NOTICE OF COMPLETION OF CONSTRUCTION

I, GEORGE IVOR REES WILLIAMS, the holder of Permit No. G-397
to appropriate the public waters of the state of Oregon, completed the construction of the works described
therein on the 25th day of July, 1956.

Remarks:

If the works have less capacity than described in the permit, or you have definitely abandoned part of the proposed development, you

should so state in order that our records may not be unnecessarily encumbered.

IN WITNESS WHEREOF, I have hereunto set my hand this 25th day of Oct., 1958

G. I. Williams

(Signature of Applicant)

Box 126 Route #1, Walla Walla Wash.

(Address)

Fill out, detach, and mail to the State Engineer, Salem, Oregon, when construction work is completed.

Form C

IMPORTANT—This form is a notice to the State Engineer that permittee is ready to make final proof to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the final proof inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the State Engineer until all of the land described in the permit which it is intended to irrigate under this permit at any time, has actually been irrigated. Fill out, detach and mail to the State Engineer, Salem, Oregon, when all of the water has been applied.

Application No. G-497

NOTICE OF COMPLETE APPLICATION OF WATER TO A BENEFICIAL USE

I, GEORGE IVOR REES WILLIAMS, the holder of Permit No. G-397
to appropriate the public waters of the state of Oregon, completely applied the waters to a beneficial use in
accordance with the terms of said permit, on the 13th day of OCT., 1961.

Remarks: Out of 120 acres, 110 acres have been irrigated.

10 acres are trees and brush which I have been unable to clear as yet. I am willing to forego this 10 acres if I cannot obtain further extension.

IN WITNESS WHEREOF, I have hereunto set my hand this 19th day of Oct., 1961.

COUNTY OF UMATILLA

ORDER APPROVING A CHANGE IN PLACE OF USE,
A CHANGE IN POINT OF DIVERSION,
AND A CHANGE IN POINT OF APPROPRIATION

Pursuant to ORS 537.705 and 540.510 to 540.530, after notice was given and no objections were filed, and finding that no injury to existing water rights would result, this order approves, as conditioned or limited herein, TRANSFER 8303 submitted by

BOB HODNEFIELD
84301 MEHARRY ROAD
MILTON-FREEWATER, OREGON 97862

LEONARD BROWN
83803 YELLOW JACKET ROAD
MILTON-FREEWATER, OREGON 97862

The FIRST right to be modified was confirmed by decree of the Circuit Court of the State of Oregon for UMATILLA County as evidenced by Certificate 1705. The decree is recorded in the Order Record of the Water Resources Director in Volume 3, at Page 321. The date of priority is 1891.

The right allows the use of the SPRING BRANCH OF DUGGER CREEK, a tributary of DUGGER CREEK, for IRRIGATION OF 13.5 ACRES. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed a rate of flow of 0.17 cubic foot per second per acre irrigated from May 1 to September 1 of each year, or its equivalent in case of rotation; the total quantity diverted during each season not to exceed 40.5 acre feet.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2).

Pursuant to ORS 536.075 and OAR 137-004-080 and OAR 690-01-005, you may either petition for judicial review or petition the Director for reconsideration of this order.

The SECOND right to be modified, as evidenced by a PORTION of Certificate 33206, was perfected under Permit G-397 with a date of priority of OCTOBER 17, 1956. The right allows the use of A WELL, within the DUGGER CREEK BASIN, for PRIMARY IRRIGATION OF 23.3 ACRES AND SUPPLEMENTAL IRRIGATION OF 13.5 ACRES. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.46 cubic foot per second, if available at the authorized well; SW $\frac{1}{4}$ NW $\frac{1}{4}$, SECTION 32, T 6 N, R 35 E, W.M.; 1086.3 FEET NORTH AND 706.2 EAST FROM THE W $\frac{1}{4}$ CORNER OF SECTION 32, or its equivalent in case of rotation, measured at the well.

The amount of water used for irrigation, together with the amount secured under any other right existing on the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The THIRD right proposed to be modified, as evidenced by a PORTION of Certificate 65773, was perfected under Permit G-9405, with a date of priority of SEPTEMBER 22, 1980 AND AUGUST 6, 1981. The right allows the use of TWO WELLS, within the DUGGER CREEK BASIN, for PRIMARY IRRIGATION OF 4.5 ACRES AND SUPPLEMENTAL IRRIGATION OF 4.5 ACRES. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.11 cubic foot per second, if available at the authorized wells; NW $\frac{1}{4}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$ NW $\frac{1}{4}$, SECTION 32, T 6 N, R 35 E, W.M.; NORTHERLY WELL - 570 FEET SOUTH AND 1300 FEET EAST; WILLIAMS WELL - 1560 FEET SOUTH AND 700 FEET EAST; BOTH FROM THE NW CORNER OF SECTION 32, or its equivalent in case of rotation, measured at the wells.

The amount of water used for irrigation, together with the amount secured under any other right existing on the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year. The right shall be limited to any deficiency in the available supply of any prior right for the same land and shall not exceed the limitation allowed herein.

The FOURTH right to be modified, is evidenced by a PORTION of Permit 43973, with a date of priority of September 28, 1978.

The right allows the use of water from the LITTLE WALLA WALLA RIVER, tributary to the WALLA WALLA RIVER and the WALLA WALLA RIVER, tributary to the COLUMBIA RIVER, for SUPPLEMENTAL IRRIGATION OF 9.0 ACRES. The amount of water to which this right is entitled is limited to not more than 0.26 CUBIC FOOT PER SECOND, or the equivalent in case of rotation, measured at the point of diversion from the source.

The amount of water used for irrigation shall be limited to 0.0375 of one cubic foot per second per acre, or its equivalent for each acre irrigated provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein, provided further that the right acquired herein together with that under all other rights held by the company to the use of the Little Walla Walla River and the Tum-A-Lum River shall not exceed the capacity of the diversion works at the time of making proof of appropriation, and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The authorized place of use for the above listed rights are described in TABLE A.

In addition, the applicant also proposes to CHANGE THE POINT OF DIVERSION for the 9.0 acres (Tax Lot 401) under primary right Certificate 1705 to:

NE¼ NW¼, SECTION 32, T 6 N, R 35 E, W.M.; 230 FEET SOUTH AND 1360 EAST FROM THE NW CORNER OF SECTION 32.

The applicant also proposes to modify another portion of water right Certificate 33206, for the lands described as follows:

NE¼ NW¼ 23.3 ACRES (PRIMARY IRRIGATION)
NW¼ NW¼ 9.0 ACRES (SUPPLEMENTAL IRRIGATION)
SECTION 32
TOWNSHIP 6 SOUTH, RANGE 35 EAST, W.M.

The applicant is requesting to change the point of appropriation for the above listed lands from the Williams Well located within the SW¼ NW¼, Section 32, T 6 N, R 35 E, W.M., to a point located:

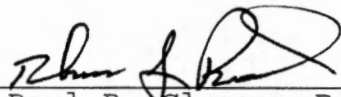

NORTHERLY WELL - NW¼ NW¼, SECTION 32, T 6 N, R 35 E, W.M.;
570 FEET SOUTH AND 1300 EAST FROM THE NW CORNER OF SECTION 32.

THESE CHANGES TO EXISTING WATER RIGHTS MAY BE MADE PROVIDED THE FOLLOWING CONDITIONS ARE MET BY THE WATER USER:

1. The proposed changes shall be completed on or before October 1, 2005.
2. When required by the Department, the water user shall install and maintain a headgate, an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the headgate and measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.
3. Oregon Department of Fish and Wildlife reports that there exists a large diversion dam on Dugger Creek downstream from the applicant's property which blocks salmonids from entering Dugger Creek. Should the above mentioned diversion dam be removed or modified to allow fish passage into Dugger Creek, a fish screen or by-pass device will then be required and approved by ODFW prior to construction.
4. The former places of use shall no longer be irrigated as a part of this water right.
5. Water shall be acquired from the same aquifer as the original point of appropriation.
6. Water shall be acquired from the same surface water source as the original point of diversion.

Certificates 1705, 33206, and 65773 are canceled. New certificates will be issued to confirm those portions of the rights NOT involved in this transfer. The remaining right certificate issued for the lands under Certificate 33206 NOT involved in this transfer rights will also reflect those lands remaining from the partial cancellation per the provisions of an order entered August 18, 1981, recorded in Special Order Volume 35, Page 103. When satisfactory proof of the completed changes are received, new certificates confirming these water rights will be issued.

On August 6, 1981, Herbert H. and Mary Jane Hendricks submitted an affidavit that they are the owners of a certain water right and the lands to which the water right is appurtenant; that they have abandoned any and all interest in and to the said water right and request the same be canceled.

The water right in question is a portion of the right described by the certificate recorded at page 33206, Volume 25, State Record of Water Right Certificates, in the name of George Ivor Rees Williams, and is for the use of not to exceed 0.90 cubic foot per second of water from one well, with a date of priority of October 17, 1956, for irrigation of 10.0 acres in NE 1/4 NW 1/4, 23.0 acres in NW 1/4 NW 1/4 and 39.0 acres in SW 1/4 NW 1/4, Section 32, Township 6 North, Range 35 East, WM.

ORS 540.621 provides that: "Whenever the owner of a perfected and developed water right certifies under oath to the Water Resources Director that the water right has been abandoned by him and that he desires cancellation thereof, the Water Resources Director shall enter an order canceling the water right."

NOW, THEREFORE, it hereby is ORDERED that the said water right, being a portion of the right described by the certificate recorded at page 33206, Volume 25, State Record of Water Right Certificates, is canceled.

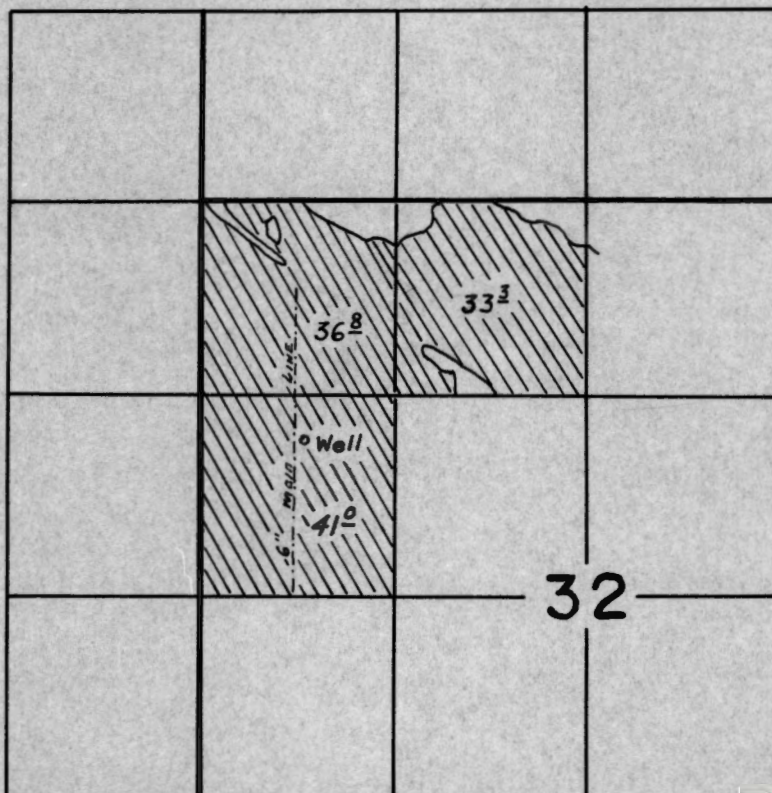

It is FURTHER ORDERED that the said certificate of water right is canceled, and in lieu thereof a new certificate be issued to describe the balance of the water right NOT involved in this proceeding.

Dated at Salem, Oregon, this 18th day of August, 1981.

Dear Mr. Williams:

Enclosed is the final proof in connection with the incomplete water right represented by your permit No. G-397.

The data contained in the proof, which is based on an inspection and survey of your project made by a representative of this department, defines the extent to which your water right has been completed within the terms of your permit. The proof should be dated and signed by you and returned to this office.

Upon receipt of the proof, properly executed and accompanied by the statutory recording fee of \$1, a certificate of water right will be issued confirming the right thereunder and, after being recorded in the county records, will be forwarded to you.

Dear Mr. Bish:

On March 15, 1966, you advised that Mr. Jerry Haines, Water-master District No. 5 at Pendleton, Oregon, was going to contact Mr. Ivor Williams in order to finish the final proof of survey in connection with permit number G-397.

I understand now from Mr. Williams that Mr. Haines has been out to the property, about two weeks ago, and that his report is now transmitted to your office.

Mr. Williams is in the process of attempting to sell the farm and consequently it would be appreciated if there is anything you can do to expedite the granting of the permit. Your attention to this matter will be appreciated.

Dear Mr. Wheeler:

You have written to George Ivor Rees Williams, Route 1, Box 126, Walla Walla, Washington with respect to application No. G-497 and permit No. G-397 enclosing final proof in connection with incomplete water right.

Mr. Williams, on reviewing your letter with enclosures, finds that the final proof of survey covers a total of only 85.4 acres, whereas his original application as confirmed in your letter of January 4, 1965, was for the irrigation of 120 acres.

Mr. Williams advises that he is actually utilizing water from this well on all 120 acres and that apparently Mr. Jackson who made the survey on April 20, 1964, did not talk with Mr. Williams and was unaware of the actual use.

It is requested therefore, before you issue the final water right that you review this matter to the end that a water right can be granted for the entire 120 acres.

I also corresponded with you on January 11, 1966, advising that the property might be sold. I appreciate very much receiving your letter of January 14, 1966, with the necessary

assignment form. Unfortunately, the sale which had been made has fallen through and unless another sale is presented, the water rights should be issued directly to Mr. Williams when finally completed.

Your attention to this matter will be appreciated. It is requested that before any final proof of survey is made that your representative be sure and see Mr. Williams so that he may more accurately determine the exact acreage covered from the well.

Your File No. G-497

We are in the process of preparing documents relating to the sale of certain real property owned by George Ivor Rees Williams, whose address is Route 1, Box 126, Walla Walla, Washington. The property is located in Umatilla County, Oregon, and is described as follows:

The West Half of the Northwest Quarter and the Northeast Quarter of the Northwest Quarter of Section 32, Township 6 North, Range 35, E.W.M.

Excepting portions thereof conveyed to Walla Walla Valley Railway Company, by Deeds recorded in Book 123, pages 308 and 313, and in Book 124, page 177 of the Deed Records of Umatilla County, Oregon, for railroad purposes;

Also excepting right of way for canal 20 feet wide as conveyed to The Milton, Free-water & Hudson Bay Irrigation Company, a corporation, by Deed recorded in Book 124, page 271 of the said Deed Records;

Also excepting right of way for pipe line as conveyed to R. T. Motley and C. W. Thomas, partners as Motley & Thomas, by Agreement, recorded in Book 57, page 379 of the said Deed Records;

Also excepting any and all water rights of way.

Mr. Lewis A. Stanley

January 11, 1966

Mr. Williams brought to me a letter from your office dated October 27, 1961 (copy attached), relating to an application for water under permit No. G-397. Could you please advise us of the status of this water permit and what will be necessary to transfer the permit to the purchaser? The purchaser will be acquiring the property under a contract of sale so that title will not vest in the purchaser until the contract is paid in full. Nevertheless, the purchaser will be taking possession of the property and farming it, and will want to utilize all of the permits and water rights appurtenant.

Your comments and advice will be appreciated.

Dear Mr. Williams:

This will acknowledge your application for an extension of time limits under your permit numbered G-397. The State Engineer can approve an application for extension of time limits only upon a showing that the permittee has been diligently working toward completion of the project. Please show on your application form what progress, if any, you have accomplished during the past year.

Since the purchase and installation of any equipment necessary to the application of water to the land is considered to be construction under the terms of the permit it would appear that your application should be for extension of time should be for completion of construction as well as for application of water to beneficial use.

Before your application can be considered it will be necessary for you to submit payment of the statutory fee in the amount of \$2. Your application form is returned herewith.

Very truly yours,

LEWIS A. STANLEY

Dear Mr. Williams:

The only report we have regarding completion of the project described in your permit No. G-397 was the annual well report which indicated that 95 acres were irrigated during the 1959 season.

You could, of course, make proof to this extent, but if you wish to irrigate the additional land you mentioned, it will be necessary to make application for and obtain an extension of the time limit. I have enclosed the proper application form for your use.

Dear Mr. Williams:

According to the terms of your permit No. G-397, which is for the appropriation of **1.50 cubic foot per second of water from a well,**

complete application of water was to have been made on or before **October 1, 1959.** It appears from our records that you have failed to submit notice of complete application, although a notice calling this matter to your attention was mailed to you on **October 8, 1959.**

Complete application of water means the application of water to beneficial use to the full extent the permittee intends under the terms of the permit. In the case of irrigation, it means beneficial irrigation of all the lands the permittee intends to cover under the terms of the permit.

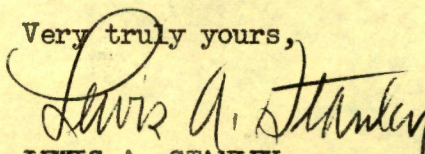

If you have complied with the terms of the permit, you should promptly submit notice describing the extent of completion.

ORS 537.260 provides: Whenever the time within which any appropriation under a permit should have been perfected has expired and the owner of the permit fails or refuses within three months thereafter to submit to the State Engineer proof of completion of appropriation as required by ORS 537.230 and 537.250, the State Engineer, after 60 days' notice by registered mail, order the cancellation of the permit. *****

In accordance with the provisions of ORS 537.260, you are hereby notified that unless proof of beneficial use is received within 60 days from the date of this letter, your permit No. G-397 will be canceled without further notice.

If for any reason you are no longer interested in the project described by the permit, we would appreciate it if you would so advise. If the property involved in the project has changed hands, please give us the name and address of the new owner.

Very truly yours,

LEWIS A. STANLEY

ATTENTION WELL OWNERS

Ground water is one of our most valuable resources, and you, the well owner, have a personal responsibility in helping to preserve these resources so that they will still be available for future generations. Your most important duty in this regard is the keeping of accurate records of changes in water levels, quantities of water pumped, and all other changes in the characteristics of our ground-water resources. It is chiefly through your observations that we know what is happening and are able to prevent depletion or contamination of our ground-water supplies.

The measurement of water levels in wells is the only way we can tell if the ground-water resources of an area are being depleted. For that reason, water level measurements given in your annual reports should be as accurate as possible.

We will be glad to supply you with any information we have in regard to methods of measuring water levels, or in measuring quantities of water pumped. Your cooperation in making the annual well report a document of value will be greatly appreciated.

Dear Mr. Williams:

This will acknowledge receipt of your application for a permit to construct a well and appropriate therefrom 700 gallons of water per minute for the irrigation of 120 acres, the accompanying print of the map of your project, and fees in the amount of \$26.50, for which our receipt No. 8758 is enclosed.

Your application has been examined, given file No. G-497, and the following observations are noted.

Since additional blueprint copies of your map must be made in the processing of your application it is necessary that the map to accompany your application be submitted on a good quality transparent tracing cloth or tracing paper, the tracing from which the enclosed print was made would be adequate.

APPLICATION-Item 4: The location of the proposed well should be listed in direct reference to a government survey corner as shown on the accompanying print and should be further located as being within a specific 40 acre tract of the U. S. Government Survey.

For your convenience in the correction of the above mentioned discrepancies we are returning herewith the application and the accompanying print, the application being endorsed so that in order to retain its date of priority it must be returned to this office on or before December 31, 1956.

Dear Mr. Williams:

To date this office has not received an application for a permit as explained in my letter of March 2, 1956.

The construction of your well as indicated in the drillers report or the use of any water therefrom without first obtaining a State Engineers Permit is in violation of Oregon Law and subject to criminal prosecution.

In the event that you have lost the form previously mailed to you I am enclosing another application together with the Rules and Regulations of the State Engineer in which you will find instructions for filling out the application, specifications for the accompanying map, and a list of the statutory filing fees. I suggest you file this application at your earliest convenience.
