Form C (690-9-77)

IMPORTANT—This form is a notice to the Water Resources Director that permittee is ready to make final proof to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the final proof inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the Water Resources Department until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated.

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when all of the water has been applied.

Gentlemen:

REFERENCE: Files G-8222, G-9479 and G-4414

We have completed our usual field inspection for your Water Permits G-7621 and G-8904. In attempting to complete the processing for issuance of the certificates, some problems have surfaced that need to be resolved, as we discussed by phone on June 11, 1985.

According to the report by our field examiner, Well #3 is no longer used to irrigate the lands in Sections 13 and 24, as described under Certificate 52524. He further reports that Well #5 is the only source of water being used for the irrigation of these lands. If this information is correct, you should request a transfer for a change in point of appropriation from Well #3 to Well #5 under Permit G-4160 (Certificate 52524), and thus maintain the May 29, 1968 priority date for those lands. We could then allow supplemental use from Well #5 on these lands to for the additional water being used under Permit G-7621.

It also appears that approximately 70.0 acres of the land described in Certificate 52524 have not been irrigated for some time, and the water right to those acres should be cancelled. Your authorization to cancel this portion of the water right could be included in the transfer request.

The enclosed, partially completed transfer application form, along with the map of our preliminary findings, should be of help to you. The form must be completed in ink or typewritten and signed by an authorized representative of King Farms, notarized and returned along with the required fees and the map. The fees for the transfer request will amount to \$85.00 plus advance publishing costs of \$120.00 for a total of \$205.00. In any change in point of diversion or point of appropriation of over $\frac{1}{4}$ mile, the Director must publish notice of the requested change over a three week period in a newspaper of your choice with general local circulation. Any unused

fees would be returned to you. Please complete items 9 - 12 on the application.

If the transfer request is approved by the Director, we will proceed with the processing of Permits G-7621 and G-8904. If you have any questions on this matter, please contact me.

Sincerely,

Dear Mr. Heimbigner:

REFERENCE: File number G-4408, G-4414, G-8222 and G-9479

We have received three requests to assign your permits along with a check in the amount of \$6.

Certificates of water right recorded at pages 46973 and 47894, State Record of Water Right Certificates have been issued confirming the use of water under permits G-4160 and G-4154 respectively. Perfected rights as evidenced by certificates are appurtenant to the land described in the certificates and the rights travel with the land at time of sale. An assignment is not necessary.

We have your request to assign permit G-8904 to Melvin E. King, Mark W. King and David King of Silverton, Oregon. Along with that request, is another assignment for the same permit as well as permit G-7621, but this request is to King Farms. I am returning the latter documents for clarification. If it is your intent to assign permits G-7621 and G-8904 to King Farms, only the one form should be submitted.

I am also returning the request to assign permits G-4154 and G-4160 since it is not required. Further action will be withheld on your files for a reasonable length of time pending your reply.

Sincerely,

Permit No. G7621

Dear Tom:

The purpose of this letter is to confirm our conversation on September 26, 1979 in which we stated that Mr. Heimbigner desires to use water on lands located in the N $\frac{1}{2}$ of NW $\frac{1}{4}$, Sec. 25; S $\frac{1}{2}$ of SW $\frac{1}{4}$ Sec. 24; Township 1S, Range 22 EWM, rather than the 160 acres located in the Northeast Quarter of Section 25, Township 1S, Range 22, E.W.M. By this letter we are requesting such a change.

In addition, enclosed is a map showing the presently irrigated land and the land to be irrigated.

Thank you for your consideration in this matter.

Permit to appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same, **SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING MINIMUM FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD** and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed ³¹⁹~~839~~ gallons ^{0.71 cubic feet per second}~~per minute~~ ^{cubic feet per second} measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from a well #5 Willow Creek

The use to which this water is to be applied is irrigation of 55 acres

If for irrigation, this appropriation shall be limited to one-eightieth of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3 acre feet per acre for each acre irrigated during the irrigation season of each year;

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is December 3, 1979

Actual construction work shall begin on or before August 25, 1981 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1981

Complete application of the water to the proposed use shall be made on or before October 1, 1982
