REMARKS

Oregon Water Resources Department
Notice of Exempt Reservoir

For reservoirs built before January 1, 1995, that:
- Store less than 9.2 acre-feet of water, or
- Have a dam less than 10 feet high.

The deadline for submitting a Notice of Exempt Reservoir is January 31, 1997.

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet–43,560 X 9.2.

Rate and Area of Use

cfs–cubic feet per second gpm–gallons per minute

Notice of Exempt Reservoir

107-33

RECEIVED
DEC 31 1996
WATER RESOURCES DEPT.
SALEM, OREGON

Oregon Water Resources Department
Notice of Exempt Reservoir

For reservoirs built before January 1, 1995, that:
- Store less than 9.2 acre-feet of water, or
- Have a dam less than 10 feet high.

The deadline for submitting a Notice of Exempt Reservoir is January 31, 1997.

Landowner: US Timberlands (Last name), _____ (First name), _____ (MI)

Authorized Agent: Haga (Last name), Catherine (First name), M. (MI)

Address: PO Box 10

Klamath Falls (City) OR (State) 97601 (Zip)

Phone: _____ (Home) (541) 884-2240 (Work)

FAX: (541) 882-8872 E-Mail Address: _____

A. County of use: Jackson . **B. River basin** *(see reverse)*: 14 .

C. Legal description of reservoir location:

Township	Range	Section	Quarter/Quarter	Tax Lot #
40S	4E	10	SW/NW	106

D. Name, if any, of reservoir: Copco Road . **E. Reservoir in existence since:** 6 1 1932 (MM DD YY) .

F. Source of water: Spring (Name of river or creek) which flows into no flow - (Name of river or creek) .

G. Maximum height of dam: 8 feet.

H. Quantity of water stored in reservoir at maximum capacity *(see reverse)*: 2 acre-feet.

I. Water stored in reservoir is used for *(see reverse)*: Forest/Range/Wildlife/Fire .

J. Rate and area of use–Refer to chart on the back of this form. For each type of water use listed in Item I., show the quantity of water used and, if applicable, the number of acres on which water is used.

BEFORE YOU SIGN AND SUBMIT THIS APPLICATION . . . HAVE YOU:
- ☐ Answered each question on this form as completely as possible?
- ☐ Attached a legible map showing township, section, range, quarter-quarter & tax lot number?

By my signature below, I swear that all statements made and information provided in this application are true to the best of my knowledge.

18–Mid Coast
19–Columbia
20–Snake

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet–43,560 X 9.2

Rate and Area of Use

cfs–cubic feet per second gpm–gallons per minute

Oregon Water Resources Department
Notice of Exempt Reservoir

RECEIVED
DEC 31 1996
WATER RESOURCES DEPT.
SALEM, OREGON

For reservoirs built before January 1, 1995, that:
- Store less than 9.2 acre-feet of water, or
- Have a dam less than 10 feet high.

The deadline for submitting a Notice of Exempt Reservoir is January 31, 1997.

Landowner: US Timberlands (Last name), _____ (First name), _____ (MI)

Authorized Agent: Haga (Last name), Catherine (First name), M. (MI)

Address: PO Box 10

Klamath Falls (City) OR (State) 97601 (Zip)

Phone: _____ (Home) (541) 884-2240 (Work)

FAX: (541) 882-8872 E-Mail Address: _____

A. County of use: Klamath . **B. River basin** *(see reverse)*: 14 .

C. Legal description of reservoir location:

Township	Range	Section	Quarter/Quarter	Tax Lot #
39S	5E	18	NE/SW	300

D. Name, if any, of reservoir: 100-50 . **E. Reservoir in existence since:** 7 1 1942 (MM DD YY) .

F. Source of water: Borrow Ditch (Name of river or creek) which flows into Johnson Creek (Name of river or creek) .

G. Maximum height of dam: 7 feet.

H. Quantity of water stored in reservoir at maximum capacity *(see reverse)*: 1.5 acre-feet.

I. Water stored in reservoir is used for *(see reverse)*: Forest/Range/Wildlife/Fire .

J. Rate and area of use–Refer to chart on the back of this form. For each type of water use listed in Item I., show the quantity of water used and, if applicable, the number of acres on which water is used.

BEFORE YOU SIGN AND SUBMIT THIS APPLICATION . . . HAVE YOU:
- ☐ Answered each question on this form as completely as possible?
- ☐ Attached a legible map showing township, section, range, quarter-quarter & tax lot number?

By my signature below, I swear that all statements made and information provided in this application are true to the best of my knowledge.

20–Snake

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You must submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet–43,560 X 9.2.

Rate and Area of Use

cfs–cubic feet per second gpm–gallons per minute

18–Mid Coast
19–Columbia
20–Snake

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet–43,560 X 9.2.

Rate and Area of Use

cfs–cubic feet per second gpm–gallons per minute

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet–43,560 X 9.2.

Rate and Area of Use

cfs–cubic feet per second gpm–gallons per minute

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet–43,560 X 9.2.

Rate and Area of Use

cfs–cubic feet per second gpm–gallons per minute

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet–43,560 X 9.2.

Rate and Area of Use

cfs–cubic feet per second gpm–gallons per minute

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet–43,560 X 9.2.

Rate and Area of Use

cfs–cubic feet per second gpm–gallons per minute

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet–43,560 X 9.2.

Rate and Area of Use

cfs–cubic feet per second gpm–gallons per minute

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet–43,560 X 9.2.

Rate and Area of Use

cfs–cubic feet per second gpm–gallons per minute

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet–43,560 X 9.2.

Rate and Area of Use

cfs–cubic feet per second gpm–gallons per minute

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet–43,560 X 9.2.

Rate and Area of Use

cfs–cubic feet per second gpm–gallons per minute

20-Snake

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet–43,560 X 9.2.

Rate and Area of Use

cfs–cubic feet per second gpm–gallons per minute

Dear Anita:

I am enclosing the appropriate forms for accomplishing the intent of HB 2376 that being obtaining exemptions for our forestry ponds. Per your conversation with John Monfore we did not complete the rate of use section as it does not apply to our uses.

Our ponds are for the most part used for wildlife and grazing. Fire fighting will occasionally require water from adjacent ponds. The use is sporadic and unmeasurable.

Ponds were built below seeps, springs, or wet areas beginning as early as 1927 and continuing through the late 1980's. Many old ponds have been reconstructed or cleaned through the years. Some are simply old borrow pits resulting from railroad construction or road construction.

Enclosed with the forms are ownership maps depicting pond locations, plat maps depicting tax lot, legal description, and location down to quarter-quarter of each section.

Please contact me at this office if there are any questions regarding this exemption activity.

Sincerely,

U.S. TIMBERLANDS SERVICES COMPANY, L.L.C.

Cathy Haga
