Re: File 63103

Beloved Mr. Estes,

Love.

We have received your letter of October 6, 1986 concerning Permit 46810 for appropriation of water from Current Creek Reservoir. Since its completion we have not been using the reservoir for irrigation. Its sole usages have been for recreation and flood control.

As you are aware, Rancho Rajneesh is now for sale. There is no new owner yet, and there may not be for some time. We have no problem with the permit being cancelled so long as the permit for the reservoir itself is not cancelled and a new owner would not have any problem obtaining a permit for irrigation from the reservoir if that was desired.

Please let us know if there is any further action we should take immediately, and send us an assignment form if that will be effective for use in the future.

His Blessings,

Ma Sujata
Treasurer

PO Box 12-A
Antelope, OR 97001

REFERENCE: File 63103

According to the terms of your Permit 46810 complete application of water was to have been made by October 1, 1985. This permit is for the appropriation of 1020.0 cubic feet per second of water from Currant Creek Reservoir for the purpose of irrigation and supplemental irrigation.

Complete application of water means the application of water to a beneficial use under the permit to the full extent intended. In the case of irrigation, it means beneficial irrigation of all the lands the permittee intends to cover under the terms of the permit. If the water has been used, you should promptly submit notice describing the extent of completion as set forth in the letter accompanying your permit and also in our postal card of October 15, 1985.

ORS 537.260 provides that: "Whenever the time within which any appropriation under a permit should have been perfected has expired and the owner of the permit fails or refuses within three months thereafter to submit to the Water Resources Director proof of completion of the appropriation as required by ORS 537.230 and 537.250, the Water Resources Director may, after 60 days notice by registered mail, order the cancellation of the permit . ."

In accordance with the provisions of ORS 537.260, you are hereby notified that unless proof of beneficial use is received within 60 days from the date of this letter, the permit(s) may be canceled without further notice.

If, for any reason, you are no longer interested in the project described by the permit, we would appreciate it if you would so advise. If the property involved has changed hands and any part of the project has been completed, you should immediately assign the permit to the new owner and advise us of his name and address. An assignment form will be furnished upon request.

Sincerely,

BRUCE A. ESTES, Supervisor
Survey/Certificate Section

REFERENCE: Files Numbered R-63581, 63582, R-63102, and 63103

Your notices of Beginning and Completion of Construction for the project described in your Permit Number R-8452 (Krishnamurti Dam) has been received and our records marked accordingly. Just as soon as we are advised that you have used the water to the fullest extent intended under the terms of your Permit No. 46810, these files will be set up for survey and our usual field inspection made the next time our representative is in the area.

Although you have given the wrong permit number on the attachments for the beginning and completion of construction for the waste water reservoir, I will use that information as satisfying the beginning of construction of your reservoir Permit Number R-8496 and Permit Number 46994. Under the terms of Permit No. R-8496, the reservoir is to be filled by October 1, 1984. You are to have adequate irrigation equipment for the project described in Permit No. 46994 by the same date also. Water is to be used on or before October 1, 1985.

Sincerely,

Thomas E. Shook

July 22, 1982

Beloved Mr. Hughes,

Love.

Thank you for the comments on our application 63103 which we are returning in revised form with this letter.

Since this application is only for use of stored water, Item 4 is amended to state 1,020 acre feet of stored water, as you suggested.

Regarding your question on how Section 23 will be irrigated, it is our intention to irrigate this area by either the gravity pipe described in the application or by pumping the water through the pipe to the sprinkling system.

Your prompt attention to this matter is appreciated.

His blessings,

Robin Reinhart
Secretary

4. The amount of water which the applicant intends to apply to beneficial use is irrigation;
cubic feet per second..... primary: ~~6.85~~ ^{6.62} cfs; supplemental: ~~5.23~~ cfs ¹⁰²⁰ acre feet ^{of stored water only}
(If water is to be used from more than one source, give quantity from each)

5. The use to which the water is to be applied is primary and supplemental irrigation

6.

DESCRIPTION OF WORKS

Include dimensions and type of construction of diversion dam and headgate, length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

The owner intends to rehabilitate a dam constructed under permit R-2269. Plans, specifications, and a topographic map of the reservoir were not available at filing. These documents will be submitted as soon as they are available.

The dam will hold less than 2000 acre-feet. Delivery will be by gravity through Carrant Creek with diversion points as shown on the map. At the diversion points the water will be pumped into sprinkling systems. A gravity pipe is planned for delivery sometime in the future. Delivery to Section 28 will be through a pipe fed by gravity or a pump.

Note: This application covers lands (shown as supplemental) that also are listed in C-25706, C-25707, C-45972, Permit 41912, and Permit 41913.

If for domestic use state number of families to be supplied N/A

7. Construction work will begin on or before March 15, 1982

8. Construction work will be completed on or before June 15, 1982

9. The water will be completely applied to the proposed use on or before October 1, 1983

Application No. 63103

Permit No.

Remarks:..... It is the intent of the owner to construct the dam in time to
..... catch run off for irrigation during the late summer. Prompt
..... review of this application and the application for permit to
..... construct a reservoir would be appreciated.

July 13, 1982

Donald Oakley, Jr., Construction Supervisor
Rajneesh Neo-Sannyas International Commune
PO Box 12A
Antelope, OR 97001

Dear Mr. Oakley:

REFERENCE: Files R-63102 and 63103

Your Applications R-63102 and 63103 describing the proposed use of 1,020 acre-feet and 11.85 cubic feet per second of water from Currant Creek Reservoir for irrigation of 264.7 acres and supplemental irrigation of 209.2 acres; together with the maps, plans and specifications, have been reviewed.

Application 63103, as submitted, will allow only the use of stored water from Currant Creek Reservoir for irrigation and supplemental irrigation. If this is the case, Item 4 should be amended to state 1,020 acre-feet of stored water.

If this is not the case and you do intend to appropriate live flow from Currant Creek to maintain the reservoir and for irrigation, then Currant Creek should be included as a source in Item 1 of Application 63103. Since two of the diversion points are located on Muddy Creek, you may wish to include Muddy Creek as a source also.

On your map and in your application is land to be irrigated in Section 23. Please state in Item 6 of Application 63103 how you intend to irrigate the land in Section 23 from Currant Creek.

The amount of water to be appropriated must be broken down to the amount of water to be appropriated from Currant Creek and the amount of water to be appropriated from Muddy Creek in Item 4 of Application 63103, if you intend to include both creeks as sources in your application.

Application R-63102 is in satisfactory form and will be considered for issuance of a permit when Application 63103 is received in proper form.

Donald Oakley, Jr., Construction Supervisor
Rajneesh Neo-Sannyas International Commune
July 13, 1982

Re: Dr. James Perkins
Communication of Jan. 30, 1982

Dear Sir:

This note is being written in Seattle and I do not have a copy of my letter to 1000 Friends of Oregon at hand, but I believe my statement concerning possible future population on Studdy Ranch was "... their stated goal is a self-contained city of 50,000 ..." This information was in an article which appeared in the Los Angeles Times and was also mentioned in other publications. I do not recall that Mrs. Silverman ever gave any definite figure concerning population at the ranch.

I share Dr. Perkins concern about the water resources in our area, but feel in fairness to everyone concerned the above correction should be made.

Sincerely
Margaret Hill

February 12, 1982

James G. Perkins
11404 Southwest Breyman Court
Portland, OR 97219

Dear Mr. Perkins:

Thank you for informing me about local concerns over continued water availability in Antelope/Clarno area.

No spring flow data have been collected in the area. As a result, no evidence exists to suggest that spring discharge on or around Muddy Ranch is diminishing. Our Department is not currently planning to initiate a program to monitor spring flow in the area.

Similarly, no observation wells have been established in the area to monitor water level changes and none are planned. The nature and interaction of the ground water flow system and area spring discharge is unknown at this time.

As with many streams in the state, the John Day River is currently fully appropriated in the latter part of most irrigation seasons. The effect of full appropriation of the river on regional ground water flow systems is currently unknown, because the nature of the connection, if any, between the river and the flow systems is currently unknown.

In short, we now have no basis to judge whether the water resources of the area are threatened by activities on Muddy Ranch.

While this area, as well as other areas of the state, should be investigated, our current level of staffing allows us to deal with only the most severe problems. For the present, I would ask that you observe closely the water supplies in the area. If decreased spring flows or ground water availability develop, please bring it to my attention and I will try to schedule an investigation. If you are able to measure actual spring flows or ground water levels, that documentation may assist any future work in the area.

Again, thank you for bringing this matter to my attention. I'm sorry the Department cannot give it more immediate attention.

Sincerely,

JAMES E. SEXSON
Director

COPY

Abstract of Permit

This is to certify that I have examined APPLICATION 63103 and do hereby grant the same SUBJECT TO EXISTING RIGHTS INCLUDING THE APPROPRIATE MINIMUM FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

This permit is issued to Rajneesh Neo-Sannyas International Commune of PO Box 12A, Antelope, Oregon 97001, phone 489-3333, for the use of the waters of Currant Creek Reservoir to be constructed under Application R-63102, Permit R-8452, a tributary of John Day River, for the PURPOSE of irrigation and supplemental irrigation; that the PRIORITY OF THE RIGHT dates from December 7, 1981, and is limited to the amount of water which can be applied to beneficial use and shall not exceed 1,020.0 acre-feet stored water only.

The POINTS OF DIVERSION are to be LOCATED: Diversion 1 - 610 feet North and 1,060 feet West from the Southeast Corner of Section 35, being within the SE 1/4 SE 1/4 of Section 35, Township 8 South, Range 18 East, WM; Diversion 2 - 2,440 feet North and 2,380 feet East from the Southwest Corner of Section 28, being within the NE 1/4 SW 1/4 of Section 28, Township 8 South, Range 19 East, WM; Diversion 3 - 2,650 feet North and 740 feet East from the Southwest Corner of Section 22, being within the SW 1/4 NW 1/4 of Section 22, Township 8 South, Range 19 East, WM, all in the County of Wasco.

A description of the PLACE OF USE under the permit, and to which such right is appurtenant, is as follows:

			Primary Irrigation		
Township 8 South	Range 18 East, WM	Section 35	SE 1/4	SE 1/4	7.6 acres
		Section 36	SW 1/4	SW 1/4	16.4 acres

4582

The **AMOUNT OF WATER** used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to a diversion of not to exceed 4.0 acre-feet per acre for each acre irrigated during the irrigation season of each year from reservoir to be constructed under Permit R-8452, and shall conform to such reasonable rotation systems as may be ordered by the proper state officer.

Actual construction work shall begin on or before July 30, 1983 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1984.

Complete application of the water to the proposed use shall be made on or before October 1, 1985.

WITNESS my hand this 30th day of July, 1982.

WATER RESOURCES DIRECTOR

Remarks:

We do not intend to prove up on Permit No. 46810, concerning areas that are in conflict with this application. being the 10.0 acres in the SE 1/4 of SE 1/4 sec 21 and 9.2 acres in the NE 1/4 of NE 1/4 sec 28 listed as primary

Item #1 continued wastewater storage reservoir constructed under permit R 8496 and enlargement of wastewater storage reservoir to be constructed under permit approving application R 67975 6/22 mpd

This permit, when issued, is for the beneficial use of water. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible that the land use you propose may not be allowed if it is not in keeping with the goals and the acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.
