-0040(4)(d)]

20. Describe in detail if there are other economic interest, beyond those of the permit holder, which are dependent upon the completion of this project. *(Who will be effected and how?)* The completion of this project will contribute greatly to not only the economy within the TVID area, especially in Washington County. Hundreds of new businesses will be developed to utilize this permit bringing large economic growth to the entire area. New jobs, new people, new houses, more stores, more schools, and more roads will be needed. More equipment will be needed, pipelines will need to be installed, irrigation systems and pumps will need to be designed and implemented, seed and fertilizer will need to be imported and purchased. The economic increase due to this permit being completed could contribute in a significant way to the increase in the economy of Oregon as a whole.

Notes:
- This data was provided by TVID. These tax lots are for the year 2023 only.
- TVID maps (by year) the location of "interruptible". TVID estimates that about 95% of "interruptible" water is used per permit S-55199 either for agriculture use on certificate 88122 lands, or agriculture or irrigation on non-88122 lands. This data is provided to demonstrate to the Water Resources Department (WRD) the general location of where the water was utilized. Jeffery Peirceall of WRD, indicated via a phone call, that this would be sufficient for the purposes of granting an Extension of Time for the permit. We have also provided the permit map showing which sections indicated above are on the permit map.
- The numbers and letters have the meaning as follows:
- N=North
- S=South
- W=West
- the numbers after the dash are the tax lot in that Section of the Township.

Re: Affidavit for TVID Partial Cancellation of Permit S-55199

Dear Lisa and Kelly:

As we discussed, I've enclosed the signed original "Affidavit in Support of Partial Cancellation of a Water Right Permit"—specifically, Permit S-55199. I represent the property owner affiants, DCMB, LLC, Wolverine Financial LLC, and Lone Oak Land & Investment Company, LLC. The Affidavit's purpose is to cancel the Tualatin Valley Irrigation District's layered water rights on the acreage owned by the property owners and thus facilitate the property owners' conveyance of Water Right Certificate 43613 and Water Right Certificate 68254 to the City of Banks. The City will eventually seek to transfer those water rights to municipal use.

Please place copies of the Affidavit in the OWRD files for Permit S-55199, Certificate 43613, and Certificate 68254. We will provide a copy of the Affidavit to the City of Banks for inclusion with its transfer application.

For reference, I have attached a copy of our September 29, 2023 email correspondence.

Please don't hesitate to contact me if I can clarify anything or provide additional documentation.

Thank you,

Jennie Bricker

Hi Jennie,

It was nice talking with you this afternoon. Here's a link to information on our website related to water right conveyance agreements: https://www.oregon.gov/owrd/WRDFormsPDF/Transfer_Property_Transactions.pdf

After you've had a chance to read through it, please reach out if you have any questions.

Related to cancellation of the layered supplemental irrigation permit held by Tualatin Valley Irrigation District (TVID) that will not be transferred along with the primary irrigation right to the City of Banks:

- TVID could submit a notarized statement along with a map that can be placed into both TVID's permit file and your client's Water Right Certificate file. A copy of the notarized statement & map should also be submitted with the Transfer Application when it is filed.
    - The statement should:
        - Identify TVID's supplemental irrigation permit (#-____) and that ___ acres are layered with primary irrigation Certificate (#-_____)
        - Include a listing of the layered acres, broken out by township range, section, and ¼ ¼
        - Indicate that the ____ acres of TVID's supplemental irrigation permit (#-____) that are layered with primary irrigation Certificate # ____ proposed for transfer to the City of Banks are not being included as part of the Transfer Application, and that TVID does not intend to perfect this portion of their supplemental irrigation permit (#-____)
        - **Be accompanied by a map** that clearly identifies (broken out by township range, section, and ¼ ¼) the ____ acres of TVID's supplemental irrigation permit (#-____) that are layered with primary irrigation Certificate # ____ proposed for transfer to the City of Banks that are NOT being included as part of the Transfer Application
    - With this information, we can make a finding in the Preliminary Determination (PD) that outlines the information provided in TVID's notarized statement. The PD will also specify that because the specified portion (___ acres) of TVID's supplemental irrigation permit (#-____) that is layered with primary irrigation Certificate # ____ is NOT being included as part of the Transfer Application, they will be cancelled as part of the Transfer Order, consistent with ORS 540.510(1) and OAR 690-380-2250(2).
    - We will provide a copy of the Transfer Preliminary Determination to TVID (as the holder of the layered supplemental right to be cancelled pursuant to ORS 540.510(1) and OAR 690-380-2250(2), as well as the Transfer Applicant.

I'm including Kelly Starnes, the Transfer Program Advisor, on this email in case he'd like

to add anything.

Please also include a copy of this correspondence as part of the Transfer Application when it is filed.

Don't hesitate to reach out if you have any follow-up questions,

-Lisa

AFFIDAVIT IN SUPPORT OF PARTIAL CANCELLATION OF A WATER RIGHT PERMIT

STATE OF OREGON)
) ss.
County of Washington)

We, Bobby Nuvolini, Robert Bobosky, and Susan Cropp, being first duly sworn, depose and say:

1. Bobby Nuvolini is the manager and authorized agent of the Tualatin Valley Irrigation District ("TVID").
2. Robert Bobosky is the manager of DCMB, LLC ("DCMB") and Wolverine Financial LLC ("Wolverine"), both Oregon limited liability companies.
3. Susan Cropp is the manager of Lone Oak Land & Investment Company, LLC ("Lone Oak"), an Oregon limited liability company.
4. TVID holds Permit S-55199 for irrigation and agricultural use on acreage that includes the following places of use in Section 36, Township 2 North, Range 4 West, of the Willamette Meridian, in Washington County, Oregon:

NE¼ NE¼	26.20 acres
NW¼ NE¼	21.90 acres
SW¼ NE¼	39.90 acres
SE¼ NE¼	32.60 acres
NW¼ SE¼	40.90 acres
Total acres:	161.60

as shown on the map attached as Exhibit 1.

5. DCMB, Wolverine, and Lone Oak own the property in Section 36 (the "Property") that is covered by TVID's Permit S-55199; specifically, the Property comprises Tax Lot 800, Tax Lot 600, and Tax Lot 603, about 176 acres in all. All of the 161.60 acres authorized under Permit S-55199, described above, are located within the Property. The Property is more particularly described in the attached Exhibit 4.
6. Of the Property's total acreage, 45.5 acres is irrigated under Water Right Certificate 43613, as shown on the map attached as Exhibit 2, and 108.2 acres is irrigated under Water Right Certificate 68254, as shown on the map attached as Exhibit 3.
7. Certificate 43613 and Certificate 68254 are the primary irrigation rights appurtenant to the Property and are now leased for instream purposes under IL 1940 and IL 1941.

RECEIVED
DEC 08 2023
OWRD

8. The irrigation and agricultural use authorized for the 161.60-acre portion of Permit S-55199 are treated by the Water Resources Department as supplemental rights because, with the exception of 7.9 acres in the Southwest Quarter of the Northwest Quarter, they are layered with the primary irrigation rights under Certificate 42613 and Certificate 68254.
9. DCMB, Wolverine, and Lone Oak intend to convey the water rights authorized under Certificate 42613 and Certificate 68254 to the City of Banks and anticipate that, at some point in the future, the City of Banks will submit a Transfer Application to convert the water rights to municipal use.
10. The primary rights (i.e., the water rights authorized under Certificate 42613 and Certificate 68254) will be included in the City's Transfer Application, but the supplemental rights (i.e., the 161.60-acre portion of Permit S-55199) will not be included.
11. TVID will not perfect the 161.60-acre portion of Permit S-55199. TVID does intend to perfect the remaining portion of Permit S-55199 (i.e., that portion of Permit S-55199 that is not appurtenant to the Property).
12. TVID intends that the 161.60-acre portion of Permit S-55199 be cancelled as part of the order approving the City's Transfer Application. TVID further intends that the remaining portion of Permit S-55199 (i.e., that portion of Permit S-55199 that is not appurtenant to the Property) be unaffected by the order approving the City's Transfer Application.

That land described in that certain Warranty Deed recorded as Washington County Instrument No. 2007-023227

EXCEPTING THEREFROM

The land described in that certain Warranty Deed recorded as Washington County Instrument No. 2017-2188

Described as follows:

That land described in that certain Warranty Deed recorded as Washington County Instrument No. 2007-023227

PARCEL I:

Beginning at the Southwest corner of the Northeast quarter of Section 36, Township 2 North, Range 4 West of the Willamette Meridian; thence running along the West line of the said Northeast quarter of said Section 36, North 0°03' East 1483.7 feet, more or less, to the center of W. Dairy Creek; thence following up the center of said W. Dairy Creek with all the meanderings thereof in a Northeasterly direction 460.0 feet, more or less, to the junction of said W. Dairy Creek with the Westerly end of drainage ditch; thence following center of said ditch North 58°24' East a distance of 742.0 feet, more or less, to the center of said W. Dairy Creek; thence following up the center of said W. Dairy Creek with all the meanderings thereof in a Northeasterly direction a distance of 283.0 feet, more or less, to the junction of the center of said W. Dairy Creek with the second drainage ditch; thence following up the center of said ditch, North 67°29' East a distance of 340.0 feet, more or less, to the center of said W. Dairy Creek; thence following up the center of said W. Dairy Creek with all the meanderings thereof, in a Northeasterly and Northerly direction a distance of 980.0 feet, more or less, to a point on that North line of said Section 36 which point bears North 89°22' West 422.8 feet from the Northeast corner of said Section; thence along the section line, South 89°22' East 268.0 feet, more or less, to a point on said section line which is North 89°22' West 154.5 feet from the Northeast corner of said Section 26; thence on a line parallel with the East line of said Section 36, South 825.5 feet; thence North 89°22' West 30.0 feet; thence on a line parallel with the East line of said Section 36, South 1835.5 feet to a point on the South line of the Northeast quarter of said Section 36 which point bears South 89°40' West 184.5 feet from the quarter section corner on the East line of said Section 36; thence along the South line of the Northwest quarter of said Section 36, South 89°40' West 2456.9 feet to the place of beginning.

TOGETHER WITH an easement for ingress and egress as described in Deed recorded January 5, 1966, Book 583, Page 392.

EXCEPT beginning at a point on North section line 356.0 feet North 89°22' West of Northeast section corner; thence South 24°30' West 125.0 feet; thence South 46°0' West 170 feet; thence North 84°54' West 600.0 feet to center of West Dairy Creek; thence meandering Easterly and Northeasterly along said center line to North section line; thence South 89°22' East on North section line 66.8 feet, more or less, to place of beginning.

ALSO EXCEPTING that real property conveyed to henry J. Vanderzanden, et ux, to the City of Banks by Deed recorded in Book 583, Page 388, Washington County Records.

MEMORANDUM

Date: June 28, 2018

To: TO: File S-69623

From: Ann Reece, District Transfer Advisor

RE: Reconsideration of Permit S-55119 issued April 27, 2018 - Clarification and Place of Use for Application S-69623, Tualatin Valley Irrigation District (TVID)

Today I met with Joe Rutledge up at the TVID office in Forest Grove and went over the contents of Permit S-55119 with him in detail. These are my notes from our meeting.

On the Permit:

> PURPOSE OR USE OF THE WATER: AGRICULTURAL USE AND IRRIGATION ON 34,679.98 ACRES

This should read AGRICULTURAL USE ON 34,258.78 acres and IRRIGATION ON 17,078.8 ACRES.

On the permit:

> STATUS A - ORIGINAL (ASSESSED LANDS)/PRIMARY AGRICULTURAL USE - CERTIFICATE 88122
> STATUS B - USA/PRIMARY AGRICULTURAL USE - PERMIT 49958
> STATUS C - NEW/PRIMARY IRRIGATION AND AGRICULTURAL USE APPLICATION 69623

Status A means permit (S-55119) was to include agricultural use (AG) on the POU authorized for irrigation (IR) and supplemental irrigation (IS) on Cert 88122 [note: this certificate was issued after S-69623 was filed; the issuance of Permit S-55119 for Application S-69623 was delayed so that the AG use (only) could match up with the POU on Certficate 88122.]

Status B means means permit (S-55119) was to include AG use for the POU on Permit S-49958. The source of water for IR and IS authorized under Permit S-49958 is wastewater. Joe said *the place of use for Permit S-49958 should NOT be included on Permit 55119 for AG (or any other) use.*

Status C means means permit (S-55119) was to include AG+IR on lands located within TVID district boundaries, but not (yet) included on any other water right issued to the district or BOR. These are also referred to as "new lands".

References to "Status A, B or C" on the permit are confusing and not meaningful and thus, will not be included in the permit.

MEMORANDUM

On the permit:

POINT OF DIVERSION LOCATION:

DIVERSION PT RM	NAME	DIVERSION DESCRIPTION		TAX LOT	STATUS
9.5	TUALATIN COUNTRY CLUB	2S1W14	SESE	200	C
12.0	WANETA CHAMBERLIN	2S1W16	SESE	108	C
13.2	MADGE MORAND	2S1W16	NWSW	2600	C
13.7	JAMES HASUIKE	2S1W17	NESW	207	B
13.7	THOMAS O'HALLORAN	2S1W17	NESW	1000	A

etc. . .

Joe clarified that these are direct points of diversion on the Tualatin River. *The name and status columns should be removed from the point of diversion list.*

On the permit:

LOCATION OF PLACE OF USE:

Orig Acres	Addtl Acres	P/A/S	Location	S	Twn	Rng	Name	Map
0.00	4.20	P	SWNW	7	1 N	2 W	REMI COUSSENS	88
0.00	3.10	P	NWSW	7	1 N	2 W	REMI COUSSENS	88
0.00	14.50	S	NWSW	7	1 N	2 W	REMI COUSSENS	90
0.00	2.70	S	SESW	7	1 N	2 W	REMI COUSSENS	90
0.00	0.50	S	NWNW	18	1 N	2 W	REMI COUSSENS	90
0.00	0.20	P	NENE	2	1 N	3 W	M.V. CROPP FARMS	275,276
0.00	2.60	S	NENE	2	1 N	3 W	M.V. CROPP FARMS	275,276
5.20	0.00	P	NENE	2	1 N	3 W	MELVIN FINEGAN	ORIGINAL MAP 647
40.78	0.00	P	NWNE	2	1 N	3 W	MELVIN FINEGAN	ORIGINAL MAP 647

etc.

Joe clarified that the column labeled "Original Acres" represents AG use (only) on Permit S-55119, and the place of use was meant to corresponded to place of use for irrigation and supplemental irrigation on existing district or BOR water rights (i.e., these lands already are authorized for IR or IS, and so only need additional AG use). Joe clarified that *the place of use for AG (only) should be the same as those currently authorized for IR or IS under Cert. 88122*[1] (perfected under Permit S-35792). *The total acreage for AG Use (only) should equal 17,078.8* acres [Cert 88122 = 12156.3 acres IR + 4922.5 acres IS]. The place of use maps are the same as those for Certficate 88122 (issued to BOR).

Joe clarified that "Addtl Acres" represent AG + IR use, and the place of use corresponds to lands considered "new" that are located within TVID district boundaries, but not (yet) included on any other water right issued to the district or BOR. *The place of use and acreage should be as listed on Permit S-55119 and should equal 17,179.98 acres.* The maps showing the place of use for these "new lands" were filed with the permit application and are located in the vault (in Pocket folders).

The column P/A/S means that the place of use listed on Permit S-55119 has (or had at the time the application was filed) primary irrigation (P) or supplemental (S) irrigation on a district or BOR held water right other than Permit S-55119. [Note: presumably the "A" stood for "Agricultural use, but no "A"s show up elsewhere in this column.] *The "P/A/S column will be removed from the permit.*

References to place of use names and maps will be removed from the permit.

Hi Ann,

Great job understanding what our Districts needs are. It was nice to have you out to the office to go over all the little details. I do concur with the memo, and do have some direct deversions (see attached) that need to come off the list because they are wastewater rights, they include the 2 in the table below.

Thanks, Joe

Subject: reconsideration of Permit S-55119 TVID

Hi Joe,

I wrote up a memo summarizing our June 28, 2018 discussion about reconsideration of Permit S-55199. Please review carefully, and let me know if you concur with all that is stated, or if I missed something. If you concur with the memo we should be able to re-issue the permit very soon.

I also have a question on the list of direct points of diversion on the Tualatin River. Do any of these points of diversion deliver ONLY wastewater under Permit S-49958? The wastewater is not a source on the permit, so any points of diversion that ONLY divert wastewater should be removed from the permit. The direct diversions start at River Mile 9.5 and go upstream to River Mile 64. I attached the list that was in Permit S-55199. Please indicate which ones (some or all) need be removed from the list for this permit.

Also, there are two direct points of diversions located in sections where the Tualatin River doesn't pass through. Do you have better location information for these to? These are highlighted below.

DIRECT POINTS OF DIVERSION ON THE TUALATIN RIVER:

Re: Notice of Reconsideration of Final Order on Water Right Application S-69623 and Permit S-55119

Dear Mr. Rutledge,

Pursuant to OAR 137-004-0080(5) the Water Resources Department is reconsidering the Final Order on Application S-69623 and Permit S-55119, issued April 27, 2018, for purposes of, but not limited to, stating the correct the total number of acres being authorized for irrigation, clarifying the descriptions of the direct points of diversion on the Tualatin River, removing references to "P/A/S" from the "Location of Place of Use:" table, adding the authorized use(s) as either (1) Agricultural Use or (2) Agricultural Use + Irrigation to the same table, and correcting errors in the place of use. The Final Order and Permit remain in effect during reconsideration. On conclusion of reconsideration the Department will issue an order confirming, modifying or reversing the existing order.

Sincerely,

Dwight French,
Water Right Services Division Administrator

SPECIALIST: Kim French

Oregon Water Resources Department
Water Right Services Division

Water Right Application S-69623 in the name of TUALATIN VALLEY IRRIGATION DISTRICT	)))	FINAL ORDER ON RECONSIDERATION

Summary: Order approving Application S-69623, as amended and issuing Permit S-55199.

Authority

The application is being processed in accordance with Oregon Revised Statute (ORS) 537.153 through 537.175, and 390.826, and Oregon Administrative Rule (OAR) Chapter 690, Divisions 5, 33, 300, 310, 400, 410, and Willamette Basin Program OAR 690-502. These statutes and rules can be viewed on the Department's website: https://www.oregon.gov/OWRD/programs/policylawandrules/Pages/default.aspx

The Department's main page is https://www.oregon.gov/owrd.

This Final Order is issued pursuant to ORS 537.170(6) to (9) and OAR 690-310-0170 to 0190.

FINDINGS OF FACT

1. On May 24, 1988, Tualatin Valley Irrigation District submitted an application to the Department for a water use permit.

2. The Department issued a Proposed Final Order on September 10, 1996.

3. The protest period closed October 25, 1996, and no protest was filed.

4. On April 27, 2018, the Department issued a Final Order and Permit S-55119.

5. On June 26, 2018, the Department gave notice of Reconsideration of Final Order on Water Right Application S-69623 and Permit S-55119. The April 27, 2018 Final Order and Permit S-55119 remained in effect during reconsideration.

6. On June 28, 2018, the applicant clarified the uses proposed under this application as agriculture use on 34,258.78 acres and irrigation of 17,179.98 acres, with no more than 17,000 acres irrigated during any one season. The applicant also clarified that the place of use for agricultural use (only) of 17,078.8 acres is consistent with the place of use authorized under Certificate 88122 for primary and supplemental irrigation.

7. The findings of fact in the Proposed Final Order are incorporated herein, with the following modifications:

    a. Corrections were made to the number of acres authorized for irrigation and the descriptions of the direct points of diversion on the Tualatin River. References to "P/A/S" were removed from the "Location of Place of Use" table. The authorized uses were revised to include (1)

Agricultural Use or (2) Agricultural Use + Irrigation and other corrections were made to the authorized place of use, based upon clarifications made in Finding of Fact #6.

8. The proposed use would not impair or be detrimental to the public interest.

CONCLUSIONS OF LAW

The conclusions of law in the Proposed Final Order issued September 10, 1996 are incorporated herein, with the above modifications.

NOTE: When issuing permits, ORS 537.170(6) authorizes the Department to include provisions or restrictions concerning the use, control and management of the water to be appropriated for the project.

ORDER

Application S-69623 is approved with Permit S-55199.

DATED AUG 0 8 2019

Dwight French
Water Right Services Division Administrator, for
Thomas M. Byler, Director
Oregon Water Resources Department

STATE OF OREGON

COUNTY OF WASHINGTON

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

TUALATIN VALLEY IRRIGATION DISTRICT
2330 ELM STREET
FOREST GROVE OR 97116

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: S-69623

SOURCE OF WATER: SCOGGINS RESERVOIR, CONSTRUCTED UNDER PERMIT R-5777 AND SCOGGINS CREEK, TRIBUTARIES TO THE TUALATIN RIVER; AND THE TUALATIN RIVER, TRIBUTARY TO THE WILLAMETTE RIVER

PURPOSE OR USE OF THE WATER: AGRICULTURAL USE ON 34,258.78 ACRES; AND PRIMARY IRRIGATION OF 17,179.98 ACRES, SUBJECT TO THE FOLLOWING LIMITATION: **NO MORE THAN 17,000 ACRES SHALL BE IRRIGATED IN ANY ONE IRRIGATION SEASON. THE DISTRICT MUST SUBMIT A LIST OF THE ACRES TO BE IRRIGATED TO THE WATERMASTER BY JUNE 1 OF EACH YEAR.**

MAXIMUM RATE: 81.25 CUBIC FEET PER SECOND (CFS), BEING UP TO 81.25 CFS FROM THE TUALATIN RIVER AND 23.6 CFS FROM SCOGGINS CREEK, WITH ANY DEFICIENCY IN LIVE FLOW MADE UP FROM STORED WATER IN SCOGGINS RESERVOIR, CONSTRUCTED UNDER PERMIT R-5777.

USE OF STORED WATER UNDER THIS PERMIT IS NOT IN ADDITION TO THE RATE OR DUTY ORIGINALLY AUTHORIZED UNDER PERMIT S-35792 OR PERMIT S-49958 FOR IRRIGATION USES.

PERIOD OF USE: LIVE FLOW - AGRICULTURAL USE - NOVEMBER 1 THROUGH APRIL 30

LIVE FLOW – IRRIGATION - MARCH 1 THROUGH APRIL 30

STORED WATER - AGRICULTURAL USE – JANUARY 1 THROUGH DECEMBER 31 (OR AS LIMITED BY CONTRACT)

STORED WATER - IRRIGATION - MARCH 1 THROUGH OCTOBER 31 (OR AS LIMITED BY CONTRACT)

DATES OF PRIORITY: MAY 24, 1988 FOR 43.75 CFS, AND DECEMBER 16, 1988 FOR 37.5 CFS

				TOTAL	**17179.98**

1. **Measurement Devices and Recording/Reporting of Annual Water Use Conditions:**

   A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the device in good working order.

   B. The permittee shall allow the watermaster access to the device; provided however, where any device is located within a private structure, the watermaster shall request access upon reasonable notice.

   C. The permittee shall keep a complete record of the volume of water diverted each month, and shall submit a report which includes water-use measurements to the Department annually, or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.

   D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

2. Diversion screening or fish passage facilities shall be designed, installed, and operated to Oregon Department of Fish & Wildlife specifications.

3. The use of stored water under this right is subject to the terms and conditions of contract No. 14-06-100-6956, or a satisfactory replacement, between the Bureau of Reclamation and the applicant, a copy of which is on file in the records of the Water Resources Department.

4. A fishway to ensure adequate upstream and downstream passage for fish is required for any in-channel obstruction, unless the permittee has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission.

STANDARD CONDITIONS

1. Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

2. Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

3. If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

4. The use may be restricted if the quality of the source stream or downstream waters decreases to the point that those waters no longer meet state or federal water quality standards due to reduced flows.

5. This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

6. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

7. The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

8. Construction of the water system shall begin within five years of the date of permit issuance. The deadline to begin construction may not be extended. This permit is subject to cancellation proceedings if the begin construction deadline is missed.

9. Complete application of the water shall be made within five years of the date of permit issuance. If beneficial use of permitted water has not been made before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.

10. Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner.

Re: Application S-69623 - Tualatin Valley Irrigation District

Dear Mr. Bailey:

On behalf of the Tualatin Valley Irrigation District ("TVID") these comments are submitted in support of the Proposed Final Order for Application S-69623 issued on September 10, 1996. These suggested corrections should be made before the Final Order is entered and the permit is issued.

1. Description of Place of Use. Since the application was originally filed, changes have occurred in property ownership and lands have been partitioned. TVID has reviewed the draft permit and has identified several hundred corrections that need to be made in the description of the plan of use before the permit is issued. TVID is still completing its review and will submit the corrections to you as soon as possible.

2. Nature of Use. In the Proposed Final Order and the draft permit the purpose or use is referred to as either "irrigation" or "agricultural use". Under the definitions of beneficial use most recently adopted by the Water Resources Commission, the requested use is for irrigation, agricultural use and nursery operations use. "Nursery operations use" should be added to the stated purpose before the permit is issued. It should also be added to the descriptions of the period of allowed use.

3. Bureau of Reclamation Contract. TVID recommends that the references to the Bureau of Reclamation Water Supply Contract should be deleted from the Proposed Final Order and the draft permit. TVID's contractual obligations to the Bureau are independent of any permit it holds from the State of Oregon and do not need to referenced.

Please call me or Marge Wattier at TVID if you have any questions regarding these comments.

Sincerely yours,

Gail L. Achterman

Subject: TVID superseding permit App S-69623

Kim,

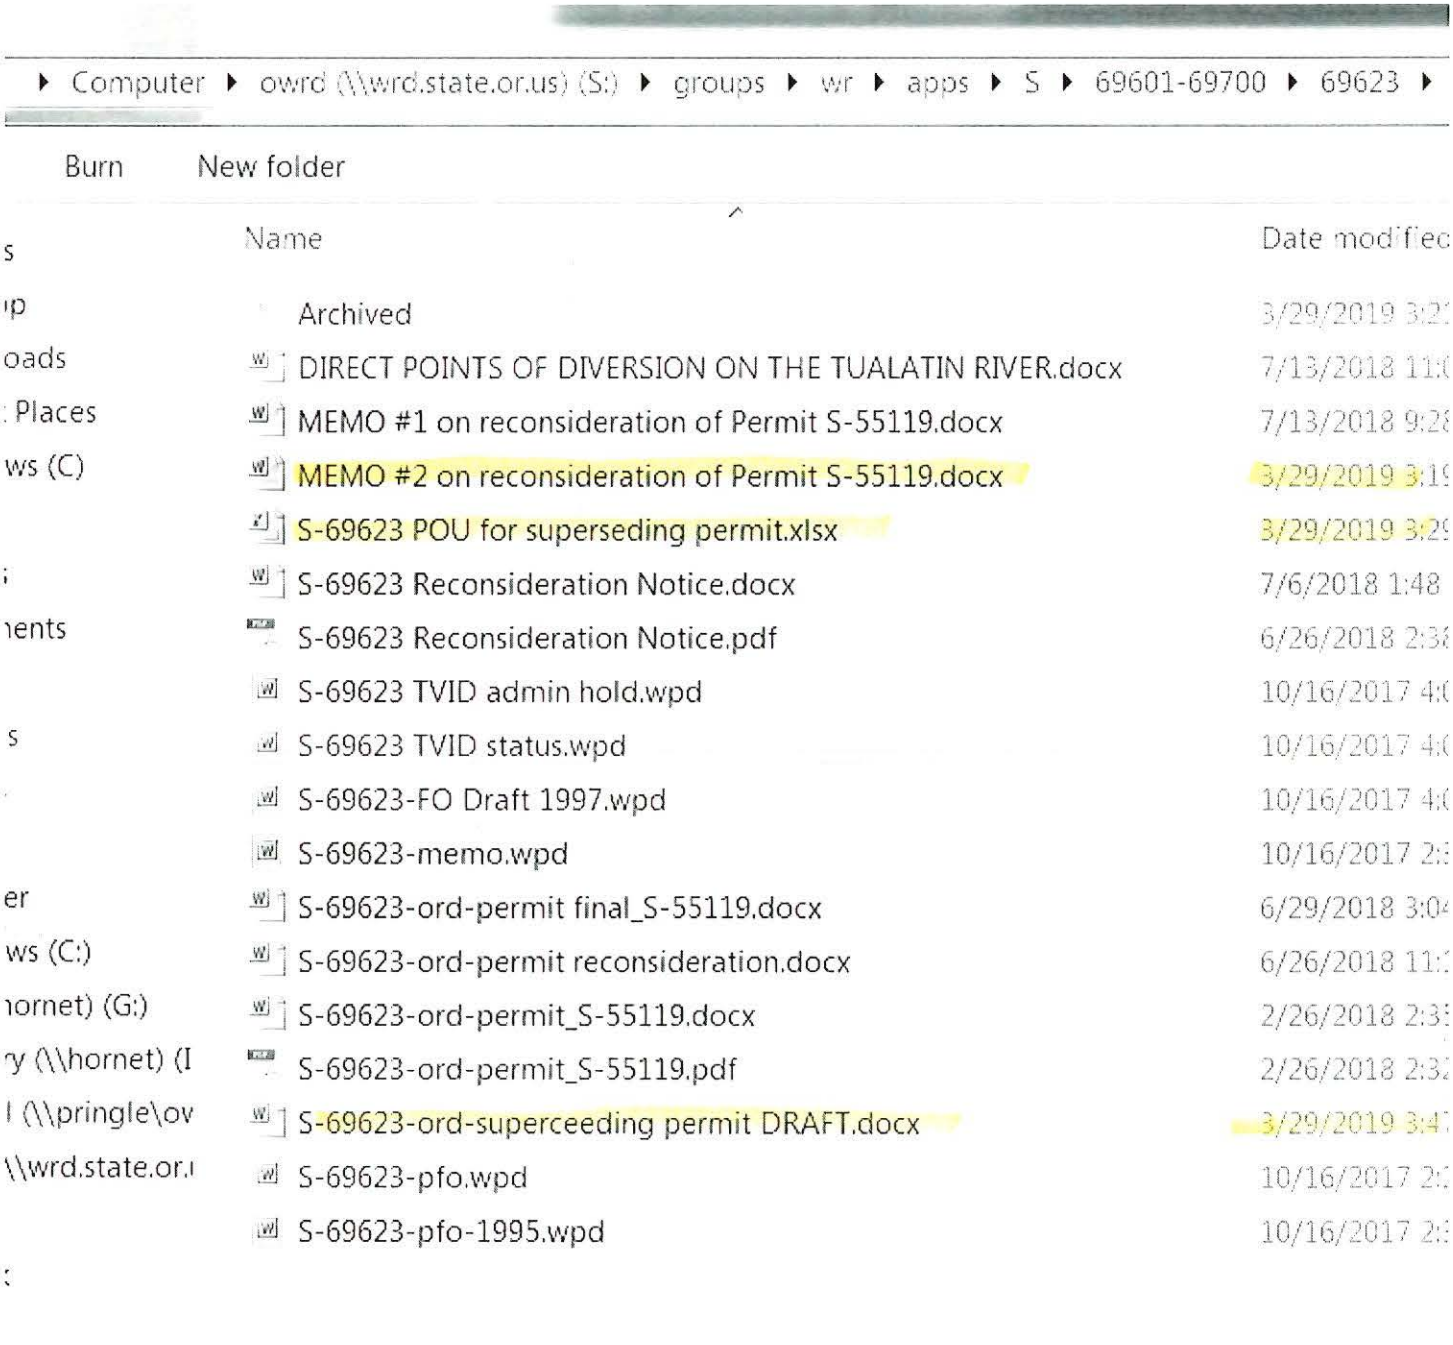
It has been a long haul, but this permit is finally drafted. There are yellow highlights that need attention on the Final Order (needs to be updated for the reconsideration?) and inside the permit, please see pages 1, 6 and 92 for highlights. I made a spreadsheet for importing the POU into WRIS. The documents I generated are shown in yellow highlights below. I moved the old spreadsheets into archives so they wouldn't get confused with the final one for the superseding permit. The place of use determination is explained in MEMO #1 and #2. This POU incorporates the authorized "ON" or proposed places (not all are issued yet) of use from transfers T-12093, T-12450, T12693, T12780 and T12840.

The POU is broken into two tables. One for AG USE (only) 17078.8 acres; and a second one for AG + IR 17179.98 acres. The lands from the two tables do NOT overlap.

The maps for AG Use only are the same as the final proof maps in WRIS for Certficate 88122 (except as modified by the above listed transfers). The AG use is for lands already authorized for primary and supplemental irrigation. They only need the addition of AG use.

The maps for AG + IR were filed with the permit application S-69623 and are located in the vault (in Pocket folders). AG + IR correspond to "new lands" available for irrigation inside district boundaries. These lands need both AG and IR use.

Let me know if you have any questions! Ann



Best regards,

Ann Reece

Attachments: SKMBT_C35317120712130.pdf

Hi Kim,

As discussed this morning TVID would like to proceed with the 1988 Application S-69623. Please look at the attached District Boundary maps and let me know if they are sufficient. The acres outlined in the application are within the TVID boundary. Also as discussed I would like to change the acreage amount from 17,500 to 17,000. Our contract with the Bureau 14-06-100-6956 article 10.(a) states that the irrigable lands within the Boundary can not exceed 17,000 acres. We will issue a check for $520 to cover the recording fees.

Thank you for helping us get this finalized and let me know if you need anything else.

Joe Rutledge
District Manager

Dwight, Kelly is continuing to work with the district. I think that we are getting close. I also think (check with Kelly) that we have locked down the area served under the permit. The only remaining issue relates to primary / supplemental. There are a number of existing water rights within the area covered by the BOR permit. The BOR and District want the BOR right to be the "primary" water right. The permit contains a provision by with the certificate can be issued as "primary" if the existing water rights are no longer in conflict. The district is working with the water right holders to either cancel or diminish the existing water rights.

RE: Application S-69623

Mr. Love:

Processing of this application, which was submitted in 1988, has been on hold for several years.

The purpose of this letter is to ascertain the status of the application, with the ultimate goal of proceeding with its processing.

Having spoken with Kelly Starnes in our office, as well as with Don Knauer, it is my understanding that you intended for the Department to refrain from processing application S-69623 until claims of beneficial use had been submitted and processed for your permit S-35792 and permit amendment T-8590.

Please confirm whether this is correct, and if possible provide a timeline for when you will want to proceed with processing of S-69623. We would like to conclude the processing of the application without any unnecessary delay.

Also, please be informed that when we do resume processing the application, one of our first tasks will be to determine whether the application lacks any required information. Though we have not made a complete review, it appears likely that updated maps may be needed, as well as payment of fees possibly exceeding $60,000.00. (This figure, which is based upon calculations we performed in 1997, is primarily the result of the application having been amended to propose irrigation of a much larger area than what was originally proposed in the application.)

I look forward to your reply. If you have any questions, please feel free to call me at 503-986-0813.

Sincerely,

Mr. Cory C. Engel
Water Right Application Caseworker

Note: Final Order is Attached

STATE OF OREGON
WATER RESOURCES DEPARTMENT

INTEROFFICE MEMORANDUM *January 14, 1997*

TO: DWIGHT FRENCH
CC:
FROM: D Baer

SUBJECT: Permit recording fees for S-69623, TVID

In response to the PFO the applicant submitted what they claim to be "several hundred corrections" in the POU description. These corrections were made on an electronic copy of the draft permit. Using the revised info I have tabulated the acreages for each use and recalculated the fees as you requested. The total number of acres has increased by nearly 1500 acres from that listed in the PFO. Consequently, the required permit recording fees are approximately $3000 higher than I stated in my previous memo to you, dated October 29, 1996. Following are three fee options based on, 1) uses proposed in PFO, 2) typical permit wording, and 3) with additional use requested by the applicant.

OPTION ONE One use, as proposed in PFO: IRRIGATION (AGRICULTURAL USE) ON 36172.90 ACRES AND PRIMARY IRRIGATION OF 17791.17 ACRES.

	$ 100	IRRIGATION, first 10 acres
+	$72196	$2 X 36098 acres
LESS	$ 7080	FEES PREVIOUSLY PAID
	$65216	AMOUNT REQUIRED PRIOR TO PERMIT ISSUANCE

OPTION TWO Two uses, as proposed in the draft Final Order: IRRIGATION OF 17791.17 ACRES, SUPPLEMENTAL IRRIGATION OF 18316.83 ACRES AND AGRICULTURAL USE ON 36172.90 ACRES."

	$ 100	IRRIGATION, first 10 acres
	$72196	$2 X 36098 acres
	$ 100	AGRICULTURAL USE, first cfs
+	$ 4050	$50 X 81 cfs
LESS	$ 7080	FEES PREVIOUSLY PAID
	$69366	AMOUNT REQUIRED PRIOR TO PERMIT ISSUANCE

OPTION THREE Three uses, as requested by the applicant: IRRIGATION OF 17791.17 ACRES, SUPPLEMENTAL IRRIGATION OF 18316.83 ACRES, AGRICULTURAL USE ON 36172.90 ACRES, AND NURSERY OPERATIONS."

	$ 100	IRRIGATION, first 10 acres
	$72196	$2 X 36098 acres
	$ 100	AGRICULTURAL USE, first cfs
	$ 4050	$50 X 81 cfs
	$ 100	NURSERY OPERATIONS, first cfs
+	$ 4050	$50 X 81 cfs
LESS	$ 7080	FEES PREVIOUSLY PAID
	$73516	AMOUNT REQUIRED PRIOR TO PERMIT ISSUANCE

Revised maps may be required to correctly locate the "corrected" place of use. ***Do you want someone to invest the time to ensure that the maps and permit agree?*** If so, perhaps a spot check should be completed to see if any errors are apparent. In the event that errors are found, I recommend issuing a FO with draft permit . The order should state,

> "Upon submission of a suitable map, showing the location of the place of use identified by taxlot, Township, Range, Section, and by quarter-quarter section (40 acre parcel, including a notation of the number of acres in each quarter-quarter section, Application S-69623 shall be approved as modified above [note: modification required to correctly describe the allowed use] and as provided on the attached draft permit.

Kelly,

After I sent the message below, you and I talked about this application, and you expressed doubt about whether permit S-35792 would be adequate to meet their needs because they irrigate more than 17,000 acres. If that's the case, then it wouldn't make sense for TVID to withdraw their pending permit application. You were going to check with Dave Jarrett and Tom Paul on it and then get back to me.

Joe Rutledge called me today. I told him about our conversation, and he said that they have a 2,000 acre permit in addition to the 17,000 acres. (I haven't confirmed that.) He said that the combined total is adequate to meet their irrigation needs. Before withdrawing S-69623, he wants assurance that (a) they will be able to use established processes (temporary district transfer I presume) to move the acres around as needed, and (b) use the water for incidental agricultural uses. Rutledge also offered to talk to Jarrett directly if he could provide some clarity.

I have these questions:

1. Have you discussed this with Jarrett/Paul? If so, what was the outcome of that?

2. My initial interpretation of permit S-35792 is that it doesn't allow use of water for non-irrigation agricultural uses. Do you agree?

3. If S-35792 doesn't allow agricultural use, is there a way to accomplish that pre-certificate? (I know they can do a transfer later, but what about the time between final proof and certification?)

4. Do you know anything about the 2,000 acre permit he was talking about? I was unable to confirm it.

Thanks.

Cory

On May 27, I wrote:
Kelly,

I spoke with Joe Rutledge this afternoon. He clarified that they didn't really have a use for the application I'm responsible for, and that they would withdraw it if we could guarantee that they will be able to use the 17,500 acres under their other permit for any land within the district,

using current rules (temporary transfers or whatever).

Is that doable?

No I haven't.
Tom is in next on Thursday. I'll see if I can corner him and find out what is happening with our final proof survey process - this application is waiting for that to be done. Then this application will fill in any holes left by the first permit.
Dwight

RE: Application S-69623

Mr. Engle:

We have received your letter dated January 19, 2005. Tualatin Valley Irrigation District (TVID) is nearing the end of its final proof process for S-35792. We would like to ask that application S-69623 be put on administrative hold for one year to allow for reevaluation after the certificate is issued or proof to the satisfaction thereof.

If you have any question please call me at 503-357-3118

Sincerely,

Joe Rutledge

This permit, when issued, is for the beneficial use of water. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible that the land use you propose may not be allowed if it is not in keeping with the goals and the acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.

ATTACHMENT "D" CONTINUED

The District operates nine of the pumps which has a combined capacity of 145 cubic feet per second. The irrigation water is pumped into a small regulating tank and distributed through 90 miles of underground pressurized pipeline. The irrigators on the pipeline have a turnout box which includes a flowmeter, valve and pressure reducing valve.

The district releases water from Scoggins Reservior to be pumped directly from Scoggins Creek, Gales Creek and the Tualatin River.

WATER RESOURCES DEPT.
SALEM, OREGON

Attachment "E"

REMARKS: The amount of water for this application will not be in addition to either the rate or duty of the permit filed by the United States Department of the Interior. This permit is number 35792 and was issued on February 20, 1963. This 1963 permit allows for a total of 366.8 cfs from various sources. The amounts are 245.8 from Scoggins Creek and Reservoir, 6.0 cfs from Carpenter Creek, 13.0 cfs from Gales Creek and 90.0 cfs from the Tualatin River. This application is to address the issue of rotating irrigation water from field to field that may not have a permit. The use of irrigation water that the irrigator or the district is rotating to allow for better use of the water must have a legal permit for that use. The rotating of water has problems as far as the current Water Law, which states that water is appurtent to the land. This application in the most part is to address that issue, so that water can be rotated on to land with a legal permit.

The Lower Willamette River Basin program will preclude the use of direct (natural) flow in some areas. For these situations the use of stored water from Scoggins Reservoir will supply those needs.

The Tualatin River Basin was adjudicated in the late 1950's. Since that time the agricultural practices have vastly changed. The construction of the Tualatin Project brought about the most significant change. This project provides a reliable water source for approximately 19,000 acres of previously nonirrigated crop land. This project allowed the expansion of row crops, nurseries and various agricultural commodities. This application will include out-of-season usages due to the changes in the irrigation practices. The irrigation practices in many cases require an application of water for seed germination and other similar situations (see ATTACHMENT "F" for support).

Please see the attached support letter for other areas of use.

This application includes a map of the boundaries of the Tualatin Valley Irrigation District. The scale is 1/2" = 1 mile. The future maps for idenitfication of individual lands will be, in most cases, 1" = 400 feet. This scale for the boundary map was used to provide a map size that is usable for reference.

ATTACHMENT "E" - PART 2

As stated in Permit No. 35792:

This appropriation shall be limited to 1/80 of one cubic foot per second or its equivalent for each acre irrigated from direct flow and shall be further limited to a diversion of not to exceed 2

1/2 acre feet per acre for each acre irrigated during the irrigation season of each year from direct flow and storage from reservoir to be consructed under permit No. R-5777 provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein and further limited to the use of stored water only on the lands described as supplemental, however said lands listed as being for supplemental irrigation may be considered as primary irrigation if at time of final proof it is determined that no such primary right exists for these lands, and shall be subject to such reasonable rotation system as may be ordered by the proper state official.

ATTACHMMENT "D"

GENERAL DESCRIPTION OF THE TUALATIN PROJECT

The Tualatin Project is located in Washington County, Oregon, except for a part of the Wapato Improvement District and some adjacent lands in northern Yamhill County. Major features included in the project are:

1. Scoggins Dam and Reservoir(Henry Hagg Lake)
2. Patton Valley Pumping Plant and Distribution system
3. Springhill Pumping Plant and Distribution system

Scoggins Dam was constructed of zoned earthfill, obtained from a borrow area on the right abutment and from materials obtained from the excavation of the spillway, spillway outlet channel, tunnel and outlet works. Riprap and bedding materials were obtained from previously owned quarries in the area. The dam is 2,700 feet long at its crest and is 147 feet in height from the lowest pointin the foundation trenches. Height from the original ground along Scoggins creek is 110 feet. The total volume of embankment in the dam is 3,648,177 cubic yards. The top of the dam was paved as a roadway and has been incorporated into the county road system circling the reservoir area.

The reservoir has an active storage capacity of 53,600 acre feet and extends about three miles upstream from the dam. Water releases for normal river flow, M&I use and irrigation are by way of the outlet tunnel and the spillway outlet channel into Scoggins Creek downstream from the dam. Lake Oswego Corporation water is being discharged into Scoggins Creek through the river outlet and diverted from the Tualatin River into the Lake Oswego canal.

The Patton Valley Pumping Plant was constructed on the right bank of Scoggins Creek about 2.5 miles downstream of the dam. The plant is an outdoor type with 6 vertical shaft pumping units and a plant capacity of 40 cubic feet per second. The plant supplies irrigation water through 3.49 miles of underground pipeline. The Wapato Improvement District is irrigated by water which can be released into the Tualatin River upstream of the diversion point for the Wapato District.

The Springhill Pumping Plant was constructed on the right bank of the Tualatin River approximately nine miles downstream from the the dam and about two miles south of Forest Grove. The plant is an indoor type has a total of 13 pumping units. The plant is operated jointly with the Joint Utilities Commission which was formed from the cities of Hillsboro, Forest Grove and Beaverton.

INTEROFFICE MEMORANDUM *October 29, 1996*

TO: DWIGHT FRENCH
CC:
FROM: D Baer

SUBJECT: APPLICANT COMMENTS TO PFO FOR S-69623, TVID

On 9/10/96 a PFO was issued proposing to allow 81.25 CFS from TUALATIN RIVER, SCOGGINS CREEK, DAIRY CREEK, GALES CREEK AND SCOGGINS RESERVOIR for IRRIGATION (AGRICULTURAL USE) ON 34,675.78 ACRES AND PRIMARY IRRIGATION OF 17175.78 ACRES. The protest period closed 10/25/96; no protests were filed. Comments were submitted, however, regarding three points.

1. *Applicant claims there are "several hundred corrections that need to be made in the description of the plan (sic) of use before a permit is issued."*

A revised map is required to correctly locate the proposed place of use. I recommend issuing a FO with draft permit. The order should state;

> "Upon submission of a suitable map, showing the location of the place of use identified by taxlot, Township, Range, Section, and by quarter-quarter section (40 acre parcel, including a notation of the number of acres in each quarter-quarter section, Application S-69623 shall be approved as modified above [note: modification required to correctly describe the allowed use] and as provided on the attached draft permit.

2. *Applicant asserts requested uses are irrigation, agricultural use and nursery operations.*

Applicant should tell us how much water will be required for use. I see this as two uses, therefore the PFO should be modified to allow "IRRIGATION OF 17175.78 ACRES, SUPPLEMENTAL IRRIGATION OF 34,675.78 ACRES AND AGRICULTURAL USE ON 34,675.78 ACRES."

Fees assessed for permit recording will vary depending on the number and type of uses listed on the permit.

OPTION ONE One use, as proposed in PFO: IRRIGATION (AGRICULTURAL USE) ON 34,675.78 ACRES AND PRIMARY IRRIGATION OF 17175.78 ACRES.

	$ 100	IRRIGATION, first 10 acres
+	$69332	$2 X 34666 acres
LESS	$ 7080	FEES PREVIOUSLY PAID
	$62352	AMOUNT REQUIRED PRIOR TO PERMIT ISSUANCE

OPTION TWO Two uses, as proposed under item 2, above: IRRIGATION OF 17175.78 ACRES, SUPPLEMENTAL IRRIGATION OF 34,675.78 ACRES AND AGRICULTURAL USE ON 34,675.78 ACRES."

	$ 100	IRRIGATION, first 10 acres
	$69332	$2 X 34666 acres
	$ 100	AGRICULTURAL USE, first cfs
+	$ 4050	$50 X 81 cfs
LESS	$ 7080	FEES PREVIOUSLY PAID
	$66502	AMOUNT REQUIRED PRIOR TO PERMIT ISSUANCE

OPTION THREE Three uses, as requested by the applicant: IRRIGATION OF 17175.78 ACRES, SUPPLEMENTAL IRRIGATION OF 34,675.78 ACRES, AGRICULTURAL USE ON 34,675.78 ACRES, AND NURSERY OPERATIONS."

	$ 100	IRRIGATION, first 10 acres
	$69332	$2 X 34666 acres
	$ 100	AGRICULTURAL USE, first cfs
	$ 4050	$50 X 81 cfs
	$ 100	NURSERY OPERATIONS, first cfs
+	$ 4050	$50 X 81 cfs
LESS	$ 7080	FEES PREVIOUSLY PAID
	$70452	AMOUNT REQUIRED PRIOR TO PERMIT ISSUANCE

3. *Applicant opposes any reference to BOR contract within the text of the permit.*

Condition 1B, stating that use of water under the terms of the permit is subject to the terms and conditions of BOR contract, should remain in the permit.

STATE OF OREGON
WATER RESOURCES DEPARTMENT
PUBLIC NOTICE OF WATER USER REQUESTS
Regarding Application S-69623

The Oregon Water Resources Department is evaluating the request by Tualatin Valley Irrigation District to use 36,465 gallons per minute of the waters of the Willamette River Basin for irrigation, agriculture and nursery operations purposes. The permit, if issued, would supplement Permit 35792 which authorizes water use for the Bureau of Reclamation, Tualatin Basin Project. This application does not request additional water. It adds lands to the project to allow rotation of water between fields and requests that water be allowed to be used for agricultural and nursery operations in addition to irrigation.

The proposed place of use is located within Washington County specifically in T1N, R2W; T1N, R3W; T1N R4W; T1S, R4W; T1S, R3W; T2N, R4W; T2S, R1W; T2S, R2W; T2S, R3W and T2S, R4W; W.M. This process is to determine if the request is in compliance with state water laws and regulations. Public participation and comments are encouraged.

ORS 537.130(3) requires notice to all affected landowners and ORS 537.130 (4) allows the Department to make this notice through publication in a local newspaper if there are more that 25 landowners involved.

For further information contact the Water Resources Department Water Rights Information Group at 1(800)624-3199 ext. 499. Written requests may be addressed to the Oregon Water Resources Department at 158 - 12th St. NE Salem, Oregon 97310-0210.

Subj: Application S-69623

Thank you for your assistance with this notice. For your information, I've attached OAR 690-310-020. This rule allows the applicant to arrange for this notice.

It is my understanding that you will be using the Hillsboro Argus for this notice. The ad must run once per week for three consecutive weeks. Before a permit can be issued, an affidavit or certificate of publication must be received. Please send this to Mike Mattick, Senior Water Rights Specialist c/o Oregon Water Resources Department 158 12th St. NE Salem, Oregon 97310 0210. If you have any questions please contact me (ext 254) or Mike (ext 276) at 1-800-624-3199.

Since there are multiple sources of water related to this application (Tualatin River, Scoggins Reservoirs and several smaller tributaries) the Department has chosen to describe the source as Willamette River Basin.

Listed below is the copy required:

STATE OF OREGON
WATER RESOURCES DEPARTMENT
PUBLIC NOTICE OF WATER USE REQUESTS
Regarding Application S-69623

The Oregon Water Resources Department is evaluating the request by Tualatin Valley Irrigation District to use 36,465 gallons per minute of the waters of the Willamette River Basin for irrigation purposes. The proposed place of use is located within Washington County specifically in T1N, R2W; T1N, R3W; T1N R4W; T1S, R4W T1S, R3W; T2N, R4W;T2S, R1W; T2S, R2W; T2S, R3W and T2S R4W; W.M. This process is to determine if the request is in compliance with state water laws and regulations. Public participation and comment is encouraged.

ORS 537.130 (3) requires notice to all affected landowners and ORS 537.130 (4) allows the Department to make this notice through publication in a local newspaper if there are more than 25 landowners involved.

Date: Thu, 15 Feb 1996 10:35:02 -0800
X-Sender: frenchdw@chetco.wrd.state.or.us
To: wr
From: frenchdw@chetco.wrd.state.or.us (Dwight French)
Subject: Period of Use for BOR contract water
X-UIDL: 825005075.028

In the Willamette Basin we have defined the period of use as April 1 through September 30 when the source of water is a BoR contract (Detroit Reservoir for example). The contracts specify that the period of use is April 1 through September 30.

The BoR used this period because they thought it matched our normal period of use. Now that the standard period of use, for irrigation, is March 1 through October 31 a change is (long over due) in order. After discussing the situation with Larry Parsons at BoR (Boise), Larry Jebousek (CWRE and water use consultant) and Steve Applegate we have determined that the following course of action is appropriate:

>From this day forward, in the Willamette Basin, when the source of water is a BoR contract, define the period of use as:

"March 1 through October 31 or as may be further limited by the Bureau of Reclamation water supply contract."

We will develope simular language for other basins. Basically, we will want to allow the standard irrigation season for that area or as may be firther limited by the Bureau of Reclamation water supply contact.

For contracts already issued, where a permit has not been issued, the BoR will begin to have those contracts amended to read similar to the quoted statement above.

If you have any questions, please send me an e-mail, stop by my office or (preferably) bring it up at our next meeting.

Thank you.

FROM: Cory Engel

RE: Processing of S-69623 (Tualatin Valley Irrigation District)

This file appeared one of my work lists for a completeness check. After a cursory look at the file, it became obvious that a large amount of work had been done on the application, including a draft Report of Technical Review which was developed jointly by Steve Brown, Jerry Rodgers, and in cooperation with representatives of TVID.

I spoke briefly with Steve Applegate (who appeared to have had some involvement with its processing) about the file, and he is of the opinion that because the application has been through so much processing already, it would be appropriate to skip the completeness review and the initial review, and proceed to the PFO/FO team to develop a Proposed Final Order.

The file is now in the cabinet, and is awaiting your instructions.

REFERENCE FILE: 69623

The enclosed **DRAFT** of Technical Review is the Department's summary of a specialized analysis of various legal and scientific aspects of your application and proposed water use. We are required by the state of Oregon's administrative rules to conduct the review. A copy has been given to Tom Paul and Jerry Rodgers.

You should note that the draft describes conditions currently anticipated which may limit the water use proposed in your project.

After the final report of technical review is completed, copies will be mailed to you and distributed to organizations or persons who have expressed an interest in your project.

If you wish to comment to any of the analyses contained in the report, please do so within two months.

Sincerely,

Thomas E. Shook
Water Right Specialist

** Water Available

The source of flow data is:

Water Availability for Oregon's Rivers and Streams: Volume 2; Technical Guide and Appendixes. By E. George Robison, May 1991.

These flows represent the amount of water which is likely available in excess of needs for all existing rights (including Instream Water Rights of record and Scenic Waterway Flow requirements) 80% of the time during each monthly period.

10 CONFLICTS WITH OTHER WATER RIGHTS

__X___ There are existing rights from this point of diversion. See permit conditions.

__X___ There are existing water rights appurtenant to the lands described in the application. See permit conditions.

REPORT CONCLUSIONS:

Water in the amount of **81.25 CFS** is likely available for **6** months for Agricultural Use. Stored water from the Scoggins Reservoir project is likely available year round for Agricultural Use and for **8** months for Irrigation. Therefore, the Director finds that water is available in sufficient amount and during periods which will reasonably support the proposed use.

THE PROPOSED WATER USE, AS CONDITIONED, SATISFIES THE REQUIREMENTS OF THIS TECHNICAL REVIEW.

This Report of Technical Review sets out the Director's technical analysis of the application. In addition to this technical analysis, the Director will evaluate this application to determine whether the proposed water use might impair or be detrimental to the public interest under the standards set out in ORS 537.170(5) and OAR 690-11-195. Matters relating to public interest in the proposed water use which are raised in objections will be evaluated following the 60-day objection period.

PROPOSED PERMIT CONDITIONS

Application: 69623

The following conditions will apply to water use under the permit, and will appear in the permit, if issued.

1. Use of water under this permit is subject to all prior rights.

2. Period of allowed use: Live flow - Agricultural Use only, November 1 through April 30. Stored water - Agricultural Use year round, Irrigation during the period of March 1 through October 31

3. Rate 81.25 CFS with any deficiency in natural flow made up from storage in Scoggins Reservoir constructed under permit R-5777.

4. The amount of water used for agricultural use is limited to a diversion of 0.15 cubic foot per second per acre. For the irrigation of **containerized nursery plants**, the amount of water diverted is limited to ONE-FORTIETH of one cubic foot per second (or its equivalent) and 5.0 acre feet per acre per year. For the irrigation of **in ground nursery plants** the amount of water diverted is limited to ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre feet per acre per year. The use of water for agricultural use may be made at anytime of the year that the use is beneficial. For the irrigation of **any other crop**, the amount of water diverted is limited to ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre feet per acre during the irrigation season of each year.

5. Before use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Department. The permittee shall maintain the measuring device, shall keep a complete record of the amount of water diverted and shall submit a report which includes the recorded water use measurements to the Department annually or as may be required by the Director.

6. Water use development requirements:

   A) Begin construction by (one year from issuance of permit).

   B) Complete construction by (five years from issuance of permit).

   C) Completely apply the water to beneficial use by (five years from issuance of permit).

7. Failure to comply with any of the provisions of the permit may result in action including, but not limited to, restrictions on the use, penalties, or cancellation of the permit.

8. The permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

9. The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

10. In the event of a request for a change in point of appropriation, an additional point of appropriation or alteration of the appropriation facility associated with this authorized diversion, the quantity of water allowed herein, together with any other right, shall not exceed the capacity of the facility at the time of perfection of this right.

11. This right is limited to any deficiency in the available supply of any prior right existing for the same land.

12. Prior to seasonal use or before the start of irrigation season which ever is earlier provide the watermaster with a map showing the location of lands irrigated or place of agricultural use.

13. Diversion screening or fish passage facilities shall be designed, installed, and operated to Oregon Department of Fish & Wildlife specifications.

Steve Brown, Water Rights Manager
Oregon Water Resources Department
3850 Portland Rd NE
Salem OR 97310

Dear Steve:

On August 6, 1993, John Ellett and I met with you and others to review a Draft Technical Review of our application 69623. This application was made so that water could be rotated within the district and the type of use could be changed from strictly irrigation to existing actual uses such as frost control, nursery use, livestock watering, spraying, implement washing, cranberry harvesting, etc. The application also requested an extension of the irrigation season for nursery use and frost control and irrigation when necessary. The District also submitted a corrected copy of the lands on the application as prepared by WRD. Numerous typos and misprints were corrected.

Since the original application was submitted to the Water Resources Department in 1988, two events have happened that will hopefully clarify the issuance of this permit. The 1991 Legislature passed HB 2191 which allows irrigation districts to rotate water under specific conditions within its boundaries and the Water Resources Department has developed administrative rules defining "other agricultural uses of water" that covers the Tualatin Valley Irrigation District's needs and also allows waster to be used for these purposes all year around.

Because of the types of crops grown in the District, the district has a need to irrigate outside the existing irrigation season, normally April and October. Because this happens on a regular basis, we want to continue with the application. We also have a need to use water for "other agricultural uses", nursery, frost control, spraying, etc on a year around basis. We also need the ability to rotate water and it is very difficult because of our row crop industry to identify the exact acreage 60 days prior to the May 1st irrigation season date as required by HB 2191. This year is a prime example, due to weather conditions, actual acres were not identified until the first part of June.

The District is not asking to expand its water right only to move the acres around and define the uses that the growers actually need. We do not plan on irrigating more than our contract with the BOR allows in any one year nor use any more water than we have in storage.

All water used in the district is metered and it can be shown that usage will not be over the district's allocated duty of water if used over a twelve month period.

Since the 1988 application was submitted, the district is serving on an interruptable year to year basis approximately 759.30 acres that were not on the application and I would like to include these acres. They would be rotational acres and supplied with storage water which would not interfere with other water rights. Because I would like to operate our district the same throughout, I would also like to include the 2339.3 acres under Permit #49958 as part of this application. This permit allows the district to use water from Unified Sewerage Agencey's Rock Creek Water Treatment Plant. I have no problem with a different priority date on these acres. I would just like treat all the lands the district services the same.

If we can submit the Technical Review to the Tualatin River Water Rights Advisory Committee for their review with these additions I believe we can then make any adjustments that are necessary.

Please advise when the application is ready for the Advisory Committee's review.

Sincerely,

Dan J Wilson
Manager

ATT: Mr. Stephen Brown

Dear Mr. Brown:

I checked with Dan Wilson, TVID manager with regards to your question concerning changes, if any, on the TVID maps recently delivered to ODWR.

TVID made no changes on the original maps, either before or after they were copied, and I made no changes during the proccess of having the original maps repaired and copied.

Except for the fact that the new maps are certified (stamped), they are exactly as the existing set you have on file.

Sorry I didn't send a cover note explaining this when the maps were given to TVID.

Sincerely,

W. Richard Verboort

Reference: File 69623 - Tualatin Valley Irrigation District
File 38447, Permit 35792 - Bureau of Reclamation

Dear Mr. Wilson:

We have received maps showing the location of the lands to receive water for uses other than irrigation allowed under permit 35792. Transparencies of theses maps stamped by a certified water right examiner will need to be submitted if they are to be included as a place of use for pending application 69623.

Upon receipt of maps, I will further review the application and craft permit wording for your review.

After completion of the draft permit, we will need to schedule a meeting with the Tualatin Water Right Application Advisors (TWRAA).

If you have any questions, please contact me.

Sincerely,

Dear Tom:

Attached are 52 individual maps that I would like to include as an amendment to our application, File # 69623. These maps represent acreage that was on our water standby list that were overlooked the first time around.

I know the Department has not acted on our application as of yet and I would encourage you to do so. I would like a permit issued for the 1991 irrigation season.

If I can provide further information please contact me. Thank you for your attention to this matter.

Sincerely,

ATTENTION: TOM PAUL

RE: Reference File 69623
Application of TUALATIN VALLEY
IRRIGATION DISTRICT

Dear Mr. Paul:

Tualatin Valley Irrigation District wishes to amend further its application for a permit to appropriate surface water, Application Number 69623, in the following particulars:

Item 3. Location of area to be irrigated, or place of use if other than irrigation.

This item is to be further amended regarding nursery use in that the District requests that it be granted a permit for a specific number of acres of nursery use without distinction as between greenhouse, container bed and in-ground use. The Applicant recognizes that current Department policy differentiates in the quantities of water use permitted depending upon whether the use is for greenhouse, container bed or in-ground use. The problem for the District is that at any given time with any given number of nurseries, they employ a mix of growing practices involving all three locations and may switch the number of plants among locations in one season. For ease of administration and regulation, the District would propose that it simply be required to report to the Commission upon request at any given time as to the mix of uses by the District's various nursery patrons.

Item 5. The use to which the water is to be applied is:

Irrigation, livestock watering, wildlife attraction, miscellaneous agricultural applications including, but not limited to, mixing with fertilizers, herbicides, pesticides, and any other chemical applications for agricultural purposes, farm implement and building cleanup, during the time period March 1 through October 31 inclusive; general agricultural temperature control during the months of March, April, and May; nursery use during the calendar year.

In all other respects, where not inconsistent with these further amendments, the District's application and prior amendments are to stand as submitted.

Sincerely yours,

BEN LOMBARD, JR.

Salem, OR 97310

Attention: TOM PAUL

RE: Reference File 69623
Application of TUALATIN VALLEY IRRIGATION DISTRICT

Dear Mr. Paul:

Tualatin Valley Irrigation District wishes to amend its application for a permit to appropriate surface water, Application Number 69623, in the following particulars:

Item 3. Location of area to be irrigated, or place of use if other than irrigation.

ATTACHMENT "C" is to be amended to read a total of 31,000 acres within the above listed sections, no more than 17,500 acres of which will be irrigated in any one season. The District will identify those lands to be irrigated in a season before irrigation commences. Maps have been submitted, or will be submitted, identifying the 31,000 acres.

For uses other than irrigation, including nursery water, temperature control, livestock watering and miscellaneous farm uses, applications will be site specific within the boundaries of the Tualatin Valley Irrigation District and will be identified by the District.

Item 5. The use to which the water is to be applied is:

Irrigation during the time period January 1 to December 15, inclusive; general agricultural temperature control during the months of March, April, and May; nursery stock temperature control during the calendar year; livestock watering; miscellaneous agricultural applications including, but not limited to mixing with fertilizers, herbicides, pesticides, and any other chemical applications for agricultural purposes, farm implement and building cleanup.

In all other respects, the District's application is to stand as submitted and previously amended.

Sincerely yours,

BEN LOMBARD, JR.

STATE OF OREGON
WATER RESOURCES DEPARTMENT
WATER RIGHTS DIVISION

Before the Director Water Resources Department

In the matter of	)	PROPOSED
Surface Water Application	)	FINAL
S-69623 submitted by	)	ORDER
Tualatin Valley Irrigation District		

FINDINGS OF FACT

Water Use Request

1. Tualatin Valley Irrigation District requested use of 81.25 cubic feet per second of water from Tualatin River, Scoggins Creek, Dairy Creek, Gales Creek, and Scoggins Reservoir constructed under Permit R-5777, for Irrigation and Supplemental Irrigation of 34,675.78 acres, no more than 17,500 acres of which will be irrigated in any one season.

2. The area of proposed use is in Washington County within Sections 7 and 18, Township 1 North, Range 2 West, W.M., Sections 1 through 36 Township 1 North, Range 3 West, W.M., Sections 1,2,3,9,10,11,12,13, 14,15,16,17,20,21,22,23,24,25,26,27,28,33,34,35,36, Township 1 North, Range 4 West, W.M., Sections 7,14,15,16,17,18,19,20,21,22,28, 29,30,31,32,33, Township 1 South, Range 2 West, W.M., Sections 1,2, 3,4,5,6,7,8,9,10,11,12,13,14,15,16,17,18,19,20,21,22,23,24,25,26,27, 30,33,34,35,36, Township 1 South, Range 3 West, W.M., Sections 27, 29,30,31,32,33,34, Township 2 North, Range 3 West, W.M., Sections 35 and 36, Township 2 North, Range 4 West, W.M., Sections 6,7,17,18,19, 20, Township 2 South, Range 1 West, W.M., Sections 1,2,3,4,5,6,7,8, 9,10,11,12,13,14,15,16,23,24, Township 2 South, Range 2 West, W.M., Sections 1,6,7,12,17,18, Township 2 South, Range 3 West, W.M., Sections 1,2,11,12,13, Township 2 South, Range 4 West, W.M.

2. The water delivery system is described by the applicant as follows: Scoggins Creek Reservoir impounds water and releases it into Scoggins Creek for delivery downstream to be appropriated at the pumping points on Scoggins Creek, Dairy Creek, Gales Creek, and The Tualatin River. The pumping points divert water into underground pipelines that deliver water to the users. Live flow water is also diverted at the pumping points.

3. The request was made in Application S-69623 which was received by the Water Resources Department on May 24, 1988, identifying 3,500 acres, for 43.75 cfs. On December 16, 1988 the department received a letter from the applicants attorney requesting to amend this application to add an additional 3000.0 acres, thus bringing the total to 6500.0 acres and an additional 37.50 cfs. On April 10, 1990 the department received a letter from the applicants attorney requesting to amend this application to use water for irrigation and agriculture use on a total of 31,000 acres, of which no more that 17,500 will be irrigated in any one season. Maps submitted to identify the specific lands identified a total of 34,675.78 acres.

Affected Waters

1. Tualatin River, Scoggins Creek, Scoggins Reservoir, Dairy Creek and Gales Creek are not within or above a State Scenic Waterway.

2. There are senior water rights on Tualatin River, Scoggins Creek, Scoggins Reservoir, Dairy Creek and Gales Creek and on downstream waters.

Department Actions

1. The application was determined to be complete and not defective.

2. A draft technical review of the application was completed and a report of the results of that review was mailed to the applicant on May 10, 1994.

3. The technical review determined:

   a. Irrigation, including Agricultural use is allowed under the Willamette Basin Program, dated August 2, 1985
   b. The use is not prohibited by Statute.
   c. Water is available for further appropriation (at a 50 percent exceedance probability) for the period November 1 through April 30 from live flow and year round from stored water for Agriculture use, stored water is may be used for Irrigation March 1 through October 31.
   d. The use would not injure existing water rights.

4. The report of technical review listed these determinations and disclosed a number of conditions and restrictions that would likely be included in the permit if issued. These conditions and restrictions are listed in the attached draft permit.

Assessment

1. In proceeding with evaluation of Application S-69623, the following criteria were found to be relevant by the Department.
   a. The Willamette Basin Program (OAR Chapter 690, Division 502) Dated August 2, 1985
   b. The amount of water available in Tualatin River, Scoggins Creek, Scoggins Reservoir, Dairy Creek and Gales Creek
   c. The established rate and duty for the proposed use
   d. Pending, senior applications and existing water rights of record
   e. A letter from Department of Environmental Quality regarding water quality in the Tualatin River
   f. Oregon Administrative Rule Chapter 690 Division 21 which allows temporary transfers within irrigation districts
   g. Comments received

CONCLUSIONS OF LAW

1. Based upon continued evaluation, the Department finds the determinations of the technical review require modification.

2. Based on comments and data received, the Department has determined that the proposed use is within a water quality limited basin, and that there may be game fish in the area of the points-of-diversion. The Department has further determined that, to protect the resource, additional conditions on the proposed water use are necessary. The conditions, as further described on the attached draft permit, would restrict appropriations from live flow waters and would require fish screening.

3. Period of allowed use: Live flow - Irrigation and Agricultural Use November 1 through April 30. Stored water - Agricultural Use year round, Irrigation during the period of March 1 through October 31, or as may be further limited by the Bureau of Reclamation water supply contract.

4. The amount of live flow allowed from the various sources shall be no more than is naturally available during the month of April or the amount allowed under permit 35792, which ever is less. These quantities are 81.25 cfs from the Tualatin River, 23.6 cfs from Scoggins Creek, 8 cfs from Dairy Creek, and 13 cfs from Gales Creek.

5. The Department finds that no more than 81.25 cfs (Total of 43.75 cfs 5-24-1988, and 37.50 cfs 12-16-1988) would be necessary for the proposed use. The amount of water requested, 81.25 cfs, is allowable as conditioned.

6. The application was filed prior to the adoption of OAR 690-05, therefore the submission of land use information with the application is not required.

7. The proposed use would not conflict with existing water rights, and, if exercised in accordance with law, rule, and the proposed conditions would not result in injury to existing water users.

8. The proposed use, as conditioned in the draft permit, complies with all other rules of the Commission.

9. Pursuant to Chapter 416, Oregon laws, 1995, enacted by the 68th Oregon Legislative Assembly, and given the findings listed above, a rebuttable presumption has been established that the use will not impair or be detrimental to the public interest if exercised in the manner described in the attached draft permit.

10. Therefore, the proposed use, as conditioned, and described in the attached draft permit, would not impair or be detrimental to the public interest.

PROPOSED ORDER

IT IS PROPOSED that Application S-69623 in the name of Tualatin Valley Irrigation District be approved for irrigation, incluing agricultural use, on 17,175.78 acres, and agricultural use on 17,500.0 acres, as provided in the attached draft permit.

DATED September 10, 1996

Dwight French
Water Rights Section Manager

NOTICE:
This Proposed Final Order is issued by the Department pursuant to Chapter 416, Oregon laws, 1995, enacted by the 68th Oregon Legislative Assembly.

To seek changes in this proposed final order, you must file a formal protest.

Formal protests to this proposed final order must be made in proper form

and accompanied by the statutory fee in the amount of $200 and proof of service upon the applicant. Note: The applicant is not subject to this fee.

For other than the applicant, if you agree with the findings in this proposed order, but wish to maintain your right to participate in any contested case proceeding or judicial review, you must file a written request for standing. Requests for standing in proceedings relating to this application must be made in the proper form and accompanied by the statutory fee in the amount of $50.

Protests or requests for standing, along with the appropriate fees must be received by the Water Resources Department in Salem, Oregon by 5:00 pm on October 25, 1996.

Only the applicant and any persons who timely file a protest or request for standing may participate in further proceedings before the Department or the Commission which deal with this Application.

DRAFT
STATE OF OREGON

COUNTY OF WASHINGTON

DRAFT PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS DRAFT PERMIT IS HEREBY ISSUED TO

TUALATIN VALLEY IRRIGATION DISTRICT
2330 ELM STREET (503)357-3118
FOREST GROVE, OREGON 97116

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: S-69623

SOURCE OF WATER: TUALATIN RIVER, SCOGGINS CREEK, ~~DAIRY CREEK~~, ~~GALES CREEK~~ AND SCOGGINS RESERVOIR CONSTRUCTED UNDER PERMIT R-5777

PURPOSE OR USE: IRRIGATION (AGRICULTURAL USE) ON 34,675.78 ACRES AND PRIMARY IRRIGATION OF 17175.78 ACRES.

QUANTITY OF WATER: 81.25 CFS (TOTAL AMOUNT)

RATE: 81.25 TOTAL CFS FROM NATURAL FLOW BEING UP TO 81.25 CFS FROM THE TUALATIN RIVER, 23.6 CFS FROM SCOGGINS CREEK, 8 CFS FROM DAIRY CREEK, AND 13 CFS FROM GALES CREEK, WITH ANY DEFICIENCY IN NATURAL FLOW MADE UP FROM STORAGE IN SCOGGINS RESERVOIR CONSTRUCTED UNDER PERMIT R-5777.

PERIOD OF ALLOWED USE: LIVE FLOW - NOVEMBER 1 THROUGH APRIL 30, FOR AGRICULTURAL USE; MARCH 1 THROUGH APRIL 30, FOR IRRIGATION. STORED WATER - AGRICULTURAL USE YEAR ROUND, IRRIGATION DURING THE PERIOD OF MARCH 1 THROUGH OCTOBER 31, OR AS MAY BE FURTHER LIMITED BY THE BUREAU OF RECLAMATION WATER SUPPLY CONTRACT.

DATE OF PRIORITY: MAY 24, 1988 FOR 43.75 CFS, DECEMBER 16, 1988 FOR 37.50 CFS

POINT OF DIVERSION LOCATION: NW 1/4 SW 1/4, SECTION 8, T 1 S, R 3 W, W.M.; 1820 FEET NORTH & 710 FEET EAST FROM SW CORNER, SECTION 8; NW 1/4 NW 1/4, SECTION 26, T 1 S, R 4 W, W.M.; 1330 FEET SOUTH & 10 FEET EAST FROM NW CORNER, SECTION 26; NE 1/4 NE 1/4, SECTION 20, T 1 S, R 4 W, W.M.; 700 FEET SOUTH & 1030 FEET WEST FROM NE CORNER, SECTION 20, T 1 S, R 4 W, W.M.

The amount of water used for AGRICULTURAL OPERATIONS is limited to a diversion of 0.15 cubic foot per second per acre. For the irrigation of **containerized nursery plants**, the amount of water diverted is limited to ONE-FORTIETH of one cubic foot per second (or its equivalent) and 5.0 acre feet per acre per year. For the irrigation of **in ground nursery plants** the amount of water diverted is limited to ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre feet per acre per year. The use of water for NURSERY OPERATIONS may be made at anytime of the year that the use is beneficial. For the irrigation of **any other crop**, the amount of water diverted is limited to ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre feet per acre during the irrigation season of each year.

No more than 17,500 acres shall be irrigated in any irrigation season. The district must submit a list of the acres to be irrigated by June 1 of each year.

STATUS A - ORIGINAL (ASSESSED LANDS)/PRIMARY AGRICULTURAL USE P-35792
STATUS B - USA/PRIMARY AGRICULTURAL USE P-49958
STATUS C - NEW/PRIMARY IRRIGATION AND AGRICULTURAL USE APPLICATION 69623

Measurement, recording and reporting conditions:

A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.

B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

Diversion screening or fish passage facilities shall be designed, installed, and operated to Oregon Department of Fish & Wildlife specifications.

The use of water under this right is subject to the terms and conditions of contract No. 14-06-100-6956, or a satisfactory replacement, between the Bureau of Reclamation and the applicant, a copy of which is on file in the records of the Water Resources Department.

The use of stored water, under this permit is NOT in addition to either the rate or duty allowed by permits 35792 or 49958.

STANDARD CONDITIONS

1. Use of water under this permit is subject to all prior rights.

2. Water use development requirements:

   A) Begin construction by (one year from issuance of permit).

   B) Complete construction by (five years from issuance of permit).

   C) Completely apply the water to beneficial use by (five years from issuance of permit).

3. Failure to comply with any of the provisions of the permit may result in action including, but not limited to, restrictions on the use, penalties, or cancellation of the permit.

4. The permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

5. The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

6. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

7. The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

8. In the event of a request for a change in point of appropriation, an additional point of appropriation or alteration of the appropriation facility associated with this authorized diversion, the quantity of water allowed herein, together with any other right, shall not exceed the capacity of the facility at the time of perfection of this right.

9. This right is limited to any deficiency in the available supply of any prior right existing for the same land.

10. Prior to seasonal use or before June 1, which ever is earlier, the District shall provide the watermaster with a map showing the location of lands irrigated or place of agricultural use.

11. The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

12. Actual construction work shall begin within one year from permit issuance and shall be completed on or before October 1, 1997. Complete application of the water to the use shall be made on or before October 1, 2001.

Martha O. Pagel
Director

WATER RESOURCES DEPARTMENT

INTEROFFICE MEMORANDUM *January 13, 1997*

TO: File S-69623
CC:
FROM: D Baer

SUBJECT: updated acreage total required for fee calculation

ACREAGE INCLUDED IN POU DESCRIPTION
FOR TVID APPLICATION S-69623

1/13/97

	"ORIGINAL ACRES"	"NEW" or "ADDITIONAL ACRES"	SUB TOTAL
PRIMARY	6791.59	10999.58	17791.17
SUPPLEMENTAL	11845.81	6471.02	18316.83
OTHER	64.90	0.00	64.90
SUB TOTAL	18,702.30	17,470.60	

GRAND TOTAL 36172.90 ACRES

The subtotals shown above were calculated in Paradox from data derived from the place of use description corrected and submitted by the applicant on December 23, 1996. One sometimes finds in applications such as this, the request is to use more than one source of water but to cover the same land, i.e. a primary right from live flow with a supplemental right included on the same permit for use of stored water (on the same lands) in the absence of live flow. A review of the application file and map indicates that is not the case with S-69623 and that primary and supplemental acres are not duplicated.

No effort has been made to verify the corrected data or compare it with either the place of use as shown on the application maps or as described in the PFO (which reportedly totalled 34675.78 acres of irrigation and primary irrigation of 17175.78 acres.)

NOTE: The meaning of the terms "ORIGINAL ACRES" and "NEW" or "ADDITIONAL ACRES" is not immediately evident from reviewing the file. The terms are used in both the Technical Review and the Proposed Final Order. Perhaps this identifies lands associated with the two priority dates, which are described as May 24, 1988 for 43.75 cfs and December 16, 1988 for 37.50 cfs.

REPAYMENT CONTRACT BETWEEN THE UNITED STATES OF AMERICA AND THE TUALATIN VALLEY IRRIGATION DISTRICT

RECITALS, DEFINITIONS AND TERM

THIS CONTRACT, made this 10th day of March , 1971 , by and between the UNITED STATES OF AMERICA, hereinafter called the United States, acting through the Regional Director, Region 1, Bureau of Reclamation, hereinafter referred to as the Contracting Officer, upon authorization of the Secretary of the Interior and pursuant to the provisions of the Act of June 17, 1902 (32 Stat. 388), and acts amendatory thereof and supplementary thereto, referred to collectively as the Federal Reclamation Laws, and particularly the Act of September 20, 1966 (80 Stat. 822), and the TUALATIN VALLEY IRRIGATION DISTRICT, hereinafter referred to as the District, an irrigation district duly organized and existing under the laws of the State of Oregon,

WITNESSETH, THAT:

Explanatory Recitals

2. WHEREAS, the Act of September 20, 1966, provides for the construction of the Tualatin Federal Reclamation Project to provide irrigation water, to develop municipal and industrial water supplies, to provide facilities for river regulation and control of floods, to enhance

recreation opportunities, to provide for the conservation and development of fish and wildlife resources and for other purposes; and

3. WHEREAS, the authorizing act of September 20, 1966, does not preclude and it has been determined to be desirable to include water quality control as a function of the project on a reimbursable interest-bearing basis; and

4. WHEREAS, the District desires to enter into a contract for an irrigation water supply from the project and is willing to pay a part of the cost of the project allocated to irrigation and assigned to be repaid by the District;

NOW, THEREFORE, in consideration of the mutual and dependent stipulations and covenants herein contained, it is mutually agreed by and between the parties hereto as follows:

Definitions

5. The following terms hereinafter used in this contract shall have the following respective meanings:

(a) "Secretary" shall mean the Secretary of the Interior or his duly authorized representative.

(b) "Federal Reclamation Laws" shall mean the Act of June 17, 1902 (32 Stat. 388), and all acts amendatory thereof or supplementary thereto, including without limitation by

this enumeration the pertinent provisions of the Act of September 20, 1966 (80 Stat. 822).

(c) "Project" shall mean the Tualatin Project to be constructed by the United States under the Federal Reclamation Laws.

(d) "Irrigation works" shall mean the works and facilities to be constructed for use in irrigating lands within the jurisdiction of the District as authorized by the Act of September 20, 1966, exclusive of the storage works as hereinafter defined.

(e) "Storage works" or "reserved works" shall mean Scoggins Dam and Reservoir, stream gauges, and other works incidental and appurtenant to those works.

(f) "Project works" shall mean all of the works authorized as part of the project.

(g) "Transferred works" shall mean all of the irrigation works as above defined.

(h) "Irrigation water" shall mean water used primarily in the commercial production of agricultural crops or livestock, including domestic use incidental thereto, on tracts of land operated in units of more than two acres.

Art. 5 cont.

(i) "Domestic, municipal, and industrial water" shall mean water used for other than those purposes referred to in (h) above or water quality control.

(j) "Project pressure irrigation service" shall mean the delivery of project water under pressure to permit sprinkler irrigation of District lands.

(k) "Project gravity irrigation service" shall mean the delivery of project water by gravity flows.

Contract Term

6. This contract shall become effective upon its execution by the Secretary and shall remain in effect until specifically terminated by mutual agreement of the parties hereto.

PROJECT CONSTRUCTION AND CONSTRUCTION CHARGES

Description and Cost of Project Works

7. (a) The United States within the limitations of this contract and authorizing legislation and to the extent funds are or may be made available therefor will construct the following project works:

(1) Storage works consisting of Scoggins Dam and Reservoir with spillway and outlet works.

(2) Irrigation works consisting of a system of main canals, pumping plants, substations, necessary electric transmission connections, open ditch and pipe laterals, drains, buildings and equipment, and appurtenant facilities.

(3) Fish facilities.

(4) Initial phase recreational facilities at the storage works.

The principal facilities and related works are as generally described in the project plan of development contained in House Document No. 295, 88th Congress, 2d Session, April 8, 1964.

(b) Should it appear necessary or desirable to the Secretary after consultation with the District, either before or during construction, the project works referred to above may be modified in design or location or work may be eliminated or added to that referred to above.

(c) The estimated cost of the project works to be constructed under this contract is thirty-one million three hundred thousand dollars ($31,300,000) (July 1969 prices) of which amount seventeen million five hundred twenty-eight thousand dollars ($17,528,000) is allocated to irrigation. The United States' obligation to undertake construction of the project works and the District's repayment obligation under this contract are based upon the premise that the actual cost of the construction of

the project works will not exceed this estimate adjusted to the amount, if any, that may be justified by reason of ordinary fluctuations in the cost of construction as indicated by engineering cost indexes applicable to the type of construction involved. If the Secretary finds at any time that the works to be constructed under this contract cannot be completed at a cost within this estimate, he shall consult with the board of directors of the District and may make continuation of construction contingent upon the completion of arrangements with the District for assumption of all or some part of the estimated increased reimbursable cost in addition to the construction charge obligation stated in article 8. In the event the Secretary does make continuation of construction contingent upon completion of such arrangements and the District does not assume the increased obligation or in the event additional appropriations are not available, or authorized, the Secretary may notify the District that the work is deemed completed, and the District's construction charge obligation shall be either the amount provided in article 8, or the cost of the completed work allocated to irrigation, whichever amount is smaller.

District's Construction Charge Obligation

8. (a) Of the amount of the cost of the project allocated to irrigation, the District shall pay to the United States as its construction charge obligation under this contract an amount not to exceed five million five hundred three thousand dollars ($5,503,000). This obligation

(46,000,000)
See Amended Contract

is based upon an estimated irrigable project acreage of 17,000 acres of which a maximum acreage of 8,000 (11,000 as amended) acres would receive project pressure irrigation service and the residual acreage project gravity irrigation service. In the event the Secretary determines that fund limitations or other considerations make it impossible to provide project pressure irrigation service to 8,000 acres, the construction charge obligation shall be decreased by one hundred twenty dollars ($120) per acre for each acre less than 8,000 acres.

(b) The District's construction charge obligation shall be paid in 50 successive equal annual installments commencing on December 31 of the first calendar year following the end of the development period provided for in article 9.

Development Period

9. The development period will begin with the year for which water is announced by the Secretary as available and extend for a period of 10 years thereafter. Such announcement shall be made no later than December 1 of the year preceding the year in which the development period is to start. During the development period the District shall pay to the United States its share of the operation and maintenance costs of the reserved works, the operation and maintenance costs of the irrigation works if the United States is operating such works, the power and transmission charges and other costs and obligations, if any, of the District

under this contract.

Project Irrigable Acreage

10. (a) The lands of the District have been classified as set forth in the document entitled "Detailed Land Classification Report, Tualatin Project, Oregon." This land classification is a detailed land classification as to each irrigable acre of land within the District. The Secretary shall determine the number of irrigable acres which can be served from the project irrigation works, the classification of such lands, and the type of project service, pressure or gravity, to be provided. From time to time prior to the close of the development period the lands within the District may, with the approval of the Secretary and under standards consistent with those used in making the detailed classification, be reclassified. Any such classification shall not change the construction charge obligation established by this contract for payment by the District. The District, with the approval of the Secretary, may for purposes of adjustments and matters of its own internal administration make changes in the irrigable acreage from time to time so long as such changes do not result in there being a total irrigable area which will exceed 17,000 acres.

(b) The water furnished under the terms of this contract shall be used solely for irrigation uses on irrigable lands. The District shall not furnish water from the project works to tracts of two acres or less, nor shall it furnish domestic, municipal, and industrial water. If such service is later desired, the terms and conditions for such service shall be prescribed by a supplemental agreement.

Statement of Costs

11. (a) Upon the completion of the work provided for in article 7, or the termination of the work thereon as determined by the Secretary for any reason, or thereafter as soon as the actual construction costs can be determined by the United States, the Secretary shall furnish the District a written statement of the actual cost of construction, the number of acres to be provided project pressure irrigation service and the number of acres to be provided project gravity irrigation service, the cost allocated to irrigation and the District's construction charge obligation.

(b) The costs which make up the various obligations to be paid by the District to the United States under this contract shall embrace all expenditures of whatsoever nature or kind in relation to the function for which the charge is made including, but without limitation by reason of this enumeration, cost of surveys and investigation, labor, property, material and equipment, engineering, legal work, superintendence, administration, overhead, general expenses, inspections, special services, and

damage claims of all kinds, whether or not involving the negligence of officers, agents or employees of the United States, but shall be exclusive of amounts which the law does not require to be repaid and which the Secretary determines as a matter of policy are to be treated as non-reimbursable.

PROJECT OPERATION AND MAINTENANCE AND OPERATION AND MAINTENANCE CHARGES

Operation and Maintenance of Transferred Works

12. (a) During the period that the United States is operating the irrigation works, the District shall pay to the United States the cost of operating said works in the manner prescribed in article 14(b).

(b) Upon substantial completion of the project works, or as otherwise determined by the Contracting Officer, and following written notification to the District, the care, operation, and maintenance of any or all of the irrigation works shall be transferred to the District. Concurrently with the transfer of operation and maintenance responsibilities to the District, or as soon as possible thereafter, and pursuant to the Act of July 29, 1954 (68 Stat. 580), as amended, equipment and supplies, the cost of which has been charged to the construction of the project, will be transferred to the District to assist it in its operation and maintenance activities.

(c) The District, without expense to the United States, shall care for, operate, and maintain such transferred works in full compliance with the terms of this contract and in such manner that the transferred works shall remain in good and efficient condition. The District shall use all practical methods to insure the economical and beneficial use of water.

(d) The District shall promptly make any and all repairs to the project works being operated by it which are necessary for the proper care, operation, and maintenance of the same. In case of neglect or failure of the District to make such repairs within 60 days following written notification to do so from the Contracting Officer, the Contracting Officer may cause the repairs to be made and the costs thereof shall be paid by the District in the manner prescribed by the United States.

(e) No substantial change shall be made by the District in the transferred works without first obtaining the written consent of the Contracting Officer.

(f) The District shall hold the United States, its officers, agents, and employees harmless as to any and all damages which may in any manner result from the care, operation, and maintenance of any of the project works transferred to the District: Provided, however, That this provision shall not be construed as relieving the United States of its obligations under the Federal Tort Claims Act (28 U.S.C. 82671-82680).

(g) In the event the District is found to be operating the transferred works or any part thereof in violation of this contract, then at the election of the Contracting Officer the United States may take over from the District, the care, operation, and maintenance of the works previously transferred to the District by giving written notice to the District of such determination and advising of the effective date of the takeover by the United States. Thereafter, during the period of operation by the United States, the District shall pay to the United States annually in advance the cost of operation and maintenance of such transferred works as prescribed in notices from the Contracting Officer to the District. Whenever in the opinion of the Secretary funds advanced will be inadequate to operate and maintain the works being operated by the United States, he may give a supplemental notice stating therein the amount of the District's share and the District shall advance such additional amount on or before the date or dates specified in the supplemental notice. Any credit over and above the actual costs of operation by the United States shall be credited to the District on future operation and maintenance charges. Such works may be retransferred to the District in the same manner as originally transferred.

(h) In addition to all other payments to be made by the District under this contract, the District shall, during the period of time any or all of the project works are being operated by it, pay to the

United States following the receipt of a detailed cost statement such specific items of direct cost incurred by the United States for work associated with this contract normally charged by the United States to water users and properly and equitably charged to the District plus a percentage of such direct cost for administrative and general overhead in accordance with procedures approved by the Secretary.

Review and Inspection of Transferred Works for Determining Adequacy of Maintenance

13. (a) The Contracting Officer and the District may from time to time make a review of maintenance of transferred works being operated by the District with a view to assisting the District in determining the condition of the facilities and the adequacy of the maintenance program. This review may include any or all of the transferred works. A report of the review, including recommendations, if any, will be prepared and copies will be furnished to the District. Except for such participation by the District as it may desire, the review and report will be without cost to the District.

(b) If deemed necessary by the Contracting Officer or requested by the District, an inspection of any transferred works and of the District's books and records may be made to ascertain whether the requirements of this contract are being satisfactorily performed by the District or to assist the District in solving specific problems. Any special inspection or audit proposed by the Contracting Officer shall,

except in case of emergency, be made only after a written notice to the District. The actual cost thereof shall be paid by the District to the United States in the manner provided in subarticle 12(h) hereof.

Operation and Maintenance of Reserved Works

14. (a) During the term of this contract, the United States shall care for, operate and maintain the project reserved works: Provided, That the care, operation and maintenance of the reserved works may be transferred to an operating organization acceptable to the District and other entities receiving water from the project.

(b) The District shall pay 21% of the total annual cost incurred in such operation and maintenance by the United States including operation and maintenance costs incurred for fish mitigation facilities. On or before September 1 of the year preceding the year for which payment is due, the Contracting Officer shall notify the District of its share of the estimated cost of operating and maintaining the reserved works for the succeeding year and payment shall be made by the District one-half on or before January 1 of the year for which it is due and one-half on or before June 30 of that year. Whenever in the opinion of the Secretary funds advanced will be inadequate to operate and maintain the works being operated by the United States, he may give a supplemental notice stating therein the amount of the District's share and the District shall advance such additional amount on or before the date or dates

specified in the supplemental notice. Any credit over and above the actual costs of operation and maintenance by the United States shall be credited to the District on future operation and maintenance charges.

Project Power Supply

15. (a) Power and energy reserved by the Act of September 20, 1966, for operation of the project pumping facilities may be provided from the Bonneville Power Administration System. Additional or alternate power and energy may be provided by purchase arrangements with other entities. The charge for reserved power provided from the Bonneville Power Administration System shall be 1-1/4 mills per kilowatt hour and does not include any transmission charges from points of delivery on the Bonneville Power Administration System to project facilities. The power charge may be adjusted from time to time by the Secretary but not oftener than once every five years, unless otherwise mutually agreed upon. The charge for power provided through purchase arrangements with other entities shall be at the entities' applicable rates.

(b) Payments for the District's power supply and the transmission thereof under this article shall be made each calendar year on the basis of annual estimates by the Secretary. Notice of these annual estimates hereinafter referred to as the power charge notice shall contain the statement of the estimated charge for power to be incurred for

the calendar year involved and shall be sent to the District on or before September 1 of the year preceding the year for which payment is due and payment shall be made by the District one-half on or before January 1 of the year for which it is due and one-half on or before June 30 of that year. Whenever in the opinion of the Secretary payments so advanced will be inadequate to pay the actual costs being incurred for the power supply, he may give a supplemental notice stating therein the amount of the additional charges required and the District shall advance such additional amounts on or before the date specified in the supplemental notice. If amounts advanced by the District under this article exceed the District's actual power charges, the surplus shall be credited on the power charges to become due from the District for succeeding years.

Reserve Fund

16. Commencing with the first year of the development period and continuing until such time as all sums of money becoming due hereunder shall have been paid to the United States, the District shall accumulate and maintain a reserve fund which will be available for use in the manner, for the purposes, and in the circumstances hereinafter set forth. Such reserve fund shall consist of annual deposits by the District of not less than fifteen thousand dollars ($15,000) to a special account created by the District for this purpose. Such annual deposits shall

continue until the amount in the reserve fund is not less than one hundred thousand dollars ($150,000) ($100,000). With the approval of the Contracting Officer, expenditures may be made from such reserve fund only for meeting major unforeseen extraordinary costs of operation and maintenance, repair, betterment and replacement of project works, and for operation and maintenance during periods of special stress such as may be caused by drought, hurricane, storms or other like emergencies. Whenever said reserve fund is reduced below one hundred thousand dollars ($150 000) ($100,000) by expenditures therefrom, it shall be restored by the accumulation of annual deposits of fifteen thousand dollars ($15,000) commencing with the next year following that in which the fund is reduced below said amount. During any periods in which any of the project works are operated and maintained by the United States, such fund shall be available for like use by the United States. At the option of the District, the reserve fund may be invested to the extent permitted by law: Provided, That such reserve fund may be available within a reasonable time to meet the expenses for the purpose for which it was accumulated: Provided, That on mutual agreement said fund and the annual installments may be adjusted to reflect the addition, deletion, or changes in project facilities and operation and maintenance costs not contemplated when this contract was executed.

District to Employ Manager

17. Until the construction charge obligation under this contract has been paid in full, the District shall employ as manager or superintendent a competent irrigation engineer or other person who has had at least three years of experience as a manager or superintendent in the operation of works similar to the project works, the employment to be subject to the approval of the Secretary. Upon notice by the Secretary that any manager or superintendent employed by the District is unsatisfactory in that capacity, the District will promptly terminate the employment of such person and employ a satisfactory manager or superintendent.

ASSESSMENTS AND PENALTIES

Levies and Assessments by the District--General Obligation--Benefits Conditioned upon Payment

18. (a) The District will cause to be levied and collected all necessary assessments, tolls and other charges and will use all of its authority and resources to meet its obligations under this contract. The obligation of the District to pay to the United States the charges becoming due as provided herein is a general obligation of the District notwithstanding the manner in which the obligation may be distributed among the District's water users and notwithstanding the default of

individual water users of assessments, tolls or other charges levied by the District.

(b) The payment of charges becoming due hereunder is a condition precedent to receiving benefits under this contract.

(c) The District directors may assess the irrigable acreage on the basis of any variable rate established pursuant to assessment procedures authorized by law to reflect the consideration of type of service and actual benefits provided so long as sufficient amounts are collected annually to meet the annual construction and operation and maintenance charges.

(d) The District in establishing and collecting per-acre charges shall levy a minimum annual operation and maintenance charge against each irrigable acre within the District designated for project service and the payment of such minimum charge shall be required whether or not water is used. Payment shall be in advance of the delivery of water. The amount of water in acre-feet per acre which is to be delivered each year on payment of the minimum annual charge shall be one acre-foot. For water to be delivered each year in excess of that delivered for the minimum charge, the landowners or water users involved shall pay to the District an additional water charge as follows:

(1) For the first one-half acre-foot per acre at a rate per acre-foot equal to 100% of the rate

per acre-foot charged for water made available under the annual minimum charge.

(2) For the second one-half acre-foot per acre at a rate per acre-foot equal to 120% of the rate per acre-foot charged for water made available under the annual minimum charge.

(3) For each acre-foot or fraction thereof per acre in excess of two acre-feet per acre at a rate per acre-foot equal to 200% of the rate per acre-foot charged for water made available under the annual minimum charge.

(e) To carry out the provisions of this article, the District shall measure the water delivered to each turnout and keep individual turnout delivery water records. The metering devices shall be accessible for inspection at all reasonable times by the Contracting Officer.

Penalty for Delinquent Payments

19. The District shall pay a penalty on installments or charges which become delinquent computed at the rate of one-half of one percent per month of the amount of such delinquent installments or charges for each day from such delinquency until paid: Provided, That no penalty shall be charged to the District unless such delinquency continues for at least 30 days.

Refusal to Deliver Water in Case of Default

20. (a) No water from the project water supply shall be delivered to or for the District if the District is in arrears in the advance operation and maintenance charges due to the United States, if any, or more than 12 months in arrears in the payment of construction charge obligation installments, or more than 12 months in arrears in the payment of any other amounts owing to the United States under this contract. The District shall refuse to deliver water to lands or parties who are in arrears in the advance payment of operation and maintenance charges due from such lands or parties to the United States or to the District, or to lands or parties who are in arrears more than 12 months in the payment of amounts due from such lands or parties to the United States or to the District for construction charge obligations or any other amounts owed by the District to the United States under this contract. The provisions of this article are not exclusive and shall not in any manner prevent the United States from exercising any other remedy given by this contract or by law to enforce the collection of any payments due under the terms of this contract.

(b) The United States reserves the right and power, without notice to the District, to enter on the project works or any part thereof in possession of the District, to shut off water being delivered in violation of the provisions of this article or article 18. In the event the

United States exercises this right and power, neither the United States nor its officers or employees shall be liable for any damages resulting directly or indirectly therefrom; and the District shall hold the United States, its officers, and employees harmless from any and all such claims of damage.

PROJECT WATER SUPPLY

Project Diversions

21. (a) Subject to the provisions of this contract, the District shall have the right to divert from water available under the United States' rights for natural flow, storage and return flow up to 37,000 acre-feet of water annually for beneficial use on 17,000 acres of project land.

(b) Prior to April 1 of each year, the Secretary shall notify the District in writing of the estimated quantity of water which will be available for diversion to the District during the current year. The District shall divert the water it is entitled to receive under this contract in accordance with schedules developed by the District and the United States.

(c) The District shall receive water at the outlet works of Scoggins Dam and Reservoir and shall be wholly responsible for taking that water at that point and diverting, conveying, and utilizing it. The

District will bear all losses chargeable to such water between the outlet works and the District's place or places of diversion.

(d) The project water supply furnished from Scoggins Dam and Reservoir directly into the irrigation works shall be measured by the United States at the outlet works of said reservoir, with equipment installed and maintained by the United States. The project water supply furnished from the Tualatin River and its tributaries shall be measured by the District at points of diversion agreed to by the United States, and the metering devices shall be accessible for inspection at all reasonable times by the Contracting Officer.

(e) In any year in which a water shortage occurs the Secretary shall apportion the available water supply among the District and others entitled under then existing contracts to receive water from the project. The quantity of water to be furnished to the District and the quantity of water furnished to other entities for water quality control, shall first be reduced as necessary but not by greater than 15%. Any further reduction in the project water supply shall be shared among the District and all other entities receiving a water supply from the project in the proportion that the District's water entitlement under this contract bears to the total quantity of project water under contract.

United States Not Liable for Water Shortage or Interruptions

22. No Liability shall accrue against the United States or any of its officers, agents, or employees for damage, direct or indirect, arising by reason of shortages in the quantity of water available through the irrigation system or interruptions in water deliveries to lands in the District resulting from drought, inaccuracy in distribution, hostile diversion, prior or superior claims, accident to or failure of facilities of the irrigation or storage system, whether or not attributable to negligence of officers, agents, or employees of the United States, or other causes of whatsoever kind. Nor shall the District's obligations to the United States under this contract be reduced by reason of such shortages or interruptions.

Protection of the Project Water Supply

23. (a) In case a dispute arises as to the character, extent, priority or validity of the right of the United States or the District to use the water supply claimed for the project, the District shall promptly bring and diligently prosecute judicial proceedings for the determination of such dispute and shall take all other measures necessary toward the defense and protection of the water supply, either independently or in cooperation with the United States, where the

Secretary, in his discretion, determines that such proceedings or other measures are desirable. Nothing in this article, however, shall be construed as precluding the United States, independently or in cooperation with the District, from taking such action as the Secretary deems necessary to protect the water supply.

(b) Neither the United States nor the District abandons or relinquishes any of the waste, seepage, or return flow waters attributable to the irrigation of land to which water is supplied under this contract. All such waters are reserved and intended to be retained for use and benefit of the United States and the District as a source of water supply for the project. To the extent that any such suitable waste, seepage, or return flow waters from any part of the project shall at any time become available at points where they can be used on lands within the District, the District or the United States shall supply such water as a part of the supply to which the lands in the District are entitled, first in substitution for natural flow water of the District, which natural flow water is then being used on other project lands or being stored, and thereafter as an additional supply of water for lands in the District.

Quality of Water

24. The operation and maintenance of project facilities and the design and construction of new project facilities for the provision of water under this contract shall be performed in such a manner as is practicable to maintain the quality of raw water to be furnished hereunder at the highest level reasonably attainable as determined by the Contracting Officer. The United States is under no obligation to construct or furnish water treatment facilities to maintain or better the quality of water except to the extent such facilities are expressly referred to elsewhere in this contract as a part of the project facilities to be constructed by the United States pursuant to Reclamation law or as otherwise required by law. Further, the United States does not warrant the quality of water to be furnished pursuant to this contract.

Water Pollution Control

25. The District shall, within its legal authority, comply fully with all applicable Federal laws, orders, and regulations, and the laws of the State of Oregon, all as administered by appropriate authorities, concerning the pollution of streams, reservoirs, groundwater, or water courses with respect to thermal pollution or the discharge of refuse, garbage, sewage effluent, industrial waste, oil, mine tailings, mineral salts, or other pollutants. Any contract the District may enter into

with a third party for the furnishing of project water shall contain a similar water pollution control article. Nothing herein shall be construed as imposing any duty, responsibility, or liability upon the District for the pollution, or the correction thereof, of streams, reservoirs, groundwater, or water courses by third parties, including water users, over which the District has no control.

GENERAL PROVISIONS

Excess Lands

26. As used herein the term "excess land" means that part of the irrigable land within the District in excess of 160 acres held in the beneficial ownership of any single person; or in excess of 320 acres held in the beneficial ownership of husband and wife jointly, as tenants in common or by the entirety, or as community property. The term "large landowner" means an owner of excess lands as herein defined; the term "nonexcess land" means all land within the District which is not excess land as defined herein. Until one-half of the construction charges allocated against any excess lands not covered by a valid recordable contract have been fully paid, no sale of any such lands shall carry the right to receive water hereunder, unless and until the purchase price involved in such sale is approved by the Secretary and upon proof of fraudulent representation as to the true consideration involved in

such sales, the Secretary may instruct the District by written notice to refuse to deliver any water subject to this contract to the lands involved in such fraudulent sales and the District shall thereafter take such steps as may be necessary to insure that said water is not delivered to such lands.

Lands Not to Receive Water until Owners Thereof Execute Certain Contracts

27. (a) Except as permitted by the Act of July 11, 1956 (70 Stat. 524) or the Act of September 2, 1960 (74 Stat. 732), no water shall be delivered to any excess lands as defined in article 26 hereof unless the owners thereof shall have executed valid recordable contracts in form satisfactory to the Secretary, agreeing to the provisions of this article and articles 26 and 28 hereof, agreeing to the appraisal provided for in article 28 hereof and that such appraisal shall be made on the basis of the actual bona fide value of such lands at the date of the appraisal without reference to the construction of the project, and agreeing to the sale of such lands under terms and conditions satisfactory to the Secretary and at prices not to exceed those fixed, all as hereinafter provided.

(b) Each large landowner as a condition precedent to the right to receive water delivered hereunder for any of his excess lands shall, within 10 years following the availability of water to the District under this contract, and before any water is delivered by the District to his

excess land, execute a valid recordable contract in form satisfactory to the Secretary: Provided, That no excess land may be made eligible to receive water hereunder by the execution of a recordable contract unless such excess land was, on the date of initial availability of water, held in the ownership of the large landowner executing such recordable contract. In such recordable contract the large landowner shall agree to the provisions contained in this article and in articles 26 and 28 hereof and agree to dispose of his excess lands in accordance therewith to persons who can take title thereto as nonexcess land as herein provided and at a price not to exceed the approved, appraised value of such excess land within the period of 10 years after the said initial availability of water, and shall agree further that if said land is not so disposed of within said period of 10 years the Secretary shall have the power to dispose of said land subject to the same conditions on behalf of such large landowner; and the District agrees that it will take all necessary steps to insure that water is not delivered to any large landowner other than for his nonexcess lands until such owner meets the conditions precedent herein stated.

(c) Each large landowner as a condition precedent to the right to receive water delivered by the District for any of his lands shall, within 30 days after the date of notice from the United States through the District requesting such large landowner to designate his lands

within the area served by said District which he desires to designate as nonexcess lands, file in the office of the District, in duplicate, one copy thereof to be furnished by the District to the Secretary, his written designation and description of lands so selected to be nonexcess lands; and upon failure to do so the District shall be required to make such designation and mail a notice thereof to such large landowner, and in the event said District fails to act within such period of time as the Secretary considers reasonable, such designation will be made by the Secretary who will mail a notice thereof to the District and to the large landowner. The large landowner shall become bound by any such action on the part of the District or the Secretary, and the District will take all necessary steps to insure that water is delivered to lands eligible as nonexcess lands only when so designated as nonexcess. A large landowner may with the consent of the Secretary designate land other than that previously designated as nonexcess land: Provided, That such redesignation may be made only by a large landowner who had theretofore executed a recordable contract under the terms hereof, only with respect to land covered by such recordable contract, and only to the extent that an equal acreage of the irrigable land initially designated as nonexcess and owned by such large landowner shall, upon such new designation, become excess land subject to the provisions of such recordable contract in the same manner as if such land had been included therein.

Valuation and Sale of Excess Lands

28. (a) The value of the excess lands within the area served by the District held in the ownership of large landowners shall be appraised in a manner to be prescribed by the Secretary. At the option of the large landowner, the value of such land may be appraised, subject to the approval thereof by the Secretary, by three appraisers. One of said appraisers shall be designated by the Secretary and one shall be designated by the District and the two appraisers so appointed shall name the third. If the appraisers so designated by the Secretary and the District are unable to agree upon the appointment of the third, the Presiding Judge of the United States District Court for the State of Oregon shall be requested to name the third appraiser.

(b) The following principles shall govern the appraisal:

(1) No value shall be given such lands on account of the existing or prospective possibility of securing water from the project.

(2) In any such appraisal appropriate consideration shall be given to land value indexes for comparable lands as published by an authorized agency of the United States.

(3) The value of improvements on the land at the time of said appraisal shall be included therein,

but shall also be set forth separately in such appraisal.

(c) The excess land of any large landowner shall be reappraised at the instance of the United States or at the request of said landowner. The cost of the first appraisal and each subsequent appraisal requested by the United States shall be paid by the United States.

(d) Any improvements made or placed on the appraised land after the appraisal hereinabove provided for prior to sale of the land by a large landowner may be appraised in like manner.

(e) Future sales of excess irrigable lands of large landowners within the area served by the District shall not carry the right to receive water hereunder for such land and the District agrees to refuse to deliver water to land so sold until, in addition to compliance with the other provisions hereof, a verified statement showing the sale price upon any such sale shall have been filed with the District.

(f) The District shall take all reasonable steps requested by the Secretary to ascertain the occurrence and conditions of all sales of irrigable lands of large landowners in the area served by the District and to inform the Secretary concerning the same.

(g) A true copy of this contract and of each appraisal made pursuant thereto shall be maintained on file in the office of the District and like copies in the office of the Secretary, and shall be made available

for examination during the usual office hours by all persons who may be interested therein.

Production Limitation on Newly Irrigated Lands

29. For a period of 10 years from September 20, 1966, no water from the project or irrigation works shall be delivered to any water user for the production on newly irrigated lands of any basic agricultural commodity, as defined in the Agricultural Act of 1949 (63 Stat. 1051) or any amendment thereof, if the total supply of such commodity for the marketing year in which the bulk of the crop would normally be marketed is in excess of the normal supply as defined in section 301(b)(10) of the Agricultural Adjustment Act of 1938 (52 Stat. 41) as amended, unless the Secretary of Agriculture calls for an increase in production of such commodity in the interest of national security.

Title to Project Works

30. Title to project works built or to be built by the United States shall remain in the United States until otherwise provided by the Congress.

Books, Records and Reports

31. The District shall establish and maintain accounts and other books and records pertaining to its financial transactions, land use and crop census, water supply, water use, changes to project works, and to other matters as the Contracting Officer may require. Annual reports

thereon shall be furnished to the Contracting Officer on or before December 31 in such form as he may require. Subject to applicable Federal laws and regulations, each party shall have the right during office hours to examine and make copies of each other's books and official records relating to matters covered by this contract.

Performance of Work with Contributed Funds

32. (a) Pursuant to the Act of March 4, 1921 (41 Stat. 1367, 1404), the United States, at its option, may perform with funds contributed by the District any construction or maintenance work within the authority of the District, but which is not otherwise provided for by this contract. If the United States determines that it will undertake any such work, funds therefor shall be advanced by the District as directed by the Secretary. The advance shall be accompanied by a certified copy of a resolution of the District's board of directors describing the work to be done and authorizing its performance by the United States with the District's funds.

(b) After completion of any work so undertaken, the United States shall furnish the District with an itemized statement of the cost of the work done. Any unexpended balance of the funds advanced will be refunded to the District or applied as otherwise directed by the District.

Rules, Regulations, and Determinations

33. (a) The Secretary reserves the right to make, after an opportunity has been offered to the District for consultation, rules and regulations consistent with the provisions of this contract, the laws of the United States and the State of Oregon, to add to or to modify them as may be deemed proper and necessary to carry out this contract, and to supply necessary details of its administration which are not covered by express provisions of this contract. The District agrees to observe such rules and regulations.

(b) Where the terms of this contract provide for action to be based upon the opinion or determination of either party to this contract, whether or not stated to be conclusive, said terms shall not be construed as permitting such action to be predicated upon arbitrary, capricious, or unreasonable opinions or determinations. The Secretary's decision on all questions of fact arising under this contract shall be made only after consultation with the District and shall be conclusive upon the parties thereto.

Confirmation of Contract

34. The execution of this contract shall be authorized or ratified by the qualified electors of the District at an election held for that purpose. The District, after the election and upon the execution of this contract, shall promptly secure a final decree of the proper court of the

State of Oregon approving and confirming the contract and decreeing and adjudging it and the apportionment of the benefits made thereunder to be lawful, valid, and binding on the District. The District shall furnish to the United States certified copies of such decrees and of all pertinent supporting records.

Changes in District Organization

35. While this contract is in effect, no change shall be made in the District, by inclusion or exclusion of lands, by dissolution, consolidation, or merger or otherwise, which would affect the obligation of the District to the United States hereunder except upon the Contracting Officer's written consent thereto.

Notices

36. (a) Any notice, demand or request authorized or required by this contract shall be determined to have been given when mailed, postage prepaid, or delivered to the Regional Director, Region 1, Bureau of Reclamation, Boise, Idaho, on behalf of the United States and to the Secretary of the Tualatin Valley Irrigation District, Hillsboro, Oregon, on behalf of the District.

(b) The designation of the addressee or the address given above may be changed at any time by similar notice.

Equal Opportunity

37. During the performance of this contract, the District agrees as follows:

(1) The District will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The District will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The District agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the Contracting Officer setting forth the provisions of this Equal Opportunity clause.

(2) The District will, in all solicitations or advertisements for employees placed by or on behalf of the District, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(3) The District will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the Contracting Officer, advising the labor union or workers' representative of the District's commitments under this Equal Opportunity clause, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The District will comply with all provisions of Executive Order No. 11246 of September 24, 1965, as amended, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The District will furnish all information and reports required by Executive Order No. 11246 and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the Contracting Officer and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the District's noncompliance with the Equal Opportunity clause of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended, in whole or in part, and

the District may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order No. 11246, and such other sanctions may be imposed and remedies invoked as provided in said Executive Order, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(7) The District will include the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order No. 11246, so that such provisions will be binding upon each subcontractor or vendor. The District will take such action with respect to any subcontract or purchase order as the Contracting Officer may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, That in the event the District becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the Contracting Officer, the District may request the United States to enter into such litigation to protect the interests of the United States.

Art. 37 cont.

Title VI, Civil Rights Act of 1964

38. (a) The District agrees that it will comply with Title VI of the Civil Rights Act of July 2, 1964 (78 Stat. 241) and all requirements imposed by or pursuant to the Department of the Interior Regulation (43 CFR 17) issued pursuant to that title, to the end that, in accordance with Title VI of that Act and the Regulation, no person in the United States shall, on the ground of race, color, or national origin be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity for which the District receives financial assistance from the United States and hereby gives assurance that it will immediately take any measures to effectuate this agreement.

(b) If any real property or structure thereon is provided or improved with the aid of Federal financial assistance extended to the District by the United States, this assurance obligates the District, or in the case of any transfer of such property, any transferee for the period during which the real property or structure is used for a purpose involving the provision of similar services or benefits. If any personal property is so provided, this assurance obligates the District for the period during which it retains ownership or possession of the property. In all other cases, this assurance obligates the District for the period during which the Federal financial assistance is extended to it by the United States.

(c) This assurance is given in consideration of and for the purpose of obtaining any and all Federal grants, loans, contracts, property, discounts, or other Federal financial assistance extended after the date hereof to the District by the United States, including installment payments after such date on account of arrangements for Federal financial assistance which were approved before such date. The District recognizes and agrees that such Federal financial assistance will be extended in reliance on the representations and agreements made in this assurance, and that the United States shall reserve the right to seek judicial enforcement of this assurance. This assurance is binding on the District, its successors, transferees, and assignees.

Certification of Nonsegregated Facilities

39. The District hereby certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. It certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The District agrees that a breach of this certification is a violation of the Equal Opportunity clause in this contract. As used in

this certification, the term "segregated facilities" means any waiting rooms, work areas, rest rooms and wash rooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, creed, color, or national origin, because of habit, local custom, or otherwise. The District further agrees that (except where it has obtained identical certifications for proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding ten thousand dollars ($10,000) which are not exempt from the provisions of the Equal Opportunity clause; that it will retain such certifications in its files; and that it will forward the following notice to such proposed subcontractors (except where the proposed subcontractors have submitted identical certifications for specific time periods):

NOTICE TO PROSPECTIVE SUBCONTRACTORS OF REQUIREMENT FOR CERTIFICATIONS OF NONSEGREGATED FACILITIES

A Certification of Nonsegregated Facilities, as required by the May 9, 1967, order (32 F.R. 7439, May 19, 1967) on Elimination of Segregated Facilities, by the Secretary of Labor, must be submitted prior to the award of a subcontract exceeding ten thousand dollars

($10,000) which is not exempt from the provisions of the Equal Opportunity clause. The certification may be submitted either for each subcontract or for all subcontracts during a period (i.e., quarterly, semiannually, or annually).

Note: The penalty for making false statements in offers is prescribed in 18 U.S.C. 1001.

Contingent on Appropriations or Allotment of Funds

40. The expenditure of any money or the performance of any work by the United States hereunder which may require appropriations of money by the Congress or the allotment of funds, shall be contingent upon such appropriations or allotments being made. The failure of the Congress to appropriate funds or the absence of any allotment of funds shall not relieve the District from any obligations then accrued under this contract, nor give the District the right to terminate this contract as to any of its executory features. No liability shall accrue to the United States in case such funds are not appropriated or allotted.

Assignment Limited--Successors and Assigns Obligated

41. The provisions of this contract shall apply to and bind the successors and assigns of the parties hereto, but no assignment or transfer of this contract or any part or interest therein shall be valid until approved by the Secretary.

Officials Not to Benefit

42. No Member of or Delegate to Congress or Resident Commissioner shall be admitted to any share or part of this contract or to any benefit that may arise herefrom. This restriction shall not be construed to extend to this contract if made with a corporation or company for its general benefit.

IN WITNESS WHEREOF, the parties hereto have signed their names as of the day and year first above written.

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF RECLAMATION
Tualatin Federal Reclamation Project, Oregon

AMENDATORY REPAYMENT CONTRACT BETWEEN THE UNITED STATES OF AMERICA AND THE TUALATIN VALLEY IRRIGATION DISTRICT

RECITALS, DEFINITIONS, AND TERM

THIS AMENDATORY CONTRACT, made this 14th day of June 1976, between the UNITED STATES OF AMERICA, hereinafter referred to as the "United States," acting through the Regional Director, Pacific Northwest Region, Bureau of Reclamation, hereinafter referred to as the "Contracting Officer," upon authorization of the Secretary of the Interior and pursuant to the provisions of the Act of June 17, 1902 (32 Stat. 388), and acts amendatory thereof and supplementary thereto, referred to collectively as the Federal Reclamation Laws, and particularly the Act of September 20, 1966 (80 Stat. 822), and the TUALATIN VALLEY IRRIGATION DISTRICT, hereinafter referred to as the "District," an irrigation district duly organized and existing under the laws of the State of Oregon,

WITNESSETH, THAT:

Explanatory Recitals

2. WHEREAS, the United States and the District entered into a contract dated March 10, 1971, hereinafter referred to as the "Repayment Contract," providing for an irrigation water supply from the Tualatin Federal Reclamation Project to be constructed by the United States for use on lands within the District; and

3. WHEREAS, the project plan initially contemplated project pressure irrigation service to not more than 8,000 acres of the 17,000

irrigable acres to receive project water but due to construction considerations has been changed to provide project pressure irrigation service to not more than 11,300 acres of the 17,000-acre project; and

4. WHEREAS, the Repayment Contract precluded the District from furnishing water for suburban agricultural uses and the District now desires to be permitted to provide such service; and

5. WHEREAS, construction of the project works has not progressed as rapidly as anticipated and it is necessary to provide for "irrigation blocks" pursuant to the Act of August 28, 1962 (76 Stat. 407); and

6. WHEREAS, the parties wish to amend the Repayment Contract to provide for the change in the project plan resulting in additional project pressure irrigation service, to increase the construction charge obligation to be paid by the District for such additional service, to provide for irrigation blocks, and to establish a rate structure for suburban agricultural water service;

NOW, THEREFORE, in consideration of the mutual and dependent stipulations and covenants herein contained, it is mutually agreed by and between the parties hereto as follows:

AMENDMENTS TO THE REPAYMENT CONTRACT

7. Article 5 of the Repayment Contract is hereby amended by the substitution of the following subarticle 5(h) and the addition of a new subarticle 5(l).

"(h) 'Irrigation water' shall mean water furnished by the District for commercial agricultural purposes in the production of crops and livestock and for suburban agricultural purposes in the irrigation of lawns, gardens, and other incidental irrigation uses."

"(1) 'Water user account' shall mean an account established on the District's assessment rolls for each separately owned tract of land shown of public record within the project area for which water is made available from the project works."

8. Article 7(a)(2) of the Repayment Contract is hereby amended to read as follows:

"(2) Irrigation works consisting of a system of main canals, pumping plants, substations, necessary electric transmission connections, open ditch and pipe laterals including pressure reducers, buildings and equipment, and appurtenant facilities."

9. Article 7(c) of the Repayment Contract is hereby amended to read as follows:

"(c) The estimated cost of the project works to be constructed under this contract is $52,407,000 (July 1975 prices) of which amount $29,156,000 is allocated to irrigation. The United States obligation to undertake construction of the project works and the District's repayment obligation under this contract are based upon the premise that the actual cost of the construction of the project works will not exceed $52,407,000 adjusted to the amount, if any, that may be justified by reason of ordinary fluctuations in the cost of construction as indicated by engineering cost indexes applicable to the type of construction involved. If the Secretary finds at any time that the works to be constructed under this contract cannot be completed for $52,407,000 as adjusted or if he determines

that due to changes in the project plans or increased construction costs the base construction charge obligation set forth in Article 8 of the Repayment Contract should be increased, he shall consult with the board of directors of the District and may make continuation of construction contingent upon the completion of arrangements with the District for assumption of all or some part of the estimated increased reimbursable cost in addition to the base construction charge obligation stated in Article 8 of the Repayment Contract. In the event the Secretary does make continuation of construction contingent upon completion of such arrangements and the District does not assume the increased obligation or in the event additional appropriations are not available, or authorized, the Secretary may notify the District that the work is deemed completed, and the District's construction charge obligation shall be either the amount provided in Article 8 of the Repayment Contract, or the cost of the completed work allocated to irrigation, whichever amount is smaller."

10. Article 8 of the Repayment Contract is hereby amended to read as follows:

"District's Construction Charge Obligation and Determination of Annual Payments to the United States

"8. (a) The estimated cost of the project allocated to irrigation is $29,156,000 (July 1975 prices) of which the District is obligated to pay $6,000,000 as its base irrigation construction charge obligation under this contract. This base irrigation construction charge obligation is based upon an irrigable project acreage of 17,000 acres of which a

maximum acreage of 11,300 acres would receive project pressure irrigation service and the residual acreage project gravity irrigation service. In the event the Secretary determines that fund limitations or other considerations make it impossible to provide project pressure irrigation service to 11,300 acres, the base irrigation construction charge obligation shall be decreased by $130 per acre for each acre less than 11,300 acres which cannot be provided project pressure irrigation service.

"(b) The Contracting Officer shall, pursuant to Article 11(a) of the Repayment Contract, assign to each irrigation block a portion of the District's base irrigation construction charge obligation. The District's base irrigation construction charge obligation assigned to each block shall be paid in 50 successive equal annual installments commencing on December 31 of the first calendar year following the end of the development period for each respective irrigation block provided for in Article 9 of the Repayment Contract. The District shall annually levy (i) for each water user account consisting of 10 acres or less a charge of not less than $80; and (ii) for each water user account consisting of more than 10 acres acreage charges which will provide an annual amount equal to that which would be provided if an annual charge of $5.35 per acre for lands receiving project gravity irrigation service and $7.95 per acre for lands receiving project pressure irrigation service were levied for the respective number of acres capable of being provided either project gravity or pressure irrigation service as determined pursuant to

Article 11(a) of the Repayment Contract. In the event that the annual amount levied by the District in accordance with the foregoing charges exceeds 2 percent of the base irrigation construction charge obligation which is then repayable, the District shall remit to the United States, in addition to the annual payment due on behalf of the base irrigation construction charge obligation, the excess amount levied and collected pursuant to this paragraph, which amount shall be applied toward the repayment of the estimated cost of the project allocated to irrigation which is not scheduled for repayment as the District's base irrigation construction charge obligation. The District's total payments to the United States over the repayment period shall not exceed the base irrigation construction charge obligation unless the charges established herein result in annual amounts greater than 2 percent of the base irrigation construction charge obligation, but in no event shall the total payments to the United States hereunder be greater than $29,156,000."

11. Article 9 of the Repayment Contract is hereby amended to read as follows:

"Irrigation Blocks and Development Period

"9. As the result of the construction schedule of the project works, irrigation water service to some of the lands within the District which

are to receive project water may precede irrigation water service to other lands. The Contracting Officer may, in consideration of the availability of water service, establish irrigation blocks for repayment purposes. The development period for each irrigation block will begin with the year for which water is announced by the Secretary as available and extend for a period of 10 years thereafter. Such announcement shall be made no later than December 1 of the year preceding the year in which the development period for each irrigation block is to start. During the development period for each irrigation block the District shall pay to the United States its share of the operation and maintenance costs of the reserved works, the operation and maintenance costs of the irrigation works if the United States is operating such works, and the power and transmission charges and other costs and obligations, if any, of the District under this contract."

12. Article 10(b) of the Repayment Contract is hereby amended to read as follows:

"(b) The water furnished under the terms of this contract shall be used solely for irrigation water as defined in this contract. The District shall not furnish domestic, municipal, and industrial water without the concurrence of the Contracting Officer and subject to such terms and conditions which he may prescribe."

13. Article 11(a) of the Repayment Contract is hereby amended to read as follows:

"(a) Upon the completion of the work provided for in Article 7 of the Repayment Contract as amended or the termination of the work thereon as determined by the Secretary for any reason, or thereafter as soon as the actual construction costs can be determined by the United States, the Secretary shall furnish the District a written statement of the actual cost of construction, the number of acres to be provided project pressure irrigation service and the number of acres to be provided project gravity irrigation service, the cost allocated to irrigation, the District's base irrigation construction charge obligation, and the base irrigation construction charge obligation assignable to each irrigation block; such assignment shall be in the proportion that the irrigable acres in each irrigation block is to the total irrigable acres for which project irrigation service is to be provided."

14. Article 18(d) of the Repayment Contract is hereby amended to read as follows:

"(d) The District in establishing and collecting charges shall levy a minimum annual charge for operation and maintenance against each irrigable acre. The District may also levy additional charges against each water user account for District costs of administration and for greater proportional costs of operation and maintenance required for service to small acreages. Payment of such minimum annual charge shall be required whether or not water is used and shall be in advance of the delivery of water. The amount of water in acre-feet per acre which is to be delivered each year on payment of the minimum annual charge shall

be 1 acre-foot. For water to be delivered each year in excess of that delivered for the minimum charge, the landowners or water users involved shall pay to the District an additional water charge as follows:

"(1) For the first one-half acre-foot per acre at a rate per acre-foot equal to not less than 100 percent of the rate per acre-foot charged for water made available under the minimum annual charge.

"(2) For the second one-half acre-foot per acre at a rate per acre-foot equal to not less than 120 percent of the rate per acre-foot charged for water made available under the minimum annual charge.

"(3) For each acre-foot or fraction thereof per acre in excess of 2 acre-feet per acre at a rate per acre-foot equal to not less than 200 percent of the rate per acre-foot charged for water made available under the minimum annual charge."

15. Article 19 of the Repayment Contract is hereby amended to read as follows:

"Penalty for Delinquent Payments

"19. The District shall pay a penalty on installments or charges which become delinquent computed at the rate of 1 percent per month of the amount of such delinquent installments or charges for each day from such delinquency until paid: Provided, That no penalty shall be charged to the District unless such delinquency continues for more than 30 days in which event the penalty shall accrue from the initial date of delinquency."

16. Article 31 of the Repayment Contract is hereby amended to read as follows:

"Books, Records, and Reports

"31. The District shall establish and maintain accounts and other books and records pertaining to its financial transactions, land use and crop census, water supply, water use, number of water user accounts, acres within each water user account, changes to project works, and to other matters as the Contracting Officer may require. Annual reports thereon shall be furnished to the Contracting Officer on such date or dates and in such form as he may require. Subject to applicable Federal laws and regulations, each party shall have the right during office hours to examine and make copies of each other's books and official records relating to matters covered by this contract."

17. Article 38(a) of the Repayment Contract is hereby amended to read as follows:

"Title VI, Civil Rights Act of 1964

"38. (a) The District agrees that it will comply with Title VI of the Civil Rights Act of July 2, 1964 (78 Stat. 241), and all requirements imposed by or pursuant to the Department of the Interior Regulation (43 CFR 17) issued pursuant to that title, to the end that, in accordance with Title VI of that Act and the Regulation, no person in the United States shall, on the ground of race, color, sex, or national origin be excluded from participation in, be denied the benefits of, or by otherwise subjected to discrimination under any program or activity for which the

District receives financial assistance from the United States and hereby gives assurance that it will immediately take any measures to effectuate this agreement."

18. A new Article 43 is added to the Repayment Contract to read as follows:

"District Responsible for Drainage

"43. (a) After project construction and development drainage facilities may be needed to attain and maintain productive levels on lands classified as irrigable within the District. In order to identify and resolve potential drainage problems the District shall upon request of the Contracting Officer install, operate and maintain ground-water observation wells and maintain records of ground-water levels. Records shall be furnished to the Contracting Officer in such form and at such times as the Contracting Officer may require.

"(b) The District at no expense to the United States shall construct, or cause to be constructed, drainage works or adopt other measures to protect the irrigability of the project lands within the District receiving water from the District."

GENERAL PROVISIONS OF THIS AMENDATORY CONTRACT

Contingent on Appropriation or Allotment of Funds

19. The expenditure or advance of any money or the performance of any work by the United States hereunder which may require appropriation of money by the Congress or the allotment of funds shall be contingent upon such appropriation or allotment being made. The failure of the Congress to appropriate funds or the absence of any allotment of funds shall not relieve the District from any obligations under this contract. No liability shall accrue to the United States in case such funds are not appropriated or allotted.

Officials Not to Benefit

20. (a) No Member of or Delegate to Congress or Resident Commissioner shall be admitted to any share or part of this contract or to any benefit that may arise herefrom. This restriction shall not be construed to extend to this contract if made with a corporation or company for its general benefit.

(b) No official of the District shall receive any benefit that may arise by reason of this contract other than as a landowner within the project and in the same manner as other landowners within the project.

Confirmation of Contract

21. The execution of this contract shall be authorized or ratified by the qualified electors of the District at an election held for that purpose. The District, after the election and upon the execution of this amendatory contract, shall promptly secure a final decree of the proper court of the State of Oregon approving and confirming the amendatory contract and decreeing and adjudging it and the apportionment of the benefits made thereunder to be lawful, valid, and binding on the District. The District shall furnish to the United States a certified copy of such decree and of all pertinent supporting records.

Effect of Contract

22. This contract is amendatory of and supplemental to the Repayment Contract of March 10, 1971, No. 14-06-100-6956, between the United States and the District, and that contract except as specifically amended hereby shall remain in full force and effect.

IN WITNESS WHEREOF, the parties hereto have signed their names as of the day and year first above written.

Amendment No. 2 to
Contract No. 14-06-100-6956

UNITED STATES DEPARTMENT OF THE INTERIOR
BUREAU OF RECLAMATION

AMENDATORY CONTRACT BETWEEN THE UNITED STATES OF AMERICA AND THE TUALATIN VALLEY IRRIGATION DISTRICT FOR CONFORMANCE WITH THE RECLAMATION REFORM ACT OF 1982 (Title II, Public Law 97-293)

THIS CONTRACT AMENDMENT, made this 10th day of July, 1987, authorized pursuant to Federal Reclamation laws, the Act of June 17, 1902 (32 Stat. 388), and all acts amendatory thereof and supplementary thereto, is between the UNITED STATES OF AMERICA, acting through the Regional Director, Pacific Northwest Region, Bureau of Reclamation, hereinafter referred to as the Contracting Officer, and the TUALATIN VALLEY IRRIGATION DISTRICT, hereinafter referred to as the District, an irrigation district organized and existing under the laws of the State of Oregon, with its principal place of business at Forest Grove, Oregon. This amendment shall be solely to conform the existing contract to Sections 203 through 208 of the Reclamation Reform Act of 1982;

It is agreed that the following changes to Contract No. 14-06-100-6956, dated March 10, 1971, hereinafter referred to as the Existing Contract, between the United States and the District shall become effective as of the date of the Contractor's request, March 10, 1987:

Article 26, entitled "Excess Lands" is hereby deleted from the Existing Contract.

Article 33, entitled "Rules, Regulations, and Determinations" is hereby amended to read as follows:

"Compliance With Reclamation Laws"

"33. The District agrees that the delivery of irrigation water or the use of Federal facilities pursuant to this contract is subject to Reclamation law, as amended and supplemented, including, but not limited to, the Reclamation Reform Act of 1982 (Public Law 97-293)."

All other contract provisions shall remain in force and are not affected by this amendment.

IN WITNESS WHEREOF, the parties hereto have executed this amendatory contract the day and year first above written.

FO CHECKLIST

REVIEW DATE: 10/29/96

WEEK # 59

PFO TO FO CONVERSION

INITIALS : JWG

In preparing the FO, you should check the following:

1. (Y) / N Were comments or protests received in response to the PFO?
2. ___ If #1 = "Y", **from whom** were the comments received and **when**? STOEL Rives LLP - 10-25-96
3. ___ Verify names and addresses on the PFO CC list. **ALL** commentors (regardless of comment date), **affected landowners (were they notified?)**, and **those who paid the $10 fee** should be listed.
4. ___ Verify payment of recording fees (circle the appropriate option) (over)
   (1) Issue FO w/permit if fees are paid -- Prepare refund request for excess fees, **including standing fees if no protest is filed and no modifications are being made to the PFO**
   (2) Issue FO w/o permit if fees are lacking
5. Y / (N) Is the file lacking a signed oath of accuracy for the application?
6. Y / (N) Has ODFW asked for self certification on screening condition?
7. Y / (N) Is water use prohibited for one or more months of the normal use period?
8. Y / N If # 7 = "Y", is short season letter on file? Note: If short season letter is lacking prepare FO with Draft permit giving applicant 60 days to submit letter.
9. (Y) / N Is further processing possible? If not state reason: Hold - Per Dwight
10. ___ Notify applicant of additional information or fees required prior to permit issuance (**SEND CERTIFIED LETTER** & use standard wording from M:\T\FO\TOOLS if possible)
11. ___ Assign permit numbers to files with oath, fees, and no protests or other issues

Route to: (circle one)

DENIAL	FO w/o PERMIT	FO & PERMIT	Respond to COMMENTS
LARRY	JERRY	JEREMY	DOUG

Hold for Dwight

Modify FO as needed to: Initials JWG

12. ___ Respond to significant comments, issues, or disputes related to the proposed use of water (see notes, if any, listed above)
13. ___ Include or exclude permit conditions and management codes
14. ___ Correct PFO errors (such as POD or POU location (verify from map), Permit format)

Once FO document is completed:

15. JWG Save WordPerfect document in M:\T\FO\WEEK 59 & delete duplicates
16. ___ Print final draft of document and submit to team leader for review
17. Y / (N) Team leader review completed

RE: Tualatin Valley Irrigation District
Your Reference File 69623

Gentlemen:

In your letter of June 21, 1988, you advised my client the Tualatin Valley Irrigation District that in order to retain its priority date, the District's application must be completed in accordance with the provisions of your letter and be received in your office on or before December 21, 1988. As you know, the District has been diligently gathering and compiling the information you requested, but is still some time away from completing its task due to the overwhelming volume of material and information needed. In accordance with the provisions of ORS 537.150(2) on behalf of the District I respectfully request that the District be granted an additional year in which to obtain and submit all of the information you have requested. In addition, the District wishes to amend it's application to add an additional 3,000 acres for a total of 6,500 acres, of land to be served by the permit. In it's investigation, the District has discovered additional lands, in addition to those generally identified in it's application, which should be covered by the new permit. The more specific identification of those lands will be supplied along with the earlier requested information.

This letter and request is being hand-delivered to you by the District along with their check for the fees for the additional requested acreage. If you have any questions, please direct them either to the District Manager, Assistant Manager, or myself. If you feel that an appearance before the commission is necessary to obtain the extension I am requesting in this letter, please advise.

Sincerely yours,

BEN LOMBARD, JR.

WATER RESOURCES DEPARTMENT

INTEROFFICE MEMO

July 12, 1988

TO: John Borden

FROM: Tom Paul

SUBJECT: Meeting With TVID

This is to confirm a meeting with TVID, Bill, Jake, Clayton, you and me. The meeting will be in the directors meeting room on 7/13/88 beginning at 10:30.

The purpose of the meeting is to settle on meters for the district, discuss Clayton's budget and talk about TVID's new application.

I HOPE I REMEMBERED TO CHECK WITH YOU FIRST.

TOM

TUALATIN VALLEY IRRIGATION DISTRICT

June 21, 1988

Oregon Water Resources Department
William H. Young, Director
3850 Portland Road, NE
Salem, OR 97310

Dear Bill:

Remi and I appreciate your giving of time to review and discuss the water meter issue on Monday evening, June 13th. We are very pleased that you agreed the issue is open for discussion. We also believe that this does put the issue back to the District to take some of the responsibility of leadership in this area.

I did give you some facts from an informational paper I put together. The installation costs and data gathering cost compared to the benefits make the District want to evaluate the issue very thoroughly. It would seem that the Water Resources Department would have the same concerns.

It would be my suggestion that the Water Resources Department, Tualatin Valley Irrigaton District, any other interests and some technical people on this issue sit down and discuss these subjects:

1. What kind of information could a meter provide?
2. How important is this information to water management?
3. What are alternative ways to get this information?
4. What is the cost of getting this information by meters or alternative ways?

The question you raised in the discussion of "How do we prove a person is pumping illegally in excess of his rate at night?" is valid. I would like to explore the idea to be sure there is no alternative solution.

Tualatin Valley Irrigation District and its staff are ready to participate in discussions and forums on the management of Tualatin Basin water that may lead to positive solutions.

Thank you again for your time.

Sincerely,

Cal Krahmer

June 21, 1988

Calvin Krahmer, Manager
Tualatin Valley Irrigation District
2330 Elm Street
Forest Grove, OR 97116

REFERENCE File: 69623

The application you submitted for the District for a permit to appropriate 43.75 cubic feet per second from Tualatin River, Scoggins Creek, Scoggins Reservoir, Dairy Creek, and Gales Creek for the irrigation of 3500.0 acres has been filed and for reference numbered 69623. Our receipt 55166 covering the fees $7,280 you submitted is enclosed.

We received the sepia print of a map showing the Tualatin Valley Irrigation District boundary line and showing the sections of which a portion are included in the application. We also received documents as follows:

Attachment A -- Sources of appropriation
Attachment B -- Location of diversion points
Attachment C -- Location of area to be irrigated
Attachment D -- General description of Tualatin project
Attachment E -- Remarks
Attachment F -- Letter from Oregon State University to Cal Krahmer, Manager TVID
Attachment G -- Public Notices
Attachment H -- Repayment contract between USA and TVID

As discussed with Tom Vanderplaat a day after the application was received, in order to establish a priority date in filing an application, the application must contain certain information, among which the location of the point of diversion needs to be located at least down to the quarter-quarter section, section, township and range. Therefore, since the points of diversion were not located for the use of water from Dairy Creek and Gales Creek, The filing of the application established a tentative priority date on the use of water only from the Tualatin River, Scoggins Creek and Scoggins Reservoir.

Before the application can be considered for approval, it will be necessary to supply additional information on the

proposed developments from each source and submit a map or maps showing more details on the proposed developments.

Each point or points of diversion for each source will need to be properly located in Item 2 or on Attachment "B".

Item 3, or attachment sheets, will need to be completed by listing the acreage it is intended to irrigate in each quarter-quarter section.

If separate acreage will be irrigated from a separate source or if a combination of sources will irrigate separate acreage, this acreage will need to be listed separately along with properly identifying the sources for this acreage. If more than one source will be used to supply specific acreage, the manner of using the sources in connection with each other will need to be explained.

The amount of water you wish to establish a water right on from each source needs to be stated in Item 4 of the application or you may refer to an attachment sheet containing the required information.

If water will be used for purposes other than irrigation as suggested on Attachment "E", these other uses will need to be specifically identified, it will be necessary to state the amount of water to be appropriated from each source for each use, and it will be necessary to complete both the application and supporting maps by properly locating the place of use for each use.

Permit R-5777 issued for storage of water in Scoggins Reservoir provided for storage only for irrigation, supplemental irrigation, municipal, water quality control and reservoir fish and recreation. The contract the District has with the United States appears to limit the District's use of the stored water to be solely for irrigation uses on irrigable lands. Therefore, unless it is intended to refile for storage for other uses and obtain an amended contract from the United States, a permit approving the District's application could only provide for the use of the stored water for irrigation purposes.

Your name and title should be printed or typed below your signature on the third page of the application.

The map or maps to support the application will need to be prepared by a Certified Water Right Examiner and be prepared to a standard even scale of at least four inches to a mile. Such map or maps will need to show the streams, points of diversion and acreage to be irrigated with relation to the section lines and quarter-quarter lines and be in agreement with the information to be supplied on the application. If other types of uses, such as categories of nursery operations or temperature control (frost or heat protection) are to be included, areas of these other uses will need to be properly shown on the maps. Additional requirements for the supporting maps are briefly explained on pages 4 and 5 of the enclosed booklet relative to surface water applications.

The use of water that may be allowed under a permit that may be issued approving the application will be subject to existing rights and minimum stream flows established. Also, the permit will provide further that water shall not be appropriated from natural flows of the river or streams during the period July 31 through September 15 of each year.

I am returning the application to you along with Attachment "A", "B" and "C" for completion. The application is endorsed, so that in order to retain its priority date, it must be received in this office on or before December 21, 1988.

Sincerely,

WAYNE J. OVERCASH
Water Rights Specialist

Forest Grove, OR 97116

Dear Cal,

The inability to irrigate crops prior to May reduces our ability to manage certain problems that can occur through the month of April. Under normal conditions, early spring vegetable plantings receive rainfall frequent enough to allow seed germination and emergence. However, we do experience years when rainfall is absent during critical times when shallow-seeded vegetables need a constant moist environment to insure a good stand. Let's use a specific example to illustrate this point.

Two years ago we were asked to look at an onion field that had a very poor stand. This field was planted in early April. Close investigation revealed that the seed inside the pelleted coating had begun to germinate but complete breakdown of the coating had not occurred. The coating then became a barrier, resulting in death of the seedling. This problem could have been avoided with an early irrigation.

Crusting can be a problem for small-seeded vegetables. Crusting restricts emergence of new seedlings, resulting in a non-uniform stand. This problem could be reduced or avoided with irrigation. Some growers have begun to use vermiculite over the seed. While this practice reduces concern with compaction, it does increase a problem of seedling desiccation should we have an extended dry period soon after germination.

Many of the herbicides we now use need to be activated by rainfall or irrigation. We know of numerous instances where poor weed control has been the result of not enough moisture to activate the herbicide. Many of these treatments are applied from February through April.

New plantings of strawberries, caneberries, and blueberries need moist soil conditions immediately after planting to prevent a high level of mortality. Washington County has nearly one-third of the state's acreage of strawberries and a high percentage of them are irrigated. Growers need to be able to irrigate when they need it whether it's April, June, August, or some other time. It makes little sense to invest in an irrigation system to deliver water to a crop and then not have water available at a critical time.

- continued -

Application No. 69623
Permit No.

OREGON STATE UNIVERSITY EXTENSION SERVICE

Agriculture, Home Economics, 4-H Youth, Forestry, Community Development, Energy, and Extension Sea Grant Programs. Oregon State University, United States Department of Agriculture, and Washington County cooperating. The Extension Service provides equal access to all its activities and programs.

Blueberries, being very shallow rooted, are quite vulnerable to moisture stress at planting time. Often soil conditions do not permit the necessary field preparation before late March or April. Assuming this to happen, and blueberries are planted in early April, they really struggle to survive. Many plants don't unless water can be judiciously applied - and with the high cost of establishment, it's imperative that the grower do things right the first time.

As you know, the production of ornamental nursery crops is about a $25 million industry in Washington County. Most of this is container-grown material and very vulnerable to moisture stress.

This industry, too, must have water available on an as-needed basis. On occasion this means as early as March and certainly by April a copious amount of water is required.

We trust these comments will be helpful as you consider the need for early season irrigation water on our high-value horticultural crops in the Tualatin Valley.

Sincerely yours,

W. Arden Sheets, Chairman

Tualatin Federal Reclamation Project, Oregon

AMENDATORY REPAYMENT CONTRACT BETWEEN THE UNITED STATES OF AMERICA AND THE TUALATIN VALLEY IRRIGATION DISTRICT

RECITALS, DEFINITIONS, AND TERM

THIS AMENDATORY CONTRACT, made this 14th day of June 1976, between the UNITED STATES OF AMERICA, hereinafter referred to as the "United States," acting through the Regional Director, Pacific Northwest Region, Bureau of Reclamation, hereinafter referred to as the "Contracting Officer," upon authorization of the Secretary of the Interior and pursuant to the provisions of the Act of June 17, 1902 (32 Stat. 388), and acts amendatory thereof and supplementary thereto, referred to collectively as the Federal Reclamation Laws, and particularly the Act of September 20, 1966 (80 Stat. 822), and the TUALATIN VALLEY IRRIGATION DISTRICT, hereinafter referred to as the "District," an irrigation district duly organized and existing under the laws of the State of Oregon,

WITNESSETH, THAT:

Explanatory Recitals

2. WHEREAS, the United States and the District entered into a contract dated March 10, 1971, hereinafter referred to as the "Repayment Contract," providing for an irrigation water supply from the Tualatin Federal Reclamation Project to be constructed by the United States for use on lands within the District; and

3. WHEREAS, the project plan initially contemplated project pressure irrigation service to not more than 8,000 acres of the 17,000

irrigable acres to receive project water but due to construction considerations has been changed to provide project pressure irrigation service to not more than 11,300 acres of the 17,000-acre project; and

4. WHEREAS, the Repayment Contract precluded the District from furnishing water for suburban agricultural uses and the District now desires to be permitted to provide such service; and

5. WHEREAS, construction of the project works has not progressed as rapidly as anticipated and it is necessary to provide for "irrigation blocks" pursuant to the Act of August 28, 1962 (76 Stat. 407); and

6. WHEREAS, the parties wish to amend the Repayment Contract to provide for the change in the project plan resulting in additional project pressure irrigation service, to increase the construction charge obligation to be paid by the District for such additional service, to provide for irrigation blocks, and to establish a rate structure for suburban agricultural water service;

NOW, THEREFORE, in consideration of the mutual and dependent stipulations and covenants herein contained, it is mutually agreed by and between the parties hereto as follows:

AMENDMENTS TO THE REPAYMENT CONTRACT

7. Article 5 of the Repayment Contract is hereby amended by the substitution of the following subarticle 5(h) and the addition of a new subarticle 5(l).

"(h) 'Irrigation water' shall mean water furnished by the District for commercial agricultural purposes in the production of crops and livestock and for suburban agricultural purposes in the irrigation of lawns, gardens, and other incidental irrigation uses."

"(1) 'Water user account' shall mean an account established on the District's assessment rolls for each separately owned tract of land shown of public record within the project area for which water is made available from the project works."

8. Article 7(a)(2) of the Repayment Contract is hereby amended to read as follows:

"(2) Irrigation works consisting of a system of main canals, pumping plants, substations, necessary electric transmission connections, open ditch and pipe laterals including pressure reducers, buildings and equipment, and appurtenant facilities."

9. Article 7(c) of the Repayment Contract is hereby amended to read as follows:

"(c) The estimated cost of the project works to be constructed under this contract is $52,407,000 (July 1975 prices) of which amount $29,156,000 is allocated to irrigation. The United States obligation to undertake construction of the project works and the District's repayment obligation under this contract are based upon the premise that the actual cost of the construction of the project works will not exceed $52,407,000 adjusted to the amount, if any, that may be justified by reason of ordinary fluctuations in the cost of construction as indicated by engineering cost indexes applicable to the type of construction involved. If the Secretary finds at any time that the works to be constructed under this contract cannot be completed for $52,407,000 as adjusted or if he determines

that due to changes in the project plans or increased construction costs the base construction charge obligation set forth in Article 8 of the Repayment Contract should be increased, he shall consult with the board of directors of the District and may make continuation of construction contingent upon the completion of arrangements with the District for assumption of all or some part of the estimated increased reimbursable cost in addition to the base construction charge obligation stated in Article 8 of the Repayment Contract. In the event the Secretary does make continuation of construction contingent upon completion of such arrangements and the District does not assume the increased obligation or in the event additional appropriations are not available, or authorized, the Secretary may notify the District that the work is deemed completed, and the District's construction charge obligation shall be either the amount provided in Article 8 of the Repayment Contract, or the cost of the completed work allocated to irrigation, whichever amount is smaller."

10. Article 8 of the Repayment Contract is hereby amended to read as follows:

"District's Construction Charge Obligation and Determination of Annual Payments to the United States

"8. (a) The estimated cost of the project allocated to irrigation is $29,156,000 (July 1975 prices) of which the District is obligated to pay $6,000,000 as its base irrigation construction charge obligation under this contract. This base irrigation construction charge obligation is based upon an irrigable project acreage of 17,000 acres of which a

maximum acreage of 11,300 acres would receive project pressure irrigation service and the residual acreage project gravity irrigation service. In the event the Secretary determines that fund limitations or other considerations make it impossible to provide project pressure irrigation service to 11,300 acres, the base irrigation construction charge obligation shall be decreased by $130 per acre for each acre less than 11,300 acres which cannot be provided project pressure irrigation service.

"(b) The Contracting Officer shall, pursuant to Article 11(a) of the Repayment Contract, assign to each irrigation block a portion of the District's base irrigation construction charge obligation. The District's base irrigation construction charge obligation assigned to each block shall be paid in 50 successive equal annual installments commencing on December 31 of the first calendar year following the end of the development period for each respective irrigation block provided for in Article 9 of the Repayment Contract. The District shall annually levy (i) for each water user account consisting of 10 acres or less a charge of not less than $80; and (ii) for each water user account consisting of more than 10 acres acreage charges which will provide an annual amount equal to that which would be provided if an annual charge of $5.35 per acre for lands receiving project gravity irrigation service and $7.95 per acre for lands receiving project pressure irrigation service were levied for the respective number of acres capable of being provided either project gravity or pressure irrigation service as determined pursuant to

Article 11(a) of the Repayment Contract. In the event that the annual amount levied by the District in accordance with the foregoing charges exceeds 2 percent of the base irrigation construction charge obligation which is then repayable, the District shall remit to the United States, in addition to the annual payment due on behalf of the base irrigation construction charge obligation, the excess amount levied and collected pursuant to this paragraph, which amount shall be applied toward the repayment of the estimated cost of the project allocated to irrigation which is not scheduled for repayment as the District's base irrigation construction charge obligation. The District's total payments to the United States over the repayment period shall not exceed the base irrigation construction charge obligation unless the charges established herein result in annual amounts greater than 2 percent of the base irrigation construction charge obligation, but in no event shall the total payments to the United States hereunder be greater than $29,156,000."

11. Article 9 of the Repayment Contract is hereby amended to read as follows:

"Irrigation Blocks and Development Period

"9. As the result of the construction schedule of the project works, irrigation water service to some of the lands within the District which

are to receive project water may precede irrigation water service to other lands. The Contracting Officer may, in consideration of the availability of water service, establish irrigation blocks for repayment purposes. The development period for each irrigation block will begin with the year for which water is announced by the Secretary as available and extend for a period of 10 years thereafter. Such announcement shall be made no later than December 1 of the year preceding the year in which the development period for each irrigation block is to start. During the development period for each irrigation block the District shall pay to the United States its share of the operation and maintenance costs of the reserved works, the operation and maintenance costs of the irrigation works if the United States is operating such works, and the power and transmission charges and other costs and obligations, if any, of the District under this contract."

12. Article 10(b) of the Repayment Contract is hereby amended to read as follows:

"(b) The water furnished under the terms of this contract shall be used solely for irrigation water as defined in this contract. The District shall not furnish domestic, municipal, and industrial water without the concurrence of the Contracting Officer and subject to such terms and conditions which he may prescribe."

13. Article 11(a) of the Repayment Contract is hereby amended to read as follows:

"(a) Upon the completion of the work provided for in Article 7 of the Repayment Contract as amended or the termination of the work thereon as determined by the Secretary for any reason, or thereafter as soon as the actual construction costs can be determined by the United States, the Secretary shall furnish the District a written statement of the actual cost of construction, the number of acres to be provided project pressure irrigation service and the number of acres to be provided project gravity irrigation service, the cost allocated to irrigation, the District's base irrigation construction charge obligation, and the base irrigation construction charge obligation assignable to each irrigation block; such assignment shall be in the proportion that the irrigable acres in each irrigation block is to the total irrigable acres for which project irrigation service is to be provided."

14. Article 18(d) of the Repayment Contract is hereby amended to read as follows:

"(d) The District in establishing and collecting charges shall levy a minimum annual charge for operation and maintenance against each irrigable acre. The District may also levy additional charges against each water user account for District costs of administration and for greater proportional costs of operation and maintenance required for service to small acreages. Payment of such minimum annual charge shall be required whether or not water is used and shall be in advance of the delivery of water. The amount of water in acre-feet per acre which is to be delivered each year on payment of the minimum annual charge shall

be 1 acre-foot. For water to be delivered each year in excess of that delivered for the minimum charge, the landowners or water users involved shall pay to the District an additional water charge as follows:

"(1) For the first one-half acre-foot per acre at a rate per acre-foot equal to not less than 100 percent of the rate per acre-foot charged for water made available under the minimum annual charge.

"(2) For the second one-half acre-foot per acre at a rate per acre-foot equal to not less than 120 percent of the rate per acre-foot charged for water made available under the minimum annual charge.

"(3) For each acre-foot or fraction thereof per acre in excess of 2 acre-feet per acre at a rate per acre-foot equal to not less than 200 percent of the rate per acre-foot charged for water made available under the minimum annual charge."

15. Article 19 of the Repayment Contract is hereby amended to read as follows:

"Penalty for Delinquent Payments

"19. The District shall pay a penalty on installments or charges which become delinquent computed at the rate of 1 percent per month of the amount of such delinquent installments or charges for each day from such delinquency until paid: Provided, That no penalty shall be charged to the District unless such delinquency continues for more than 30 days in which event the penalty shall accrue from the initial date of delinquency."

16. Article 31 of the Repayment Contract is hereby amended to read as follows:

"Books, Records, and Reports

"31. The District shall establish and maintain accounts and other books and records pertaining to its financial transactions, land use and crop census, water supply, water use, number of water user accounts, acres within each water user account, changes to project works, and to other matters as the Contracting Officer may require. Annual reports thereon shall be furnished to the Contracting Officer on such date or dates and in such form as he may require. Subject to applicable Federal laws and regulations, each party shall have the right during office hours to examine and make copies of each other's books and official records relating to matters covered by this contract."

17. Article 38(a) of the Repayment Contract is hereby amended to read as follows:

"Title VI, Civil Rights Act of 1964

"38. (a) The District agrees that it will comply with Title VI of the Civil Rights Act of July 2, 1964 (78 Stat. 241), and all requirements imposed by or pursuant to the Department of the Interior Regulation (43 CFR 17) issued pursuant to that title, to the end that, in accordance with Title VI of that Act and the Regulation, no person in the United States shall, on the ground of race, color, sex, or national origin be excluded from participation in, be denied the benefits of, or by otherwise subjected to discrimination under any program or activity for which the

District receives financial assistance from the United States and hereby gives assurance that it will immediately take any measures to effectuate this agreement."

18. A new Article 43 is added to the Repayment Contract to read as follows:

"District Responsible for Drainage

"43. (a) After project construction and development drainage facilities may be needed to attain and maintain productive levels on lands classified as irrigable within the District. In order to identify and resolve potential drainage problems the District shall upon request of the Contracting Officer install, operate and maintain ground-water observation wells and maintain records of ground-water levels. Records shall be furnished to the Contracting Officer in such form and at such times as the Contracting Officer may require.

"(b) The District at no expense to the United States shall construct, or cause to be constructed, drainage works or adopt other measures to protect the irrigability of the project lands within the District receiving water from the District."

GENERAL PROVISIONS OF THIS AMENDATORY CONTRACT

Contingent on Appropriation or Allotment of Funds

19. The expenditure or advance of any money or the performance of any work by the United States hereunder which may require appropriation of money by the Congress or the allotment of funds shall be contingent upon such appropriation or allotment being made. The failure of the Congress to appropriate funds or the absence of any allotment of funds shall not relieve the District from any obligations under this contract. No liability shall accrue to the United States in case such funds are not appropriated or allotted.

Officials Not to Benefit

20. (a) No Member of or Delegate to Congress or Resident Commissioner shall be admitted to any share or part of this contract or to any benefit that may arise herefrom. This restriction shall not be construed to extend to this contract if made with a corporation or company for its general benefit.

(b) No official of the District shall receive any benefit that may arise by reason of this contract other than as a landowner within the project and in the same manner as other landowners within the project.

Confirmation of Contract

21. The execution of this contract shall be authorized or ratified by the qualified electors of the District at an election held for that purpose. The District, after the election and upon the execution of this amendatory contract, shall promptly secure a final decree of the proper court of the State of Oregon approving and confirming the amendatory contract and decreeing and adjudging it and the apportionment of the benefits made thereunder to be lawful, valid, and binding on the District. The District shall furnish to the United States a certified copy of such decree and of all pertinent supporting records.

Effect of Contract

22. This contract is amendatory of and supplemental to the Repayment Contract of March 10, 1971, No. 14-06-100-6956, between the United States and the District, and that contract except as specifically amended hereby shall remain in full force and effect.

IN WITNESS WHEREOF, the parties hereto have signed their names as of the day and year first above written.

REPAYMENT CONTRACT BETWEEN THE UNITED STATES OF AMERICA AND THE TUALATIN VALLEY IRRIGATION DISTRICT

RECITALS, DEFINITIONS AND TERM

THIS CONTRACT, made this 10th day of March , 1971 , by and between the UNITED STATES OF AMERICA, hereinafter called the United States, acting through the Regional Director, Region 1, Bureau of Reclamation, hereinafter referred to as the Contracting Officer, upon authorization of the Secretary of the Interior and pursuant to the provisions of the Act of June 17, 1902 (32 Stat. 388), and acts amendatory thereof and supplementary thereto, referred to collectively as the Federal Reclamation Laws, and particularly the Act of September 20, 1966 (80 Stat. 822), and the TUALATIN VALLEY IRRIGATION DISTRICT, hereinafter referred to as the District, an irrigation district duly organized and existing under the laws of the State of Oregon,

WITNESSETH, THAT:

Explanatory Recitals

2. WHEREAS, the Act of September 20, 1966, provides for the construction of the Tualatin Federal Reclamation Project to provide irrigation water, to develop municipal and industrial water supplies, to provide facilities for river regulation and control of floods, to enhance

Application No. 69623
Permit No.

recreation opportunities, to provide for the conservation and development of fish and wildlife resources and for other purposes; and

3. WHEREAS, the authorizing act of September 20, 1966, does not preclude and it has been determined to be desirable to include water quality control as a function of the project on a reimbursable interest-bearing basis; and

4. WHEREAS, the District desires to enter into a contract for an irrigation water supply from the project and is willing to pay a part of the cost of the project allocated to irrigation and assigned to be repaid by the District;

NOW, THEREFORE, in consideration of the mutual and dependent stipulations and covenants herein contained, it is mutually agreed by and between the parties hereto as follows:

Definitions

5. The following terms hereinafter used in this contract shall have the following respective meanings:

(a) "Secretary" shall mean the Secretary of the Interior or his duly authorized representative.

(b) "Federal Reclamation Laws" shall mean the Act of June 17, 1902 (32 Stat. 388), and all acts amendatory thereof or supplementary thereto, including without limitation by

Application No. 69623
Permit No.

this enumeration the pertinent provisions of the Act of September 20, 1966 (80 Stat. 822).

(c) "Project" shall mean the Tualatin Project to be constructed by the United States under the Federal Reclamation Laws.

(d) "Irrigation works" shall mean the works and facilities to be constructed for use in irrigating lands within the jurisdiction of the District as authorized by the Act of September 20, 1966, exclusive of the storage works as hereinafter defined.

(e) "Storage works" or "reserved works" shall mean Scoggins Dam and Reservoir, stream gauges, and other works incidental and appurtenant to those works.

(f) "Project works" shall mean all of the works authorized as part of the project.

(g) "Transferred works" shall mean all of the irrigation works as above defined.

(h) "Irrigation water" shall mean water used primarily in the commercial production of agricultural crops or livestock, including domestic use incidental thereto, on tracts of land operated in units of more than two acres.

Application No. 69623
Permit No.

Art. 5 cont.

(i) "Domestic, municipal, and industrial water" shall mean water used for other than those purposes referred to in (h) above or water quality control.

(j) "Project pressure irrigation service" shall mean the delivery of project water under pressure to permit sprinkler irrigation of District lands.

(k) "Project gravity irrigation service" shall mean the delivery of project water by gravity flows.

Contract Term

6. This contract shall become effective upon its execution by the Secretary and shall remain in effect until specifically terminated by mutual agreement of the parties hereto.

PROJECT CONSTRUCTION AND CONSTRUCTION CHARGES

Description and Cost of Project Works

7. (a) The United States within the limitations of this contract and authorizing legislation and to the extent funds are or may be made available therefor will construct the following project works:

(1) Storage works consisting of Scoggins Dam and Reservoir with spillway and outlet works.

Application No. 69623
Permit No.

(2) Irrigation works consisting of a system of main canals, pumping plants, substations, necessary electric transmission connections, open ditch and pipe laterals, drains, buildings and equipment, and appurtenant facilities.

(3) Fish facilities.

(4) Initial phase recreational facilities at the storage works.

The principal facilities and related works are as generally described in the project plan of development contained in House Document No. 295, 88th Congress, 2d Session, April 8, 1964.

(b) Should it appear necessary or desirable to the Secretary after consultation with the District, either before or during construction, the project works referred to above may be modified in design or location or work may be eliminated or added to that referred to above.

(c) The estimated cost of the project works to be constructed under this contract is thirty-one million three hundred thousand dollars ($31,300,000) (July 1969 prices) of which amount seventeen million five hundred twenty-eight thousand dollars ($17,528,000) is allocated to irrigation. The United States' obligation to undertake construction of the project works and the District's repayment obligation under this contract are based upon the premise that the actual cost of the construction of

Application No. 69623
Permit No.

the project works will not exceed this estimate adjusted to the amount, if any, that may be justified by reason of ordinary fluctuations in the cost of construction as indicated by engineering cost indexes applicable to the type of construction involved. If the Secretary finds at any time that the works to be constructed under this contract cannot be completed at a cost within this estimate, he shall consult with the board of directors of the District and may make continuation of construction contingent upon the completion of arrangements with the District for assumption of all or some part of the estimated increased reimbursable cost in addition to the construction charge obligation stated in article 8. In the event the Secretary does make continuation of construction contingent upon completion of such arrangements and the District does not assume the increased obligation or in the event additional appropriations are not available, or authorized, the Secretary may notify the District that the work is deemed completed, and the District's construction charge obligation shall be either the amount provided in article 8, or the cost of the completed work allocated to irrigation, whichever amount is smaller.

District's Construction Charge Obligation

8. (a) Of the amount of the cost of the project allocated to irrigation, the District shall pay to the United States as its construction charge obligation under this contract an amount not to exceed five million five hundred three thousand dollars ($5,503,000). This obligation

($6 000.000)
See amended Contract

Application No. 69623
Permit No.

is based upon an estimated irrigable project acreage of 17,000 acres of which a maximum acreage of 11,000 as amended 8,000 acres would receive project pressure irrigation service and the residual acreage project gravity irrigation service. In the event the Secretary determines that fund limitations or other considerations make it impossible to provide project pressure irrigation service to 8,000 acres, the construction charge obligation shall be decreased by one hundred twenty dollars ($120) per acre for each acre less than 8,000 acres.

(b) The District's construction charge obligation shall be paid in 50 successive equal annual installments commencing on December 31 of the first calendar year following the end of the development period provided for in article 9.

Development Period

9. The development period will begin with the year for which water is announced by the Secretary as available and extend for a period of 10 years thereafter. Such announcement shall be made no later than December 1 of the year preceding the year in which the development period is to start. During the development period the District shall pay to the United States its share of the operation and maintenance costs of the reserved works, the operation and maintenance costs of the irrigation works if the United States is operating such works, the power and transmission charges and other costs and obligations, if any, of the District

Application No. 69623
Permit No.

under this contract.

Project Irrigable Acreage

10. (a) The lands of the District have been classified as set forth in the document entitled "Detailed Land Classification Report, Tualatin Project, Oregon." This land classification is a detailed land classification as to each irrigable acre of land within the District. The Secretary shall determine the number of irrigable acres which can be served from the project irrigation works, the classification of such lands, and the type of project service, pressure or gravity, to be provided. From time to time prior to the close of the development period the lands within the District may, with the approval of the Secretary and under standards consistent with those used in making the detailed classification, be reclassified. Any such classification shall not change the construction charge obligation established by this contract for payment by the District. The District, with the approval of the Secretary, may for purposes of adjustments and matters of its own internal administration make changes in the irrigable acreage from time to time so long as such changes do not result in there being a total irrigable area which will exceed 17,000 acres.

Application No. 69623
Permit No.

(b) The water furnished under the terms of this contract shall be used solely for irrigation uses on irrigable lands. The District shall not furnish water from the project works to tracts of two acres or less, nor shall it furnish domestic, municipal, and industrial water. If such service is later desired, the terms and conditions for such service shall be prescribed by a supplemental agreement.

Statement of Costs

11. (a) Upon the completion of the work provided for in article 7, or the termination of the work thereon as determined by the Secretary for any reason, or thereafter as soon as the actual construction costs can be determined by the United States, the Secretary shall furnish the District a written statement of the actual cost of construction, the number of acres to be provided project pressure irrigation service and the number of acres to be provided project gravity irrigation service, the cost allocated to irrigation and the District's construction charge obligation.

(b) The costs which make up the various obligations to be paid by the District to the United States under this contract shall embrace all expenditures of whatsoever nature or kind in relation to the function for which the charge is made including, but without limitation by reason of this enumeration, cost of surveys and investigation, labor, property, material and equipment, engineering, legal work, superintendence, administration, overhead, general expenses, inspections, special services, and

Application No. 69623
Permit No.

damage claims of all kinds, whether or not involving the negligence of officers, agents or employees of the United States, but shall be exclusive of amounts which the law does not require to be repaid and which the Secretary determines as a matter of policy are to be treated as non-reimbursable.

PROJECT OPERATION AND MAINTENANCE AND OPERATION AND MAINTENANCE CHARGES

Operation and Maintenance of Transferred Works

12. (a) During the period that the United States is operating the irrigation works, the District shall pay to the United States the cost of operating said works in the manner prescribed in article 14(b).

(b) Upon substantial completion of the project works, or as otherwise determined by the Contracting Officer, and following written notification to the District, the care, operation, and maintenance of any or all of the irrigation works shall be transferred to the District. Concurrently with the transfer of operation and maintenance responsibilities to the District, or as soon as possible thereafter, and pursuant to the Act of July 29, 1954 (68 Stat. 580), as amended, equipment and supplies, the cost of which has been charged to the construction of the project, will be transferred to the District to assist it in its operation and maintenance activities.

Application No. 69623
Permit No.

(c) The District, without expense to the United States, shall care for, operate, and maintain such transferred works in full compliance with the terms of this contract and in such manner that the transferred works shall remain in good and efficient condition. The District shall use all practical methods to insure the economical and beneficial use of water.

(d) The District shall promptly make any and all repairs to the project works being operated by it which are necessary for the proper care, operation, and maintenance of the same. In case of neglect or failure of the District to make such repairs within 60 days following written notification to do so from the Contracting Officer, the Contracting Officer may cause the repairs to be made and the costs thereof shall be paid by the District in the manner prescribed by the United States.

(e) No substantial change shall be made by the District in the transferred works without first obtaining the written consent of the Contracting Officer.

(f) The District shall hold the United States, its officers, agents, and employees harmless as to any and all damages which may in any manner result from the care, operation, and maintenance of any of the project works transferred to the District: Provided, however, That this provision shall not be construed as relieving the United States of its obligations under the Federal Tort Claims Act (28 U.S.C. §2671-2680).

Application No. 69623
Permit No.

(g) In the event the District is found to be operating the transferred works or any part thereof in violation of this contract, then at the election of the Contracting Officer the United States may take over from the District, the care, operation, and maintenance of the works previously transferred to the District by giving written notice to the District of such determination and advising of the effective date of the takeover by the United States. Thereafter, during the period of operation by the United States, the District shall pay to the United States annually in advance the cost of operation and maintenance of such transferred works as prescribed in notices from the Contracting Officer to the District. Whenever in the opinion of the Secretary funds advanced will be inadequate to operate and maintain the works being operated by the United States, he may give a supplemental notice stating therein the amount of the District's share and the District shall advance such additional amount on or before the date or dates specified in the supplemental notice. Any credit over and above the actual costs of operation by the United States shall be credited to the District on future operation and maintenance charges. Such works may be retransferred to the District in the same manner as originally transferred.

(h) In addition to all other payments to be made by the District under this contract, the District shall, during the period of time any or all of the project works are being operated by it, pay to the

Application No. 69623
Permit No.

United States following the receipt of a detailed cost statement such specific items of direct cost incurred by the United States for work associated with this contract normally charged by the United States to water users and properly and equitably charged to the District plus a percentage of such direct cost for administrative and general overhead in accordance with procedures approved by the Secretary.

Review and Inspection of Transferred Works for Determining Adequacy of Maintenance

13. (a) The Contracting Officer and the District may from time to time make a review of maintenance of transferred works being operated by the District with a view to assisting the District in determining the condition of the facilities and the adequacy of the maintenance program. This review may include any or all of the transferred works. A report of the review, including recommendations, if any, will be prepared and copies will be furnished to the District. Except for such participation by the District as it may desire, the review and report will be without cost to the District.

(b) If deemed necessary by the Contracting Officer or requested by the District, an inspection of any transferred works and of the District's books and records may be made to ascertain whether the requirements of this contract are being satisfactorily performed by the District or to assist the District in solving specific problems. Any special inspection or audit proposed by the Contracting Officer shall,

Application No 69623
Permit No.

except in case of emergency, be made only after a written notice to the District. The actual cost thereof shall be paid by the District to the United States in the manner provided in subarticle 12(h) hereof.

Operation and Maintenance of Reserved Works

14. (a) During the term of this contract, the United States shall care for, operate and maintain the project reserved works: Provided, That the care, operation and maintenance of the reserved works may be transferred to an operating organization acceptable to the District and other entities receiving water from the project.

(b) The District shall pay 21% of the total annual cost incurred in such operation and maintenance by the United States including operation and maintenance costs incurred for fish mitigation facilities. On or before September 1 of the year preceding the year for which payment is due, the Contracting Officer shall notify the District of its share of the estimated cost of operating and maintaining the reserved works for the succeeding year and payment shall be made by the District one-half on or before January 1 of the year for which it is due and one-half on or before June 30 of that year. Whenever in the opinion of the Secretary funds advanced will be inadequate to operate and maintain the works being operated by the United States, he may give a supplemental notice stating therein the amount of the District's share and the District shall advance such additional amount on or before the date or dates

Application No. 69623
Permit No.

specified in the supplemental notice. Any credit over and above the actual costs of operation and maintenance by the United States shall be credited to the District on future operation and maintenance charges.

Project Power Supply

15. (a) Power and energy reserved by the Act of September 20, 1966, for operation of the project pumping facilities may be provided from the Bonneville Power Administration System. Additional or alternate power and energy may be provided by purchase arrangements with other entities. The charge for reserved power provided from the Bonneville Power Administration System shall be 1-1/4 mills per kilowatt hour and does not include any transmission charges from points of delivery on the Bonneville Power Administration System to project facilities. The power charge may be adjusted from time to time by the Secretary but not oftener than once every five years, unless otherwise mutually agreed upon. The charge for power provided through purchase arrangements with other entities shall be at the entities' applicable rates.

(b) Payments for the District's power supply and the transmission thereof under this article shall be made each calendar year on the basis of annual estimates by the Secretary. Notice of these annual estimates hereinafter referred to as the power charge notice shall contain the statement of the estimated charge for power to be incurred for

Application No. 69623
Permit No.

the calendar year involved and shall be sent to the District on or before September 1 of the year preceding the year for which payment is due and payment shall be made by the District one-half on or before January 1 of the year for which it is due and one-half on or before June 30 of that year. Whenever in the opinion of the Secretary payments so advanced will be inadequate to pay the actual costs being incurred for the power supply, he may give a supplemental notice stating therein the amount of the additional charges required and the District shall advance such additional amounts on or before the date specified in the supplemental notice. If amounts advanced by the District under this article exceed the District's actual power charges, the surplus shall be credited on the power charges to become due from the District for succeeding years.

Reserve Fund

16. Commencing with the first year of the development period and continuing until such time as all sums of money becoming due hereunder shall have been paid to the United States, the District shall accumulate and maintain a reserve fund which will be available for use in the manner, for the purposes, and in the circumstances hereinafter set forth. Such reserve fund shall consist of annual deposits by the District of not less than fifteen thousand dollars ($15,000) to a special account created by the District for this purpose. Such annual deposits shall

Application No. 69623
Permit No.

continue until the amount in the reserve fund is not less than one hundred thousand dollars ($150,000) ($100,000). With the approval of the Contracting Officer, expenditures may be made from such reserve fund only for meeting major unforeseen extraordinary costs of operation and maintenance, repair, betterment and replacement of project works, and for operation and maintenance during periods of special stress such as may be caused by drought, hurricane, storms or other like emergencies. Whenever said reserve fund is reduced below one hundred thousand dollars ($150,000) ($100,000) by expenditures therefrom, it shall be restored by the accumulation of annual deposits of fifteen thousand dollars ($15,000) commencing with the next year following that in which the fund is reduced below said amount. During any periods in which any of the project works are operated and maintained by the United States, such fund shall be available for like use by the United States. At the option of the District, the reserve fund may be invested to the extent permitted by law: Provided, That such reserve fund may be available within a reasonable time to meet the expenses for the purpose for which it was accumulated: Provided, That on mutual agreement said fund and the annual installments may be adjusted to reflect the addition, deletion, or changes in project facilities and operation and maintenance costs not contemplated when this contract was executed.

Application No. 69623
Permit No.

Art. 16 cont.

District to Employ Manager

17. Until the construction charge obligation under this contract has been paid in full, the District shall employ as manager or superintendent a competent irrigation engineer or other person who has had at least three years of experience as a manager or superintendent in the operation of works similar to the project works, the employment to be subject to the approval of the Secretary. Upon notice by the Secretary that any manager or superintendent employed by the District is unsatisfactory in that capacity, the District will promptly terminate the employment of such person and employ a satisfactory manager or superintendent.

ASSESSMENTS AND PENALTIES

Levies and Assessments by the District--General Obligation--Benefits Conditioned upon Payment

18. (a) The District will cause to be levied and collected all necessary assessments, tolls and other charges and will use all of its authority and resources to meet its obligations under this contract. The obligation of the District to pay to the United States the charges becoming due as provided herein is a general obligation of the District notwithstanding the manner in which the obligation may be distributed among the District's water users and notwithstanding the default of

Application No. 69623
Permit No.

individual water users of assessments, tolls or other charges levied by the District.

(b) The payment of charges becoming due hereunder is a condition precedent to receiving benefits under this contract.

(c) The District directors may assess the irrigable acreage on the basis of any variable rate established pursuant to assessment procedures authorized by law to reflect the consideration of type of service and actual benefits provided so long as sufficient amounts are collected annually to meet the annual construction and operation and maintenance charges.

(d) The District in establishing and collecting per-acre charges shall levy a minimum annual operation and maintenance charge against each irrigable acre within the District designated for project service and the payment of such minimum charge shall be required whether or not water is used. Payment shall be in advance of the delivery of water. The amount of water in acre-feet per acre which is to be delivered each year on payment of the minimum annual charge shall be one acre-foot. For water to be delivered each year in excess of that delivered for the minimum charge, the landowners or water users involved shall pay to the District an additional water charge as follows:

(1) For the first one-half acre-foot per acre at a rate per acre-foot equal to 100% of the rate

Application No. 69623
Permit No.

per acre-foot charged for water made available under the annual minimum charge.

(2) For the second one-half acre-foot per acre at a rate per acre-foot equal to 120% of the rate per acre-foot charged for water made available under the annual minimum charge.

(3) For each acre-foot or fraction thereof per acre in excess of two acre-feet per acre at a rate per acre-foot equal to 200% of the rate per acre-foot charged for water made available under the annual minimum charge.

(e) To carry out the provisions of this article, the District shall measure the water delivered to each turnout and keep individual turnout delivery water records. The metering devices shall be accessible for inspection at all reasonable times by the Contracting Officer.

Penalty for Delinquent Payments

19. The District shall pay a penalty on installments or charges which become delinquent computed at the rate of one-half of one percent per month of the amount of such delinquent installments or charges for each day from such delinquency until paid: Provided, That no penalty shall be charged to the District unless such delinquency continues for at least 30 days.

Application No. 69623
Permit No.

Refusal to Deliver Water in Case of Default

20. (a) No water from the project water supply shall be delivered to or for the District if the District is in arrears in the advance operation and maintenance charges due to the United States, if any, or more than 12 months in arrears in the payment of construction charge obligation installments, or more than 12 months in arrears in the payment of any other amounts owing to the United States under this contract. The District shall refuse to deliver water to lands or parties who are in arrears in the advance payment of operation and maintenance charges due from such lands or parties to the United States or to the District, or to lands or parties who are in arrears more than 12 months in the payment of amounts due from such lands or parties to the United States or to the District for construction charge obligations or any other amounts owed by the District to the United States under this contract. The provisions of this article are not exclusive and shall not in any manner prevent the United States from exercising any other remedy given by this contract or by law to enforce the collection of any payments due under the terms of this contract.

(b) The United States reserves the right and power, without notice to the District, to enter on the project works or any part thereof in possession of the District, to shut off water being delivered in violation of the provisions of this article or article 18. In the event the

Application No. 69623
Permit No.

United States exercises this right and power, neither the United States nor its officers or employees shall be liable for any damages resulting directly or indirectly therefrom; and the District shall hold the United States, its officers, and employees harmless from any and all such claims of damage.

PROJECT WATER SUPPLY

Project Diversions

21. (a) Subject to the provisions of this contract, the District shall have the right to divert from water available under the United States' rights for natural flow, storage and return flow up to 37,000 acre-feet of water annually for beneficial use on 17,000 acres of project land.

(b) Prior to April 1 of each year, the Secretary shall notify the District in writing of the estimated quantity of water which will be available for diversion to the District during the current year. The District shall divert the water it is entitled to receive under this contract in accordance with schedules developed by the District and the United States.

(c) The District shall receive water at the outlet works of Scoggins Dam and Reservoir and shall be wholly responsible for taking that water at that point and diverting, conveying, and utilizing it. The

Application No. 69623
Permit No.

District will bear all losses chargeable to such water between the outlet works and the District's place or places of diversion.

(d) The project water supply furnished from Scoggins Dam and Reservoir directly into the irrigation works shall be measured by the United States at the outlet works of said reservoir, with equipment installed and maintained by the United States. The project water supply furnished from the Tualatin River and its tributaries shall be measured by the District at points of diversion agreed to by the United States, and the metering devices shall be accessible for inspection at all reasonable times by the Contracting Officer.

(e) In any year in which a water shortage occurs the Secretary shall apportion the available water supply among the District and others entitled under then existing contracts to receive water from the project. The quantity of water to be furnished to the District and the quantity of water furnished to other entities for water quality control, shall first be reduced as necessary but not by greater than 15%. Any further reduction in the project water supply shall be shared among the District and all other entities receiving a water supply from the project in the proportion that the District's water entitlement under this contract bears to the total quantity of project water under contract.

Application No. 69623
Permit No.

United States Not Liable for Water Shortage or Interruptions

22. No Liability shall accrue against the United States or any of its officers, agents, or employees for damage, direct or indirect, arising by reason of shortages in the quantity of water available through the irrigation system or interruptions in water deliveries to lands in the District resulting from drought, inaccuracy in distribution, hostile diversion, prior or superior claims, accident to or failure of facilities of the irrigation or storage system, whether or not attributable to negligence of officers, agents, or employees of the United States, or other causes of whatsoever kind. Nor shall the District's obligations to the United States under this contract be reduced by reason of such shortages or interruptions.

Protection of the Project Water Supply

23. (a) In case a dispute arises as to the character, extent, priority or validity of the right of the United States or the District to use the water supply claimed for the project, the District shall promptly bring and diligently prosecute judicial proceedings for the determination of such dispute and shall take all other measures necessary toward the defense and protection of the water supply, either independently or in cooperation with the United States, where the

Application No. 69623
Permit No.

Secretary, in his discretion, determines that such proceedings or other measures are desirable. Nothing in this article, however, shall be construed as precluding the United States, independently or in cooperation with the District, from taking such action as the Secretary deems necessary to protect the water supply.

(b) Neither the United States nor the District abandons or relinquishes any of the waste, seepage, or return flow waters attributable to the irrigation of land to which water is supplied under this contract. All such waters are reserved and intended to be retained for use and benefit of the United States and the District as a source of water supply for the project. To the extent that any such suitable waste, seepage, or return flow waters from any part of the project shall at any time become available at points where they can be used on lands within the District, the District or the United States shall supply such water as a part of the supply to which the lands in the District are entitled, first in substitution for natural flow water of the District, which natural flow water is then being used on other project lands or being stored, and thereafter as an additional supply of water for lands in the District.

Application No. 69623
Permit No.

Quality of Water

24. The operation and maintenance of project facilities and the design and construction of new project facilities for the provision of water under this contract shall be performed in such a manner as is practicable to maintain the quality of raw water to be furnished hereunder at the highest level reasonably attainable as determined by the Contracting Officer. The United States is under no obligation to construct or furnish water treatment facilities to maintain or better the quality of water except to the extent such facilities are expressly referred to elsewhere in this contract as a part of the project facilities to be constructed by the United States pursuant to Reclamation law or as otherwise required by law. Further, the United States does not warrant the quality of water to be furnished pursuant to this contract.

Water Pollution Control

25. The District shall, within its legal authority, comply fully with all applicable Federal laws, orders, and regulations, and the laws of the State of Oregon, all as administered by appropriate authorities, concerning the pollution of streams, reservoirs, groundwater, or water courses with respect to thermal pollution or the discharge of refuse, garbage, sewage effluent, industrial waste, oil, mine tailings, mineral salts, or other pollutants. Any contract the District may enter into

Application No. 69623
Permit No.

with a third party for the furnishing of project water shall contain a similar water pollution control article. Nothing herein shall be construed as imposing any duty, responsibility, or liability upon the District for the pollution, or the correction thereof, of streams, reservoirs, groundwater, or water courses by third parties, including water users, over which the District has no control.

GENERAL PROVISIONS

Excess Lands

26. As used herein the term "excess land" means that part of the irrigable land within the District in excess of 160 acres held in the beneficial ownership of any single person; or in excess of 320 acres held in the beneficial ownership of husband and wife jointly, as tenants in common or by the entirety, or as community property. The term "large landowner" means an owner of excess lands as herein defined; the term "nonexcess land" means all land within the District which is not excess land as defined herein. Until one-half of the construction charges allocated against any excess lands not covered by a valid recordable contract have been fully paid, no sale of any such lands shall carry the right to receive water hereunder, unless and until the purchase price involved in such sale is approved by the Secretary and upon proof of fraudulent representation as to the true consideration involved in

Application No. 69623
Permit No.

such sales, the Secretary may instruct the District by written notice to refuse to deliver any water subject to this contract to the lands involved in such fraudulent sales and the District shall thereafter take such steps as may be necessary to insure that said water is not delivered to such lands.

Lands Not to Receive Water until Owners Thereof Execute Certain Contracts

27. (a) Except as permitted by the Act of July 11, 1956 (70 Stat. 524) or the Act of September 2, 1960 (74 Stat. 732), no water shall be delivered to any excess lands as defined in article 26 hereof unless the owners thereof shall have executed valid recordable contracts in form satisfactory to the Secretary, agreeing to the provisions of this article and articles 26 and 28 hereof, agreeing to the appraisal provided for in article 28 hereof and that such appraisal shall be made on the basis of the actual bona fide value of such lands at the date of the appraisal without reference to the construction of the project, and agreeing to the sale of such lands under terms and conditions satisfactory to the Secretary and at prices not to exceed those fixed, all as hereinafter provided.

(b) Each large landowner as a condition precedent to the right to receive water delivered hereunder for any of his excess lands shall, within 10 years following the availability of water to the District under this contract, and before any water is delivered by the District to his

Application No. 69623
Permit No.

excess land, execute a valid recordable contract in form satisfactory to the Secretary: Provided, That no excess land may be made eligible to receive water hereunder by the execution of a recordable contract unless such excess land was, on the date of initial availability of water, held in the ownership of the large landowner executing such recordable contract. In such recordable contract the large landowner shall agree to the provisions contained in this article and in articles 26 and 28 hereof and agree to dispose of his excess lands in accordance therewith to persons who can take title thereto as nonexcess land as herein provided and at a price not to exceed the approved, appraised value of such excess land within the period of 10 years after the said initial availability of water, and shall agree further that if said land is not so disposed of within said period of 10 years the Secretary shall have the power to dispose of said land subject to the same conditions on behalf of such large landowner; and the District agrees that it will take all necessary steps to insure that water is not delivered to any large landowner other than for his nonexcess lands until such owner meets the conditions precedent herein stated.

(c) Each large landowner as a condition precedent to the right to receive water delivered by the District for any of his lands shall, within 30 days after the date of notice from the United States through the District requesting such large landowner to designate his lands

Application No. 69623
Permit No.

within the area served by said District which he desires to designate as nonexcess lands, file in the office of the District, in duplicate, one copy thereof to be furnished by the District to the Secretary, his written designation and description of lands so selected to be nonexcess lands; and upon failure to do so the District shall be required to make such designation and mail a notice thereof to such large landowner, and in the event said District fails to act within such period of time as the Secretary considers reasonable, such designation will be made by the Secretary who will mail a notice thereof to the District and to the large landowner. The large landowner shall become bound by any such action on the part of the District or the Secretary, and the District will take all necessary steps to insure that water is delivered to lands eligible as nonexcess lands only when so designated as nonexcess. A large landowner may with the consent of the Secretary designate land other than that previously designated as nonexcess land: Provided, That such redesignation may be made only by a large landowner who had theretofore executed a recordable contract under the terms hereof, only with respect to land covered by such recordable contract, and only to the extent that an equal acreage of the irrigable land initially designated as nonexcess and owned by such large landowner shall, upon such new designation, become excess land subject to the provisions of such recordable contract in the same manner as if such land had been included therein.

Application No. 69623
Permit No.

Valuation and Sale of Excess Lands

28. (a) The value of the excess lands within the area served by the District held in the ownership of large landowners shall be appraised in a manner to be prescribed by the Secretary. At the option of the large landowner, the value of such land may be appraised, subject to the approval thereof by the Secretary, by three appraisers. One of said appraisers shall be designated by the Secretary and one shall be designated by the District and the two appraisers so appointed shall name the third. If the appraisers so designated by the Secretary and the District are unable to agree upon the appointment of the third, the Presiding Judge of the United States District Court for the State of Oregon shall be requested to name the third appraiser.

(b) The following principles shall govern the appraisal:

(1) No value shall be given such lands on account of the existing or prospective possibility of securing water from the project.

(2) In any such appraisal appropriate consideration shall be given to land value indexes for comparable lands as published by an authorized agency of the United States.

(3) The value of improvements on the land at the time of said appraisal shall be included therein,

Application No. 69623
Permit No.

but shall also be set forth separately in such appraisal.

(c) The excess land of any large landowner shall be reappraised at the instance of the United States or at the request of said landowner. The cost of the first appraisal and each subsequent appraisal requested by the United States shall be paid by the United States.

(d) Any improvements made or placed on the appraised land after the appraisal hereinabove provided for prior to sale of the land by a large landowner may be appraised in like manner.

(e) Future sales of excess irrigable lands of large landowners within the area served by the District shall not carry the right to receive water hereunder for such land and the District agrees to refuse to deliver water to land so sold until, in addition to compliance with the other provisions hereof, a verified statement showing the sale price upon any such sale shall have been filed with the District.

(f) The District shall take all reasonable steps requested by the Secretary to ascertain the occurrence and conditions of all sales of irrigable lands of large landowners in the area served by the District and to inform the Secretary concerning the same.

(g) A true copy of this contract and of each appraisal made pursuant thereto shall be maintained on file in the office of the District and like copies in the office of the Secretary, and shall be made available

Application No. 69623
Permit No.

for examination during the usual office hours by all persons who may be interested therein.

Production Limitation on Newly Irrigated Lands

29. For a period of 10 years from September 20, 1966, no water from the project or irrigation works shall be delivered to any water user for the production on newly irrigated lands of any basic agricultural commodity, as defined in the Agricultural Act of 1949 (63 Stat. 1051) or any amendment thereof, if the total supply of such commodity for the marketing year in which the bulk of the crop would normally be marketed is in excess of the normal supply as defined in section 301(b)(10) of the Agricultural Adjustment Act of 1938 (52 Stat. 41) as amended, unless the Secretary of Agriculture calls for an increase in production of such commodity in the interest of national security.

Title to Project Works

30. Title to project works built or to be built by the United States shall remain in the United States until otherwise provided by the Congress.

Books, Records and Reports

31. The District shall establish and maintain accounts and other books and records pertaining to its financial transactions, land use and crop census, water supply, water use, changes to project works, and to other matters as the Contracting Officer may require. Annual reports

Application No. 69623
Permit No.

thereon shall be furnished to the Contracting Officer on or before December 31 in such form as he may require. Subject to applicable Federal laws and regulations, each party shall have the right during office hours to examine and make copies of each other's books and official records relating to matters covered by this contract.

Performance of Work with Contributed Funds

32. (a) Pursuant to the Act of March 4, 1921 (41 Stat. 1367, 1404), the United States, at its option, may perform with funds contributed by the District any construction or maintenance work within the authority of the District, but which is not otherwise provided for by this contract. If the United States determines that it will undertake any such work, funds therefor shall be advanced by the District as directed by the Secretary. The advance shall be accompanied by a certified copy of a resolution of the District's board of directors describing the work to be done and authorizing its performance by the United States with the District's funds.

(b) After completion of any work so undertaken, the United States shall furnish the District with an itemized statement of the cost of the work done. Any unexpended balance of the funds advanced will be refunded to the District or applied as otherwise directed by the District.

Application No. 69623
Permit No.

Rules, Regulations, and Determinations

33. (a) The Secretary reserves the right to make, after an opportunity has been offered to the District for consultation, rules and regulations consistent with the provisions of this contract, the laws of the United States and the State of Oregon, to add to or to modify them as may be deemed proper and necessary to carry out this contract, and to supply necessary details of its administration which are not covered by express provisions of this contract. The District agrees to observe such rules and regulations.

(b) Where the terms of this contract provide for action to be based upon the opinion or determination of either party to this contract, whether or not stated to be conclusive, said terms shall not be construed as permitting such action to be predicated upon arbitrary, capricious, or unreasonable opinions or determinations. The Secretary's decision on all questions of fact arising under this contract shall be made only after consultation with the District and shall be conclusive upon the parties thereto.

Confirmation of Contract

34. The execution of this contract shall be authorized or ratified by the qualified electors of the District at an election held for that purpose. The District, after the election and upon the execution of this contract, shall promptly secure a final decree of the proper court of the

Application No. 69623
Permit No.

State of Oregon approving and confirming the contract and decreeing and adjudging it and the apportionment of the benefits made thereunder to be lawful, valid, and binding on the District. The District shall furnish to the United States certified copies of such decrees and of all pertinent supporting records.

Changes in District Organization

35. While this contract is in effect, no change shall be made in the District, by inclusion or exclusion of lands, by dissolution, consolidation, or merger or otherwise, which would affect the obligation of the District to the United States hereunder except upon the Contracting Officer's written consent thereto.

Notices

36. (a) Any notice, demand or request authorized or required by this contract shall be determined to have been given when mailed, postage prepaid, or delivered to the Regional Director, Region 1, Bureau of Reclamation, Boise, Idaho, on behalf of the United States and to the Secretary of the Tualatin Valley Irrigation District, Hillsboro, Oregon, on behalf of the District.

(b) The designation of the addressee or the address given above may be changed at any time by similar notice.

Application No. 69623
Permit No.

Equal Opportunity

37. During the performance of this contract, the District agrees as follows:

(1) The District will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The District will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The District agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the Contracting Officer setting forth the provisions of this Equal Opportunity clause.

(2) The District will, in all solicitations or advertisements for employees placed by or on behalf of the District, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

Application No. 69623
Permit No.

(3) The District will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the Contracting Officer, advising the labor union or workers' representative of the District's commitments under this Equal Opportunity clause, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The District will comply with all provisions of Executive Order No. 11246 of September 24, 1965, as amended, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The District will furnish all information and reports required by Executive Order No. 11246 and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the Contracting Officer and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the District's noncompliance with the Equal Opportunity clause of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended, in whole or in part, and

the District may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order No. 11246, and such other sanctions may be imposed and remedies invoked as provided in said Executive Order, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(7) The District will include the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order No. 11246, so that such provisions will be binding upon each subcontractor or vendor. The District will take such action with respect to any subcontract or purchase order as the Contracting Officer may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, That in the event the District becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the Contracting Officer, the District may request the United States to enter into such litigation to protect the interests of the United States.

Application No. 69623
Permit No.

Art. 37 cont.

Title VI, Civil Rights Act of 1964

38. (a) The District agrees that it will comply with Title VI of the Civil Rights Act of July 2, 1964 (78 Stat. 241) and all requirements imposed by or pursuant to the Department of the Interior Regulation (43 CFR 17) issued pursuant to that title, to the end that, in accordance with Title VI of that Act and the Regulation, no person in the United States shall, on the ground of race, color, or national origin be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity for which the District receives financial assistance from the United States and hereby gives assurance that it will immediately take any measures to effectuate this agreement.

(b) If any real property or structure thereon is provided or improved with the aid of Federal financial assistance extended to the District by the United States, this assurance obligates the District, or in the case of any transfer of such property, any transferee for the period during which the real property or structure is used for a purpose involving the provision of similar services or benefits. If any personal property is so provided, this assurance obligates the District for the period during which it retains ownership or possession of the property. In all other cases, this assurance obligates the District for the period during which the Federal financial assistance is extended to it by the United States.

Application No. 69623
Permit No.

(c) This assurance is given in consideration of and for the purpose of obtaining any and all Federal grants, loans, contracts, property, discounts, or other Federal financial assistance extended after the date hereof to the District by the United States, including installment payments after such date on account of arrangements for Federal financial assistance which were approved before such date. The District recognizes and agrees that such Federal financial assistance will be extended in reliance on the representations and agreements made in this assurance, and that the United States shall reserve the right to seek judicial enforcement of this assurance. This assurance is binding on the District, its successors, transferees, and assignees.

Certification of Nonsegregated Facilities

39. The District hereby certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. It certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The District agrees that a breach of this certification is a violation of the Equal Opportunity clause in this contract. As used in

Application No. 69623
Permit No.

this certification, the term "segregated facilities" means any waiting rooms, work areas, rest rooms and wash rooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, creed, color, or national origin, because of habit, local custom, or otherwise. The District further agrees that (except where it has obtained identical certifications for proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding ten thousand dollars ($10,000) which are not exempt from the provisions of the Equal Opportunity clause; that it will retain such certifications in its files; and that it will forward the following notice to such proposed subcontractors (except where the proposed subcontractors have submitted identical certifications for specific time periods):

NOTICE TO PROSPECTIVE SUBCONTRACTORS OF REQUIREMENT FOR CERTIFICATIONS OF NONSEGREGATED FACILITIES

A Certification of Nonsegregated Facilities, as required by the May 9, 1967, order (32 F.R. 7439, May 19, 1967) on Elimination of Segregated Facilities, by the Secretary of Labor, must be submitted prior to the award of a subcontract exceeding ten thousand dollars

Application No. 69623
Permit No.

Art. 39 cont.

($10,000) which is not exempt from the provisions of the Equal Opportunity clause. The certification may be submitted either for each subcontract or for all subcontracts during a period (i.e., quarterly, semiannually, or annually).

Note: The penalty for making false statements in offers is prescribed in 18 U.S.C. 1001.

Contingent on Appropriations or Allotment of Funds

40. The expenditure of any money or the performance of any work by the United States hereunder which may require appropriations of money by the Congress or the allotment of funds, shall be contingent upon such appropriations or allotments being made. The failure of the Congress to appropriate funds or the absence of any allotment of funds shall not relieve the District from any obligations then accrued under this contract, nor give the District the right to terminate this contract as to any of its executory features. No liability shall accrue to the United States in case such funds are not appropriated or allotted.

Assignment Limited--Successors and Assigns Obligated

41. The provisions of this contract shall apply to and bind the successors and assigns of the parties hereto, but no assignment or transfer of this contract or any part or interest therein shall be valid until approved by the Secretary.

Application No. 69623
Permit No.

Officials Not to Benefit

42. No Member of or Delegate to Congress or Resident Commissioner shall be admitted to any share or part of this contract or to any benefit that may arise herefrom. This restriction shall not be construed to extend to this contract if made with a corporation or company for its general benefit.

IN WITNESS WHEREOF, the parties hereto have signed their names as of the day and year first above written.

RESOLUTION TO AMEND CONTRACT TO CONFORM
TO THE DISCRETIONARY PROVISIONS OF THE
RECLAMATION REFORM ACT OF 1982

WHEREAS, Title II of Public Law 97-293, known as the Reclamation Reform Act of 1982, was signed into law on October 12, 1982; and

WHEREAS, the discretionary provisions of the Reclamation Reform Act of 1982 are those Sections 203 through 208; and

WHEREAS, the Secretary of the Interior has promulgated final rules and regulations for implementation of the Reclamation Reform Act of 1982; and

WHEREAS, on the 10th day of March, 1987, the Board of Directors of the Tualatin Valley Irrigation District passed a resolution to adopt the discretionary provisions of the Reclamation Reform Act of 1982.

NOW, THEREFORE, BE IT RESOLVED THAT the Tualatin Valley Irrigation District requests that their contract, identified as Contract No. 14-06-100-6956 (as amended and/or supplemented), dated March 10, 1971, be amended to the extent required to conform to the discretionary provisions of the Reclamation Reform Act of 1982.

BE IT FURTHER RESOLVED THAT the Tualatin Valley Irrigation District shall be subject to the discretionary provisions of the Reclamation Reform Act of 1982 from the date the district's request is submitted to the Secretary of the Interior, thereby obligating the district to take, in a timely manner, the action required by applicable State law to amend its contract.

Application No. 69623
Permit No.

IN WITNESS WHEREOF, the Board of Directors of the Tualatin Valley Irrigation District have signed their names this 10th day of March, 1987.

Remarks: Response to item 4. The use to be made of the impounded water is for the purposes of construction, operation and maintenance of the Tualatin Federal Reclamation Project as authorized by the Act of September 20, 1966, 80 Stat. 822. These are irrigation, municipal and industrial supplies, fish and wildlife, water quality, and recreation.

STATE OF OREGON,
County of Marion, } *ss.*

This is to certify that I have examined the foregoing application and do hereby grant the same, subject to the following limitations and conditions: The right herein granted is limited to the construction of Scoggins Reservoir and storage of water from Scoggins Creek to be appropriated under application No. 38447, permit No. 35792, for irrigation, supplemental irrigation, municipal and water quality control, reservoir fish and recreation

The right hereunder shall be limited to the storage of 60,000.0 *acre feet,* of which 6,190.0 acre feet will be in minimum pool for fish and recreation.

The priority date of this permit is February 20, 1963

Actual construction work shall begin on or before May 1, 1973 *and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 19*75.

WITNESS my hand this 1st *day of* May, *19*72

PUBLIC NOTICES . . .

PUBLIC NOTICE OF
ANNEXATION OF LAND
TO THE TUALATIN VALLEY
IRRIGATION DISTRICT

Public notice is hereby given that the Tualatin Valley Irrigation District has received petitions from the below named persons for annexation of certain of their properties, which properties are more particularly described hereinbelow. At the regular meeting of the Board of Directors for the Tualatin Valley Irrigation District, to be held on September 9, 1975, at 7:00 a.m., in Ireland's Tip Top Restaurant, 2032 Pacific Avenue, Forest Grove, Oregon, all persons interested may appear and show cause, if any they have, why the said petitions for annexation should not be granted. The failure of any person interested to show cause shall be taken as an assent on his part to the inclusion of such land in the District as prayed for in the petitions. The following named persons seek annexation of their lands, or a part thereof, to the Tualatin Valley Irrigation District for the purpose of receiving irrigation water service:

Andrew Longbridge, Minor T. Hesse, Virgil Bish, John W. Mulloy, Alan Cady, Alvin N. Luttrell, Jesse W. Snyder, Waldo B. Flint, Alden O. Oleson, Tony Amstad, E. J. Sheppard, Adele Sheppard, Nancy Jo Amstad, Al Amstad;

Francis Baggenstos, Baggenstos Bros., Francis, Baggenstos Bros., Edward C., Baggenstos Bros., John A., John A. Baggenstos, Fred Plieth, James Husericke, H. L. Pattee, Dene Mallroy, Daniel Dennis, Yoshio Hosinke, Edward C. Baggenstos, Theo Wetzel;

Donald Hillecke, Robert Hillecke, Vernon Hillecke, Fred Barby, Eldon R. McRobert, Florence M. Newman, Vincent Dobbin, Norman Mann, R. C. Enschede, Alvin Schulmerich, Lester M. White;

Alphons J. Vanderschuere, Pat Unger, Walter Erdman, Schuemerick Investments, R. M. Simpson, Donald C. Jesse, Donald B. Anderson, Lois V. Anderson, Rosa F. Anderson, Golda M. Saunders, Norman Goetze, Sally Duyck, Gary W. Duyck, Otto H. Moeller, John & Linda Petshow, Richard O. Adamson;

Rolfe M. Simpson, Richard C. Heisler, Mildred Heisler, Martin G. Vandehey, Kenneth Peters, Ron Tankersley, Joseph T. Bernards, Raymond Claeys, Florence D. O'Connell, VyLette D. Putman, F. J. Chalmers, Anna I. Salzwedel;

Donald L. Cawse, Frank A. Pranger, Robert J. Pranger, Alfred Simantel, Albert Vanasche, A. F. Delplanche, Roland Duyck, Charles T. Askew, Edward T. Saunders, Lyle L. Smith, Robert K. Hartrampf, John E. Krise, Walter J. Lepschat;

Lawrence F. Peters, Edwin H. Duyck, John Vanoudenhaegen, Dennis R. Crop, Harold J. Meyer (Susbauer Est.), Melvin J. Finegar, Henry T. Taghon, L. Eberhart, Harold A. Myers, Stanley H. Schmidlkfs, Lorna Clinton, Robert Bridges, Adelbert Evers;

Christine VanderBerg, J. Herb, Stanley H. Schmidelkfs, Kenneth & Roberta Willis, Francis J. Herb, Mabel Vandehey, Dennis J. Herb, Gladys M. Garner, Paul J. Choban, Mona Dee Choban, Robert & Joan Camenzind, Bonita Rae Sahnow, Walter Parkin, Wm. A. Peters.

The above named persons seek annexation of the following described lands to the Tualatin Valley Irrigation District:

The following lands situated within the above described boundaries are excepted from said district and shall form no part thereof and shall not be subject to the taxes thereof nor be entitled to any benefits therefrom,

All incorporated cities, towns, and platted subdivisions available for residence purposes that existed on or before February 26, 1975, are excluded in accordance Irrigation District Laws of Oregon, 1975 Revised Statutes, ORS 545.006 (a)

The following described sections and parts of sections lying within the described boundaries are also excepted:

Washington County

That part of the NW ¼ section 1 township 1S, range 3W, W.M.; laying west of Dairy Creek.

N ½ section 2 township 1S, range 3W, W.M.

That part of the N ½ section 3 township 1S, range 3W, W.M. laying east of the east boundary of Cornelius

That part of the S ½ of sections 34 and 35 township 1N, range 3W W.M. laying south of the Oregon Electric tracks.

That area within the city limits of Gaston that is in the Wapato Improvement District and Tualatin Valley Irrigation District shall be subject to Irrigation District taxes and entitled to receive benefits therefrom, described as follows:

Description of area within
Gaston city limits in TVID boundary

Beginning at the Southeast corner of Donald McLeod D.L.C. No. 49 in section 35, township 1S, range 4W, W.M.

thence South 56 degrees 16' west 215.36 feet more or less

thence South 2 degrees 4' east 350.0 feet more or less to center of Wapato Creek

thence southerly along center of Wapato Creek to intersection with South boundary line of section 35, township 1S, range 4W, W.M.

Thence east along south boundary line of section 35, township 1S, range 4W, W.M. to southeast corner of section 35

thence northwesterly to southeast corner of D. McLeod D.L.C. No. 49 point of beginning.

Revised Tualatin Valley Irrigation District Boundary.

Beginning at the N.E. corner of section 24, township 2S, range 2W, W.M.; thence south along east line of section 24 to intersection with center of Lebeau Road; thence east along center of Lebeau Road to intersection of Sherwood-Scholls Road, Elsner Avenue and Lebeau Road in center of section 19, township 2S, range 1W, W.M.; thence east and north along center of Elsner Avenue to center of Tualatin River in NE ¼ section 19, township 1S, range 1W, W.M.; thence east and north along center of Tualatin River to intersection with north-south quarter section line of section 17, township 2S, range 1W, W.M.; thence north along north-south quarter section line of section 17 to intersection with S.W. Beef Bend Road; thence west along center of Beef Bend Road to in-

to iron pipe; thence south 67 degrees 35' west 1196.02 feet more or less along boundary of Witch Hazel Little Farms Addition to intersection with north section line of section 16, township 1S, range 2W; W.M.; thence west on north section line of section 16, township 1S, range 2W, W.M.; to intersection with Tualatin River; thence south west along Tualatin River to intersection with west line of Russel Holbrook D.L.C. No. 62; thence north 0 degree 42' east 755.4 feet more or less to northwest corner of R. Holbrook D.L.C. No. 62; thence north 67 degrees 50' west 353 feet more or less to east line of Henry Nowland Jr. D.L.C. No. 68; thence southwest along south east line of H. Nowland Jr. D.L.C. No. 68 to southeast corner of D.L.C. No. 68; thence northwest along southwest line of Nowland Jr. D.L.C. No. 68 to intersection with west line of H. Nowland Jr. D.L.C. No. 68; thence north along west line of Nowland D.L.C. No. 68 to northwest corner of D.L.C. 68 and northeast corner of G. Stigler D.L.C. No. 42; thence west along north line of D.L.C. No. 42 and north line extended to intersection with the boundary of City of Hillsboro;

thence south along boundary of City of Hillsboro to the center line of the Tualatin River; thence westerly following the centerline of the Tualatin River upstream, to intersection with the center of Dairy Creek; thence northly following the centerline of Dairy Creek to its intersection with the west section line section 36 township 1N, range 3W, W.M.; thence north along west section line of section 36, township 1N, range 3W, W.M. to N.W. corner of section 36; thence east along north section line of section 36, township 1N, range 3W, W.M. to intersection with center of McKay Creek; thence north along center of McKay Creek to intersection with south right of way line of U.S. Highway No. 26 (Sunset Highway); thence northwest along south right of way line of U.S. Highway 26 (Sunset Highway) to intersection with north line of John Dobbins D.L.C. No. 47; thence west along north line of John Dobbins D.L.C. No. 47 which is also Beach Road to intersection with center of Gordon Road in N.E. quarter of section 11, township 1N, range 3W, W.M.; thence northeast along center of Gordon Road to south property line of George Stevens property in Northeast quarter section 2 township 1N, range 3W, W.M.; as recorded in Vol 834 page 264 Washington County Deed Records; thence northwest along said property line 1242.44 feet more or less to west boundary of Stevens property; thence Northeast along west boundary 1405.14 feet more or less to center of Mountaindale Road; thence northwest along center of Mountaindale Road and northline of John Harrison D.L.C. No. 37 to north west corner of L.L. Glaske property recorded Book 903, page 738 Washington County Deed Records thence southwest along west line of L. L. Glaske property to south right of way line of U. S. Highway 26 (Sunset Highway);

thence northwest along south right of way line of U.S. Highway No. 26 (Sunset Highway) to west line of John L. Northrop D.L.C. No. 44 which is also southwest corner of right of way of U.S. Highway No. 26 and Oregon State Highway No. 6; thence north along west line of John L. Northrop D.L.C. No. 44 and west highway right of way line of south right of way line U.S. Highway No. 26; thence northwesterly along south right of way line of U.S. Highway No. 26 to north line of S.W. quarter (¼) of section 29 township 2N, range 3W, W.M.; thence west to the center of section 30, township 2N, range 3W, W.M.; thence south along north-south quarter line of section 30 township 2N, range 3W, W.M.; to south line of section 30; thence west along south line of section 30, township 2N, range 3W, W.M.; also center of Banks Road to east boundary of City of Banks; thence west and south along boundary of City of Banks to intersection with west section line of section 31, township 2N, range 3W, W.M.; thence south along west section line of section 31, township 2N, range 4W, W.M. to south right of way line of Oregon State Highway No. 6 (Wilson River Highway) extended east to intersection with west section line of section 31; thence west along south right of way line of Highway No. 6 (Wilson River Highway) to west section line of section 35 township 2N, range 4W, W.M.; thence south along west section line of section 35, township 2N, range 4W, W.M.; and section 2, township 1N, range 4W, W.M.; to the ¼ (quarter) corner on section line between sections 2 and 3 township 1N, range 4W, W.M.; thence west along east-west ¼ (quarter) line to west section line of section 3 township 1N, range 4W, W.M.; thence south along west section line of section 3, township 1N, range 4W, W.M.; to southwest corner of said section 3;

thence west along north section line of section 9 township 1N, range 4W, W.M. to intersection with center of Hillside Road; thence south and east along center of Hillside Road to east line of section 9, township 1N, range 4W, W.M.; thence south along section line to southwest corner of section 15 township 1N, range 4W, W.M.; thence east along south section line of section 15 township 1N, range 4W, W.M.; to southeast corner of said section 15; thence south along west section line of section 23 township 1N range 4W, W.M. to intersection with North line of M. H. Watts D.L.C. No. 48; thence east along north line of D.L.C. 48 to Northeast corner of D.L.C. 48; thence south along east line of D.L.C. 48 extended south to intersection with center of Oregon State Highway No. 8 (Gales Creek Highway); thence north west along center of Oregon State Highway No. 8 (Gales Creek Highway) to intersection with east line of Samuel Sheperd D.L.C. No. 62; thence north along east line of S. Shepard D.L.C. No. 62 2300 feet more or less to southwest corner of Paul Choban property (section 16, township 1N, range 4W, W.M.) recorded in Vol. 860 page 75 Washington County Deed Records; thence east along south line of Paul Choban property 1677.0 feet more or less to southeast corner of Choban property; thence north along east line of Paul Choban property 1339 feet more or less to northeast corner of Choban property; thence west along north line of Choban property 1677.0 feet more or less to intersection with east line of S. Shepard D.L.C. No. 62; thence north along east line of D.L.C. No. 62 to Northeast corner of said D.L.C. which is also northeast corner of Choban property;

thence south 70 degrees 25' west 298.7 feet more or less along north line of Choban property; thence south 456.7 feet more or less along property line of

property 35.83 chains to center of Tualatin River. Recorded in Vo. 430 page 180 Washington County Deed Records; thence northeast along center of Tualatin River to north-south quarter section line of section 33, township 1S, range 4W, W.M.; thence south along north-south quarter section line section 33 to south line of section 33 township 1S, range 4W, W.M. county line between Washington and Yamhill County; thence east along south line of sections 33, 34 and 35 township 1S, range 4W, W.M. (county Line) to west city limits of Gaston, Oregon; thence north along west city limits of Gaston, Oregon to north bank of Tualatin River;

thence easterly along north bank of Tualatin River to intersection with east line of Donald McLeod D.L.C. No. 49; thence southeasterly along east line of D.L.C. No. 49 to the southeast corner of D. McLeod D.L.C. No. 49; thence south 56 degrees 16' west 215.3 feet more or less; thence south 2 degrees 4' east 350 feet more or less to center of Wapato Creek; thence southerly along center of Wapato Creek to point on southeast line of David Bridge farmer D.L.C. No. 56; thence southwest along southeasterly boundary of David Bridge farmer D.L.C. No. 56 to the intersection of the southeasterly boundary of D.L.C. No. 56 with the north-south quarter section line of section 2 township 2S, range 4W, W.M.; thence south 54 degrees 35' east 993.30 feet more or less to a point in center of county road No. 269 which is also angle point of land described in Vol. 185 page 185 of Yamhill County Deed Records; thence south 77 degrees east 599.2 feet more or less to intersection with center line of county roads 268 and 269; thence north 60 degrees 25' east 1067 feet more or less along center line of county road No. 269 to southeast corner of land described in Vol 185 page 185 Yamhill County Deed Records; thence south 1575 feet more or less on west line described in Vol. 131 page 358 of Yamhill County Deed Records, to southwest corner of land; thence south 89 degrees 9' east 330.7 feet more or less to north-south section line between sections 11, and 12 township 2s, range 4W, W.M.; thence south 665 feet more or less along section line also east line of Yamhill Heights to southwest corner of Lot. No. 7 of Yamhill Heights;

thence east to the southeast corner of lot 10 Yamhill Heights Subdivision; thence south 150 feet more or less to the southeast corner of land described in vol. 150 page 324 Yamhill County Deed Records; thence east 1030 feet more or less to easterly right of way line of the Southern Pacific Railroad; thence southerly along east right of way of Southern Pacific Railroad line 1088.8 feet more or less; thence north 78 degrees 38' east 100 feet more or less; thence southerly along east right of way of Southern Pacific Railroad 1043 feet more or less to the intersection of east right of way line and the centerline of County Road M.R. 4; thence south 46 degrees 56' east 1185.5 feet more or less along center line of County Road M.R. No. 4 to the southeast corner of land described in Vol 6 page 653; thence south 31 degrees 50' west 2675.4 feet more or less to southwest corner of land described in Vol. 142 page 675 Yamhill County Deed Records; thence south 69 degrees east 640 feet more or less to south line of John Flett D.L.C. No. 41 point is also southeast corner of second parcel of land described in Vol. 142 page 675 Yamhill County Deed Records; thence south 70 degrees 45' east 724.0 feet more or less along south line of John Flett D.L.C. No. 41 to southeast corner of Third Parcel of land described in Vol. 122 page 277 Yamhill County Deed Records; thence north 57 degrees 12' east 4,653.0 feet more or less to the northeast corner of John Flett D.L.C. No. 40;

thence north 58 degrees east 186.8 feet more or less to a point on the west line of William Doughty D.L.C. No. 57 which point is also the southeast corner of land described in Vol 126 page 66 of Yamhill County Deed Records; thence south along the west line of William Doughty D.L.C. No. 57 to the centerline of County Road M.R. 4; thence east along center line of County Road M.R. 4 to intersection with centerline of County Road M.R. 116; thence south 16 degrees 06' east 800 feet more or less along center line of County Road M.R. No. 4 to the southwest corner of land described in Vol. 124 page 470 of Yamhill County Deed Records; thence south 89 degrees 10' east 1188 feet more or less; thence north 0 degrees 15' east 1029 feet more or less; thence east 2,027.5 feet more or less to the east line of the William Doughty D.L.C. No. 57; thence North along east line of the William Doughty D.L.C. No. 57 to the northeast corner of claim No. 57; thence west along the north line of W. Doughty D.L.C. No. 57 to the center line of County Road M. R. No. 116; thence north along the center line of county road M.R. No. 116 to the north line of section 18 township 2S, range 3W, W.M. line also being boundary between Yamhill and Washington County; thence continuing north in the center of Spring Hill Road to its intersection with the center of Hardeback Road in Gaston Acres; thence northerly along the centerline of Hardeback Road to the southwest corner of section 30, township 1S, range 3W, W.M.; thence east ½ mile to north-south quarter section line section 30, township 1S, range 3W, W.M.;

thence north one mile along north-south quarter section line of section 30, to north line of section 30 township 1S, range 3W, W.M.; thence east ½ mile along north line of section 30 to southeast corner section 19 township 1S, range 3W, W.M.; thence North 1 (one) mile along east line of section 19 township 1S, range 3W, W.M. to northeast corner of section 19; thence east 1 (one) mile along south line of section 17 township 1S, range 3W, W.M. to southeast corner of section 17; thence south ½ (one-half) mile along west line of section 21 township 1S, range 3W W.M. to east-west quarter section line of section 21; thence East ½ (one-half) mile along east-west quarter section line to center of section 21 township 1S, range 3W, W.M.; thence south ½ (one-half) mile along north-south quarter section of section 21 to south line of section 21 township 1S, range 3W, W.M.; thence east 3 miles along south section line of sections 21, 22, 23 and 24 to center of Redwig Road (County Road 161); thence north along center of Redwig Road (County Road No. 161) to intersection with center of Simpson Road (County Road No. A-175); thence southeast along center of Simpson Road (County Road No. A-175) to intersection with west right of way line of State Highway No. 219; thence south along west right of way

thence southerly along center of Wapato Creek to intersection with South boundary line of section 35, township 1S, range 4W, W.M.

Thence east along south boundary line of section 35, township 1S, range 4W, W.M. to southeast corner of section 35

thence northwesterly to southeast corner of D. McLeod D.L.C. No. 49 point of beginning.

Revised Tualatin Valley Irrigation District Boundary.

Beginning at the N.E. corner of section 24, township 2S, range 2W, W.M.; thence south along east line of section 24 to intersection with center of Lebeau Road; thence east along center of Lebeau Road to intersection of Sherwood-Scholls Road, Elsner Avenue and Lebeau Road in center of section 19, township 2S, range 1W, W.M.; thence east and north along center of Elsner Avenue to center of Tualatin River in NE ¼ section 19, township 1S, range 1W, W.M.; thence east and north along center of Tualatin River to intersection with north-south quarter section line of section 17, township 2S, range 1W, W.M.; thence north along north-south quarter section line of section 17 to intersection with S.W. Beef Bend Road; thence west along center of Beef Bend Road to intersection of section line between sections 17 and 18 township 2S, range 1W, W.M.; thence north on west section line of sections 17, 8 and 6 township 2S, range 1W, W.M. 1.5 miles more or less to intersection with S.W. Roshak Road (County Road No. 142) and Bull Mountain Road (County Road No. 142½); thence north and west along Bull Mountain Road (County Road No. 142½) to intersection with S.W. Scholls Ferry Road; thence west along center of Scholls Ferry Road till it intersects the east line of D.L.C. No. 40 in S.W. ¼ of section 2 township 2S, range 2W, W.M.; thence North 22 degrees 30' East 1787.0 feet more or less to N.E. corner of D.L.C. No. 40 in S.W. ¼ section 2, township 2S, range 2W, W.M.; thence north 71 degrees 39' west 2597.6 feet more or less along north line of D.L.C. No. 40 to center of county road A-186;

thence South 29 degrees 20' west 1734.7 feet more or less along center of county road A-186 to intersection centers of county road A-186; River Road; and Scholls Ferry Road; thence northwest along center of River Road to North section line of section 4, township 2S, range 2W, W.M.; thence east 328.04 feet more or less to north-south quarter line section 33, township 1S, range 2W, W.M.; thence north along north-south quarter line section 33, township 1S, range 2W, W.M. to intersection with southeast line of Philip Harris D.L.C. No. 53; thence north east (N40 degrees 30'E) along southeast line of DLC No. 53 and center of Tile Flat Road to intersection with center of Farmington Road (State Highway 208) in NE quarter section 33, township 1S, range 2W, W.M.; thence north east along center of Farmington Road (State Highway 208) to east line properly recorded Book 402 page 96 Washington County Deed Records; thence N 2 degrees E 1512.7 feet more or less to east-west dividing line of A. Landess D.L.C. No. 54; thence west along east-west dividing line of A. Landess D.L.C. No. 54 to intersection with center of River Road in S.W. quarter section 28, township 1S, range 2W, W.M.; thence north along center of River Road to north property line of D. L. Watts property recorded in Vol. 185 page 659 Washington county deed records; thence east 2,036.2 feet more or less to east section line section 21, township 1S, range 2W, W.M.; thence south 175 feet more or less to southeast corner of section 21, township 1S, range 2W, W.M.; thence east along south line of section 22, township 1S, range 2W, W.M.; to intersection with center of Jacktown Road;

thence north along center of Jacktown Road to intersection with center of Rosedale Road near center of section 22, township 1S, range 2W, W.M.; thence west along center of Rosedale Road to intersection with center of River Road; thence north along center of River Road to intersection with south line of section 16, township 1S, range 2W, W.M.; thence east along south section line of sections 14, 15 and 16 township 1S, range 2W, W.M.; to intersection with center of S. W. 213th Avenue in S.E. quarter section 14, township 1S, range 2W, W.M.; thence north along center of S.W. 213th Avenue 754.6 feet more or less; thence east 766.1 feet more or less to center of S.W. 209th Avenue; thence north along center of S.W. 209th Avenue to north section line of section 14, township 1S, range 2W, W.M.; thence west along north section line sections 14 and 15 township 1S, range 2W, W.M.; to center S.W. 229 Avenue; thence south along center of S.W. 229th Avenue 280 feet more or less to stone and southeast corner of Witch Hazel Little Farms Addition; thence north 66 degrees 57' 20' west 2250.56 feet more or less along south boundary of Witch Hazel Little Farms Addition to iron pipe; thence south 38 degrees 30' west 521.85 feet more or less along boundary of Witch Hazel Little Farms Addition to iron pipe; thence south 22 degrees 30' east 332.16 feet more or less along boundary of Witch Hazel Little Farms Addition to stone;

thence south 64 degrees 00' west 656.00 feet more or less along boundary of Witch Hazel Little Farms addition to iron pipe; thence north 1 degree 30' west 521.90 feet more or less along boundary of Witch Hazel Little Farms addition to iron pipe; thence north 57 degrees 00' west 762.14 feet more or less along boundary of Witch Hazel Little Farms Addition M. H. Watts D.L.C. No. 48; thence east along north line of D.L.C. 48 to Northeast corner of D.L.C. 48; thence south along east line of D.L.C. 48 extended south to intersection with center of Oregon State Highway No. 8 (Gales Creek Highway); thence north west along center of Oregon State Highway No. 8 (Gales Creek Highway) to intersection with east line of Samuel Sheperd D.L.C. No. 62; thence north along east line of S. Shepard D.L.C. No. 62 2300 feet more or less to southwest corner of Paul Choban property (section 16, township 1N, range 4W, W.M.) recorded in Vol. 860 page 75 Washington County Deed Records; thence east along south line of Paul Choban property 1677.0 feet more or less to southeast corner of Choban property; thence north along east line of Paul Choban property 1339 feet more or less to northeast corner of Choban property; thence west along north line of Choban property 1677.0 feet more or less to intersection with east line of S. Shepard D.L.C. No. 62; thence north along east line of D.L.C. No. 62 to Northeast corner of said D.L.C. which is also northeast corner of Choban property;

thence south 70 degrees 25' west 298.7 feet more or less along north line of Choban property; thence south 456.7 feet more or less along property line of Choban property; thence south 65 degrees 34' west 1298.7 feet more or less to center of Gales Creek Road; thence south along center of Gales Creek Road to intersection with county Road No. 1216; thence southwesterly along center of County Road No. 1216 (south 71 degrees West) 2,310 feet more or less to center of Gales Creek; thence south east along center of Gales Creek to intersection with west line of W. J. Bell D.L.C. No. 57; thence south along west line of W. J. Bell D.L.C. No. 57 to south west corner of D.L.C. No. 57; thence east along south line of W. J. Bell D.L.C. No. 57 to intersection with west line of section 21 township 1N, range 4W, W.M.; thence south along west line of section 21 township 1N, range 4W, W.M.; to southwest corner of section 21; thence east along south line of section 21 township 1N, range 4W W.M.; to intersection with west line of Marvil H. Watts D.L.C. 48; thence south along west line of M. H. Watts D.L.C. 48 to southwest corner of said D.L.C. No. 48; thence east along south line of M. H. Watts D.L.C. 48 to northwest corner of G. H. Fearnside D.L.C. No. 49; thence south 2000 feet more or less along west line of D.L.C. No. 49 to south line of Government Lot No. 2 section 28 township 1N, range 4W, W.M.;

thence north 88 degrees 27' east 1206.5 feet more or less along south line of Government Lot No. 2 to northwest corner of Government Lot 3 section 28 township 1N, range 4W, W.M.; thence south 1300 feet more or less along west line of lot 3 section 28 to southwest corner of said lot 3; thence east 480 feet more or less along south line of lot 3 section 28 to southeast corner of lot 3 and west line of Willis F. & Franque L. Franck property recorded in book 813 page 325 Washington County Deed Records; thence south along east of lot 4 section 28 and west line of David Allen D.L.C. No. 47 to angular corner of D.L.C. No. 47; thence east along south line of D.L.C. No. 47 to west section line of section 34 township 1N, range 4W W.M.; thence south along west section line of section 34, township 1N, range 4W, W.M.; to southwest corner of section 34; thence east along north section line of section 3 township 1S, range 4W W.M. (Willamette Base Line) to Northwest Corner of William Beagle D.L.C. No. 38; thence south along west line of Beagle D.L.C. No. 38 extended to south corner of J.E. Alexander property as recorded Book 297 page 287 Washington County Deed Records; thence east 838 feet more or less along boundary of J. E. Alexander property as recorded Book 297 page 287 Washington County Deed Records to north-south quarter section line of section 3, township 1S, range 4W, W.M.; thence south along north-south quarter section line of sections 3 and 10 township 1S, range 4W, W.M. to south section line of section 10; thence east along south line of sections 10 and 11 township 1S, range 4W, W.M. to intersection with south lineof H. Parsons D.L.C. No. 40; thence south 72 degrees 37' east 625 feet more or less along line of H. Parsons D.L.C. No. 40 to north-south quarter section line section 14 township 1S, range 4W, W.M.;

thence south along north-south quarter section line sections 14 and 23 township 1S, range 4W, W.M. to north line of J. Dickson D.L.C. No. 45; thence east along north line of Dickson D.L.C. No. 45 extended along south line of R. F. Tupper D.L.C. Palmer Torvend, District Manager.

(July 31, Aug. 7, 14, 1975)

NOTICE OF PUBLIC HEARING

The McKay Creek Water Control District Board will meet in regular session on Monday, August 4, 1975. The meeting will convene at 8:00 p.m. in the District office at 257 West Main Hillsboro, Oregon.

James A. Sullivan, Mgr.

(July 29, 31, 1975)

NOTICE OF STREET VACATION

Notice is hereby given that, at the regular meeting of the City Council of Hillsboro, Oregon, to be held on the 2nd day of September, 1975, at the hour of 8:00 p.m. in the Council Chambers in the City Hall of the City of Hillsboro, a petition will be presented praying for the vacation of a portion of N.W. Forest Street located westerly of N.W. Tenth Avenue and more particularly described as follows:

A tract of land forty feet in width the centerline of which is described as follows:

Beginning at a point on the east line of Lot 4, Block 6, Hillsboro Garden Tracts, a subdivision of record in Washington County, Oregon, which bears North 2138.2 feet and West 92.47 feet from the Southeast corner of the H. Davis Donation Land Claim No. 68, and running thence, S 88 degrees 09' 05" E 165.33 feet to a point on the southerly extension of the west line of Northwest Tenth Avenue, as dedicated to the public by deed recorded in Book 473, Page 394, Washington County, Oregon Deed Records.

And at said meeting the petitioner will request the City Council to fix a time and place for hearing upon such petition and objections thereto, if any are filed.

July 31, Aug. 7, 14, 21 and 28, 1975)
