FINDINGS OF FACT

1. On July 27, 2026, Steve DeRuyter and SSD Lands LLC submitted an application to the Department for an emergency-use permit requesting 5.0 cubic feet per second, further limited to 600.0 acre-feet, of groundwater for supplemental irrigation of 400.0 acres from Well 2 (UNIO 52514) for use from July 31, 2026, through October 31, 2026.
2. The required examination and recording fees were paid.
3. The Department has not received adverse comments related to the possible issuance of the attached permit.
4. The Department completed a review of the application in accordance with OAR 690-019-0040.
5. The use is proposed in a designated drought area according to the Governor's July 13, 2026, Executive Order 26-12.
6. Drought conditions have created an inability on the part of the applicant to obtain water under existing Water Right Permits S-35791 and S-50717.
7. The Department considered the factors described in OAR 690-310-0130 and finds that:
 - a. The proposed use requested in this application is allowed in the Powder Basin Program (OAR 690-509-0000(1));

 - c. The proposed use will not injure other water rights; and
 - d. The proposed use complies with other rules of the Commission.
8. The Department has considered the need for water because of the drought emergency and the short-term nature of the proposed emergency use and determined that the use would not impair or be detrimental to the public interest.

CONCLUSION OF LAW

The application will not cause injury to existing water rights and will not impair or be detrimental to the public interest (OAR 690-019-0040(3)).
